Configuring your Phone

Configuring via web user interface

Accessing the web user interface:
1. Press the OK key when the phone is idle to get the IP address of the phone.
2. Open the web browser of your computer, enter the IP address into the address bar (e.g., “http://192.168.0.10” or “192.168.0.10”) and press Enter.
3. Enter the user name (default: admin) and password (default: admin) in the login page and click Confirm.

Note: Please locate your computer in the same network segment of the IP phone (192.168.0.X) to access the web user interface. Contact your system administrator for more information.

Network Settings: Click on Network -> Basic -> IPv4 Config

You can configure the network settings in the following ways:
- DHCP: By default, the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.
- Static IP Address: If your phone can not contact a DHCP server for any reason, you need to configure IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.
- PPPoE: If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. Contact the ITSP for the account and password.

Note: The wrong network settings may result in inaccessibility of your phone and may have an impact on the network performance. Contact your system administrator for more information.

Account Settings: Click on Account -> Account X (X=1,2,3,4,5,6)

Parameters of the account:
- Register Status: It shows the register status of the current account.
- Account Active: You can select Enabled/Disabled to enable/disable the account.
- Label: It is shown on the LCD to identify the account.
- Display Name: It is shown as Caller ID when placing a call.
- User Name: It is provided by ITSP for registration (required).
- Register Name: It is authenticated ID for authentication provided by ITSP (required).
- Server Host: It is provided by ITSP for registration (required).

Register status icons on the LCD screen:

Note: Check with your system administrator if any error appears during the registration process or if a specific configuration is required for your registration.

Configuring via phone user interface

Network Settings:
Press the Menu soft key when the phone is idle, select Advanced (password: admin) -> Network -> WAN Port/VLAN/Webserver Type/B02.1x/VPN to configure the network.

Account Settings:
Press the Menu soft key when the phone is idle, select Advanced (password: admin) -> Account to configure the account.

Note: Refer to Configuring via web user interface for the parameter information.
Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

- IP Phone
- Handset
- Stand
- Wall Mount Bracket (Optional)
- Power Adapter (Optional)
- Quick Installation Guide & Quick Reference Guide
- Ethernet Cable
- CD-ROM
- Handset Cord

Assembling the Phone

1. Attach the stand or the optional wall mount bracket, as shown below:

- Desk Mount Method
- Wall Mount Method (Optional)

2. Connect the handset, optional headset and Bluetooth headset, as shown below:

- Bluetooth-compatible USB Adapter

3. Connect the network and power, as shown below:

You have two options for network and power connections. Your system administrator will advise you on which one to use.

a. AC Power (Optional)

b. PoE (Power over Ethernet)

Note: If inline power (PoE) is provided, you don’t need to connect the power adapter. Make sure the Ethernet cable and hub/switch are PoE compliant.

Startup

After the IP phone has been connected to the network and supplied with power, it automatically begins a process of initializing itself on the network. After that, you can begin to configure the phone via web user interface or phone user interface.

Note: The headset and Bluetooth headset should be purchased separately.
