A STRIKING NEW ADDITION TO WINNEBAGO’S LINEUP OF MOTOR HOMES.

INTRODUCING THE 2006 WINNEBAGO VIEW.

From the moment you lay eyes on the View, you know you’ve found a motor home like no other. Whether it’s the exterior styling, cab, lounge or galley, you’ll see innovations that maximize function and style at every turn. Check out the interior cabinetry featuring curved lines that not only look great, but also increase available storage space. A stainless steel galley sink is sized to accommodate large pans with ease. The View’s interior climate is just as inviting, with day/night pleated shades, floor-ducted heat and ceiling-ducted air conditioning. Choose the available heat pump and take the chill off a cool morning without using LP.

The skylight — another unique View feature — opens as a fresh air vent complete with retractable screen and sun shade. The dinette features comfortable seating for four as well as a child-seat tether in the forward-facing seat (23J only), and it easily converts to a comfortable bed. A 15" LCD TV with DVD player is mounted above the dinette for your viewing pleasure. The TV even retracts into the overhead when not in use (23J only).

Don’t let the open layout fool you; there’s no shortage of available storage in the View. There are large overhead cabinets with handy open shelves below, easy-to-access under dinette storage, underbed storage in the 23J and even expandable storage in the rear wardrobe of the 23H.
A NEW KIND OF MOTOR HOME.

The View differs from many Class C motor homes in that it gets its power from a 2.7 liter Mercedes-Benz diesel engine. The 5-cylinder turbo-diesel is remarkably quiet, delivering both consistent power and diesel fuel efficiency. An electronically controlled automatic transmission and power rack-and-pinion steering give the View excellent drivability and a tight turning radius. Four-wheel ABS disc brakes with automatic skid control provide added peace of mind on slippery roads. Getting in the View is a breeze too, thanks to cab doors that open nearly 90 degrees.

The living area is also easy to get to, thanks to the large opening provided by our exclusive cutaway chassis design, coupled with the spacious (49\" x 75\") overhead bunk that easily flips up and out of the way. Or you can choose the front overhead storage cabinet on the 23J floorplan.

NEW FOR THE KITCHEN AND BATH.

Modern design influences are also apparent in the galley’s beautiful curved cabinet doors with satin nickel hardware. The full-extension drawer slides provide easy access to all your stored items. You’ll appreciate the stylish functionality of the Sharp\textsuperscript{®} microwave/convection oven and three-burner range top with storage below. Add the optional cold-water purification system to the galley sink for a refreshing drink of filtered water anytime.

Step into the bath area and you’ll notice chrome fixtures; a stainless steel sink; and an innovative retractable shower door. A flexible showerhead makes showering easy, while the removable clothes rod gives you additional storage. More storage space is also available in the mirrored-door medicine cabinet, the vanity cabinet and the wardrobe.
THE COCKPIT OF YOUR DREAMS.
The cab of the View puts all controls within easy reach. State-of-the-art features include a flip-out key that is electronically encoded for anti-theft security. The power door lock remote is built into the handle, eliminating the need for a separate transmitter. A Sirius® satellite-ready, Clarion® AM/FM/CD in-dash radio with wireless remote allows you to enjoy your favorite music or talk radio. When parked, save the engine battery and run the radio on the house batteries by flipping the radio power switch. To make parking easier than ever, choose the available rearview monitor with one-way audio. Creative use of space, such as the storage designed into the driver and passenger doors, is just another example of what sets the View apart.

LOOKS AND FEELS GREAT.
Every driving experience should be as enjoyable as it is in the View. Once behind the wheel, you’ll immediately notice the comfort of adjustable driver and passenger seats. These comly seats come standard and allow you to slide, recline and dial in the adjustable lumbar support. A handy dash clip puts maps and directions at your fingertips. A plush carpet floor mat in the cab area can be removed for quick cleanup. And for your safety, driver and passenger airbags come standard. For a luxurious touch, choose the optional Brushed Aluminum appliqué for the instrument panel and beverage holder.
WINNEBAGO INNOVATIONS AND QUALITY THROUGHOUT.

Bring your favorite towable plaything along using the beefy 3,500-pound hitch with 350-pound vertical tongue weight. You can keep dirt and grime off your belongings with the sealed lid on our slideout storage bin. It even includes a drain plug for added versatility. Our innovative TrueLevel™ tank monitoring system uses Mirus® detector cells on the water storage tanks to precisely determine liquid levels from outside the tank, putting an end to inaccurate tank-level readings. Versatile storage is made possible by our innovative mattress configuration. The rear mattress is made in two parts, allowing you to slide the outer mattress in, exposing a large underbed storage area that can be accessed from inside or outside the motor home, perfect for bikes, golf bags or other large items. The exterior service center houses many vital motor home utilities, including city water hookup and available exterior shower with pump switch. Electrical center hookups can also be found here, including the power cord with QuickPort® service connection hatch, cable TV connection and a portable satellite dish hookup.

Keep you and your loved ones protected from the heat of the midday sun with the available exterior awning. Our fiberglass roof resists chalking and outlasts our competitors' rubber roofs. The contoured lower ABS valance panels and doors are rustproof and resist denting and chipping. Wheel covers and a spare tire cover come standard, or upgrade by choosing the available stylized aluminum wheels. Keep the windshield clean with the help of the built-in steps found on the front bumper. Reaching the roof is equally hassle-free, thanks to the rear fold-down exterior ladder. Choose the available Onan® MicroQuiet™ 3600 generator for power anywhere the road takes you.
The View gives you the choice of two exciting floorplans that blend Winnebago quality construction with the latest in modern design and innovative features.

ATTENTION TO DETAIL. INSIDE AND OUT.
We believe the same high standards we apply to construction should apply to interior design. That's why we design efficient floorplans based on customer input and why we select comfortable and durable fabrics in pleasing colors.
Each and every part that goes into our motor homes is well thought out. From the nap of the carpet we choose to the capacity of the refrigerator, no detail is too small to avoid our scrutiny.

5. Specifications based on most recent information available.
NOT ALL MOTOR HOMES ARE CREATED EQUAL. As you take a closer look, you’ll see that there is much more to the Winnebago View than a long list of standard features and compelling floor plans. Beneath it all you’ll find a SuperStructure® foundation of strength and durability, and Winnebago Industries’ recognized service and warranty support.

We are committed to service. We back our motor homes with the best after-the-sale service in the industry. This includes a 12-month/15,000-mile basic limited warranty; 36-month/36,000-mile warranty on structure; standard 10-year limited parts- and-labor roof skin warranty; and complimentary 24-hour Roadside Assistance Program. TripSaver Fast Track Parts guarantees that in-stock warranty parts ship directly to your dealer within 24 hours. Winnebago Industries has a nationwide dealer service network.

Certified quality. Recreation Vehicle Dealer Association members annually rate RV manufacturers on the quality of their products, and on their sales and service support. Winnebago Industries has achieved the coveted Quality Circle Award every year since its inception, the only RV manufacturer to do so.

Warning: Joining WIT has been known to cause excessive fun. Winnebago-Itasca Travelers (WIT) is a club for owners of Winnebago Industries motor homes. WIT is a great way to meet people and offers you caravans and rallies, local and state group activities, and other benefits for RVers.

SUPERSTRUCTURE is the term given to Winnebago Industries’ structural motor home design and construction. Rather than a single component, it is the culmination of design integration that incorporates steel and aluminum substructures; welded tubular aluminum floor supports; interlocking joint technology; and Thermo-Panel® floor, roof and sidewalls to form a high-strength, durable vehicle body.

Thermo-Panel manufacturing combines a durable fiberglass exterior panel with welded aluminum support substructures. The substructures are embedded in a high-density, block-foam insulation core to create a strong, durable, yet lightweight sidewall. Just another Winnebago Industries’ invention.

A Interlocking joint construction utilizes advanced extruded aluminum structural components to create integrated floor-to-sidewall and sidewall-to-roof joints. This design effectively distributes the weight of the walls and roof, making a stronger and more durable body than competitor designs that rely on screws to carry the weight.

B The foundation substructure assembly is precision-aligned to maximize strength and cross-coach support as well as durability.

C Tubular aluminum floor supports provide a stable base for the floor structure and storage compartments.

D Critical steel components are treated using an advanced electrodeposition coating process that provides superior corrosion protection.

Seat belts are your most important hookup. Always buckle up.

BUILT TO A HIGHER STANDARD.
The View features a crowned, one-piece fiberglass roof skin backed with a 10-year limited parts- and-labor roof skin warranty. Fiberglass offers superior strength, attractiveness and durability compared to rubber roofs found on many competitive models. Over time, rubber roofs are susceptible to chalking, streaking and degradation, and have less puncture and tear resistance than fiberglass.
