**TESTIMONIALS**

“We use the EI assessment in an educational setting for new police officers to discover their strengths and weaknesses. I appreciate the ability as an administrator to enroll and assign tests myself online without needing to contact anyone personally.”

Lt. Al Kuehl
Staff Development
Rochester Police Department

“Our lead consultant wanted to introduce the EIQ assessment as part of our leadership programs to raise the level of awareness of our managers to the emotional aspect. We piloted the EIQ assessment with managers in Singapore and it was very well received.”

Anne Buquet
People Development and Talent Management
France Telecom
Introduction

About ARCH Profile

ARCH Profile offers the most comprehensive and reliable selection of online assessments available. Developed by our team of experienced psychologists and programmers, our assessments utilize Artificial Intelligence (A.I.) technologies to deliver precise scoring and in depth analysis instantaneously in a user-friendly environment.

Our tests are developed by a team of experienced developers led by Ilona Jerabek, PhD. Our technical team, directed by artificial intelligence (AI) researcher Vrat Jerabek, continuously conducts experiments and simulations to improve the AI systems that handle complicated scoring algorithms. All of the professional tests offered on Psychtests are rigorously developed and based on a thorough statistical analysis. Each test is well researched and designed according to the APA (American Psychological Association) standards for educational and psychological testing.

About Us

Psychtests.com originally appeared on the internet scene in 1997 and is a subsidiary of Plumeus Inc., a privately owned high-tech company specializing in psychological test development and related products and services. While Plumeus is responsible for research and development of high-quality products and services centered on an extensive battery of psychological assessments, Psychtests was conceived as the delivery system of those same solutions. Since its inception, Psychtests has become a pre-eminent provider of psychological assessment products and services to human resource personnel, therapists, academics, researchers and a host of other professionals around the world.
AMI - R (Assessment of Multiple Intelligences - Revised)

Vitals

No. of questions: 55
Question type: Situational, self-report
Estimated completion time: 20 minutes
Shorter versions of assessment: N/A
Recommended age level: 18+
Qualification Level: Class A
Compliance: APA standards; EEOC standards (disability, ethnicity)

Validation Information:
- Sample Size: 10,135
- Cronbach’s Alpha range: 0.64 to 0.79

Features

Benchmarks: Available (general population and 26 industries)
Interview Questions: Available
Group Comparisons: Available

Report Includes:
- Summary
- Introduction
- Graphs
- Detailed narrative interpretation
- Dominant and Least Developed Intelligence Types
- Advice
