A small investment that pays off.

You work hard for your living and you expect your equipment to do the same.

In your book the ideal machine is one that never stops, doesn’t complain and won’t quit until you’re through. That’s why you chose John Deere.

So when it’s time for maintenance, be sure to ask your dealer for genuine John Deere parts and accessories. Because when you give your machines the best, they’ll repay you many times over with higher performance, lower fuel consumption and years of faithful service.

“I will never put my name on a product that does not have in it the best that is in me.”

John Deere

FOR LIKE-NEW PERFORMANCE, TRUST THE ORIGINAL.

Made for each other.

At John Deere, we take quality seriously. So when you buy genuine John Deere parts, you can be sure they are every bit as good as the original you’re replacing. Built by the same people who made your equipment, they slot right in and work perfectly every time. No risk, no hassle … just good-as-new performance for years and years to come.

Nothing comes close.

It’s a fact: only genuine John Deere parts meet our original John Deere specifications. So if it doesn’t say John Deere on the box, you might be getting more than you bargained for inside. Because while alternatives may look the same or even cost a little less, one thing is for sure: they simply weren’t built for the job.

At your service.

Better still, you can order everything you need from the same place, easily and quickly. Your John Deere dealer has a huge stock of genuine John Deere products on the shelf and can order anything else you need overnight. Pick up or delivery, invoice or COD, you decide what suits you best and with our online JDParts service, you can order everything yourself too, any time of the day or night.

Why settle for less?

So next time you do some maintenance, choose wisely – choose genuine John Deere parts. You’ll be doing yourself and your equipment a big favour. After all, you only get out what you put in and when it’s like new performance and reliability you’re after, there is simply no alternative to quality.

Next-day delivery.

Need a repair part for your John Deere? With our next-day delivery service, you can be back in the field in hours – not days.

The national parts depot in Nottingham, England is backed up by our European Parts Distribution Centre in Bruchsal (Germany) supplies service parts to dealers all over the world.

At John Deere, we believe in quality all round.

So when it comes to service, we do everything we can to make sure you always get the best. Your John Deere dealership has everything you need to keep your equipment in good shape. Drop by soon!

We hate downtime too.

When you need a maintenance part fast, you’ll be glad you chose John Deere. Our dealers are down to earth people who know your equipment like the back of their hand. So when you call them up from the middle of nowhere, they won’t ask for a list of part numbers first. They’ll just do what it takes to keep you and your business running smoothly.

At John Deere Original Equipment Parts, Consumables, Supplies and Accessories.

• Comply with John Deere specifications and technical standards
• Meet the specific requirements of your machine
• Fit perfectly to minimise installation time
• Maintain like-new performance
• Support high resale value
Good maintenance saves good money.

Regular maintenance saves you real money on fuel bills – and keeps your John Deere running better for longer.

You don’t have money to burn.

With diesel prices the way they are, you can’t afford to waste a drop. That’s why it pays to keep your equipment running at peak efficiency. It’s surprising how much you can save with regular maintenance, as this independent survey shows. Often, you’ll save more on fuel bills than you spend on parts and labour!

Save on fuel, not maintenance.

“This chart explains the link between poor maintenance and higher diesel consumption really well. A 200 HP tractor needs around 20,000 litres of diesel for 1,000 hours work, so fuel efficiency is clearly crucial. Even more complex maintenance tasks pay their way quickly. Replacing worn injection nozzles, for example, can save you around 1,000 litres of diesel. Poor maintenance means you could be wasting up to 15% of the fuel you pay for. That makes a big difference to your business results. Energy costs account for around 20% of your total expenses, so that 15% extra would swallow up 3% of your operating margin – and a fair share of your profit too.”

Dr. Wesenberg

Beware of bargains.

Cheap engine oils can cost a lot more than you think. Since they offer less protection, you have to make a difficult choice. You can either spend extra and change them more frequently. Or stick to the normal intervals and wear your engine out faster. Either way, you’ll spend more than you planned to.

As usual, quality works out cheaper.

John Deere Plus-50 oil gives your engine long lasting protection for maximum performance and peace of mind. It also helps you to save fuel. How? Thanks to its superior lubrication qualities, it reduces the friction inside your engine. That means less drag and lower running temperatures. And that means you use less fuel.

Greater efficiency and protection.

Specially formulated, non-foaming lubricants from John Deere mean outstanding performance, high productivity and sound financial sense. Their all-important tasks include:

- Lubricating to reduce friction and to minimise wear at metal-to-metal contacts.
- Cooling metallic components such as bearings, pistons and valves.
- Protecting against corrosion and rust.
- Minimising friction and wear of engine components.
- Preventing build-up of deposits on pistons and rings.
- Maintaining clean internal surfaces by minimising the formation of sludge and coke.
- Sealing (e.g. at piston rings) to prevent blow-by of gas.
- Transmitting forces, e.g. in hydraulic systems.
- Diminishing power losses in order to increase efficiency.
- Ensuring satisfactory operations – under every temperature range.
Three simple facts.

So the next time someone tells you all oils are the same, remember this:

1. **John Deere Plus-50 oil is unique.**
   - John Deere Plus-50 oil has the unique JQ78A specification. It’s a unique JD specification that ensures perfect performance in typical off-highway conditions.

2. **John Deere Plus-50 oil has a longer life.**
   - Plus-50 oil provides improved wear protection with longer oil drain intervals.

3. **Only John Deere sells Plus-50 oil.**
   - It’s our way of making sure you always get what you pay for.

**Intelligence inside.**

John Deere Plus-50 oil is not just good, it’s unique.

Every drop contains an exclusive blend of additives – the fruit of research and development.

Three simple facts.

Filters – Breathe new life into your machinery.

The quality of the filters you fit has a direct effect on the performance and longevity of your John Deere equipment. So next time you change a filter, invest in the best.

JDParts Keyword: ‘Filter’.

**Why change an air filter?**
- **Optimum protection**
  The engine intake system is designed to intercept, isolate and capture contaminants before they can reach the engine.
- **Longer engine life**
  A good filtration system reduces engine wear.
- **Increased efficiency**
  A blocked filter will restrict the air flow and strangle your engine’s power.
- **Higher performance, lower costs**
  Fuel and oil consumption are better controlled, maintenance intervals are extended and maintenance costs are reduced.

**FUEL FILTERS:**
**Keep it clean.**
Your John Deere fuel injection system is a masterpiece of precision engineering. The pump and metering components are so finely machined, even the tiniest of particles could cause serious damage. That’s why it’s important to change the fuel filters that protect them regularly.

**Three reasons to change your fuel filter.**
- **Dirt:** Often, it’s the smallest particles that cause the most damage. Clean fuel filters can trap particles 15 times thinner than a human hair.
- **Water:** Diesel fuel contains more water than you might think. If that gets into your fuel injection system, it can cause serious problems.
- **Oxidised fuel (asphaltene):** Ever wondered why fuel filters get so black and sticky? The reason is asphaltene or oxidised fuel. Asphaltene particles occur in all grades of diesel. They are so tiny, they slip through the fuel injection components. But when they reach the filter element, they stick to the fibre, build up... and gradually choke your system.

**Did you know?** Blocked filters starve your engine of power.

**Filters out worries too.**
Other filters may look the same on the outside – but inside, there’s a world of difference. From the quality of the filter material to the sealing rings and spring tensioners that ensure top performance, John Deere gives you the quality it takes to keep the wheels turning smoothly.

Fortunately you don’t have to cut a filter open yourself because there’s an easier way to check before you buy: If it doesn’t say John Deere on the label, it doesn’t meet our quality standards.

**AIR FILTERS:**
**Did you know?** A handful of dust is all it takes to ruin your engine.

**Keep it clean.**
Air filters are supposed to get dirty – that’s their job. They protect your equipment by trapping airborne dirt before it can get inside your engine and cause wear. Like most vacuum cleaners, though, air filters become less effective as they slowly clog up with dirt. It’s a slow process, which is why so many people forget to change them regularly. After all, you don’t really feel the gradual drop in performance... or the rise in fuel consumption... or the extra strain on your engine. Until you fit a new filter, that is. Then suddenly, you realise what you’ve been missing.

**SEE FOR YOURSELF!**
- **Original John Deere Filter**
  - The original has a John Deere spring that’s calibrated for exact pressure.
  - John Deere filter paper is so dense, it hardly lets any light through.
  - John Deere filters are 50% thicker than some non-genuine filters. 50% more surface area means better filtering and longer life.
- **Look-alike Filter**
  - This filter has no sealing ring, so dirty oil pollutes the filtered oil again.
  - Other papers are so thin, they don’t even filter light effectively – let alone oil.

**Fit and forget.**
Genuine John Deere filters come with peace of mind fitted as standard.
- Long lasting performance – right through to the next service interval.
- Outstanding efficiency – custom-built for your equipment.
- Maximum protection – fit for you and your investment.

---

You didn’t buy no-name equipment.

People who choose John Deere appreciate the difference between something that’s cheap and something that offers real value for money. They know from experience that while quality has its price, it will usually save you money long term. By working harder and lasting longer – however tough the going gets.

So why fit a no-name filter?

When it comes to filters, the same thing applies. As you’ll see on the opposite page, many so-called ‘bargain’ filters cut corners to make you think they’re cheaper. They skimp on paper thickness, use a thinner spring... even leave out a seal altogether. No wonder they need changing so often!

Why quality pays.

John Deere filters, on the other hand, offer real value for money. Because we never compromise on quality, you can be sure they’ll do the job properly, for as long as they’re supposed to. Keeping your engine running smoothly for years to come.

The quality of the filters you fit has a direct effect on the performance and longevity of your John Deere equipment. So next time you change a filter, invest in the best.

JDParts Keyword: ‘Filter’.
**Different systems, different filters.**

John Deere filters are designed to keep both your equipment and the people who operate it healthy and happy. If you run a tractor with a cab, that means it’s important to change the cab air filters at regular intervals to ensure the air you breathe stays fresh and clean. Just as you would a fuel or oil filter. That way, the air you breathe will continue to be clean and healthy, giving years of reliable service. So when the time finally comes to replace it, don’t take chances. Choose the original – and enjoy the same proven performance you’ve always had.

**Filter overview with service intervals.**

**6030 Series Tractors**

(6030 Premium, 6030, 7430 and 7530 Premium, 6025)

**CAR**

- **KIT ACTIVATED CARBON FILTER** (6030 Premium, 6030, 7430, 7530 Premium, 6025)
  - Please order 2 packs, fully charged and raring to go.
  - Replace every 500 hours or every 2 years and as required.

**CAB**

- **FRESH AIR FILTER – HEAVY DUTY** (4 cyl., 6 cyl.) – Please order 4 packs, every 500 hours or every 2 years and as required.
- **AIR FILTER – STANDARD** (4 cyl., 6 cyl.) – Please order 4 packs, every 500 hours or every 2 years and as required.

**TRANSMISSION**

- **MAIN CARTRIDGE AIR FILTER** (6225 – 6525) – Please order 2 packs, every 500 hours or every 2 years and as required.

- **FUEL FILTER** (4 cyl., 6 cyl. – 6030, 7430, 7530 Premium, 6025) – Please order 2 packs, every 500 hours or every 2 years and as required.
- **MAIN CARTRIDGE AIR FILTER** (6225 – 6525) – Please order 2 packs, every 500 hours or every 2 years and as required.

**Batteries – the power to perform.**

Your John Deere dealership has a complete range of top quality power-packs, fully charged and saving to go. Why settle for less?

**Built to last.**

Like everything else in a John Deere machine, your battery was built to give years of reliable service. So when the time finally comes to replace it, don’t take chances. Choose the original – and enjoy the same proven performance you’ve always had.

**Our battery promise:**

- Superior starting performance even under extreme operating conditions.
- Vibration resistance up to ten times better than traditional batteries.
- High charge and discharge durability, even when the engine is switched off.

**The choice is yours.**

John Deere StrongBox batteries come in three different grades to suit your voltage system and operating requirements. All three grades come with superior cycling capability and reserve capacity built in as standard:

**John Deere StrongBox batteries.**

John Deere StrongBox batteries are built to demanding John Deere specifications, using the highest quality materials and state-of-the-art technology. For voltage systems 14.2 and below:

- **Through-the-wall, welded intercell connectors** withstand severe vibration for dependable power and quick starts – whatever the weather.
- **Super radial-grid design with inboard lug** for more starting power, faster charging and corrosion resistance.
- **Extra heavy plates** for more reserve power on really cold days.
- **Microporous plastic envelope separators** eliminate electrical short-circuiting.
- **Epoxy-anchored plates** reduce vibration – the main cause of battery failure.

**John Deere StrongBox ST batteries.**

John Deere StrongBox ST batteries have all the above features PLUS a silver technology alloy grid that extends battery life in really hot operating environments. For voltage systems 14.4 and above:

- **Silver tech alloy construction** for less corrosion and longer life in high heat conditions.
- **Maintenance free** no need to add water during normal service life.
- **Efficient radial pattern** for faster high-voltage starts.
- **Full-perimeter frame rails** for even more durability and longer service life.

**What’s the right battery for my John Deere?**

If you don’t have your operating manual to hand, just ask your John Deere dealership. They know all about John Deere batteries and how they stack up to the competition.
John Deere StrongBox batteries – for all makes of vehicles and applications.

John Deere StrongBox batteries are built to demanding John Deere specifications. As a result these batteries offer extremely high quality construction and computer designed internal and external components. Take a look inside:

1. Dry charged from the factory for initial storing. StrongBox batteries are activated for you at the time of purchase.
2. Through-the-wall, welded intercell connectors are 25% larger than in other batteries, withstand vibration and provide quick starts and increased power in extreme cold.
3. Super radial grid design with inboard lug permits electrical current to flow more efficiently and provides higher cranking amps, faster charge and corrosion resistance.
4. Extra heavy plates give extra reserve power. Especially on extremely cold days.
5. Microporous plastic envelope separators eliminate electrical shorts and keep positive material from touching the negative plate. Plus, they help prevent the corrosion and misalignment of separators that can cause shorts.
6. Epoxy anchored plates make StrongBox batteries four times stronger than hot-melt anchored plates and they reduce vibration – the leading cause of failure in commercial batteries.

Get the right battery for your John Deere Equipment.

John Deere Paints and Chemicals.

Looks aren’t everything – but the better you look after your John Deere equipment, the better it will keep its value. From cleaning sprays to heavy duty lubricants and paints, we offer a complete range of products to keep your John Deere looking and working like new. Ask your dealer for details!

JDParts Keywords: ‘Paint’, ‘Aerosol’.

John Deere PAINTS:

Even our paints work hard.

Thinking of touching up or repainting your John Deere? Nobody makes green and yellow the way we do – because only John Deere paints are made to the original formula we use in the factory. For a perfect colour match every time, insist on genuine John Deere paints. Everything else is just green or yellow.

Enamel paints – can.

- Lead-free formulations – user-friendly and environmentally safe
- High quality, long lasting, colour-fast paints for weather proven performance in field testing
- Produces a finish that sets up in minutes, is tack free in a few hours and dries overnight to a hard, glossy finish
- Resists fading, cracking and chipping
- May be applied to metal or plastic. Using John Deere primer is recommended for improved paint application and corrosion resistance.

Spray paints.

- Faster drying for early handling of equipment and painted parts
- Thin spray viscosity requires little thinning for spray application
- Lead-free formulations
- Matches original equipment colours
- Exceeds current John Deere paint specifications
- Excellent gloss and colour retention
- Protects against chipping, corrosion and rust

John Deere CHEMICALS:

A complete range of top quality products to keep your John Deere equipment running like new!

MC491 Multi-Purpose Lubricant.

- Lubricates and prevents rust
- Will free parts seized by rust, scale or corrosion
- Will not harm electrical contacts, wood, vinyl or paint
- Also for chains, sliding doors, hinges, locks, zippers, office machines etc.

MC430 Penetrating Oil.

- Will free parts seized by rust, scale or corrosion
- Superior penetrating action for long lasting performance
- Heavy duty formula for professional shop use

MC499 Brake & Parts Cleaner.

- Safely removes brake fluid, grease, oil and other contaminant from brake lines and drums
- Stops disc brake squeal
- Cleans and degreases tools and electrical / mechanical components

MC406 Silicone Spray.

- Prevents squealing, sticking and binding
- Protects and preserves equipment
- Fast drying, leaves no greasy oil or film
- Prevents tools from binding

MC449 Glass Cleaner.

- Heavy duty formulation, removes bugs, road grime, smoke residue, fresh paint from auto, truck, tractor windows
- Will not harm windows, glass table tops, formica, chrome, tile, porcelain, etc.
- Clinging foam – will not run when sprayed on vertical surfaces
- Contains no ammonia, non-flammable, non-caustic

PartsCountry – parts you can trust at prices you’ll like. No matter which make you run.

PartsCountry is your one-stop shop for quality parts and accessories. From vehicle jacks to diesel injectors – even replacement parts for other makes of machinery – PartsCountry is the ideal solution for all your general workshop needs.

Since John Deere would never stock anything that’s not up to our own standards, we always source from well known manufacturers who comply with strict quality guidelines. That means you can buy with confidence. Come to PartsCountry!

One-stop service for all brands.

Running mixed brands of equipment? PartsCountry makes multiple ordering and pick up runs a thing of the past. Now you can order replacement parts for all makes and types of farm equipment straight from your local John Deere dealer. All at fair prices and all backed by our legendary John Deere service.

Discover JDParts:
the simple, fast way to order parts on the Web.

Use the JDParts website to easily find the information and order the parts that keep you going: 24 hours a day, 7 days a week.

Here's what JDParts let you do:
• View the parts catalogue.
• Find part numbers and specifications for John Deere equipment and other makes.
• Check parts prices and inventory at your local dealership.*
• Order parts from your dealer.
• Review assembly schematics.
• Learn about special promotions and new products.
• Send your dealer a question.
• Use the keyword search to find information about John Deere parts.

Here's how JDParts works:
• Log on to www.JDParts.JohnDeere.com at your convenience. Input the part number you need. Or use the search function to find it. Parts for many other makes and models are also included.
• Check availability. JDParts connects you to your dealer’s inventory file. So you’ll know in moments if the part is in stock.
• Place the order. You can provide instructions, ask questions, arrange delivery and even choose payment options.

You too will be delighted:
"I can’t always get to my John Deere dealer before closing time. So I was delighted to learn about the John Deere online parts system: JDParts. During my visit to the site, I quickly found and ordered my parts by part number: I even printed a picture to help me assemble them. Amazing! This new tool will make my life a lot easier." — Robert Candall

Add productivity and resale value
You may wish you had ordered a certain option when you bought your John Deere machine. Or, you may have acquired your machine from a previous owner.

Regardless, now you can set your machine up just the way you want it. John Deere attachments and accessories add more comfort, convenience, security and productivity.

But that’s not all. When it’s time to trade or sell your tractor, it will also be worth more. Don’t wish or wait. See your dealer today about his complete line of John Deere attachments.

*Dealer must upload inventory data to JDParts system.
