Reinvent protection

HP Secure Managed Print Services

64% of IT managers state their printers are likely infected with malware.

73% of CISOs expect a major security breach within a year.

$7.7M is the average annual cost of cyber crime.
We reinvented managed print services so you can better protect your business.

Cybercrime, internal breaches, compliance infringement and more can hurt your business. In addition to expensive fines and lawsuits, a security breach can result in a damaged reputation and loss of business.

Although many IT departments rigorously apply security measures to computers and the network, printing and imaging devices are often overlooked. As threats continue to evolve, printers can offer opportunities for attackers to compromise the device, your data, or the entire network.

Since security is mission-critical, HP Secure Managed Print Services (MPS) provides the advanced protections you need with the most comprehensive device, data and document security. Plus, we provide the expertise to help you develop and deploy your print security strategy and then maintain your print environment over time.

Get comprehensive security for devices, data and documents
Strong security starts with the world’s most secure printers. HP Secure MPS provides you with HP Enterprise printers and MFPs with self-healing security features, and then helps you properly configure them to your security policy and proactively maintain them against ever-changing security challenges.

HP Secure MPS deploys the latest security tools to protect and monitor your HP printer fleet while providing you with the visibility and reporting necessary for proof-of-compliance to regulations.

Rely on HP’s security innovation and expertise
HP Secure MPS security consultants work with you to:

• Assess your print security vulnerabilities.
• Build a comprehensive print security policy based on business needs and best practices.
• Identify and implement solution recommendations to achieve and maintain improved security within your unique environment.

Trust HP to help you stay up-to-date with the latest security innovations through periodic reviews. Even breakthrough technologies like run-time intrusion detection can be added to your existing fleet via the upgradeable FutureSmart Firmware in HP Enterprise devices.

Improve transparency, governance and compliance
HP Secure MPS provides the expertise to help you meet complicated compliance requirements and avoid fines with documented plans and visibility into print fleet security status. It’s easy with the automated reporting capabilities of HP JetAdvantage Security Manager. Plus, we can help you integrate printer event data into the major security monitoring and incident detection tools, such as HP ArcSight or Splunk.
HP Secure MPS can help you close the security gap

Critical gaps can occur at multiple points within your environment. Creating a complete imaging and printing security strategy requires coordinated protection of devices, data, and documents, plus comprehensive security monitoring and reporting solutions.

Get the help you need to protect your business

The HP Secure MPS offering includes the world’s most secure printers, with built-in, self-healing features. (For details, see hp.com/go/PrintersThatProtect.) But printing and imaging security isn’t just about device security. It’s a comprehensive strategy that includes solutions to help secure data and documents; visibility and reporting to optimise your environment and meet compliance regulations; and maintenance of your print security over time.

Comprehensive print security can impact the whole organisation, with potential trade-offs in costs, productivity, risk and benefit. HP Secure MPS advisors have the experience to help you navigate these options to develop and implement a plan that fits your business needs. With HP Secure MPS, you can be confident that your print environment has the strongest protection available in the industry, proactively maintained over time to address evolving threats and compliance requirements. To reinvent your printing protection, contact your HP representative today.
