Armstrong
Inspiring Great Spaces™

Armstrong is a leader in the design and manufacture of floors and ceilings. We provide a portfolio of residential and commercial products and services developed to inspire our customers to deliver the exceptional interiors they envision for themselves and their clients. At home, at work, in hospitals, classrooms, stores, or restaurants, Armstrong offers innovative interior solutions that help to enhance comfort, save time, improve building efficiency and overall performance, and create beautiful spaces, from Dubai to Shanghai, New York to Sao Paolo.
What began more than 150 years ago has grown to become Armstrong World Industries, a global, multi-billion corporation with thousands of employees around the world.

Armstrong has flourished, in times of prosperity, change and challenge, because we’ve always been the company that could be trusted to deliver quality products when we said we would. At a time when most companies operated under the premise, “let the buyer beware,” we grew stronger on the principle, “let the buyer have faith.”

Built on Trust

Armstrong has flourished, in times of prosperity, change and challenge, because we’ve always been the company that could be trusted to deliver quality products when we said we would. At a time when most companies operated under the premise, “let the buyer beware,” we grew stronger on the principle, “let the buyer have faith.”
Our innovation led to the development of acoustic ceiling products that can improve learning in schools and hasten healing in hospitals. It’s our innovation that brought about American Scrape, our collection of hardwood flooring that captures the warmth and character homeowners want from interior finishes today.

Our research and development teams are constantly looking for ways to improve our product and service portfolio. With new and sustainable ceiling and flooring solutions, we’re able to help expand design possibilities, empowering our customers to create beautiful, high-performance homes, offices, healthcare facilities, schools, airports and retail spaces.

INNOVATION IN SUSTAINABILITY
Striations BioBased Tile® (BBT) is an award-winning floor that delivers a stylish, linear aesthetic. Made of 85% limestone and 10% pre-consumer recycled content, BBT contains BioStride®, a revolutionary patent-pending polymer made with rapidly renewable, American-grown plant ingredients.

INNOVATION IN EFFICIENCY
CoolZone absorbs heat and energy during the day and releases it at night to keep interior spaces at a steady, comfortable temperature around the clock, saving energy for building owners. Available in the UK only.

INNOVATION IN LIVING
Architectural Remnants laminate provides the look of reclaimed wood flooring, with a more practical application. It’s made with HYDRACORE™ PLUS which gives it a more substantial feel and the solid sound of real hardwood. Its finish, VISIONGUARD®, protects the floor’s surface from stains, fading and everyday wear, making cleaning – and living – easier.
Driven to Deliver

At Armstrong, our inspiration starts with our customers. What do they need? What do they want? How can we help? What improvements can we make to our business, our products and our services to make life simpler, easier, smoother for them?

We collaborate with architects, designers, homeowners and contractors to deliver solutions that bring their ideas to life, in ways that benefit people and the planet. We draw inspiration, and fulfillment, from the knowledge the products we develop contribute to the healthier, smarter, more inspiring spaces our customers design every day.
We have a long-standing reputation for sustainable innovation. We were the first to establish a ceiling recycling program that’s diverted thousands of tons of construction waste from landfills. We’ve since expanded that program to Europe and started a vinyl flooring recycling program in the U.S. We develop products that have lower environmental footprints, and in some cases, reduce the environmental footprints of the buildings where they are installed.

We have a rigorous product stewardship and quality program with internal tests and standards – from product design and manufacture through to performance attributes and ease-of-installation – that often exceed legal requirements.

Our steady pursuit of an injury-free workplace has earned us a world class safety record within the manufacturing sector. And, we develop our products with the goal of helping to create safer buildings with fire, seismic and slip-resistant performance.

Our ethics program was in place long before it was required by law. We take responsibility for our actions and demonstrate character in how we behave, make decisions and communicate which includes abiding by the law and company policies everywhere we operate.

We have participated in United Way fundraising campaigns since 1924 with millions of dollars and volunteer hours; we’re often the largest donor in communities where we operate. The Armstrong Foundation, established in 1985, has contributed more than $30 million to global disaster relief, educational institutions and scholarship programs, and worthy charities.

In the majority of schools, students only hear 3 out of 4 words. When schools choose Armstrong acoustical ceilings, kids can hear every word – when they’re not busy passing notes – which helps them learn better. And that’s not all – in hospitals patients heal faster with less noise, and in the workplace, employees can be more productive.
Committed to Our Partners

We exist because of the customers that buy and install our products; the employees that bring their passion and their commitment to work every day; the shareholders that invest in our company; and the communities where we live and work.

Through the development of innovative products that are best in class in all of the markets we serve, we deliver what our customers want and need, when and how they need it.

By establishing our principles on a foundation of candor, commitment, inclusion and integrity, we continue to build a brand culture where boldness prospers and ideas flourish.

In employing thousands of people globally at our manufacturing facilities, sales operations and business offices, we help create vibrant local economies and thriving international ones.

Because we’re committed to disciplined spending, prudent balance sheet management and investment in growth, we continue to drive value for our shareholders.
