Prontosan® Wound Irrigation Solution and Gel with Polyhexanide (PHMB) and Betaine (Surfactant)

Wound bed preparation remains a fundamental, yet critical, aspect of wound management.

Only a clean wound can heal.

After 10–minutes, gauzes soaked in Prontosan®

Cleansing effect after 10–minute application.

Prontosan® is a unique surface-active wound cleanser setting a NEW STANDARD to help reduce necrotic burden, control exudate and remove foreign materials that impede healing.

Prontosan Wound Irrigation Solution and Prontosan Wound Gel may be used together or independently.

Two effective ingredients combined to maximize cleansing power: PHMB and Betaine.

- PHMB (Polyhexanide) functions as a preservative (also found in contact lens solution) that inhibits the growth of microorganisms within the product.
- Betaine (Surfactant) is a surface-active cleanser that provides immediate debridement.
Prontosan® Wound Irrigation Solution and Gel with Polyhexanide (PHMB) and Betaine (Surfactant)
Only a clean wound can heal.

Solution Application: Preparation

- Irrigate and cleanse wounds thoroughly with Prontosan Wound Irrigation Solution so coatings can readily be released and removed before further treatment with Prontosan Wound Gel.
- Additionally, it is recommended to cleanse a large area around the entire wound site with the wound irrigation solution.
- Irrigation can be made directly from the solution container to the wound bed.

Gel Application: Shallow Wounds

- For flat wounds, apply Prontosan Wound Gel directly from the 30 mL bottle onto the wound, creating a coating that is at least one-eighth of an inch to a quarter of an inch thick.
- Cover with a secondary dressing.

Gel Application: Deep Wounds/Dressing

- For application in deep wound cavities or fissures, the encrusted coatings are also covered with at least one-eighth of an inch to a quarter of an inch of Prontosan Gel.
- Pack the wound without applying pressure and cover with a secondary dressing.

Apply Prontosan Wound Irrigation Solution and Wound Gel at every dressing change per your facility’s protocol.

Ordering Information
