Discover our Inspiration: Olive Oil - The Liquid Gold

For thousands of years the ancient Greeks have used olive oil to effectively care for their body, skin and hair. Hippocrates called olive oil the Great Therapeutic because of its great health and healing properties.

Why Olive Oil?

Olive oil is one of the most superior substances on earth for good health and great skin. In fact, when compared to other vegetable oils commonly used in personal care, it has the most similar lipid composition to that of the human skin. This allows it to penetrate pores very deeply and to hold in moisture without clogging.

Bursting in nutrients - triglycerides with a high oleic acid content, vitamins & anti-oxidants - olive oil helps in the capturing of free radicals, delaying the skin cells ageing, and providing long lasting moisture.

This liquid gold is truly one of Mother Nature’s finest gifts for beautiful, healthy glowing skin. A gift that we are proud to trust as the key ingredient in our entire product collection.

Did you know?

Minoans, the ancient Cretans, were among the first to cultivate and use olive oil in their daily activities.
Our all natural olive oil based emulsifier generates biomimetic, skin-compatible liquid crystals that can act as a delivery system to **allow the pure plant-based active ingredients to penetrate deeper in the dermis** for more targeted and effective result. **This innovating technology brings our precious oils and extracts exactly where they are needed to be for beautiful, even & vibrant skin.**

Clinical studies have shown that the application of the olive liquid crystals increases the integrity of the stratum corneum barrier function ensuring maximal protection from harsh environmental insults.

The unique combination of organic Cretan Olive oil with the olive oil liquid crystals special structure was carefully incorporated in our formulas to bring to you products that offer:

- Short- and long-term hydration
- Improved skin tone & elasticity
- Prevention of the trans-epidermal water loss
- Integration of the skin barrier function
- Protection against the environmental stress
- Promotion of skin luminescence
