In 2010-2011 the NSNA’s Community Health and Disaster Preparedness Committees were combined by the Board of Directors to facilitate coordination of the initiatives undertaken in both areas. Go to www.nsna.org/ProgramActivities/CommHealthDisasterPrep.aspx and click on more on community health for updated information.
INTRODUCTION

Community health involvement by nursing students has become an important contribution to the health and well-being of the total community. Projects carried out at the local level by nursing students provide a service to the community while giving students an opportunity to utilize knowledge and skills. This booklet outlines activities, project ideas and resources available to help plan successful projects.

All NSNA constituents* conducting community health projects are eligible to apply for the NSNA Community Health Activity Award Program. Prizes are awarded for outstanding community health activities. Deadlines for these applications are printed in NSNA News and Imprint and on www.nsna.org. NSNA members serving as state community health chairpersons or directors should go to www.nsna.org and then member Services to update their membership profile and check the Community Health box to be placed on NSNA’s Community Health Memo e-blast list so that they are informed routinely of NSNA’s community health activities.

The following information provides guidelines for planning and implementing projects based on a community needs assessment and resources available. This booklet is a guide to get you started -- there are undoubtedly a variety of resources in your own community. Good luck with your projects!

*Refer to Getting the Pieces to Fit 2010-2011 for constituency information and the Official Application for NSNA Constituency Status which must be submitted to NSNA annually.

PROJECT IDEAS

Many of NSNA’s community health project ideas come from resolutions and positions adopted by the NSNA House of Delegates and the Board of Directors. They cover a wide range of health needs that nursing students are concerned with. Resolutions passed at state conventions will also provide direction for projects. The following is a list of ideas for possible activities:

**School**
- Blood pressure, scoliosis, anemia, glaucoma, vision, hearing screening
- Recycling of paper, metal, glass
- Education about occupational health hazards in the hospital or other health care settings
- Cancer screening and prevention i.e., breast self-exam, mammograms, sun safety
- Adopt a grandparent program
- Nutrition, weight management, exercise
- Domestic violence prevention
- Suicide prevention
- Health needs of college students, (i.e. flu immunization—go to www.flu.gov)
- Drug awareness and recovery services
- Sexually transmitted diseases and AIDS
- Parenting and child safety classes
- Sudden Infant Death Syndrome (SIDS) education
- Birth defects information
- Immunization and well child clinics
- Adolescent and young adult education: harmful effect of steroids; acquaintance/date rape; teenage pregnancy; eating disorders; suicide prevention
- Assisting with Special Olympics
- Fundraising projects
- The homeless: food and clothing drives; drives for shelters
- Education related to environmental health issues i.e., lead, pesticides
- Participation in disaster drills

**State**

Other ideas that work well for state-wide projects are:
- Environmental health education programs; resource recovery projects; occupational safety training.
- Supporting a hospital in need of supplies
- Purchasing equipment for handicapped adults and children
- Organizing a statewide program for AIDS counseling
- Supporting missing children efforts
- Collecting food or clothing for a shelter for the homeless

Note: State conventions are a good collection spot.

Go to the Community Health web page (www.nhsna.org/ProgramActivities/CommunityHealth.aspx) for information that can direct you to materials and resources as you plan your Community Health project.

GETTING STARTED
NSNA encourages state and school chapters to conduct community health projects which will provide beneficial community services.

COMMUNITY ASSESSMENT
Once your school or state chapter has decided to conduct a community health activity, the selection of the activity is determined by assessing the community's health needs. A community can be:

- The students comprising the student body of your nursing program, another student population at your college or university, or may be open to all students (for example, a campus-wide health fair).
- People living in the community where the school of nursing or college/university is located. Segments of this population can be targeted for your project (i.e., elderly, children, high risk groups, women, men, homosexuals, drug abusers, etc.).
- Long-term care facilities, senior citizen centers, adult and child day care centers, rehabilitation centers, pediatric units in acute care settings, centers for homeless individuals and families, public and private schools, are all potential sites for community health projects.

A community assessment is a structured method for determining the health needs profile of a specific community. Students should seek the guidance of a faculty member, preferably one who teaches community health nursing, or from a local public health nursing service for assistance in conducting a community health assessment. In addition, several excellent community health nursing textbooks can provide specific steps for conducting the community assessment.

A community assessment is important since it can help to alleviate health problems by providing needed services that are not being adequately provided through other channels. Here are some general considerations when conducting a community assessment:

- Community Demographics: This information is available from statistics collected by the U.S. Census and is available at the library.
- General demographics can include: sex, race, age, and birth rates. Specific demographics can include: number of homeless people in the community; incidence rates for various communicable diseases such as tuberculosis and AIDS; cancer incidence; and teenage pregnancies. These statistics are available in the library and at the local health department.

Once you have determined what the health problems in your community are, do some research to find out which health problems are being addressed and which are not. Contact local health groups, watch newspapers, and ask community leaders for information about services and projects currently provided. By the process of elimination, you can determine where the needs are and how resources can best be utilized. Once the focus of your project has been determined, plan your project.
PLANNING AND IMPLEMENTING
After completing the community assessment, use the data collected to plan the project. Form a project team to identify goals, the number of nursing students involved, where and when the project will take place, community organizations that might help with the project, and how many people you think might participate. Ask faculty to guide you—especially those faculty who teach community or public health.

Implement the project. Be sure to publicize the activities to the target population. Keep copies of any publicity, photos, flyers, press releases. Remember to thank cooperating community organizations and sponsors for their participation. Recognize those involved in the project by highlighting their participation in newsletters and college newspapers.

Evaluate the project. How was it conducted? What was learned that would be beneficial to others?

2011 NSNA COMMUNITY HEALTH AWARDS PROGRAM
The NSNA 2010-2011 Community Health / Disaster Preparedness Committee will award the following Community Health awards at the NSNA 2011 Annual Convention in Salt Lake City, UT, April 7-11, 2011:

- Most Successful Statewide Community Health Project, Certificate and $100
- Most Successful School Community Health Projects, Certificate and $100

Please refer to the 2011 NSNA Awards and Honors Booklet on the committee web pages (go to www.nsna.org/ProgramActivities/CommHealthDisasterPrep.aspx for more information and the application.

Mark Your Calendars Now!
Completed 2011 Community Health Award applications with supporting materials must be received at NSNA Headquarters by March 11, 5:00 pm ET to be eligible for consideration.

Previous Winners of the NSNA Community Health Awards

2009
Theme: Community Health: It All Starts With You
State Award: Georgia Association of Nursing Students
School Award: Georgia Baptist College of Nursing of Mercer University in Atlanta, Georgia

2010
Theme: Get Fit, Stay Fit: Wellness, Fitness, and Prevention
State Award: Oregon Student Nurses’ Association
School Award: Pittsburg State University in Pittsburg, Kansas
A WORD ABOUT THE IMAGE OF NURSING...
Participating in community activities not only provides an important community service, it also increases visibility for the nursing profession. Every contact we make with the public has a lasting impression. The way we speak, our appearance, and the way we dress and act convey our individual and collective image. We all have a responsibility to enhance and foster a positive image of the profession. Conducting community health projects is one way to let the public know that we care enough about their health and well-being to do something about it.

FOR AWARDS APPLICATIONS AND OTHER INFORMATION
NSNA has model projects which describe award-winning projects and can serve as a guideline when planning similar projects. If you need additional resources or require specific information on a particular community health project, you can write to: Community Health Projects Program, National Student Nurses' Association, 45 Main Street, Suite 606, Brooklyn, NY 11201; phone call (718) 210-0705, or e-mail: nsna@nsna.org.

Community Health Projects School Chapter Committee Responsibilities*
If you do not yet have a community health committee at your school, use the following list of responsibilities to help form one:

1. Evaluate effectiveness of community health activities conducted in the past.

2. Review resolutions relevant to community health that were passed at school, at your state convention and at NSNA’s Annual Convention.

3. Identify two or three goals and a theme for the year.

4. Become familiar with NSNA and state community health contests and applications.

5. Read NSNA’s Community Health Project Guidelines.

6. Conduct a community health needs assessment.

7. Plan and implement a community health project based on community health needs assessment.

8. Publicize community health activities.

9. Initiate and facilitate appropriate partnerships with community health organizations.

*See your chapter bylaws for the Community Health role and responsibilities specific to your school or state chapter.
Earn credit when you Participating in Community Health Projects

As a student leader, you’ll learn and practice important leadership skills by participating in community health projects sponsored by your NSNA school chapter or state association. NSNA members may earn formal credit for the leadership service learning that is inherent in community health activities. Consider approaching faculty to explore the possibility of having your start-a-chapter experience counted toward course requirements or independent study elective credit. Use your course syllabus to see if you can meet the objectives with the following leadership activities.

**Community Health Project Activities**

- Establish a Community Health committee, or;
- Participate in a committee already established.

By participating in this activity, you will be able to:

- Identify and list your personal leadership attributes;
- Evaluate your personal capacity for leadership;
- Demonstrate an understanding of the complex role organizations play to serve the community health needs.

Please visit the New Community Health web page at www.nsna.org/ProgramActivities/CommunityHealth.aspx for more information on how you can earn academic credit and recognition for participating in NSNA’s Community Health Projects Program.

**2010-2011 NSNA Community Health Committee Theme and Goals**

**Prevention: Education is Empowerment**

1. Educate, provide tools, and guide state constituents in the development, planning, and implementation of health literacy programs.
2. Educate members on the proposed Healthy People 2020 objectives and promote the HALT program.

**The NSNA HALT Program for 2010-2011**

NSNA encourages nursing students across the country to keep healthy and take the time to ensure that they eat right, exercise, and find healthy ways to reduce stress. Keep watching the **Community Health pages on the NSNA web site** for tips on healthy habits for daily life as a nursing student from your NSNA colleagues, and how to share some of your own healthy choices for the school year ahead. Watch for details on how you can participate in the **NSNA 59 Days HALT Challenge, January 6—April 6, 2011. Bookmark our web page: www.nsna.org/ProgramActivities/CommunityHealth.aspx to stay in-**

## CALENDAR OF NATIONAL HEALTH OBSERVANCES

### May - continued
- National Hospital and Healthcare Week (May 10-16)
- National Stuttering Awareness Week (May 10-16)
- Fibromyalgia Awareness Day (May 12)
- Florence Nightingale’s Birthday (May 12)
- International Nurses Day (May 12)
- National School Nurse Day (May 12)
- National Nursing Home Week (May 14-20)
- National EMS Week (May 17-23)
- HIV Vaccine Awareness Day (May 18)
- World Hepatitis Day (May 19)
- World No Tobacco Day (May 31)

### June
- Fireworks Safety Month
- Home Safety Month
- National Aphasia Awareness Month
- National Congenital Cytomegalovirus (CMV) Awareness Month
- National Scleroderma Awareness Month
- National Scoliosis Awareness Month
- Sun Safety Week (June 1-7)
- National Cancer Survivors Day (June 6)
- National Headache Awareness Week (June 6-12)
- National Vascular Nursing Week (June 7-13)
- National Nurse Assistant Week (June 10-17)
- National Men’s Health Week (June 15-20)
- World Sickle Cell Day (June 19)
- Lightning Safety Week (June 20-26)
- National HIV Testing Day (June 27)
- Eye Safety Awareness Week (June 27-July 5)

### July
- Cord Blood Awareness Month
- International Group B Strep Awareness Month
- Juvenile Arthritis Awareness Month
- UV Safety Month

### August
- Cataract Awareness Month
- Children’s Eye Health and Safety Month
- National Immunization Awareness Month
- Psoriasis Awareness Month
- Spinal Muscular Atrophy Awareness Month
- National Minority Donor Awareness Day (August 1)
- National Health Center Week (August 8-14)

### September
- Childhood Cancer Month
- Fruit and Veggies - More Matters Month
- Leukemia & Lymphoma Awareness Month
- National Alcohol and Drug Addiction Recovery Month
- National Atrial Fibrillation Awareness Month
- National Cholesterol Education Month
- National Infant Mortality Awareness Month
- National Pediculosis Prevention Month/Head Lice Prevention Month
- National Sickle Cell Month
- Ovarian Cancer Awareness Month
- Prostate Cancer Awareness Month
- Rye’s Syndrome Awareness Month
- Whole Grains Month
- National Suicide Prevention Week (September 5-11)
- National HIV/AIDS and Aging Awareness Day (September 18)
- National Farm Safety & Health Week (September 19-25)
- National Rehabilitation Awareness Celebration (September 19-25)
- World Alzheimer’s Day (September 21)
- Family Health & Fitness Day USA (September 25)
- National Mesothelioma Awareness Day (September 26)
- World Heart Day (September 26)
- World Rabies Day (September 28)

### October
- Eye Injury Prevention Month
- Halloween Safety Month
- National Breast Cancer Awareness Month
- National Celiac Disease Awareness Month
- National Dental Hygieneist/National Dental Hygiene Month
- National Disability Employment Awareness Month
- National Domestic (and Workplace) Violence Awareness Month
- National Down Syndrome Awareness Month
- National Medical Librarians Month
- National Physical Therapy Month
- National Spina Bifida Awareness Month
- Sudden Infant Death Syndrome Awareness Month
- Talk About Prescriptions Month
- National Sarcoidosis Awareness Week (October 1-7)
- National Gerontological Nurses Week (October 1-7)
- National Fire Prevention Week (October 3-9)
- Mental Illness Awareness Week (October 3-9)
- Hearing Aid Awareness Week (October 3-10)
- National Child Health Day (October 5)
- National Nurse-Midwifery Week (October 4-10)
- National Physician Assistants Week (October 6-12)
- World Mental Health Day (October 10)
- Emergency Nurses Week (October 10-16)
- National Depression Screening Day® (October 11)
- Bone and Joint Decade National Action Week (October 12-20)
- Metastatic Breast Cancer Awareness Day (October 13)
2010 NSNA Resolution #8: Adopted by the 2010 NSNA House of Delegates, April 7-10, 2010 in Lake Buena Vista, Florida.

IN SUPPORT OF INCREASED EDUCATION IN SELF-CARE AWARENESS FOR NURSING STUDENTS AND NURSES

SUBMITTED BY: The College of New Rochelle

WHEREAS, self care is referred to as an active role a person participates in to maintain and/or improve one’s health and wellbeing; and

WHEREAS, in order for self care to be effective, nurses need to evaluate their level of self appreciation before they can present themselves as instruments of healing for their patients; and

WHEREAS, working beyond scheduled hours and experiencing exhaustion are factors that place the nurse at a three times higher risk for medication errors, and inadequate sleep can impair sound judgment and vital decision making which compromises patient safety; and

WHEREAS, stress management techniques such as healthy eating, daily exercise regimen, positive affirmation, meditation, self awareness, peer/collegial support network, and effective time management skills can prevent or alleviate psychological and physical stressors that nursing students may have during their intense nursing curriculum and that nurses may experience in their intense working environment; and

WHEREAS, stress management techniques such as healthy eating, daily exercise regimen, positive affirmation, meditation, self awareness, peer/collegial support network, and effective time management skills can prevent or alleviate psychological and physical stressors that nursing students may have during their intense nursing curriculum and that nurses may experience in their intense working environment; and

WHEREAS, one study reports that nurses felt energetic and revitalized after having their complete meal break without interruption and away from the unit, colleague teamwork improved, and patient satisfaction increased; and

WHEREAS, the nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth; therefore be it

RESOLVED, that the National Student Nurses’ Association (NSNA) advocate for its constituents to support increased education about self-care awareness and practices for nursing students and nurses; and be it further

RESOLVED, that the NSNA encourage its constituents to become involved in efforts to promote daily self-care practices such as self-reflection, relaxation, guided imagery techniques, improved nutrition, exercise, and effective time management; and be it further

RESOLVED, that the NSNA publish an article on self-care awareness for nurses and nursing students in Imprint, if feasible; and be it further

RESOLVED, that the NSNA send a copy of this resolution to the NSNA constituents, the American Association of Colleges of Nursing, the American Holistic Nurses’ Association, the National League for Nursing, the American Nurses Association, the American Nurse, the American Journal of Nursing, the National Organization for Associate Degree Nursing, and any others deemed appropriate by the NSNA Board of Directors.
