DEFINITIONS ............................................................. 57
The boundary line (46 CFR Part 7) follows the seaward high water shoreline and follows a line across the entrance to small bays, rivers and inlets, except for the following four areas...

- Puget Sound
- Grays Harbor
- Columbia River
- Coos Bay
Puget Sound

A line drawn from the northern most point of Angeles Point, north to the U.S. Canadian Border.

Grays Harbor, WA

A line drawn from Grays Harbor Bar Range Rear Light, (46° 55.0' N, 124° 14.7' W), to Grays Harbor Entrance Lighted Whistle Buoy #3, (46° 55.0' N, 124° 14.7' W); thence to Grays Harbor Entrance Lighted Whistle Buoy #2, (46° 52.8' N, 124° 12.6' W); thence to Grays Harbor Light, (46° 53.2' N, 124° 07.0' W).
Columbia River

A line drawn from lookout tower located approximate position (46° 13.0' N, 124° 00.7' W),
to Columbia River Entrance Lighted Whistle Buoy "2",
(45° 12.9' N, 124° 05.0' W),
thence to Columbia River Entrance Lighted Bell Buoy "1",
(46° 14.5' N, 124° 09.5' W),
thence to North Head Light.

Coos Bay, OR

A line drawn from the seaward extremity of the Coos Bay North Jetty,
to Coos Bay Entrance Lighted Bell Buoy "1",
(43° 21.9' N, 124° 21.7' W),
thence to the seaward extremity of the Coos Bay South Jetty.
GENERAL INFORMATION

This guide summarizes Federal Regulations applicable to U.S. uninspected commercial fishing vessels. This includes **FISHING VESSELS** which are engaged in activities pursuant to the harvesting of fish for commercial purposes; **FISH TENDER** vessels that transport, store, refrigerate, or provide supplies to the commercial fishing industry, and **FISH PROCESSING** vessels which process the fish to a finished product beyond decapitating, gutting and freezing.

You will find the 4100F Boarding Report numbers, when applicable, near the bottom of each page, such as #173 for documentation is found at the bottom of page 1.

APPLICABILITY

Use flowchart to determine applicable regulations and equipment requirements.

BOARDING POLICY
MLE Manual Chap. 3.D.5.b

Special consideration should be given to vessels that have received a CFVS Decal through a Dockside Fishing Vessel Safety Exam. Policy states vessels with CFVS Decal less than 2 years old are considered a low boarding priority target.

WITH a current CFVS Decal:
Spot check of the “Big 8”.

WITHOUT a current CFVS Decal:
Complete check of “Big 8,” and as many other applicable items listed on the CG-4100F form as boarding team personnel are trained to inspect, with due regard for boarding team safety. Boarding personnel should encourage vessel master to schedule a Vessel Dockside Exam.

To continue to provide an incentive for participation in the voluntary dockside exam program, boarding personnel shall acknowledge the importance of the CFVS Decal to vessel masters, specifically noting that boardings will be abbreviated for those vessels which have a CFVS Decal.
Post Boarding Process & Compliance Program

Both Sector Seattle and Sector Portland have a compliance program aimed at increasing the effectiveness of at-sea law enforcement boardings. As a Boarding Officer, it is important to accurately describe to the skipper what the case process will be once you depart the vessel.

Once the CG-4100F is received at the Sector a letter is sent to the owner and/or operator of the vessel providing 30 days to correct the violations and complete a Commercial Fishing Vessel Safety Dockside Exam. All violations identified during the at-sea boarding must be corrected.

If the owner or operator does not respond or declines to correct the violations, then a civil penalty case is forwarded to the Hearing Officer recommending monetary fines. At this point, the owner or operator has been given ample opportunity to correct the violation and did not do so, therefore, the likelihood for a monetary penalty to be assessed is increased.

A benefit to the success of this program is to provide the operator with the phone number to the local Fishing Vessel Safety Coordinator. Emphasize to the operator to correct the violations soon AND to contact the Sector.

FOR MORE INFORMATION CONTACT THE NEAREST SECTOR.
All Vessels

Documentation #173

46 CFR 67

Applies to: all commercial vessels 5 net tons and greater.

Requirements:

A. The original Certificate of Documentation must be maintained on board the vessel. Proper Fisheries endorsement. Not expired.

B. Name of the vessel must be -
   1. on port & starboard bow and the vessel stern
   2. not less than 4 inches in height
   3. marked in clearly legible letters.

C. Hailing port of the vessel must be-
   1. on stern of the vessel
   2. not less than 4 inches in height
   3. marked in clearly legible letters.

D. Official number of the vessel must be -
   1. permanently affixed to some clearly visible structural part of the hull, such as an internal deck beam
   2. not less than 3 inches in height
   3. affixed in clearly legible numbers.

National Documentation Center: 1-800-799-8362
All Vessels

Numbering #159
33 CFR 173

Applies to: All undocumented commercial fishing industry vessels equipped with propulsion machinery.

Requirements:
1. Valid State Certificate of Numbers on board whenever underway.
2. Block numbers on the forward half of the vessel.

Acceptability:
• A valid State certificate of numbers must be on board while the vessel is underway. A temporary or official duplicate is acceptable.

Display of Numbers:
• 3 inch BLOCK - minimum height
• Affixed to forward half of the vessel
• One on each side of the vessel
• Contrasting color to the background
• Permanently affixed
• Read from left to right
• Have a hyphen or a space between prefix, number, and suffix

Tribal Issued State Numbers:
The state of Washington has permitted some local tribes to issue their own vessel registration numbers. These are identified by the last 3 letters of the vessel's registration being a tribal code.

WN 123 MKH

All requirements detailed above apply to tribal vessels. Tribal vessels that are 5 net tons and greater must still be documented by the Coast Guard.

### All Vessels

#### PFD’s/Immersion Suits

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Type Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>All vessels on Coastal Waters or beyond</td>
<td>Immersion or exposure suit.</td>
</tr>
<tr>
<td>Vessels ≥ 40 feet, waters inside coastal</td>
<td>Type I, V, or immersion suit.</td>
</tr>
<tr>
<td>Vessel &lt; 40 feet, waters inside coastal</td>
<td>Type I, II, III, V or immersion suit.</td>
</tr>
</tbody>
</table>

**Acceptability Requirements:**

- Immersion suit approval no. 46 CFR 160.171
- Exposure suit approval found in 46 CFR 160.071.
- **Note:** Older non-approved suits are allowed as long as they are in good and serviceable condition.

**Personal Flotation Device (PFD) lights.** CG approval 46 CFR 161.012, must be on PFD’s or immersion suits on vessels on coastwise voyages. Lights having an expiration date must be unexpired and still serviceable. Off the shelf alkaline batteries must be replaced annually.

**CHECKLIST:**

- At least one device of the proper size per individual.
- Each device stowed to be **readily accessible**.
- CG approved, and in good and serviceable condition.
- Operate zippers, clips, etc.
- PFD Light attached & operational (when required)
- PFD Light battery not expired (#146)
- Marked with vessel name or name of owner or person to whom assigned (Item #145).
- Retro reflective material; 31sq. inches (#145).
- Excess PFD’s should be either maintained and in serviceable condition, marked for “Training Only” or removed from vessel.
### Vessel Length and Required Type

<table>
<thead>
<tr>
<th>VESSEL LENGTH</th>
<th>TYPE REQUIRED</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;16 feet</td>
<td>None</td>
</tr>
<tr>
<td>16 feet to &lt;26 feet</td>
<td>1 cushion or ring life buoy</td>
</tr>
<tr>
<td>26 feet to &lt;65 feet</td>
<td>1 orange ring life buoy, 24 inch in diameter with ≥60 ft of line attached</td>
</tr>
<tr>
<td>65 feet or more</td>
<td>3 orange ring life buoys, 24 inch in diameter with ≥90 ft of line attached to at least one RLB</td>
</tr>
</tbody>
</table>

### Commercial LifeSling

May be substituted for one ring life buoy if:
1. It is the CG Approved model,
2. Vessel has a 10 ft high (above the deck) lifting point, and
3. 150 ft of line attached.

### Acceptability Requirements:

- Cushions used on vessels 16 to 26 ft must be CG approved Type IV PFD.
- Ring life buoys must be CG approved and at least 24 inches on vessels over 26 ft.
- An approved 20 inch or larger ring life buoy installed prior to 15 Sep 91 and in good and serviceable condition, may be used on vessels less than 65 ft in length.

### Checklist:

- Check for proper type and quantity.
- Each device stowed to be immediately available.
- CG approved, and in good and serviceable condition.
- Ring Life Buoys marked with vessel's name, retro reflective tape, and line attached.
- Excess RLBs should be either maintained and in serviceable condition, marked for “Training Only” or removed from vessel.
Survival Craft

46 CFR 28.120

Type Required: See the tables on the following pages for specifics.

Acceptability:

- The required survival craft is on board.
- The craft is good and serviceable, including having been serviced per the table on page 11 of this Job Aid.
- The craft is stowed properly. (See page 8)
- If an inflatable life raft, has the appropriate pack. (See page 8)
- The total number of survival craft must be able to accommodate all individuals on board.
- An auxiliary craft carried on the vessel which is necessary and integral for normal fishing operations may be substituted for survival craft, except an inflatable liferaft, provided it is readily accessible and is capable of carrying all individuals on board.
- An approved lifeboat may be substituted for a survival craft required by section 28.120.

Survival craft installed prior to 15 Sep 91 may continue to be used provided:

- Of the same type required in tables 28.120 (a)-(c), as appropriate for the vessel type. (See the following pages.)
- Maintained in good and serviceable condition.
- Equipped with the proper equipment pack required in tables 28.120 (a)-(c), as appropriate for the vessel type.

CHECKLIST:

- Check applicability for survival craft.
- Check proper type, capacity, equipment pack.
- Inflatable raft/apparatus serviced within 12 months unless brand new 24 months (if expired, see Termination guidance, p. 52).
- Check hydrostatic release for proper installation and expiration date (2 yrs from installation) if expired, see Termination guidance, p. 52.
- Excess survival craft should be either maintained and in serviceable condition, marked for “Training Only” or removed from vessel.
## Survival Craft

**Documented Vessels**

*Note: All areas are cold waters.*

<table>
<thead>
<tr>
<th>Area</th>
<th>Vessel Type</th>
<th>Survival Craft Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-12 miles from coastline</td>
<td>Less than 36 feet in length</td>
<td>Buoyant apparatus. (See Note 2)</td>
</tr>
<tr>
<td>0-12 miles from coastline</td>
<td>36 feet or more in length</td>
<td>Inflatable buoyant apparatus. (See Note 3)</td>
</tr>
<tr>
<td>12 - 20 miles from coastline</td>
<td>All</td>
<td>Inflatable liferaft</td>
</tr>
<tr>
<td>20-50 miles from coastline</td>
<td>All</td>
<td>Inflatable liferaft with SOLAS B pack.</td>
</tr>
<tr>
<td>&gt;50 miles from coastline</td>
<td>All</td>
<td>Inflatable liferaft with SOLAS A pack.</td>
</tr>
</tbody>
</table>

**Note 1:** The hierarchy of survival craft is:
1. Lifeboat
2. Inflatable liferaft with SOLAS A or Oceans pack
3. Inflatable liferaft with SOLAS B or Limited pack
4. Inflatable liferaft with coastal service pack
5. Inflatable buoyant apparatus
6. Life float
7. Buoyant apparatus

A survival craft higher in the hierarchy may be substituted for any survival craft required in the tables.

**Note 2:** Survival craft not required for a vessel less than 36 feet with 3 or fewer individuals on board while operating within 12nm of coastline.

**Note 3:** A buoyant apparatus may be substituted for a vessel 36 feet or more in length with 3 or fewer individuals on board while operating within 12nm of coastline.

**Type Required:** See the tables on the following pages for specifics.
**State Registered** Vessels with 16 or less persons on board.

**Note:** All areas are *cold* waters.

<table>
<thead>
<tr>
<th>Area</th>
<th>Vessel Type</th>
<th>Survival Craft Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-12 miles from coastline</td>
<td>Less than 36 feet in length</td>

</tr>
<tr>
<td>0-12 miles from coastline</td>
<td>36 feet or more in length</td>
<td>Buoyant apparatus.</td>
</tr>
<tr>
<td>&gt;12 miles from coastline</td>
<td>All</td>
<td>Inflatable buoyant apparatus</td>
</tr>
</tbody>
</table>

**Note 1:** The hierarchy of survival craft is:
1. Lifeboat
2. Inflatable liferaft with SOLAS A or Oceans pack
3. Inflatable liferaft with SOLAS B or Limited pack
4. Inflatable liferaft with coastal service pack
5. Inflatable buoyant apparatus
6. Life float
7. Buoyant apparatus

A survival craft higher in the hierarchy may be substituted for any survival craft required in the tables.

**Note 2:** Survival craft not required for a vessel less than 36 feet with 3 or fewer individuals on board while operating within 12nm of coastline.
Stowage of Survival Craft #143
46 CFR 28.125

Requirement:

1. Each inflatable liferaft required to be equipped with a SOLAS A or a SOLAS B, (Oceans or Limited), equipment pack must be stowed so as to float free and automatically inflate in the event the vessel sinks.

2. Each inflatable liferaft with a coastal service pack, inflatable buoyant apparatus, and any auxiliary craft used in their place, must be kept readily accessible for launching or be stowed so as to float free in the event the vessel sinks.

Acceptability Requirements:

- Each hydrostatic release unit used in a float free arrangement must be approved under 46 CFR 160.062.
- Each float free link used with a buoyant apparatus or with a life float must be certified to meet 46 CFR 160.073.

Note: A hydrostatic release unit is not required for a proper float free installation. See NVIC 4-86. See placard on raft canister exterior for proper installation.

Survival Craft Equipment #144
46 CFR 28.130

Requirements:

A. Each item of survival equipment must be of good quality and secured to the survival craft.

B. Inflatable liferaft must be marked with the type of equipment pack inside:
   1. Coastal Service
   2. SOLAS B or Limited Service
   3. SOLAS A or Ocean Service

C. Life floats or buoyant apparatus must be fitted with:
   1. Lifeline, pendants and painter
   2. Floating electric light approved under 46 CFR 161.010

Note: Excess survival craft must meet COMDT (G-MCO) Policy Letter No. 01-96 dated 7 Feb 96. See page 53.
All Vessels

Lifesaving Equipment Markings  #145
46 CFR 28.135

Requirements:
• Block CAPITAL letters must be used to mark all lifesaving equipment.
• Immersion suits and PFD's must be marked with one of the following:
  1. Name of the vessel
  2. Name of owner of the immersion suit or PFD
  3. Name of person assigned to wear the immersion suit or PFD
• Retroreflective markings will be applied as appropriate.

<table>
<thead>
<tr>
<th>Item</th>
<th>Markings Required</th>

</tr>
</tbody>
</table>

Note: No marking other than that provided by the manufacturer and the servicing facility is required.
Lifesaving Equipment Readiness, #146
Maintenance & Inspection of
46 CFR 28.140

Requirements:
The master or individual in charge of a vessel must ensure that each item of lifesaving equipment be in good working order, ready for immediate use and readily accessible before the vessel leaves port and at all times when the vessel is operated.

Except for an inflatable liferaft or an inflatable buoyant apparatus less than two years of age, each item of lifesaving equipment, including unapproved equipment, must be maintained and inspected in accordance with Table 46 CFR 28.140.

An escape route from a space where an individual may be employed or an accommodation space must not be obstructed.

(continued on next page)
## Table 46 CFR 28.140 Maintenance & Inspection of Lifesaving Equipment

<table>

<td>46 CFR 28.140, 46 CFR 25.26-5</td>
</tr>
</tbody>
</table>

* Water activated batteries must be replaced after use.

**Maintenance and inspection must:**
- be done in accordance with the manufacturer’s guidelines
- Inflatable liferafts or inflatable buoyant apparatus must be serviced at a facility approved by the CG and by the manufacturer of the survival craft.

**Note 1:** Except new inflatable liferafts or new inflatable buoyant apparatus within two years of the manufacture date.
Distress Signals

46 CFR 28.145

Requirements:

<table>
<thead>
<tr>
<th>Area</th>
<th>Parachute Flares</th>
<th>Hand Flares</th>
<th>Smoke Signals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inside of Coastal</td>
<td>None</td>
<td>None</td>

<td></td>
</tr>
<tr>
<td>&gt;50 miles (See B.)</td>
<td>3, and 3, and 3</td>
<td>6, and 6, and 3</td>
<td></td>
</tr>
</tbody>
</table>

Expired flares should be kept separately from serviceable supply and marked for “Training Only.”

Acceptability:
A. All Flares and signaling devices must be replaced by their expiration dates.
B. Flares required on vessels operating beyond 50 miles from the coast must be approved under 46 CFR:
   1. 160.136 (parachute)
   2. 160.121 (hand)
   3. 160.122 (smoke)
C. Flares required on vessels operating 3-50 miles from the coast must be approved under 46 CFR:
   1. 160.136 or 160.036 (parachute)
   2. 160.121 or 160.021 (hand)
   3. 160.122 or 160.022 or 160.037 (smoke)
D. Any 3 Coast Guard approved flares are acceptable in coastal waters.
E. Distress flag must be in accordance with 46 CFR 160.072.
F. Electric distress light must be in accordance with 46 CFR 161.013.
All Vessels

EPIRB #148
46 CFR 28.150, 46 CFR 25.26

Applies to: All commercial fishing industry vessels operating on the high seas (beyond 3nm of the coastline).

Type Required:
A. Fishing vessels 36 feet or more in length:
   1. A float-free, automatically activated Category 1 406 MHz EPIRB unless there is a builder’s certification stating the vessel was built with sufficient buoyant material to keep the flooded vessel afloat (see para. B).

B. Fishing vessels less than 36 feet in length, or a fishing vessel 36 feet or more in length having a builder’s certification stating the vessel was built with sufficient buoyant material to keep the flooded vessel afloat:
   1. A float-free, automatically activated Category 1 406 MHz EPIRB, or
   2. A manually activated Category 2 406 MHz EPIRB.

Exemptions:
1. A skiff or workboat does not require an EPIRB if it is stored, when not working, aboard a mother ship equipped with an EPIRB.
2. The District Commander may grant other exemptions.

CHECKLIST:
- Cat. 1 EPIRBs mounted in a float-free location and armed.
- EPIRB battery not expired.
- Hydrostatic release not expired.
- NOAA registration decal not expired.
- EPIRB is tested monthly.
- Excess EPIRBs should be either maintained and in serviceable condition, marked for “Training Only” or removed from vessel.

See page 11 for inspection and testing requirements.
## Fire Extinguishers

### #149

<table>
<thead>
<tr>
<th>Type Required</th>
<th>Without Fixed System in Machinery Space</th>
<th>With Fixed System in Machinery Space</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;26 ft in length</td>
<td>1 B-I</td>
<td>0</td>
</tr>
<tr>

<td>2 B-I</td>
<td>1 B-I</td>
</tr>
<tr>
<td>40 ft to &lt;65 ft</td>
<td>3 B-I</td>
<td>2 B-I</td>
</tr>
<tr>
<td>&gt;65 ft</td>
<td></td>
<td>See next page</td>
</tr>
</tbody>
</table>

**Note:**
1. One B-II replaces two B-I fire extinguishers.
2. Outboard boats less than 26 feet in length are not required to carry fire extinguishers if their construction will not permit the entrapment of explosive or flammable gases or vapors.

**Pre-Engineered** fire system has a bottle (Halon/CO2) and a thermocouple.

**Fixed System** has a bottle (Halon/CO2), fixed piping for distributing the agent and remote actuator.

**Excess fire detection and protection equipment is permitted if:**
- It does not endanger the crew or vessel,
- It is listed and labeled by an independent, national testing laboratory such as UL, FM, etc.
- It is in accordance with appropriate industry standards for design, installation, testing and maintenance.

**CHECKLIST:**
- Sufficient number and type on board.
- Properly mounted in marine bracket.
- UL, USCG, FM approved.
- Pressure gauge in the “Green”.
- Must be weighed and tagged annually if the extinguisher does not have a gauge (owner may tag extinguishers himself).
- Excess fire equipment should be maintained and in serviceable condition, marked for “Training Only” or removed from vessel.

(continued on next page)
Fire Extinguishers #149

Stability/Stability Instructions  #177

46 CFR 28.65(b)(5), 46 CFR 28.500

Stability for All Vessels:
Vessel may not have instability resulting from overloading, improper loading or lack of freeboard. Vessel’s voyage may be terminated. A vessel with less than 6” freeboard at amidships may be operating in an especially hazardous condition: Contact nearest Sector.

Stability Instructions—Applies to: Each commercial fishing industry vessel which is 79 feet or more in length that is NOT required to be issued a Load Line AND:

1. Has its keel laid or is at a similar stage of construction or undergoes a major conversion started on or after September 15, 1991;
2. Undergoes alterations to the fishing or processing equipment for the purpose of catching, landing, or processing fish in a manner different than has previously been accomplished on the vessel; or
3. Has been substantially altered on or after September 15, 1991.

Requirement:
Vessel must have a Stability Book or Stability Information developed by a naval architect or other qualified individual outlining different loading conditions and capacities pertaining to the vessel.

Note the date of this information on the CG-4100S.

If the boarding officer observes any vessel which may be unstable or operating contrary to the Stability Information, then contact the District Commander and local Sector IMMEDIATELY.
Sound Signals

33 USC 1602, Rule 33

Applies to: All vessels.

Requirements:

<table>
<thead>
<tr>
<th>Vessel Length Overall</th>
<th>Sound Devices Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 39.4 ft (12 m)</td>
<td>a means of making an efficient sound signal</td>
</tr>
<tr>
<td>39.4 ft (12 m) to 65.6 ft (20m)</td>
<td>a whistle</td>
</tr>
<tr>
<td>&gt;65.6 ft (20m)</td>
<td>a whistle and a bell</td>
</tr>
<tr>
<td>328.1 ft (100 m) or more</td>
<td>a whistle, a bell and a gong</td>
</tr>
</tbody>
</table>

Note: The bell or gong may be replaced by other equipment having the same respective sound characteristics, provided that the signal can be sounded manually if necessary.

Bell Size (minimum):
- 11.8 inches (300 mm) for vessels 65.6 ft (20 m) or more in length overall.
All Vessels

Backfire Flame Control
46 CFR 25.35-1
Applies to: All vessels with installed gasoline engines.

Requirements:
- Installed gasoline engines must be equipped with backfire flame control of:
  A. Backfire Flame Arrestor:
      1. CG Approval 162.015 or 162.042, or
      2. Marine Type SAE J-1928 or UL 1111.
  B. Engine air and fuel induction systems
      1. CG Approval 162.015 or 162.041,

Acceptability:
- Devices must be marked with the CG approval number OR marine type complying with SAE J-1928 or UL 1111.
- Devices must be installed on the engine, clean, and in good and serviceable condition.

Ventilation
46 CFR 25.40
Applies to: All vessels with closed compartments which use gasoline for electric generation, mechanical power, or propulsion.

Requirement:
- Vessels manufactured after 1940 must have at least adequate natural ventilation in each fuel and engine compartment having an ignition source.

Note: A fuel level sensing unit is not an ignition source.

Acceptability:
A. Natural ventilation:
   1. Intake duct below level of carburetor.
   2. Exhaust duct extended to lower portion of the bilge, below starter level.
   3. Cowls trimmed so as not to re-circulate fumes.
B. Power Ventilation, if equipped:
   1. Motor must be operational.
   2. Ducting must be intact.
   3. System must discharge adequate volumes of air.
All Vessels

Injury Placard #150
46 CFR 28.165

Requirements:
- Must be at least 5” X 7”
- Must be posted in a highly visible location, accessible to the crew.

Placards are available from the local Sector.

Oil Pollution Placard #155
33 CFR 155.450

Applies to: All U.S. vessels 26 ft or more in length having a machinery space.

Acceptability Requirements:
- Placard must be at least 5” X 8”.
- In a language understood by the crew.
- Permanently affixed in the machinery space or near the bilge pump operating switch.
**All Vessels**

**Waste Management Plan #151**

33 CFR 151.57

**Applies to:** All oceangoing (beyond 3nm limit) commercial fishing industry vessels that are 40 ft or more in length.

**Waste Management Plan:**

**Acceptability requirements:**

The **WRITTEN waste management plan** must describe procedures for:

- collection,
- processing,
- storage, and
- discharge of garbage and waste,
- plus designate the person who is responsible for carrying out the plan.

**Garbage Placard #156**

33 CFR 151.59

**Applies to:** All vessels 26 ft or more in length.

**Acceptability Requirements for Placards:**

- Sufficient number posted so as to be read by crew and passengers.
- Displayed in prominent locations.
- At least 4" X 9" in size.
- Letters must be at least 1/8 inch high.
- Must be made of durable material.

---

**MARPOL Garbage Dumping Restrictions**

Under U.S. federal law, it is illegal to discharge plastics or garbage mixed with plastics into coastal waters. Regulations may apply. To report illegal dumping, contact the National Response Center at 1-800-433-8478.

**Open Ocean Restrictions**

- Never discharge any plastic or refuse.
- Even with no visible water visible, discharge prohibited.

**Placards are available from the local Sector.**
## Marine Sanitation Device

**#152**

### Applies to

All vessels that have an installed toilet facility and operate within U.S. Territorial Seas (inside 3 nm).

#### Requirements:

- The marine sanitation device must be Coast Guard Certified.
- Vessels 65 ft and less must have a Type I, Type II, or Type III MSD.
- Vessels over 65 ft must have a Type II or Type III MSD.

#### Acceptability Requirements:

- Type I and Type II MSDs must have a label as per 33 CFR 159.16 (CG approval number and manufacturer’s information) and be certified. Type III MSDs (holding tanks) do not need a label.
- **Type I and Type II devices are certified under 33 CFR 159.12.**
- **Type III devices are certified by design.** They must be a holding tank solely for sewage and flush water at ambient air temperature and pressure, and designed to prevent overboard discharge of sewage.
- The MSD must be operational.
- If the installed toilet has a “Y” valve, the valve must be secured while in U.S. Territorial waters so as to prohibit accidental discharge overboard.

**Note:** Portable toilets or “porta-potties” are not considered installed toilets and are not subject to the MSD regulations.

**Secured** means locked, tagged, wire-tied, zip-tied, or chained in the closed position.
Inland Navigation Rules #153
33 CFR 88.05

Applies to all self-propelled vessels greater than 12 meters (39.4 ft) operating on the inland waters of the U.S.

Note: Inland waters are those waters inside the COLREGS Demarcation Lines.

Acceptability Requirement:
- Have on board for ready reference a current copy of the Inland Navigation Rules.
All Vessels

Rules of the Road #154
33 USC 1620, 33 CFR 81 (COLREGS)

 Applies to: All vessels at anchor or underway between sunset and sunrise, or in or near areas of restricted visibility.

<table>
<thead>
<tr>
<th>Acceptability Requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Navigation Lights: Rules 21, 22, 23 &amp; Annex I</strong></td>
</tr>
<tr>
<td>• Proper Range of Visibility</td>
</tr>
<tr>
<td>• Proper Arc of Visibility</td>
</tr>
<tr>
<td>• Proper Light Configuration</td>
</tr>
<tr>
<td>• Deck Lights must not hinder recognition of the vessel's navigational lights</td>
</tr>
<tr>
<td>• On vessels 65.6 ft (20m) or more in length, the sidelight screens must be matt black.</td>
</tr>
<tr>
<td><strong>Fishing at Night: Rule 26 &amp; Annex II</strong></td>
</tr>
<tr>
<td>• All around red over all around white lights properly displayed. (Trawling at night requires all around green over all around white.) Not required on trollers.</td>
</tr>
<tr>
<td><strong>Day Shapes: Rule 26 &amp; Annex II</strong></td>
</tr>
<tr>
<td>• When engaged in fishing, 2 black cones apex to apex must be properly displayed. Not required on trollers.</td>
</tr>
</tbody>
</table>

Notes: The previously accepted basket day shape is no longer authorized.
Power-driven vessel of less than 12m in length
All around white light, combination red/green light

Power-driven vessel—less than 50m in length
Masthead, stern & side lights

Vessel engaged in trawling—less than 50m in length
All around green over white, stern and side lights

Vessel engaged in fishing other than trawling
All around red over white, stern and side lights
### Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

**High Water Alarms** #168  
46 CFR 28.250

#### Applies to:
Documented fishing industry vessels:  
1. operating beyond the Boundary Line or with more than 16 persons on board, and  
2. are 36 feet or more in length.

#### Requirement:
- **Visual and Audible** alarm at the operating station to indicate high water levels in unmanned spaces.

#### Acceptability:
The following spaces must be included:
- A space with a **through hull fitting** below the deepest load waterline, such as a lazarette.
- A space subject to flooding from sea water piping, such as a machinery space bilge, bilge well, shaft alley bilge.
- A space with a **non-watertight closure**, such as a space covered with a non-watertight deck hatch.

#### Examination Procedure:
- After verifying the location of High Water Alarms, return to the operating station and have the operator trigger the alarm from the appropriate space. Check the operation of the visual and audible alarm at the operating station.
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

Drills & Safety Orientation #171
46 CFR 28.270

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:
A. Drills
The master or individual in charge of each vessel must ensure that drills are conducted and instructions given to each individual on board at least once each month so as to ensure that each individual is familiar with their duties and responses to at least the following contingencies:
1. Abandoning the vessel.
2. Fighting a fire in different locations on board the vessel.
3. Recovering an individual from the water.
4. Minimizing the affects of unintentional flooding.
5. Launching survival craft and recovering lifeboats.
6. Donning immersion suits and other wearable PFDs.
7. Donning a fireman’s outfit and a self-contained breathing apparatus, if vessel is so equipped.
8. Making a voice radio distress call and using visual distress signals.
9. Activating the general alarm.
10. Reporting inoperative alarm and fire detection systems.

Drills must be conducted on board the vessel as if there were an actual emergency and must include participation by all persons on board.

B. Safety Orientation - The master or individual in charge of a vessel must ensure that a safety orientation is given to each individual on board that has not participated in the required drills before the vessel may be operated.

C. Training - No individual may conduct drills or provide instructions unless that individual has been trained in the proper procedures for conducting the activity.

Note: The individual conducting the drills and instruction need not be the master, individual in charge of the vessel, or a member of the crew.
Emergency Instructions #172
46 CFR 28.265

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirement:
Emergency instructions must be posted in conspicuous locations accessible to the crew.

Note: On vessels with less than 4 POB, the emergency instructions may be kept readily available in lieu of posting.

Acceptability:
The emergency instructions must identify at least the following information, as appropriate for the vessel:
1. Survival craft embarkation stations and the survival craft to which each person is assigned.
2. The fire and emergency signals and the abandon ship signal.
3. If immersion suits are provided, the location of the suits and illustrated instructions on the method for donning the suits.
4. Procedures for making a distress call.
5. Essential action to be taken in an emergency by each individual.
6. Procedures for rough weather at sea, crossing hazardous bars, and flooding.
7. Procedures for anchoring the vessel.
8. Procedures to be used in the event an individual falls overboard.

Note: Items 6 - 9 may be kept readily available as an alternative to posting.
Documented commercial fishing vessels that use Ammonia Refrigerant must have:

A. Two **self-contained breathing apparatus** that:
   1. have as a minimum, a 30 minute air supply
   2. have a full facepiece
   3. have at least one spare bottle per each SCBA
   4. is approved by MSHA and NIOSH
   5. proof of maintenance being conducted IAW manufacturers recommendations

**FIREMAN’S OUTFIT:**

Documented fishing vessels **operating with more than 49 persons on board** must have:

A. Two **firemen’s outfits** in widely separated locations that include:
   1. Self-contained breathing apparatus with lifeline attached (lifeline must be all wire rope or 3 strand with wire strands in the line)
   2. One flashlight
   3. A rigid helmet
   4. Boots
   5. Gloves
   6. Protective clothing
   7. One fire axe
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

First Aid Equipment & Training #161
46 CFR 28.210

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:

A. Equipment
   1. First Aid Manual
   2. Medicine Chest

B. Training

<table>
<thead>
<tr>
<th>No. of POB</th>
<th>First Aid</th>
<th>CPR</th>
</tr>
</thead>
<tbody>
<tr>
<td>More than 2</td>
<td>1</td>
<td>1</td>
</tr>
<tr>
<td>More than 16</td>
<td>2</td>
<td>2</td>
</tr>
<tr>
<td>More than 49</td>
<td>4</td>
<td>4</td>
</tr>
</tbody>
</table>

Note: An individual certified in both first aid and CPR may be counted for both requirements.

* A certificate indicating completion of:

   Acceptable First Aid Courses:
   • American National Red Cross
   • Coast Guard approved course

   Acceptable CPR Certificates:
   • American National Red Cross
   • American Heart Association
   • Coast Guard approved course

Acceptability:

First Aid manual and medicine chest must be -
• of a size suitable for the number of persons on board and
• readily accessible.

1ST Aid/CPR Training
• Proof of having had the training. The training is not required to be current, i.e., annual CPR training is not required.
Guards for Exposed Hazards #162
46 CFR 28.215

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:

- Suitable hand covers, guards, or railings must be installed in the way of machinery which can cause injury to personnel.
- Exhaust pipes from an engine in reach of personnel must be insulated or guarded to prevent burns.

Examples of items to be guarded:

⇒ gearing
⇒ chain or belt drives
⇒ rotating shafting
⇒ electrical hazards

Note: This is not meant to restrict access to fishing equipment such as:

◊ winches
◊ drums
◊ gurdies
Navigational Information #163
46 CFR 28.215

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:
Each vessel must have, for the area to be transited and operated in, current editions of:

A. **Marine Charts** properly scaled and with current corrections

B. A copy or extract of:
   1. **U.S. Coast Pilot (#7 for WA/OR/CA/HI)**
   2. **Coast Guard Light List**
   3. **Tide Tables**
   4. **Current Tables**

C. **Inland Navigation Rules** must be carried by vessels of 39.4 ft (12m) or more in length operating shoreward of the COLREG Demarcation Line.

Acceptability:
- "Current" is considered corrected through the latest Notice To Mariners OR: Chart—the latest edition. Coast Pilot/Light List—within the past 3 years.
- Charts must be of large enough scale to safely navigate the area and currently corrected.

Compasses & Deviation Tables #164
46 CFR 28.230

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:
1. Magnetic steering compass
2. Compass deviation table

Acceptability:
- Compass must be operable.
- Deviation table must be located at the operating station.

Note: *It is recommended that at least 8 points of the compass be checked and recorded on the deviation table.*
**Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB**

### Anchor

| #165 | 46 CFR 28.235 |

**Applies to:** Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

**Requirements:**
- Anchor with chain, cable, or rope.
- Appropriate for the vessel and waters.

### Radar Reflectors

| #165 | 46 CFR 28.235 |

**Applies to:** Documented fishing industry vessels with *nonmetallic hulls* operating beyond the Boundary Line or with more than 16 persons on board.

**Requirement:**
- Radar Reflector.

**Note:** A vessel rigged with gear that provides a radar signature at 6nm distance is not required to have a radar reflector.
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

General Alarm System #166
46 CFR 28.240

Applies to:
Documented fishing industry vessels
1. operating beyond the Boundary Line or with more than 16 persons on board, and
2. having an accommodation or workspace which is not adjacent to the operating station.

Requirements:
- An audible general alarm system with contact maker at the operating station.
- A flashing red light must also be installed in spaces where noise makes the alarm system difficult to hear.

Markings:
- Each general alarm bell and flashing red light must be identified with ½ inch RED lettering as follows:

```
Attention
General Alarm
When Alarm Sounds Go to Your Station
```

Acceptability:
A. The alarm system must be capable of notifying an individual in any accommodation or workspace where they may normally be employed.
B. The alarm must be tested:
   1. prior to operation of the vessel and
   2. at least once each week thereafter.

Note: A public address system may be used for the alarm system provided it is capable of the above stated requirements.
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

Communication Equipment #167
46 CFR 28.245

Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:

<table>
<thead>
<tr>
<th>Operating Area</th>
<th>VHF Frequency Capability</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>156 - 162 MHz</td>
</tr>
<tr>
<td></td>
<td>2 - 4 MHz</td>
</tr>
<tr>
<td></td>
<td>2 - 27.5 MHz</td>
</tr>
<tr>
<td>All</td>
<td>X</td>
</tr>
<tr>
<td>More than 20nm from coast</td>

<tr>
<td>More than 100nm from coast</td>
<td>X</td>
</tr>
<tr>
<td></td>
<td>X</td>
</tr>
<tr>
<td>Waters next to Alaska</td>
<td>X</td>
</tr>
<tr>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

Emergency Source of Power Must Be:
1. provided for all communications equipment
2. capable of supplying all connected loads continuously for at least three hours
3. be located outside the main machinery space.

Other Acceptability Items:
A. Location of the equipment must be such as to
1. Ensure safe operation
2. Facilitate repair
3. Protect against vibration, moisture, temperature, excessive current/voltage.
4. Minimize water intrusion from windows broken by heavy seas.
B. A single radio capable of communicating on the 2 -4 and 2 - 27.5MHz frequencies is acceptable.
C. A satellite communication system is an acceptable substitute for 2 -4 and 2 -27.5MHz radios.
D. A cellular phone capable of communicating with a Coast Guard station may substitute for the radios that operate in the 2 - 4 and 2 - 27.5MHz range.
E. A 4 - 20MHz radio installed before Sept. 15, 1991, may be used in lieu of a 2 -27.5MHz radio.
F. The principal operating position of the communication equipment must be at the operating station.

(continued next page)
### Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

#### Radiotelephone Requirements (VHF)  
33 CFR 26.03

**Applies to:** All power driven vessels 20 meters (65.6 ft) or more in length overall operating on the navigable waters of the U.S.

**Requirements:**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| 1. | Monitor VHF Channel 16 (156.800 MHz).  
| 2. | Monitor VHF Channel 13 (156.650 MHz).  
| 3. | Have equipment capable of transmitting and receiving on VHF Channel 22A (157.100 MHz).  
| 4. | The individual maintaining the listening watch must be able to speak English. |

**Note:** The FCC has determined that the “Watch” or “Scan” features of VHF radios do not meet requirements for monitoring the designated channels. Therefore, **two VHF radios are required.**

#### Automated Identification System (AIS)  
33 CFR 164.46 & 33 CFR 26.03

**Applies to:** Fish processors and tenders, >65 ft., operating within a Vessel Traffic System (Canadian VTS, Puget Sound, Prince William Sound, San Francisco Bay).

**Requirements:**

- Must have a properly installed or portable AIS.
- Portable systems must not have electromagnetic interference from existing navigation and communication equipment.
- A Vessel Monitoring System (VMS) required by NMFS does not meet the requirements for AIS.
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

FCC Ship/Station License #157
47 CFR 80.405

**Applies to:** All vessels **required** to have communications equipment on board.

<table>
<thead>
<tr>
<th>Acceptability Requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Original license on board.</td>
</tr>
<tr>
<td>• Name and number of the vessel is correct.</td>
</tr>
<tr>
<td>• License is not expired.</td>
</tr>
<tr>
<td>• License lists all transmitting equipment and frequencies.</td>
</tr>
<tr>
<td>• License is stamped with the FCC seal.</td>
</tr>
<tr>
<td>• Licensee listed is the current owner or manager of the vessel.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Notes:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• If the vessel is not <strong>required</strong> to carry the radio equipment, then do not cite for lack of the FCC-SSL.</td>
</tr>
<tr>
<td>• FCC Ship Station Licenses are renewed every 10 years.</td>
</tr>
<tr>
<td>• To renew or apply for FCC SSL contact 1-888-CALL-FCC or <a href="http://www.fcc.gov">www.fcc.gov</a></td>
</tr>
</tbody>
</table>
Applies to: Documented fishing industry vessels operating beyond the Boundary Line or with more than 16 persons on board.

Requirements:
A. Bilge pumps and bilge piping capable of draining watertight compartments, except tanks and small buoyancy compartments.
B. Large spaces, such as engine room, must be fitted with more than one suction line.
C. Vessels 79 ft and over must be equipped with a fixed, self-priming, power bilge pump connected to a bilge manifold unless an individual pump is provided for each space.
D. Spaces used in the sorting or processing of fish:
   1. must be fitted with a dewatering system capable of dewatering the space at the same rate as water is introduced.
   2. The dewatering pump must be interlocked with the pump supplying the water so that if the dewatering pump fails, the water supply pump will be deactivated.

Acceptability:
- If a bilge pump is portable, it must have a suitable suction hose of adequate length to reach the bilge of each watertight compartment it must serve and a discharge hose of adequate length to ensure overboard discharge. The portable pump must be capable of dewatering each space it serves at a rate of at least 2 inches of water per minute.
- Except for a required fire pump, a bilge pump may be used for other purposes.
- Except where an individual pump is provided for a separate space or for a portable pump, each individual bilge suction line must be led to a manifold, have a stop valve at the manifold and a check valve at some accessible point in the bilge line to prevent unintended flooding of a space.
- Each bilge suction line and dewatering system must be fitted with a suitable strainer to prevent clogging of the line. Strainers must have an open area of not less than 3 times the open area of the suction line.
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

Electronic Position Fixing Devices #170
46 CFR 28.260

Applies to: Documented fishing industry vessels 79 feet or more in length operating beyond the Boundary Line or with more than 16 persons on board.

Requirement:
Vessel must be equipped with an electronic position fixing device such as:
- GPS/DGPS

Acceptability:
- The device must provide accurate fixes for the area in which the vessel operates.
Documented Vessels Operating Beyond the Boundary Line or with more than 16 POB

Load Line Certificate #158
46 CFR 28.265

Applies to: Fish processing vessels and fish tender vessels EXCEPT

A. Fish Processing vessels of not more than 5000 GT:
   1. i) constructed as a fish processing vessel before August 16, 1974, or
      ii) converted for use as a fish processing vessel before January 1, 1983; and
   2. is not on a foreign voyage.

B. Fish Tender vessels of not more than 500 GT:
   1. i) constructed, under construction, or under contract to be constructed as a fish tender vessel before January 1, 1980, or
      ii) was converted for use as a fish tender vessel before January 1, 1983; and
   2. i) is not on a foreign voyage, or
      ii) engaged in the Aleutian Trade.

C. Vessels less than 24 meters (79 feet) overall in length.

D. A vessel of not more than 150 GT, the keel of which was laid or that was at a similar stage of construction, before January 1, 1986, that is on a domestic voyage.

Load Line Certificates:
- Are issued by either ABS or Det Norske Veritas, classification societies.
- Are good for 5 years.
- Must be endorsed annually by the issuing class society otherwise the certificate is invalid (TERMINATION).

Load Line marks shall
- be permanently and conspicuously affixed to the hull.
- not be submerged.
Fish Processing Vessels

Certificate of Compliance
46 CFR 28.700

Applies to: Fish processing vessels of 5000 gross tons or less not having a Certificate of Inspection issued by the U.S. Coast Guard.

Requirements:
A Once in every two years, each fish processing vessel must be examined for compliance with the regulations by:
1. American Bureau of Shipping (ABS),
2. A similarly qualified organization, or
3. A surveyor of an accepted organization.

B A Certificate of Compliance (COC) must be issued by the examiner to the vessel operator.

C Each certificate of compliance must:
1. Be signed by the issuing examiner,
2. Include the name of the organization the examiner represents,
3. State that the vessel has been found in compliance with applicable regulations,
4. Be retained on board the vessel.

Note: A Fishing Safety Decal does not take the place of the Certificate of Compliance.

Contact your local Sector fishing vessel safety coordinator for an up-to-date list of similarly qualified and accepted organizations.
Fish Processing Vessels

Certificate of Class
46 CFR 28.720

Applies to:
Fish processing vessels:
- without a Certificate of Inspection issued by the Coast Guard,
- built after or has undergone a major conversion after 27 July 1990.

Requirements:
A Each vessel must be classed by either:
   1. American Bureau of Shipping (ABS), or
   2. A similarly qualified organization.

B Classed Vessels must:
   1. Have on board a certificate of class issued by the organization that classed the vessel, and
   2. Meet all survey and classification requirements prescribed by the organization that classed the vessel.

A missing or expired class certificate may be reason for vessel termination. See page 52.

Contact your local Sector fishing vessel safety coordinator for an up-to-date list of similarly qualified and accepted organizations.
**Fish Processing Vessels**

**Alternate Compliance and Safety Agreement (ACSA) Program**
G-PCV Policy Letter 06-03

**General:** The ACSA Program is for certain qualifying Head and Gut (H & G) freezer longliners and trawlers. It is the Coast Guard's aim to provide a high level of supervision and oversight to this program. The Coast Guard will assume the lead for compliance with all ACSA provisions. All Sections of the ACSA agreement may be examined at any time by Coast Guard Marine Inspector or Coast Guard fishing vessel safety personnel.

**Requirements:**
A. Each year, ACSA processing vessel must be examined for compliance with the Agreement by:
   1. USCG Marine Inspector or fishing vessel safety examiner. And
   2. American Bureau of Shipping (ABS),
   3. A similarly qualified organization, or
   4. A surveyor of an accepted organization.

B. An ACSA Certificate must be issued by the cognizant Coast Guard Sector office.

**Overall Compliance:** The Thirteenth or Seventeenth Coast Guard District Commander shall provide full compliance and oversight with Sections (A)-(L) of this agreement. Full compliance with the ACSA will be achieved when a letter of exemption is issued annually by the appropriate District Commander allowing an existing H & G vessel to operate as fish processing vessel.

**Note:** A Fishing Safety Decal does not take the place of the Alternative Compliance and Safety Agreement Certificate.

Contact your local Sector fishing vessel safety coordinator for more information on this program.
## Oil Transfer Procedures

33 CFR 155.720, 155.750

**Applies to:** All vessels with an oil capacity of 250 barrels or more (10,500 gallons or more).

### Requirements:

1. Any person that transfers oil to, from, or within a vessel with a capacity of 250 or more barrels of oil must have oil transfer procedures.
2. The transfer procedures must comply with 33 CFR 155.750.
3. The Person in Charge of the transfer operation must meet the qualification requirements of 33 CFR 155.710.

### Per 33 CFR 155.820 the following written records must be maintained by the vessel operator for inspection by the Coast Guard:

1. Person in Charge designation.
2. Results of hose and other required tests (33 CFR 156.170).
3. Transfer hose information ("oil service", MAWP (Maximum Allowable Working Pressure), test date, date of manufacture).
4. Declarations of Inspection for the past month (33 CFR 156.150).
### Fuel Oil Discharge Containment

33 CFR 155.320

**Applies to:** All vessels of 100 gross tons or more.

**Requirements:**
Under or around each fuel oil or bulk lubricating oil tank vent, overflow, and fill pipe requires either:

<table>
<thead>
<tr>
<th>For vessels constructed before July 1, 1974:</th>
</tr>
</thead>
<tbody>
<tr>
<td>100 gross tons or more: Fixed container or enclosed deck area of one-half barrel (21 gallons) capacity, or portable container of 5 gallons capacity.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>For vessels constructed after June 30, 1974:</th>
</tr>
</thead>
<tbody>
<tr>
<td>100 - 300 gross tons: Fixed container or enclosed deck area of one-half barrel (21 gallons) or portable container of 5 gallons capacity.</td>
</tr>
<tr>
<td>300 - 1600 gross tons: Fixed container or enclosed deck area of one-half barrel (21 gallons) capacity.</td>
</tr>
<tr>
<td>Over 1600 gross tons: Fixed container or enclosed deck area of one barrel.</td>
</tr>
</tbody>
</table>

**Note:** If the vessel has a fill fitting for which containment is impractical, an automatic back pressure shut-off nozzle must be used.
**Oil Pollution - Other**

33 CFR 151, 33 CFR 155, 33 CFR 130

**Applies to:** All Vessels

**Requirements:**

- **COFR Certificate** – Vessels 300 GT and above.
- **IOPP Certificate** - vessels 400 GT and above on foreign voyage.
- **Oil Record Book, Part I** - vessels 400 GT and above.
- **Oily Water Separator, Sludge Tank, & Oily Waste Discharge Piping** - oceangoing vessels 400 GT and above.
- **Capacity to retain oily mixtures on board & the ability to discharge to a reception facility** - Oceangoing vessels less than 400 GT and non-oceangoing vessels.
- **Fixed system to discharge slops, pump stop & stop valve at each discharge station** - oceangoing vessels 100 GT and greater but less than 400 GT.
- **Standard discharge connection** - oceangoing vessels 100 GT and greater. MOC policy letter 2-97 permits a 1.5 inch quick connect fitting for vessels in U.S. domestic service less than 400 GT.
- **Prohibited oil spaces**
  - No oil in forepeak on vessels 400 GT and greater built after January 1, 1982; or
  - No oil forward of collision bulkhead on vessels 300 GT and greater. (See 33 CFR 155.470 for exceptions.)
- **No person may intentionally drain oil or hazardous material from any source into the bilge of a vessel.**
Shipboard Oil Pollution Emergency Plan (SOPEP)
33 CFR 151.26, MARPOL 73/78 Annex I Reg 26

Applies to: All ships of 400 GT and above, other than oil tankers.

Requirements:
1. Subject vessels shall carry on board a shipboard oil pollution emergency plan approved by the Coast Guard, which is good for 5 years.
2. The vessel owner or operator shall review the plan annually and submit a letter to Commandant (G-MOR) certifying the review was completed.
3. Changes to the plan must be approved by the Coast Guard, (G-MOR).
4. The entire plan must be resubmitted to Commandant 6 months prior to expiration.

Acceptability:
1. SOPEP is on board the vessel.
2. The SOPEP has a cover letter stamped approved by the Coast Guard.
3. The annual review has been completed and a letter submitted to Commandant certifying it was completed.

If you have questions regarding this topic, contact your local Sector.
Additional Requirements

Citizenship/Licensing/Manning  #180/181
46 USC 8103, 8304, 8701, 8702 and 46 CFR 15

Applies to: All vessels.

Citizenship:
- Only a U.S. citizen may be in command of a documented vessel or serve as master, chief engineer, radio officer or officer in charge of a deck watch or engineering watch.
- Not more than 25% of the unlicensed seamen may be nonresident aliens allowed to be employed under the Immigration and Naturalization Act.

Licensing:
- On documented vessels 200 gross tons or greater which operate beyond the Boundary Line, the master, mate, and engineers must have appropriate Coast Guard licenses for the tonnage, horsepower, etc. of the vessel on which they are serving.

Manning:
A The master is responsible for establishing adequate watches and lookouts. (See 46 CFR 15.705 for fish processing vessel manning requirements.)
B Seamen on the following vessels must hold a Merchant Mariners Document (MMD):
1. Processors over 1600 GT but less than 5000 GT which entered into service prior to 1 Jan. 88.
2. Processors 100 GT and over which entered into service after 31 Dec. 87 with more than 16 persons on board primarily employed in the preparation of fish or fish products:
   i) Each seaman, excluding factory and support personnel, must have a MMD.
   ii) 75% of the crew in each department, excluding factory and support personnel, must be able to understand any order spoken by officer.
   iii) 50% of the deck crew, excluding licensed personnel, must have a MMD endorsed for a rating of at least able seaman.
Crew Contract
46 USC 10601

Applies to: All commercial fishing industry vessels of at least 20 gross tons on a voyage from a port in the U.S.

**Requirement:**
The contract agreement between the master or individual in charge of the vessel and each crewmember shall:
- be in writing and signed also by the vessel owner,
- state the period of effectiveness of the agreement,
- include the terms of any wage, share, or other compensation arrangement peculiar to the fishery in which the vessel will be engaged during the period of agreement, and
- include other agreed terms.

**Note:** The contract is not required to be maintained on board the vessel.
**Drug & Alcohol Testing Programs**

46 CFR 4.06

**Applies to:** A vessel engaged in commercial service that is involved in a Serious Marine Incident must conduct alcohol and chemical testing of all individuals directly involved. Alcohol testing must be conducted within 2 hrs and chemical testing within 32 hrs of casualty.

There is no requirement to have test kits on board, however, vessels that operate more than 2 hrs from an alcohol testing facility should have alcohol test kits on board. Most alcohol test kits do not require the collector to be trained. Vessels that operate more than 32 hrs from a chemical testing facility should have chemical test kits on board. Most chemical test kits DO require special training.

**Serious Marine Incident:**

- One or more deaths;
- An injury to a crewmember, passenger, or other person which requires professional medical treatment beyond first aid, and, in the case of a person employed on a vessel in commercial service, which renders the individual unfit to perform routine vessel duties;
- Damage to property in excess of $100,000;
- Actual or constructive total loss of any vessel subject to inspection;
- Actual or constructive total loss of any self-propelled vessel, not subject to inspection, of 100 gross tons or more;
- A discharge of oil of 10,000 gallons or more into the navigable waters of the United States; or
- A discharge of a reportable quantity of a hazardous substance into the navigable waters of the United States.

**Contact the local Sector ASAP.**
Random Drug Testing

Applies to: All documented vessels of 200 gross tons or greater.

Requirement:
- Fishing industry vessels of 200 gross tons or greater must comply with the chemical testing regulations found in 46 CFR 4.06.

Note: Vessels of less than 200 gross tons are not required to have a chemical testing program. However, they are still subject to the regulations found in 33 CFR 95, Operating a Vessel While Intoxicated and the casualty testing requirements listed above.
Global Maritime Distress and Signaling System (GMDSS)
47 CFR Subchapter W; NVIC 3-99

Applies to: Cargo ships (defined as all commercial ships other than passenger ships) of 300 gross tons and over, that sail internationally or in open ocean (defined as seaward of the low-water mark or seaward of inland waters).

Requirements:
• Basic equipment is required for all vessels with additional required equipment based on the vessel's area of operation.
• Also, a new class of radio operator's license called the GMDSS Radio Operator's License, has been established.
• Some of the required equipment includes digital select calling (DSC) equipped VHF, MF, and HF radios; Search and Rescue Transponders (SART); NAVTEX receivers; and 406 MHz EPIRB.
• NAVTEX receivers, 406MHz EPIRBS, SART, and two-way VHF radios for survival crafts must currently be carried on vessels required to meet GMDSS.
• Presently there is a grace period for certain fishing vessels.

If you have questions regarding this topic, contact your local Sector.
Termination of Unsafe Operations
46 CFR 28.65, MSG DTG R102252ZAPR01

Requirement:
Especially Hazardous Conditions which warrants vessel termination includes to the items described below. Any singular violation of items (1-7) or 12(a) should automatically result in termination. Violations of items (8-11) or items 12(b-c) do not automatically rise to the level of an EHC and therefore sound judgment should be exercised in determining whether these items pose a significant threat to the safety of the crew and the vessel:

1. An insufficient number of lifesaving equipment on board, to include unserviceable PFDs, unserviceable immersion suits or inadequate survival craft capacity.
2. An inoperable EPIRB or radio communication equipment when required by regulation. When both are required, at least one must be in operable condition to avoid termination.
3. Instability resulting from overloading, improper loading or lack of freeboard.
4. Inoperable bilge system.
5. Intoxication of the master or person in charge, i.e., person is operating the vessel and has an alcohol concentration of 0.04 percent, or the intoxicant’s effect on the person’s manner, disposition, speech, muscular movement, general appearance or behavior is apparent by observation.
6. Flooding or uncontrolled leakage in any space.
7. A missing or expired certificate of class, as required by 46 U.S.C. 4503(1), for a fish processing vessel.
8. Inadequate firefighting equipment on board.
9. Excessive volatile fuel (gasoline or solvents) or volatile fuel vapors in bilges.
10. A lack of adequate operable navigation lights during periods of restricted visibility.
11. Watertight closures missing or inoperable.
12. Additional EHC’s:
   a. Liferaft servicing past due by 5 months or more.
   b. Hydrostatic release units expired 5 months or more.
   c. Inoperable high water alarms or lack of high water alarms in required spaces.
   d. Total lack of required safety and emergency drill training for vessel master or crew.
Post SAR and Additional Termination Policy
MSG DTG R100013Z AUG 06

Actions Following termination or SAR activity involving commercial vessels:
1. Once the vessel is safely moored at the dock, the responding CG unit will conduct a post-SAR or post-termination boarding.

2. A description of deficiencies and especially hazardous conditions (EHC) will be relayed to the cognizant OCMI/COTP.

3. The OCMI/COTP will determine if the conditions warrant CG oversight and/or a COTP Order for vessel to remain at dock until deficiencies corrected.

4. If a COTP Order is issued, the vessel will be permitted to get underway only when the deficiencies have been cleared by the cognizant OCMI/COTP.

District Commander's Intent:
1. 100% of commercial vessels involved in SAR, receive a post-SAR boarding.

2. 100% of terminated commercial vessels receive a post-termination boarding. This consists of examining the vessel for full compliance with all applicable uninspected commercial vessel safety regulations.

3. The OCMI/COTP take appropriate actions to ensure uninspected commercial vessels meet applicable laws and regulations following SAR or termination activity.shing industry vessels.
Excess Safety and Lifesaving Equipment
COMDT (G-MCO) Policy Letter 01-96

Applies to: All commercial fishing industry vessels.

The policy letter 01-96, Excess Equipment Found on Uninspected Commercial Fishing Industry Vessels, was issued to clarify guidance and respond to questions on the carriage and use of excess safety and lifesaving equipment.

A. All safety and lifesaving equipment in excess of that required by 46 CFR Part 28, whether an approved type or not, carried on board any commercial fishing industry vessel must be either:

B. 1. **Maintained and inspected** as required by regulation and in compliance with the manufacturer’s guidelines; or

   2. **Distinctly and permanently marked** that it is to be used ONLY for training if not meeting the maintenance and inspection standards above (except for excess survival craft which must be maintained and inspected as above); or

   3. **Removed from the vessel** if not meeting the maintenance and inspection standards or marked for training as listed above.

B. All excess safety or lifesaving equipment retained onboard a vessel for training purposes shall be stowed in such a manner or location that it will not be mistakenly utilized during an actual emergency.

C. Expired distress signals may be used for training. The skipper is required to send a SECURITE broadcast and encouraged to contact the nearest Coast Guard unit. Expired flares, however, should only be used as a last resort during an emergency.
DEFINITIONS

Accepted organizations - an organization which has been designated in writing by the Commandant for the purpose of examining commercial fishing industry vessels under the provisions of 46 CFR 28.073. Navigation and Inspection Circular (VIC) 13-91 describes the types of organizations that can qualify as accepted organizations and outlines the steps they need to take to receive this designation. Coordinators maintain a list of these organizations.

Accommodations - include messrooms, lounges, sitting areas, recreation rooms, quarters, toilet spaces, shower rooms, galleys, berthing facilitates or clothing changing rooms.

Berthing Space - a space that is intended to be used for sleeping and is provided with installed bunks and mattresses.

Big 8 – Refers to PFDs/Immersion Suits, Survival Craft, EPIRB, Distress Signals, Fire Extinguishers, Stability, High Water Alarms and Drills & Training.

Boundary Lines - the lines set forth in 46 CFR 7. In general, they follow the trend of the seaward high water shorelines and cross entrances to small bays, inlets and rivers.

Coastal Waters - as defined in 33 CFR 175.105, the territorial seas of the U.S. (3 miles) and those waters directly connected (i.e., bays, sounds, harbors, rivers, inlets, etc.) where any entrance exceeds 2 nm to the first point where the largest distance between shorelines narrows to 2nm.

Coastwise Voyage - navigating the waters of any ocean or the Gulf of Mexico 20nm or less offshore.

Cold Waters/Warm Waters - cold water means water where the monthly mean low water temperature is 59 degrees Fahrenheit or less. Warm waters mean water where the monthly mean low water temperature is above 59 degrees Fahrenheit. See NVIC 7-91. Note: All waters in D13 are considered Cold Waters.
**Commercial Fishing Industry Vessel** - includes fishing vessels, fish tender vessels, and fish processing vessels.

**Documented** - a vessel for which a Certificate of Documentation has been issued under the provisions of 46 CFR 67. Commercial vessels greater than 5 net tons must be documented.

**Domestic Voyage** – the movement of a vessel between places in, or subject to the jurisdiction of, the United States, except movement between a place in a territory or possession of the United States or the Trust Territory of the Pacific Islands; and a place outside that territory, possession, or Trust Territory.

**Fish** - means finfish, mollusks, crustaceans, and all other forms of marine animal and plant life, except marine mammals and birds.

**Fish Processing Vessel** - a vessel that commercially prepares fish or fish products other than by gutting, decapitating, gilling, skinning, shucking, icing, freezing, or brine chilling. Salting cod is considered processing.

**Fish Tender Vessel** - a vessel that commercially supplies, stores, refrigerates, or transports fish, fish products, or materials directly related to fishing or the preparation of fish to or from a fishing, fish processing or fish tender vessel or a fish processing facility.

**Fishing Vessel** - a vessel that commercially engages in the catching, taking, or harvesting of fish, or an activity that can reasonably be expected to result in the catching, taking or harvesting of fish.

**Foreign Voyage** – a voyage from the United States to a country outside the United States or any of it’s Trust Territories or possessions. A vessel that is not on a foreign voyage is considered to be on a domestic voyage for the sake of applying these rules to commercial fishing industry vessels.
**Other Information**

**Galley** - a space that provides for extended storage and preparation of food. This does not include small alcohol or propane stoves with limited cooking capability, or ice chests or similar devices that are intended for keeping small quantities of food for short duration.

**Inland Waters** – waters shoreward of the COLREGS Demarcation Line.

**International Voyage** – a voyage from one country to a port outside that country.

**ITC Tonnage** – International Tonnage Convention method to measure a vessel’s tonnage.

**Length** - the length listed on the vessel’s Certificate of Documentation or Certificate of Registry. Length over all (LOA) may be considerably longer than the documented length. LOA is used in reference to the navigation rules.

**Motorboat** - any vessel 65 feet in length or less which is equipped with propulsion machinery.

**Motor Vessel** - any vessel more than 65 feet in length, which is propelled by machinery other than steam.

**Oceangoing** - per 33 CFR 151.05, vessels which operate any time seaward of the outermost boundary of the territorial sea (3 nm) of the U.S.

**Ocean Voyage** - includes waters of any ocean, or the Gulf of Mexico, more than 20nm offshore.

**Operating Station** - the principal steering station on the vessel from which vessel is normally navigated.

**Tonnage** - a measurement used for documenting vessels.

**Use** - operate, navigate, or employ.

**Waters Inside Coastal** – Protected waters where the entrance is less than 2nm wide. Boundary Bay in Washington is considered WIC.
