Hereinafter referred to as, the “Company”. Such report of examination is herewith respectfully submitted.
SCOPE OF EXAMINATION

This examination covered the period of January 1, 2004, through December 31, 2008. The Company’s was last examined by representatives of the Florida Office of Insurance Regulation (Office) as of December 31, 2003. The Office also conducted a limited scope examination of the Company’s reinsurance program as of June 30, 2008. This examination commenced with planning at the Office on January 4, 2010 to January 7, 2010. The fieldwork commenced on January 11, 2010 and concluded as of May 7, 2010.

This financial examination was an association zone statutory financial examination conducted in accordance with the Financial Condition Examiners Handbook, Accounting Practices and Procedures Manual and annual statement instructions promulgated by the NAIC as adopted by Rules 69O-137.001(4) and 69O-138.001, Florida Administrative Code, with due regard to the statutory requirements of the insurance laws and rules of the State of Florida.

The Financial Condition Examiners Handbook requires that the examination be planned and performed to evaluate the financial condition and identify prospective risks of the Company by obtaining information about the Company including corporate governance, identifying and assessing inherent risks within the Company, and evaluating system controls and procedures used to mitigate those risks. An examination also includes assessing the principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation and management’s compliance with Statutory Accounting Principles and annual statement instructions when applicable to domestic state regulations.
Risk-focused examinations consist of a seven-phase process that can be used to identify and assess risk, assess the adequacy and effectiveness of strategies/controls used to mitigate risk and assist in determining the extent and nature of procedures and testing to be utilized in order to complete the review of that activity. The process should generally include a determination of the quality and reliability of the corporate governance structure and risk management programs. In addition, it can be used for verification of specific portions of the financial statements or other limited-scope reviews, increased focus on and increased substantive testing of, accounts identified as being at high risk of misstatement. Conversely, the risk assessment process should result in decreased focus on and fewer substantive tests on the accounts identified as being at low risk of misstatement. The risk-focused surveillance process can be used to assist examiners in targeting areas of high-risk.

In this examination emphasis was directed to the quality, value and integrity of the statement of assets and the determination of liabilities, as those balances affect the financial solvency of the Company as of December 31, 2008. Transactions subsequent to year-end 2008 were reviewed where relevant and deemed significant to the Company's financial condition.

All accounts and activities of the Company were considered in accordance with the risk-focused examination process.

The examination included a review of the corporate records and other selected records deemed pertinent to the Company’s operations and practices. In addition, the NAIC IRIS ratio reports, the Demotech rating report, the Company’s independent audit reports and certain work papers prepared by the Company’s independent certified public accountant (CPA) and other reports as
