A positive reflection. Our CoolStar™, Landmark Solaris™ Collection and Presidential Solaris products are ENERGY STAR® and Cool Roof Rating Council certified, and they reflect away the sun’s rays, lowering rooftop and attic temperatures.

Steep energy costs go low. Our reflective products for both steep- and low-slope roofing reduce energy costs and CO2 emissions by keeping buildings cooler inside.

ECO-LOGICAL: Brilliance and reflectivity. We integrate recycled content into packaging materials, including corrugated rolls and Kraft paper.

Coveting our tracks. By generating zero manufacturing waste, production of our Landmark shingles keeps waste out of landfills.

Reaching for the ENERGY STARS. CertainTeed was chosen by the U.S. Environmental Protection Agency from more than 12,000 organizations. The prestigious award recognizes CertainTeed for accomplishments and continued leadership in reducing greenhouse gas emissions.

Green is a lot of things to a lot of people. To us, green is simple. Green means responsibility. And we believe responsibility is key to building the structures that sustain our lives. Green represents our responsibility to our customers and the places they inhabit.

Which is why CertainTeed’s ENERGY STAR®-rated roofing products are more energy-efficient than standard roofing products by exceeding ENERGY STAR standards in both solar reflectance and thermal emittance.

And also because green means money. For you.

The complete package. By generating zero manufacturing waste, production of our Landmark shingles keeps waste out of landfills.

The Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 extends tax credits for energy efficiency into 2011, but at lower levels. The new tax credit allows for 10% of the cost of the improvement, up to $500 for insulation, roofs and doors.

CertainTeed certifies the following roofing materials and systems as “Eligible Building Envelope Components” that qualify for federal tax credits for existing structures, with the exception of Symphony, which is a composite slate product and does not qualify for tax credits like asphalt shingles do. However, Symphony is an ENERGY STAR® rated product.

With such incentives in place, now is the time for us all to become a bit more responsible.

After all, green also means “go.”
STEEP-SLOPE SHINGLES

- SR value of at least 25%
- Lifetime limited warranty
- UL Certified

SYMPHONY STAR

Enduring architecture, sleekness and historic detailing by combining. Symphony composite slate roofing makes a stunning appearance on virtually every surrounding. Its smooth, gray wavelengths contrasts the face of the eagle with impeccable precision. Fine lines, Durham tones, gradients and dimension..

- 10-year SureStart™ Protection
- UL Certified
- 10-year SureStart™ Protection
- UL Certified

LANDMARK SOLARIS

Solar reflective asphalt roofing shingles with advanced colored granules that reflect the sun's rays and can reduce a roof's temperature by as much as 20 percent in the summer.

- 7-year SureStart™ Protection
- UL Certified
- 10-year SureStart™ Protection
- UL Certified

SYMPHONY PREMIUM

- 20-year limited transferrable warranty
- Polyester cap sheet w/ fine granule surfacing
- pound weight fire resistant cap sheet
- Fire resistant SBS modified, fiber glass in commercial applications. The CoolStar™ versions of low-slope roofing products qualify for use on slopes greater than 2”. The CoolStar™ coated roofing membranes are ENERGystar rated when used in commercial applications. These CoolStar™ versions of low-slope roofing products are also used for roof system flashings.
