Electric Power Distribution

A S Pabla
Consulting Engineer
and
Former Chief Engineer
Punjab State Electricity Board

McGraw-Hill
New York  Chicago  San Francisco  Lisbon  London
Madrid  Mexico City  Milan  New Delhi  San Juan
Seoul  Singapore  Sydney  Toronto
Preface xvii

1. Power System 1
   1.1 General Concept 1
   1.2 Distribution of Power 4
   1.3 Quality of Supply 12
   1.4 System Study 15
   1.5 Benchmarking 16
   1.6 Electricity Reforms 19
   1.7 Future Distribution Systems 20

Problems 24

Bibliography 24

2. Electricity Forecasting 26
   2.1 Power Loads 26
   2.2 Connected Load 33
   2.3 Load Forecasting 41
   2.4 Definitions of Some Basic Concepts in Statistics 42
   2.5 Regression Analysis 45
   2.6 Correlation Theory 50
   2.7 Analysis of Time Series 51
   2.8 Factors in Power System Loading 56
   2.9 Unloading the System 59
   2.10 Forecast of System Peak 63
   2.11 Strategic Forecasting (10) 66
2.12 Spatial Load Forecasting  67
2.13 Technological Forecasting  69
2.14 Sources of Error: Regulating the Model  72

Problems  72
Bibliography  73

3. System Planning
3.1 Planning Process  74
3.2 Planning Criteria and Standards  81
3.3 System Development  83
3.4 Dispersed Generation  89
3.5 Distribution System Economics and Finance  92
3.6 Mapping  96
3.7 Enterprise Resource Planning (ERP)  100
3.8 Modelling  103
3.9 System Calculations  104
3.10 Introductory Methods  107
3.11 Network Elements  112
3.12 Load Flow  117
3.13 Automated Planning  123
3.14 Fault Studies  131
3.15 Effect of Abnormal Loads  139
3.16 Line Circuits  140
3.17 Urban Distribution  142
3.18 Outsourcing  143

Problems  144
Bibliography  145

4. Design and Operation
4.1 Engineering Design  147
4.2 Operation Criteria and Standards  151
4.3 Sub-transmission  153
4.4 Sub-station and Feeder  156
4.5 Low Voltage—Three-phase or Single-phase  162
4.6 Practices  164
4.7 Location of Sectionalizer  167
4.8 Voltage Control  168
4.9 Harmonics  178
4.10 Load Variations  189
7. Reliability and Quality

7.1 Introduction 308
7.2 Definition of Reliability 310
7.3 Failure 310
7.4 Probability Concepts 312
7.5 Limitations of Distribution Systems 317
7.6 Power Quality 320
7.7 Reliability Measurement 326
7.9 Reliability Aids 334

Problems 341

Bibliography 341

8. Consumer Services

8.1 Supply Industry 343
8.2 Natural Monopoly 343
8.3 Regulations 344
8.4 Other Legal Provisions 349
8.5 Distribution Code 351
8.6 Consumer Care 352
8.7 Standards 353
8.8 Consumer Load Requirements 354
8.9 Consumer Factors 354
8.10 Least Cost of Supply 358
8.11 Revenue and Return 358
8.13 Energy Audit 378
8.14 Theft of Electricity 382
8.15 Metering of Energy 386
8.16 Periodical Testing of Meters 397
8.17 Consumer Load Monitoring 399

Problems 399

Bibliography 400

9. Tariffs and Billing

9.1 Objectives 402
9.2 Costing 404
9.3 Pricing Approach 410

</table>
12.4 Thermo-Mechanical Effects in Cable Systems 541
12.5 Cable Materials 542
12.6 Cable Jointing 544
12.7 Installation of Cables 546
12.8 Principal Causes of Cable Failure 553
12.9 Selection of Cables 554
12.10 System Fault Location 556

Problems 562
Bibliography 563

13. System Overvoltages 564

13.1 Causes of Overvoltages 564
13.2 Lightning 566
13.3 Protective Devices 569
13.4 Failure of Lightning Arresters 577
13.5 Detection of Arrester Failures in the Field 580
13.6 Allowable Maximum Distance of Separation 581
13.7 Travelling Waves 583
13.8 Protection Schemes 585
13.9 Pole-Mounted Distribution Transformers 588
13.10 Cable Junction 589
13.11 Lightning Arresters: Earthing 590

Problems 592
Bibliography 592

14. Rural Supply 594

14.1 Rural System 596
14.2 Reliability 601
14.3 Faults and Protection 602
14.4 Improvement of Existing Distribution Systems 605
14.5 Single Wire Earth Return System 609
14.6 Fault Locating 610
14.7 Auto-Reclosers 612
14.8 Determination of Rating of Induction Motor (Cage Type) 613
14.9 Constructional Practices 616
14.10 Future Orientation of Rural System 629

Problems 643
Bibliography 644
15. Power Capacitors

15.1 Reactive Power 646
15.2 Series and Shunt Capacitors 654
15.3 System Harmonics 665
15.4 HT Shunt Capacitors’ Installation Requirements 667
15.5 Size of Capacitors for Power Factor Improvement 671
15.6 LT Capacitors 672
15.7 Construction Features 679
15.8 Failures [7, 6] 680
Problems 682
Bibliography 683

16. Insulation Measurements

16.1 Insulation Supervision 685
16.3 Insulation Testing: Destructive Tests 697
16.4 Transformer Oil Testing 699
Problems 706
Bibliography 706

17. System Protection

17.1 Time Current Characteristics 708
17.2 Fuses 709
17.3 Switching Devices 717
17.4 Circuit Breakers 720
17.5 Protective Relaying 729
17.6 Instrument Transformers 742
17.7 Overcurrent Schemes 746
17.8 Unit Protection 748
Problems 749
Bibliography 750

18. System Maintenance

18.1 Successful Maintenance 751
18.2 Failures and Maintenance 757
18.3 Porcelain Insulators 764
18.4 Transformer Oil Maintenance 765
18.5 Transformer Drying 769
18.6 Maintenance Staff and Tools 772
18.7 Maintenance Costs 776

Problems 777

Bibliography 777

19. Electrical Services 779

19.1 Standards 779
19.2 Electrical Installations 779
19.3 Reception of Electric Supply 780
19.4 Supply Voltage 783
19.5 Consumer Supply Arrangement 785
19.6 Internal Wiring 790
19.7 Switchgear 796
19.8 Plug and Socket Outlets 798
19.9 Circuit Loading 798
19.10 Load Estimation 804
19.11 Earthing 806
19.12 Lighting 809
19.13 Lamps 810
19.14 Luminaires 812
19.15 Lighting Design 812
19.16 Road Lighting 814
19.17 Flood Lighting 819
19.18 Automatic Fire Alarm System 821
19.19 Electrical Call Bell Services 824
19.20 Other Services 824
19.21 Lightning Protection 827
19.22 Standby Supplies 830
19.23 Voltage Stabilizers [5] 831

Problems 833

Bibliography 834

Appendix I: International Electricity Supplies 836
Appendix II: Conductors and Cable Data 841
Appendix III: Power Cable Laying Merits 852
Appendix IV: Village Electrification and Pumpset Energization 854
Appendix V: Electrical Accidents 856
Appendix VI: Illumination Levels 859
Appendix VII: Optimum Specific Energy Consumption 863
Appendix VIII: Tinned Copper Fuse Wire 865
Appendix IX: Power Factors  867
Appendix X: Ambient Temperature and Average Altitude  869
Appendix XI: Transmission and Distribution Losses in States  871
