Note: DeVry's academic catalog, available via www.devry.edu/uscatalog, contains the most current and detailed program information, including graduation requirements.
DeVry University’s Bachelor's degree in Technical Management can help prepare you for the workplace with a solid business foundation. Our specialization in Human Resource Management can further focus your studies and help equip you for the career you want to pursue.

Human resource management focuses on an organization's most precious asset: the people who, individually and collectively, are responsible for its success. Human resource managers play an important role in helping to plan and direct hiring practices, employee benefits and relations programs, and training and development.

Our Human Resource Management specialization can help you learn about designing and reviewing pay structures; developing and enforcing employee policies; communicating to employees about benefits; developing or selecting systems to run or improve payroll; insurance benefits and other areas of compensation; and working with the executive team to develop short and long-term hiring and employment goals.

This specialization's coursework covers such topics as employment law, HR information systems, staffing, training, development, compensation and benefits.

Graduates of DeVry University's Technical Management program with a specialization in Human Resource Management may consider careers including:

- Human Resource Generalist
- Employee Benefits Specialist
- Employment Law Specialist
- Training and Development Manager

According to the Bureau of Labor Statistics, employment of human resources and training and labor relations managers and specialists is expected to grow by 22 percent between 2008 and 2018, much faster than the average for all occupations. According to its Occupational Outlook Handbook, "legislation and court rulings revising standards in various areas — occupational safety and health, equal employment opportunity, wages, healthcare, retirement plans, and family leave, among others — will increase demand for human resources, training, and labor relations experts."
