Objective:

Two words driving the engine of growth in the contemporary world today are Information and Technology. Today’s society is knowledge society wherein the technology regulates production and dissemination this knowledge. Information Technology (IT) these days stands as the single factor contributing to rapid change of any political economy. All of us are in some or other ways are indispensable part of this drive of change. The history any economy can now be divided into two eras, the time before IT and after it. Recent advancements in Information Technology have revolutionized almost all the arenas of human endeavor. Cyber world has delimited entire world in the form of a globalised information hub. Consequently information security issues and regulatory mechanism has developed a complex system. To understand the dynamics of information security and cyber law matrix, techno-legal professionals with the blended skills of law and technology are highly required. This course aims to develop the skills to imbibe the Information Security issues at technological ground and then relate it to complex cyber world legal problems. It gives a detailed understanding of national and international regulatory paradigms and its mechanics regarding Cyber Law.
