**Section 2: Items not taken onto the Interpretations Committee’s agenda** 19

**Section 3: Expected pronouncements from the IASB** 21
Companies reporting under International Financial Reporting Standards (IFRS) continue to face a steady flow of new standards and interpretations.

The nature of the changes ranges from significant amendments of fundamental principles to some minor changes from the annual improvements process (AIP). They will affect many different areas of accounting ranging from the presentation of financial statements to changes to particular elements, such as financial instruments and employee benefits.

Some of the changes have implications that go beyond matters of accounting, potentially also impacting the information systems of many entities. Furthermore, the changes may impact business decisions, such as the creation of joint arrangements or the structuring of particular transactions.

The challenge for preparers is to gain an understanding of what lies ahead.

Purpose of this publication

This publication provides an overview of the upcoming changes in standards and interpretations. It does not attempt to provide an in-depth analysis or discussion of the topics. Rather, the objective is to highlight key aspects of these changes. Reference should be made to the text of the standards and/or interpretations before taking any decisions or actions.

This publication consists of three sections, which are summarised below.

Section 1 provides a high-level overview of the key requirements of each pronouncement issued by the IASB and the IFRS Interpretations Committee (Interpretations Committee) as at 31 August 2013 that is applicable for the first time for fiscal years ended September 2013 and thereafter. This overview provides a summary of the transitional requirements and a brief discussion of the potential impact that the changes may have on an entity’s financial statements.

This section is presented in the numerical order of the standards and interpretations, except the AIP. All AIP amendments are presented at the end of Section 1.

In addition, a table comparing mandatory application for different year ends is presented at the beginning of Section 1. In the table, standards and interpretations are presented in order of their effective dates. However, many standards and interpretations contain provisions that would allow entities to adopt in earlier periods.

When a standard or interpretation has been issued, but has yet to be applied by an entity, IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors requires the entity to disclose any known (or reasonably estimable) information relevant to understanding the possible impact that the new pronouncement will have on the financial statements, or indicate the reason for not doing so. The table at the beginning of Section 1 is helpful in identifying the pronouncements that fall within the scope of this disclosure requirement.

Section 2 provides a summary of the agenda rejection notices published in the IFRIC Update since September 2012 that are considered to provide relevant guidance on the application of IFRS. In some rejection notices, the Interpretations Committee refers to the existing pronouncements that provide adequate guidance. These rejection notices provide a view on the application of the pronouncements and fall within ‘other accounting literature and accepted industry practices’ in paragraph 12 of IAS 8.

Section 3 lists expected pronouncements from the IASB and the Interpretations Committee. As mentioned above, if a standard or interpretation is published prior to the date on which the financial statements are authorised for issue, an entity will have to provide the IAS 8 disclosures for pronouncements that are issued but not yet effective.

1 The IFRIC Update is available on the IASB’s website at http://www.ifrs.org/Updates/IFRIC+Updates/IFRIC+Updates.htm.
IFRS Core Tools

This publication provides an overview of new pronouncements issued as at 31 August 2013 that contribute to a significant amount of accounting change expected in the next two years and beyond. Frequent changes to IFRS add to the complexity entities face when approaching the financial reporting cycle.

EY’s IFRS Core Tools provide the starting point for assessing the impact of these changes to IFRS. Our IFRS Core Tools include a number of practical building blocks that can help the user to navigate the changing landscape of IFRS. In addition to this publication, EY’s IFRS Core Tools include the publications described below.

International GAAP® Disclosure Checklist

Our International GAAP® Disclosure Checklist captures disclosure requirements for years ended 31 December 2013, disclosures that are permitted to be adopted early, and disclosure requirements for all pronouncements issued as at 31 August 2013. This tool assists preparers to comply with the presentation and disclosure requirements of IFRS in their interim and year-end IFRS financial statements.

Good Group (International) Limited

Good Group (International) Limited for the year ended 31 December 2013 is a set of illustrative financial statements, incorporating presentation and disclosure requirements that are in issue as at 31 August 2013 and effective for the year ended 31 December 2013. Good Group Interim Limited for the period ended 30 June 2013 supplements Good Group (International) Limited. Among other things, these illustrative financial statements can assist in understanding the impact accounting changes may have on the financial statements.

Good Group (International) Limited is supplemented by illustrative financial statements that are aimed at specific sectors, industries and circumstances. These include:

- Good Bank (International) Limited
- Good Construction (International) Limited
- Good First-time Adopter (International) Limited
- Good Insurance (International) Limited
- Good Investment Fund Limited (Equity)
- Good Investment Fund Limited (Liabilities)
- Good Mining (International) Limited
- Good Petroleum (International) Limited
- Good Real Estate Group (International) Limited

Also available from EY:

Other EY publications

References to other EY publications that contain further details and discussion on these topics are included throughout the IFRS Update, all of which can be downloaded from our website www.ey.com/ifrs.

International GAAP® 2013

Our International GAAP® 2013 is a comprehensive guide to interpreting and implementing IFRS. It includes standards and interpretations mentioned in this publication that were issued prior to September 2012, and it provides examples that illustrate how the requirements are applied. International GAAP® 2014 will be published early in 2014.

AIP: Annual IFRS Improvements Process
* Effective for annual periods beginning on or after this date

- **Dark Gray**: Pronouncements effective for the previous reporting period
- **Light Gray**: New pronouncements effective for the current reporting period
- **Yellow**: New pronouncements effective for the next reporting period
- **White**: New pronouncements that will become effective in periods subsequent to the next reporting period

---

In July 2013, the IASB tentatively decided to defer the mandatory effective date of IFRS 9 until the issue date of the completed version of IFRS 9 is known.
IFRS 1 Government Loans – Amendments to IFRS 1
Effective for annual periods beginning on or after 1 January 2013.

**Key requirements**
The IASB added an exception to the retrospective application of IFRS 9 *Financial Instruments* (or IAS 39 *Financial Instruments: Recognition and Measurement*, as applicable) and IAS 20 *Accounting for Government Grants and Disclosure of Government Assistance*. These amendments require first-time adopters to apply the requirements of IAS 20 prospectively to government loans existing at the date of transition to IFRS. However, entities may choose to apply the requirements of IFRS 9 (or IAS 39, as applicable) and IAS 20 to government loans retrospectively if the information needed to do so had been obtained at the time of initially accounting for those loans.

The exception will give first-time adopters relief from retrospective measurement of government loans with a below-market rate of interest. As a result of not applying IFRS 9 (or IAS 39, as applicable) and IAS 20 retrospectively to government loans with a below-market rate of interest, entities will not have to recognise the corresponding benefit of a below-market rate government loan as a government grant.

**Transition**
The amendments may be applied earlier than the effective date, in which case, this must be disclosed.

**Impact**
These amendments give first-time adopters the same relief that existing preparers of IFRS financial statements had on the first-time application of IAS 20 (as revised in May 2008) and, therefore, will reduce the cost of transition to IFRS.

IFRS 7 Disclosures – Offsetting Financial Assets and Financial Liabilities – Amendments to IFRS 7
Effective for periods beginning on or after 1 January 2013.

**Key requirements**
These amendments require an entity to disclose information about rights of set-off and related arrangements (e.g., collateral agreements). The disclosures will provide users with information that is useful in evaluating the effect of netting arrangements on an entity’s financial position. The new disclosures are required for all recognised financial instruments that are set off in accordance with IAS 32 *Financial Instruments: Presentation*. The disclosures also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or ‘similar agreement’, irrespective of whether they are set off in accordance with IAS 32.

**Transition**
These amendments are applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy. If an entity chooses to early adopt IAS 32 *Offsetting Financial Assets and Financial Liabilities*, it also must make the disclosure required by IFRS 7 *Disclosures – Offsetting Financial Assets and Financial Liabilities – Amendments to IFRS 7*.

**Impact**
To extract the necessary data to prepare the new disclosures, entities (in particular, banks) may need to modify management information systems and internal controls, including linking their credit systems to accounting systems.

IFRS 9 Financial Instruments

IFRS 9 for financial assets was first published in November 2009 and was updated in October 2010 to include financial liabilities. These pronouncements initially required the adoption of the standard for annual periods on or after 1 January 2013. Amendments to IFRS 9 Mandatory Effective Date of IFRS 9 and Transition Disclosures, issued in December 2011, moved the mandatory effective date of both the 2009 and 2010 versions of IFRS 9 from 1 January 2013 to 1 January 2015. At its July 2013 meeting, the IASB tentatively decided to defer the mandatory effective date of IFRS 9 until the issue date of the completed version of IFRS 9 is known.

Key requirements

IFRS 9 is being developed in phases. The first phase addressed the classification and measurement of financial instruments (Phase 1). The Board’s work on the other phases is ongoing, and includes impairment of financial instruments and hedge accounting, with a view to replacing IAS 39 in its entirety.

Financial assets

All financial assets are measured at fair value at initial recognition. Debt instruments may, if the fair value option (FVO) is not invoked, be subsequently measured at amortised cost if:

- The asset is held within a business model that has the objective to hold the assets to collect the contractual cash flows
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding.

All other debt instruments are subsequently measured at fair value. All equity investment financial assets are measured at fair value either through other comprehensive income (OCI) or profit or loss. Equity instruments held for trading must be measured at fair value through profit or loss. Entities have an irrevocable choice of recognising changes in fair value either in OCI or profit or loss by instrument for all other equity investment financial assets.

Financial liabilities

For FVO liabilities, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change in respect of the liability’s credit risk in OCI would create or enlarge an accounting mismatch in profit or loss.

All other IAS 39 classification and measurement requirements for financial liabilities have been carried forward into IFRS 9, including the embedded derivative separation rules and the criteria for using the FVO.

Transition

An entity may choose to apply the classification and measurement requirements of IFRS 9 retrospectively, in accordance with the requirements of IAS 8. However, the restatement of comparative period financial statements is not required.

IFRS 7 Financial Instruments: Disclosures requires additional disclosures on transition from IAS 39 to IFRS 9. The new disclosures are either required or permitted on the basis of the entity’s date of transition and whether the entity chooses to restate prior periods.

Early application of the financial asset requirements is permitted. Early application of the financial liabilities requirements is permitted if the entity also applies the requirements for financial assets. Early application must be disclosed.

Impact

Phase 1 of IFRS 9 will have a significant impact on:

- The classification and measurement of financial assets
- Reporting for entities that have designated liabilities using the FVO

Similarly, the other phases, including impairment and hedge accounting, are also expected to have significant accounting implications.

For entities considering early application, there are a number of benefits and challenges that should be considered. Careful planning for this transition will be necessary.

IFRS 10 Consolidated Financial Statements, IAS 27 Separate Financial Statements

Effective for annual periods beginning on or after 1 January 2013.

Key requirements
IFRS 10 replaces the portion of IAS 27 that addresses the accounting for consolidated financial statements. It also addresses the issues raised in SIC-12 Consolidation – Special Purpose Entities, which resulted in SIC-12 being withdrawn. IAS 27, as revised, is limited to the accounting for investments in subsidiaries, joint ventures, and associates in separate financial statements.

IFRS 10 does not change consolidation procedures (i.e., how to consolidate an entity). Rather, IFRS 10 changes whether an entity is consolidated by revising the definition of control. Control exists when an investor has:

- Power over the investee (defined in IFRS 10 as when the investor has existing rights that give it the current ability to direct the relevant activities)
- Exposure, or rights, to variable returns from its involvement with the investee

And
- The ability to use its power over the investee to affect the amount of the investor's returns

IFRS 10 also provides a number of clarifications on applying this new definition of control, including the following key points:

- An investor is any party that potentially controls an investee; such party need not hold an equity investment to be considered an investor
- An investor may have control over an investee even when it has less than a majority of the voting rights of that investee (sometimes referred to as de facto control)
- Exposure to risks and rewards is an indicator of control, but does not in itself constitute control
- When decision-making rights have been delegated or are being held for the benefit of others, it is necessary to assess whether a decision-maker is a principal or an agent to determine whether it has control
- Consolidation is required until such time as control ceases, even if control is temporary

Transition
IFRS 10 must be applied using a modified retrospective approach. The entity will need to make an assessment of whether control exists at the date of initial application (i.e., the beginning of the annual reporting period in which IFRS 10 is applied for the first time). If the control assessment is the same between IFRS 10 and IAS 27/SIC-12, no retrospective application is required. However, if the control assessment under the two standards is different, retrospective adjustments have to be made. If more than one comparative period is presented, additional relief is given to require only one period to be restated.

Earlier application is permitted if the entity also applies the requirements of IFRS 11 Joint Arrangements, IFRS 12 Disclosure of Interests in Other Entities, IAS 27 (as revised in 2011) and IAS 28 Investments in Associates (as revised in 2011) at the same time.

Impact
IFRS 10 creates a new, and broader, definition of control.

Assessing control will require a comprehensive understanding of an investee's purpose and design, and the investor's rights and exposures to variable returns, as well as rights and returns held by other investors. This may require input from sources outside of the accounting function, such as operational personnel and legal counsel, and information external to the entity. It will also require significant judgement of the facts and circumstances.

IFRS Developments Issue 1: IASB issues three new standards: Consolidated Financial Statements, Joint Arrangements, and Disclosure of Interests in Other Entities (May 2011) EYG no. AU0839.
IFRS 10, IFRS 12 and IAS 27 Investment Entities (Amendments)

Effective for annual periods beginning on or after 1 January 2014.

Key requirements
The investment entities amendments apply to investments in subsidiaries, joint ventures and associates held by a reporting entity that meets the definition of an investment entity.

The key amendments include:

• ‘Investment entity’ is defined in IFRS 10
• An investment entity must meet three elements of the definition and consider four typical characteristics, in order to qualify as an investment entity
• An entity must consider all facts and circumstances, including its purpose and design, in making its assessment
• An investment entity accounts for its investments in subsidiaries, associates and joint ventures at fair value through profit or loss in accordance with IFRS 9 (or IAS 39, as applicable), except for investments in subsidiaries, associates and joint ventures that provide services that relate only to the investment entity, which must be consolidated (investments in subsidiaries) or accounted for using the equity method (investments in associates or joint ventures)
• An investment entity must measure its investment in another controlled investment entity at fair value
• A non-investment entity parent of an investment entity is not permitted to retain the fair value accounting that the investment entity subsidiary applies to its controlled investees
• For venture capital organisations, mutual funds, unit trusts and others that do not qualify as investment entities, the existing option in IAS 28, to measure investments in associates and joint ventures at fair value through profit or loss, is retained

Transition
The amendments must be applied retrospectively, subject to certain transition reliefs.

Early application is permitted and must be disclosed.

Impact
The concept of an investment entity is new to IFRS. The amendments represent a significant change for investment entities, which are currently required to consolidate investees that they control. Significant judgement of facts and circumstances may be required to assess whether an entity meets the definition of investment entity.

Other EY publications
Applying IFRS: IFRS 12 – Example disclosures for interests in unconsolidated structured entities (March 2013) EYG no. AU1407.
IFRS Developments Issue 44: Investment entities final amendment – exception to consolidation (October 2012) EYG no. AU1330.
IFRS 11 Joint Arrangements, IAS 28 Investments in Associates and Joint Ventures

Effective for annual periods beginning on or after 1 January 2013.

Key requirements
IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC-13 Jointly-controlled Entities – Non-monetary Contributions by Venturers. Joint control under IFRS 11 is defined as the contractually agreed sharing of control of an arrangement, which exists only when the decisions about the relevant activities require the unanimous consent of the parties sharing control. ‘Control’ in ‘joint control’ refers to the definition of ‘control’ in IFRS 10.

IFRS 11 also changes the accounting for joint arrangements by moving from three categories under IAS 31 to the following two categories:

Joint operation – An arrangement in which the parties with joint control have rights to the assets and obligations for the liabilities relating to that arrangement. In respect of its interest in a joint operation, a joint operator must recognise all of its assets, liabilities, revenues and expenses, including its relative share of jointly controlled assets, liabilities, revenue and expenses.

Joint venture – An arrangement in which the parties with joint control have rights to the net assets of the arrangement. Joint ventures are accounted for using the equity method. The option in IAS 31 to account for joint ventures as defined in IFRS 11 using proportionate consolidation has been removed.

Under these new categories, the legal form of the joint arrangement is not the only factor considered when classifying the joint arrangement as either a joint operation or a joint venture, which is a change from IAS 31. Under IFRS 11, parties are required to consider whether a separate vehicle exists and, if so, the legal form of the separate vehicle, the contractual terms and conditions, and other facts and circumstances.

IAS 28 has been amended to include the application of the equity method to investments in joint ventures.

Transition
IFRS 11 must be applied using a modified retrospective approach. Similar to IFRS 10, relief is given to require only one period to be restated, if more than one comparative period is presented.

Early application of IFRS 11 is permitted, provided that an entity also applies the requirements of IFRS 10, IFRS 12, IAS 27 (as revised in 2011) and IAS 28 (as revised in 2011) at the same time.

Impact
IFRS 11 represents a significant change for entities accounting for interests in jointly controlled entities using proportionate consolidation, if such arrangements are classified as joint ventures under IFRS 11. It is also possible that arrangements that were considered to be jointly controlled entities will be considered joint operations under IFRS 11, which will affect the accounting for such entities, regardless of whether they have been accounted for using the equity method or proportionate consolidation.

Since ‘control’ in ‘joint control’ refers to the new definition of ‘control’ in IFRS 10, it is possible that what is considered a joint arrangement under IFRS 11 will change. Significant judgement of the facts and circumstances may be required to assess whether joint control exists and to determine the classification of the arrangement.

Other EY publications
IFRS Developments Issue 35: Transition guidance amendments for IFRS 10, IFRS 11 and IFRS 12 (July 2012) EYG no. AU1235.

Applying IFRS: Challenges in adopting and applying IFRS 11 (September 2011) EYG no. AU0921.

IFRS Practical Matters: What do the new consolidation, joint arrangements and disclosures accounting standards mean to you? (June 2011) EYG no. AU0853.

IFRS Developments Issue 1: IASB issues three new standards: Consolidated Financial Statements, Joint Arrangements, and Disclosure of Interests in Other Entities (May 2011) EYG no. AU0839.
**IFRS 12 Disclosure of Interests in Other Entities**

Effective for annual periods beginning on or after 1 January 2013.

**Key requirements**

IFRS 12 applies to an entity that has an interest in subsidiaries, joint arrangements, associates and/or structured entities. Many of the disclosure requirements of IFRS 12 were previously included in IAS 27, IAS 31, and IAS 28, while others are new.

The objective of the new disclosure requirements is to help the users of financial statements understand the following:

- The effects of an entity’s interests in other entities on its financial position, financial performance and cash flows
- The nature of, and the risks associated with, the entity’s interest in other entities

Some of the more extensive qualitative and quantitative disclosures of IFRS 12 include:

- Summarised financial information for each subsidiary that has non-controlling interests that are material to the reporting entity
- Significant judgements used by management in determining control, joint control and significant influence, and the type of joint arrangement (i.e., joint operation or joint venture), if applicable
- Summarised financial information for each individually material joint venture and associate
- Nature of the risks associated with an entity’s interests in unconsolidated structured entities, and changes to those risks

**Transition**

IFRS 12 must be applied retrospectively in accordance with the requirements of IAS 8 for changes in accounting policy, with some relief being provided:

- Disclosure requirements of IFRS 12 need to be applied only for the current period and one comparative period, if more than one is presented
- Comparatives for disclosures relating to unconsolidated structured entities are not required

An entity may early adopt IFRS 12 before adopting IFRS 10, IFRS 11, IAS 27 and IAS 28. Entities are encouraged to provide some of the information voluntarily, even if they are not adopting all of IFRS 12 before its effective date.

**Impact**

The new disclosures will assist users to make their own assessment of the financial impact of management’s conclusion regarding consolidation. Additional procedures and changes to systems may be required to gather information for the preparation of the additional disclosures.

*IFRS Developments Issue 1: IASB issues three new standards: Consolidated Financial Statements, Joint Arrangements, and Disclosure of Interests in Other Entities (May 2011) EYG no. AU0839.*
IFRS 13 *Fair Value Measurement*

Effective for annual periods beginning on or after 1 January 2013.

**Key requirements**
IFRS 13 does not change when fair value is used, but rather describes how to measure fair value when fair value is required or permitted by IFRS.

Fair value under IFRS 13 is defined as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date” (i.e., an ‘exit price’). ‘Fair value’ as used in IFRS 2 *Share-based Payments* and IAS 17 *Leases* is excluded from the scope of IFRS 13.

The standard provides clarification on a number of areas, including the following:

- Concepts of ‘highest and best use’ and ‘valuation premise’ are relevant only for non-financial assets
- Adjustments for blockage factors (block discounts) are prohibited in all fair value measurements
- A description of how to measure fair value when a market becomes less active

New disclosures related to fair value measurements are also required to help users understand the valuation techniques and inputs used to develop fair value measurements and the effect of fair value measurements on profit or loss.

**Transition**
IFRS 13 is applied prospectively (in the same way as a change in accounting estimate). Early application is permitted and must be disclosed.

**Impact**
Specific requirements relating to the highest and best use and the principal market may require entities to re-evaluate their processes and procedures for determining fair value, and assess whether they have the appropriate expertise.

**Other EY publications**
*IFRS Developments Issue 2: Fair value measurement guidance converges* (May 2011) EYG no. AU0840.

IAS 1 *Presentation of Items of Other Comprehensive Income – Amendments to IAS 1*

Effective for annual periods beginning on or after 1 July 2012.

**Key requirements**
The amendments to IAS 1 introduce a grouping requirement for items presented in OCI. Items that will be reclassified (or recycled) to profit or loss in the future (e.g., the effective portion of gains and losses on hedging instruments in a cash flow hedge) will be presented separately from items that will never be reclassified (for example, changes in revaluation surplus recognised as a result of applying the revaluation model in IAS 16 *Property, Plant and Equipment* and IAS 38 *Intangible Assets*).

The amendments do not change the nature of the items that are recognised in OCI, nor do they impact the determination of whether items in OCI are reclassified through profit or loss in future periods.

**Transition**
These amendments are applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy.

**Impact**
Although the change in presentation of OCI is relatively minor with respect to the overall financial statements, it will assist users to identify more easily the potential impact that OCI items may have on future profit or loss.

**Other EY publications**
*IFRS Developments Issue 7: Changes to the presentation of other comprehensive income – amendments to IAS 1* (June 2011) EYG no. AU0787.
IAS 12 *Income Taxes (Amendment) — Deferred Taxes: Recovery of Underlying Assets*

Effective for annual periods beginning on or after 1 January 2012.

**Key requirements**
The amendment to IAS 12 introduces a rebuttable presumption that deferred tax on investment properties measured at fair value will be recognised on a sale basis, unless an entity has a business model that would indicate the investment property will be consumed in the business.

The amendment also introduces the requirement that deferred tax on non-depreciable assets measured using the revaluation model in IAS 16 should always be measured on a sale basis.

As a result of this amendment, SIC-21 *Income Taxes — Recovery of Revalued Non-Depreciable Assets* has been withdrawn.

**Transition**
This amendment is applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy.

**Impact**
In certain jurisdictions entities have noted difficulties in applying the principles of IAS 12 to certain investment properties. This amendment is intended to give guidance on the tax rate that should be applied.

**Other EY publications**
*Supplement to IFRS Outlook Issue 93: Amendments to IAS 12 Income Taxes* (December 2010) EYG no. AU0729.

IAS 19 *Employee Benefits (Revised)*

Effective for annual periods beginning on or after 1 January 2013.

**Key requirements**
The revised standard includes a number of amendments that range from fundamental changes to simple clarifications and re-wording. The more significant changes include the following:

- For defined benefit plans, the ability to defer recognition of actuarial gains and losses (i.e., the corridor approach) has been removed. As revised, amounts recorded in profit or loss are limited to current and past service costs, gains or losses on settlements, and net interest income (expense). All other changes in the net defined benefit asset (liability), including actuarial gains and losses, are recognised in OCI with no subsequent recycling to profit or loss.

- Expected returns on plan assets are no longer recognised in profit or loss. Expected returns are replaced by recording interest income in profit or loss, which is calculated using the discount rate used to measure the pension obligation.

- Objectives for disclosures of defined benefit plans are explicitly stated in the revised standard, along with new and revised disclosure requirements. These new disclosures include quantitative information about the sensitivity of the defined benefit obligation to a reasonably possible change in each significant actuarial assumption.

- Termination benefits are recognised at the earlier of when the offer of termination cannot be withdrawn, or when the related restructuring costs are recognised under IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*.

- The distinction between short-term and other long-term employee benefits is based on the expected timing of settlement rather than the employee’s entitlement to the benefits.

**Transition**
The revised standard is applied retrospectively in accordance with the requirements of IAS 8 for changes in accounting policy. There are limited exceptions for restating assets outside the scope of IAS 19 and for presenting sensitivity disclosures for comparative periods in the period the amendments are first effective. Early application is permitted and must be disclosed.

**Impact**
These changes represent a significant further step in reporting gains and losses outside of profit or loss, with no subsequent recycling. Actuarial gains and losses will be excluded permanently from profit or loss.

**Other EY publications**
*Applying IFRS: Implementing the 2011 revisions to employee benefits* (November 2011) EYG no. AU1007.

*IFRS Developments Issue 6: Significant changes to accounting for pensions* (June 2011) EYG no. AU0888.
IAS 32 Offsetting Financial Assets and Financial Liabilities – Amendments to IAS 32

Effective for annual periods beginning on or after 1 January 2014.

**Key requirements**

The amendments to IAS 32 clarify the meaning of “currently has a legally enforceable right to set-off”. The amendments also clarify the application of the IAS 32 offsetting criteria to settlement systems (such as central clearing house systems), which apply gross settlement mechanisms that are not simultaneous.

The amendments clarify that rights of set-off must not only be legally enforceable in the normal course of business, but must also be enforceable in the event of default and the event of bankruptcy or insolvency of all of the counterparties to the contract, including the reporting entity itself. The amendments also clarify that rights of set-off must not be contingent on a future event.

The IAS 32 offsetting criteria require the reporting entity to intend either to settle on a net basis, or to realise the asset and settle the liability simultaneously. The amendments clarify that only gross settlement mechanisms with features that eliminate or result in insignificant credit and liquidity risk and that process receivables and payables in a single settlement process or cycle would be, in effect, equivalent to net settlement and, therefore, meet the net settlement criterion.

**Transition**

These amendments are applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy. Early application is permitted. However, if an entity chooses to early adopt, it must disclose that fact and also make the disclosure required by IFRS 7 Disclosures – Offsetting Financial Assets and Financial Liabilities – Amendments to IFRS 7.

**Impact**

Entities will need to review legal documentation and settlement procedures, including those applied by the central clearing houses they deal with to ensure that offsetting of financial instruments is still possible under the new criteria. Changes in offsetting may have a significant impact on financial presentation. The effect on leverage ratios, regulatory capital requirements, etc., will need to be considered.

**Other EY publications**

*Applying IFRS: Offsetting financial instruments: clarifying the amendments (May 2012)* EYG no. AU1182.

*IFRS Developments Issue 22:Offsetting of financial instruments (December 2011)* EYG no. AU1053.

IAS 36 Recoverable Amount Disclosures for Non-Financial Assets – Amendments to IAS 36

Effective for annual periods beginning on or after 1 January 2014.

**Key requirements**

The amendments clarify the disclosure requirements in respect of fair value less costs of disposal. When IAS 36 Impairment of Assets was originally changed as a consequence of IFRS 13, the IASB intended to require disclosure of information about the recoverable amount of impaired assets if that amount was based on fair value less costs to sell. An unintended consequence of the amendments was that an entity would be required to disclose the recoverable amount for each cash-generating unit for which the carrying amount of goodwill or intangible assets with indefinite useful lives allocated to that unit was significant in comparison with the entity’s total carrying amount of goodwill or intangible assets with indefinite useful lives. This requirement has been deleted by the amendment.

In addition, the IASB added two disclosure requirements:

- Additional information about the fair value measurement of impaired assets when the recoverable amount is based on fair value less costs of disposal.
- Information about the discount rates that have been used when the recoverable amount is based on fair value less costs of disposal using a present value technique. The amendment harmonises disclosure requirements between value in use and fair value less costs of disposal.

**Transition**

The amendments are applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy. Earlier application is permitted when the entity also applies IFRS 13 and must be disclosed.

**Impact**

The amendments no longer require the disclosure of information that was regarded as commercially sensitive by preparers. This might be a valid reason for entities to early adopt the amendments. Nevertheless, additional information needs to be provided. In general, it is likely that the information required to be disclosed will be readily available.
**IAS 39 Novation of Derivatives and Continuation of Hedge Accounting – Amendments to IAS 39**

Effective for annual periods beginning on or after 1 January 2014.

**Key requirements**

The amendments provide an exception to the requirement to discontinue hedge accounting in certain circumstances in which there is a change in counterparty to a hedging instrument in order to achieve clearing for that instrument. The amendment covers novations:

- That arise as a consequence of laws or regulations, or the introduction of laws or regulations
- Where the parties to the hedging instrument agree that one or more clearing counterparties replace the original counterparty to become the new counterparty to each of the parties
- That did not result in changes to the terms of the original derivative other than changes directly attributable to the change in counterparty to achieve clearing

All of the above criteria must be met to continue hedge accounting under this exception.

The amendments cover novations to central counterparties, as well as to intermediaries such as clearing members, or clients of the latter that are themselves intermediaries.

For novations that do not meet the criteria for the exception, entities have to assess the changes to the hedging instrument against the derecognition criteria for financial instruments and the general conditions for continuation of hedge accounting.

**Transition**

The amendments are applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy. However, entities that discontinued hedge accounting in the past, because of a novation that would be in the scope of the amendments, may not reinstate that previous hedging relationship. Earlier application is permitted and must be disclosed.

**Impact**

The amendments are, in effect, a relief from the hedge accounting requirements, and will allow entities to better reflect hedge relationships in the circumstances in which the novation exception applies.

**Other EY publications**

*IFRS Developments Issue 62: Amendments to IAS 39: Continuing hedge accounting after novation (June 2013) EYG no. AU1700.*

**IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine**

Effective for annual periods beginning on or after 1 January 2013.

**Key requirements**

IFRIC 20 applies to waste removal (stripping) costs incurred in surface mining activity, during the production phase of the mine.

If the benefit from the stripping activity will be realised in the current period, an entity is required to account for the stripping activity costs as part of the cost of inventory. When the benefit is the improved access to ore, the entity recognises these costs as a non-current asset, only if certain criteria are met. This is referred to as the ‘stripping activity asset’. The stripping activity asset is accounted for as an addition to, or as an enhancement of, an existing asset.

If the costs of the stripping activity asset and the inventory produced are not separately identifiable, the entity allocates the cost between the two assets using an allocation method based on a relevant production measure.

After initial recognition, the stripping activity asset is carried at its cost or revalued amount less depreciation or amortisation and less impairment losses, in the same way as the existing asset of which it is a part.

**Transition**

This interpretation is applied to production stripping costs incurred on or after the beginning of the earliest period presented. The interpretation does not require full retrospective application. Instead it provides a practical expedient for any stripping costs incurred and capitalised up to the start of the earliest period presented.

Earlier application is permitted and must be disclosed.

**Impact**

IFRIC 20 represents a change from the current life of mine average strip ratio approach used by many mining and metals entities reporting under IFRS. Depending on the specific facts and circumstances of an entity’s mines, these changes may impact both financial position and profit or loss. In addition, changes may also be required to processes, procedures and systems of the reporting entity.

**Other EY publications**

*IFRS Developments for Mining & Metals: Accounting for waste removal costs (October 2011) EYG no. AU0979.*
IFRIC 21 Levies
Effective for annual periods beginning on or after 1 January 2014.

Key requirements
IFRIC 21 is applicable to all levies other than outflows that are within the scope of other standards (e.g., IAS 12) and fines or other penalties for breaches of legislation. Levies are defined in the interpretation as outflows of resources embodying economic benefits imposed by government on entities in accordance with legislation.

The interpretation clarifies that an entity recognises a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. It also clarifies that a levy liability is accrued progressively only if the activity that triggers payment occurs over a period of time, in accordance with the relevant legislation. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability is recognised before the specified minimum threshold is reached.

The interpretation does not address the accounting for the debit side of the transaction that arises from recognising a liability to pay a levy. Entities look to other standards to decide whether the recognition of a liability to pay a levy would give rise to an asset or an expense under the relevant standards.

Transition
The interpretation is applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy. Earlier application is permitted and must be disclosed.

Impact
The interpretation is intended to eliminate the current diversity in practice on the treatment for the obligation to pay levies. Entities need to consider whether the interpretation would impact the treatment of levies in their financial statements.

IFRS Developments Issue 59: IASB issues IFRIC Interpretation 21 Levies (May 2013) EYG no. AU1581.
**Improvements to International Financial Reporting Standards - 2009-2011 Cycle**

**Key requirements**

The IASB's annual improvements process deals with non-urgent but necessary clarifications and amendments to IFRS. In the 2009-2011 annual improvements cycle, the IASB issued six amendments to five standards, summaries of which are provided below.

The amendments are applicable to annual periods beginning on or after 1 January 2013. Earlier application is permitted and must be disclosed. The amendments are applied retrospectively, in accordance with the requirements of IAS 8 for changes in accounting policy.

<table>
<thead>
<tr>
<th>IFRS 1 First-time Adoption of International Financial Reporting Standards</th>
<th>Repeated application of IFRS 1</th>
</tr>

</tbody>
</table>
| IAS 32 Financial Instruments: Presentation | Tax effects of distributions to holders of equity instruments  
- The amendment removes existing income tax requirements from IAS 32 and requires entities to apply the requirements in IAS 12 to any income tax arising from distributions to equity holders. |
| IAS 34 Interim Financial Reporting | Interim financial reporting and segment information for total assets and liabilities  
- The amendment clarifies the requirements in IAS 34 relating to segment information for total assets and liabilities for each reportable segment to enhance consistency with the requirements in IFRS 8 Operating Segments.  
- Total assets and liabilities for a particular reportable segment need to be disclosed only when the amounts are regularly provided to the chief operating decision maker and there has been a material change in the total amount disclosed in the entity’s previous annual financial statements for that reportable segment. |

## Section 2: Items not taken onto the Interpretations Committee's agenda

Certain items deliberated by the Interpretations Committee are published in the IASB’s IFRIC Update as not having been added to the Interpretations Committee’s agenda, together with the reasons for not doing so. For some of these items, the Interpretations Committee includes further information about how the standards should be applied. This guidance does not constitute an interpretation, but rather, provides additional information on the issues raised and the Interpretations Committee’s views on how the standards and current interpretations are to be applied.

The table below summarises topics that the Interpretations Committee decided not to take onto its agenda for the period from 1 September 2012 to 31 August 2013. All items considered by the Interpretations Committee during its meetings, as well as the full text of its conclusions, can be found in the IFRIC Update on the IASB’s website.3

<table>
<thead>
<tr>
<th>Final date considered</th>
<th>Issue</th>
<th>Summary of reasons given for not adding issue to the Interpretations Committee’s agenda</th>
</tr>
</thead>
</table>
| September 2012        | IAS 16 Property, Plant and Equipment, IAS 38 Intangible Assets and IAS 17 Leases – Purchase of right to use land | The Interpretations Committee received a request to clarify whether the purchase of a right to use land should be accounted for as:  
- Purchase of property, plant and equipment  
- Purchase of an intangible asset  
Or  
- Lease of land  
In the fact pattern submitted, the laws and regulations in the jurisdiction concerned do not permit entities to own freehold title to land. Instead, entities can purchase the right to exploit or build on land. The Interpretations Committee noted that the specific fact pattern contains the characteristics of a lease. |
| September 2012        | IAS 19 Employee Benefits – Accounting for contribution-based promises: impact of the 2011 amendments to IAS 19 | The Interpretations Committee received a request to clarify the accounting in accordance with IAS 19 (2011) for contribution-based promises. An underlying concern in the submission was whether the revisions to IAS 19 in 2011 that, for example, clarified the treatment of risk-sharing features related to defined benefit obligations, affect the accounting for contribution-based promises.  
The Interpretations Committee noted that the 2011 amendments should not cause changes to the accounting for contribution-based promises, unless such promises also include elements of risk sharing arrangements between employees and employers. |
| September 2012        | IAS 39 Financial Instruments: Recognition and Measurement – Derecognition of financial instruments upon modification | The Interpretations Committee received a request for guidance on the circumstances in which the restructuring of Greek government bonds (GGBs) should result in derecognition, in accordance with IAS 39, of the whole asset or only part of it. In particular, the Interpretations Committee was requested to consider whether the portion of the old GGBs that are exchanged for twenty new bonds with different maturities and interest rates should be derecognised or accounted for as a modification or transfer that would not require derecognition.  
In the specific fact pattern submitted, the Interpretations Committee noted that the relevant alternative approaches to address this matter would result in derecognition. |
| September 2012        | IAS 39 Financial Instruments: Recognition and Measurement – Classification of a GDP-linked security | The Interpretations Committee received a request for guidance on the appropriate accounting for the GDP-linked security that was offered as part of the restructuring of GGBs.  
The Interpretations Committee noted it would not be able to reach consensus on the issue on a timely basis, but that the GDP-linked security would either be classified as fair value through profit or loss or as available-for-sale. |

---

3 The IFRIC Update is available at http://www.ifrs.org/Updates/IFRIC+Updates/IFRIC+Updates.htm.
<table>
<thead>
<tr>
<th>Final date considered</th>
<th>Issue</th>
<th>Summary of reasons given for not adding issue to the Interpretations Committee's agenda</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 2013</td>
<td>IFRS 3 <em>Business Combinations</em> and IFRS 2 <em>Share-based payment</em> - Accounting for reverse acquisitions that do not constitute a business</td>
<td>The Interpretations Committee received requests for guidance on how to account for transactions in which the former shareholders of a non-listed operating entity become the majority shareholders of the combined entity by exchanging their shares for new shares of a listed non-operating entity. However, the transaction is structured such that the listed non-operating entity acquires the entire share capital of the non-listed operating entity. The Interpretations Committee observed that the reverse acquisition guidance in IFRS 3 should be applied to this transaction by analogy. This results in the non-listed operating entity being identified as the accounting acquirer, and the listed non-operating entity being identified as the accounting acquiree. If the listed non-operating entity is not a business, the transaction is not a business combination, but a share-based payment transaction accounted for in accordance with IFRS 2.</td>
</tr>
<tr>
<td>May 2013</td>
<td>IAS 10 <em>Events after the Reporting Period</em> - Reissuing previously issued financial statements</td>
<td>The Interpretations Committee was asked to clarify the accounting implications of applying IFRS 10 when previously issued financial statements are reissued in connection with an offering document. The Interpretations Committee noted that the scope of IFRS 10 is the accounting for, and disclosure of, events after the reporting period and that the objective of this standard is to prescribe: ▶ When an entity should adjust its financial statements for events after the reporting period ▶ The disclosures that an entity should give about the date when the financial statements were authorised for issue and about events after the reporting period The Interpretations Committee also noted that financial statements prepared in accordance with IFRS 10 should reflect all adjusting and non-adjusting events up to the date that the financial statements were authorised for issue. The Interpretations Committee noted that IAS 10 does not address the presentation of re-issued financial statements in an offering document when the originally issued financial statements have not been withdrawn, but the re-issued financial statements are provided either as supplementary information or a re-presentation of the original financial statements in an offering document in accordance with regulatory requirements.</td>
</tr>
<tr>
<td>May 2013</td>
<td>IAS 7 <em>Statement of Cash Flows</em> - Identification of cash equivalents</td>
<td>The Interpretations Committee received a request about the basis of classification of financial assets as cash equivalents in accordance with IAS 7. Specifically, the submitter suggested that the classification of investments as cash equivalents on the basis of the remaining period to maturity as at the balance sheet date would lead to a more consistent classification rather than the current focus on the investment’s maturity from its acquisition date. The Interpretations Committee noted that, on the basis of paragraph 7 of IAS 7, cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. This paragraph further states that an investment is classified as a cash equivalent only when it has a short maturity from the date of acquisition. The Interpretations Committee observed that paragraph 7 of IAS 7 promotes consistency between entities in the classification of cash equivalents and did not think that the requirements of paragraph 7 of IAS 7 were unclear.</td>
</tr>
<tr>
<td>July 2013</td>
<td>IAS 19 <em>Employee Benefits</em> - pre-tax or post-tax discount rate</td>
<td>The Interpretations Committee received a request to clarify whether, in accordance with IAS 19, the discount rate used to calculate a defined benefit obligation should be a pre-tax or post-tax rate. The Interpretations Committee observed that the discount rate used to calculate a defined benefit obligation should be a pre-tax discount rate.</td>
</tr>
</tbody>
</table>
The IASB is working on a number of projects and interpretations, some of which are expected to be issued by the end of 2013.

Any standards or interpretations that are issued, but not yet effective, need to be considered in the disclosure requirements, as set out in IAS 8. This includes disclosure of the known or reasonably estimable impact that initial application of the pronouncement is expected to have on the entity’s financial statements. If the impact is not known or reasonably estimable, disclosure of this fact must also be made. Therefore, users of this publication should be alert for any changes in IFRS requirements between 31 August 2013 and the date on which their financial statements are authorised for issue.

The table below sets out an estimated timeline for the projects on the IASB’s active agenda. Many of these projects are joint projects between the IASB and the US Financial Accounting Standards Board (FASB).

Please note that this timeline is subject to change by the IASB. Full details are available on the IASB’s website.

EY | Assurance | Tax | Transactions | Advisory

About EY
EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization and may refer to one or more of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit ey.com.

A global set of accounting standards provides the global economy with one measure to assess and compare the performance of companies. For companies applying or transitioning to International Financial Reporting Standards (IFRS), authoritative and timely guidance is essential as the standards continue to change. The impact stretches beyond accounting and reporting, to key business decisions you make. We have developed extensive global resources – people and knowledge – to support our clients applying IFRS and to help our client teams. Because we understand that you need a tailored service as much as consistent methodologies, we work to give you the benefit of our deep subject matter knowledge, our broad sector experience and the latest insights from our work worldwide.
