Format:

- The Table of Contents at the front of the book gives the section number and page numbers for each category.
- Firms are listed in alphabetical order in each category.
- An alphabetical listing of firms with page numbers appears at the back of the directory under Section Three.
- See Example (below) for codes used to identify contact person, phone number, and certifications of each business along with a description of the business, previous clients, date the business was established, the number of employees, sales for the previous year and size of facility.

Example:
If you are looking for a supplier to print a brochure explaining your company’s services or products, go to the front pages (i-iii) and see what categories are listed. You will see a category named Professional Advertising Agencies. Turning to the pages listed for the Professional Advertising Agencies section and you will find that suppliers are listed in alphabetical order.

A typical entry might appear as follows:
