Acknowledgements

The Middletown Preschool Program would like to acknowledge the contribution of the Bristol Public Schools for providing the district access to their Preschool Curriculum. The Bristol Preschool Curriculum was utilized as a framework for Middletown’s Preschool Curriculum revisions. These revisions were a coordinated effort among Middletown Public School educators and School Readiness preschool and child-care providers. The curriculum was aligned with Middletown’s Language Arts and Math Curriculum, and the Connecticut Preschool Curriculum Framework. The following committee members are acknowledged and commended for their contributions to the development of the curriculum.

Middletown Public Schools
- Cathie Osiecki: Math Resource Teacher
- Amy Radikas: K-5 Language Arts Coordinator
- Melissa Gonzalez-Moreno: Preschool Coordinator
- Sally Kensel: Kindergarten Teachers
- Sandra Cardella: Kindergarten Teacher
- Colleen Fitzpatrick: Kindergarten Teacher
- Tracey Bielenda: Preschool Teacher
- Keavy Peterson: Preschool Teacher
- Allison Dykas: Preschool Teacher
- Christine Fahey: School Readiness Coordinator

Middletown School Readiness
- Susan Hunter: Kiddie World Early Learning Center
- Hillary Phelps: Middlesex Community College
- Shannon Crossland: YMCA Phelps Ingersoll Center for Children
Statement of Philosophy and Goals

The Middletown Preschool Program is committed to providing a high quality preschool experience for all children it serves. We are sensitive to the social, emotional, language, cognitive, self-care, and motor needs of each child. We believe that children are best able to achieve their full potential through a positive self-esteem and a love of learning. We believe in the importance of providing a well-designed and safe facility; an environment that honors all ethnic groups, religions, genders, and abilities; and the vital role that parents play in their child’s preschool experience.

The following goals guide us toward our vision of learning, growth, and fulfillment for all of our children:

1. Through the provision of a safe, caring, and supportive environment, our children will continue to develop in social, cognitive, language, motor, and self-help areas, with their current level of development serving as the focus of our beginning efforts.

2. Recognizing that language, speech, and all forms of non-verbal communication serve as the medium for learning, play, and social connectedness, developing communication skills will serve as a major focus of our daily activities.

3. In the classroom and on the playground, our children will experience school as an enjoyable activity, and will thus develop a life-long love of learning, inquiry, and play.

4. Through the total preschool experience, our children will become familiar with the routine and structured experiences of school and will thus become prepared for learning environments beyond preschool.

5. Staff and administrators will develop meaningful and supportive relationships with parents for the purpose of facilitating children’s growth and learning at home and school.

6. Staff and administration will foster children’s positive self-image, independence, self-discipline, confidence, and appreciation of diversity.
## PERSONAL-SOCIAL DEVELOPMENT

### Content Standard
**Personal/Social**

*Preschool programs will provide children with opportunities to exhibit curiosity, creativity, self-direction and persistence in learning situations.*

(#1) **Performance Standard:** Student will

*Engage in activities that he/she selects or creates and demonstrate self-direction in use of materials.*

### PreK-12 Expectations for Student Learning

**Student will acquire the skills and disposition for learning.**

Frequently Used Instructional Strategies

These are definitions of some of the frequently used instructional strategies used in the elementary school language arts programs.

**Read Aloud**

Teachers select and read books or other materials to students in a whole class setting or small groups. A variety of texts, rich in meaning or language, are read daily and used as the basis for other activities. Through this process teachers provide support for students to access text and provide opportunities to respond to pictures, meaning and language.

**Shared Reading**

Teachers and students read and reread carefully selected texts in unison. The teacher consistently models effective reading strategies and behaviors for the students to use.

**Guided Reading**

Teachers work daily with small groups of students who have similar reading processes. Materials are chosen based on the instructional level of the students. Teachers select and introduce new books by assessing what students already know and can demonstrate. Through guided reading teachers reinforce reading strategies and continually monitor student progress.

**Independent Reading**

Children are given time daily to read appropriate materials. This time provides students an opportunity to apply various reading strategies and sustain reading behavior independently with little or no teacher support.

Teachers in Grades 4 and 5 enrich students’ reading experiences with the use of literature circles. Literature circles are a means for students to discuss books and stories they have read to enhance their comprehension.

Teachers provide print-rich classroom environments that are supportive of students’ literacy development. They provide students with opportunities throughout the day to read and write for a purpose.
In addition to the four types of reading, there are also four types of writing that are woven into the Middletown Public Schools literacy framework. These include shared writing, interactive writing, writer’s workshop and independent writing.

**Shared Writing**

Teachers and students work together to compose messages and stories. The teacher demonstrates how writing works and provides opportunities to draw attention to letters, words and sounds. This process provides students with an opportunity to record and create written language.

**Interactive Writing**

Teachers and students compose messages and stories using a “shared pen” technique that involves students in the writing process. The process demonstrates concepts about print, early reading/writing strategies and how words work. It also provides opportunities for students to hear sounds in words, make appropriate sound/symbol connections, as well as create written language resources in the classroom.

**Writer’s Workshop**

Students write for a variety of purposes. Teachers guide students through mini-lessons and conferences. This process teaches students to develop their voice and provides opportunities for students to learn how to write across the curriculum.

**Independent Writing**

Students are provided opportunities for the independent production of a variety of written texts. This extends the use of writing for varied purposes across the curriculum.
