Warranty

THE SPECIFICATIONS AND INFORMATION REGARDING THE PRODUCTS IN THIS GUIDE ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL STATEMENTS, INFORMATION, AND RECOMMENDATIONS IN THIS GUIDE ARE BELIEVED TO BE ACCURATE AND PRESENTED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. USERS MUST TAKE FULL RESPONSIBILITY FOR THEIR APPLICATION OF PRODUCTS.

YEALINK NETWORK TECHNOLOGY CO., LTD. MAKES NO WARRANTY OF ANY KIND WITH REGARD TO THIS GUIDE, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Yealink Network Technology CO., LTD. shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance, or use of this guide.

Declaration of Conformity

Hereby, Yealink Network Technology CO., LTD. declares that this phone is in conformity with the essential requirements and other relevant provisions of the CE, FCC.

CE Mark Warning

This device is marked with the CE mark in compliance with EC Directives 2006/95/EC and 2004/108/EC.

Part 15 FCC Rules

This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.
Class B Digital Device or Peripheral

Note: This device is tested and complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experience radio/TV technician for help.

WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.
GNU GPL INFORMATION

Yealink SIP-T46G firmware contains third-party software under the GNU General Public License (GPL). Yealink uses software under the specific terms of the GPL. Please refer to the GPL for the exact terms and conditions of the license.

The original GPL license, source code of components licensed under GPL and used in Yealink products can be downloaded online:
http://www.yealink.com/GPLOpenSource.aspx?BaseInfoCatId=293&NewsCatId=293&CateId=293.
About This Guide

Thank you for choosing the SIP-T46G IP Phone, an ultra-elegant gigabit IP Phone which is exquisitely designed to provide business telephony features, such as Call Hold, Call Transfer, Busy Lamp Field, Multicast Paging and Conference over an IP network.

This guide provides everything you need to quickly use your new phone. First, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Packaging Contents and Regulatory Notices sections in this guide before you set up and use the SIP-T46G IP phone.

If this is your first time using the SIP-T46G IP phone, we recommend that you first refer to the Quick Installation Guide and Quick Reference Guide, available online: http://www.yealink.com/DocumentDownload.aspx?CatId=142&flag=142.

Note

Shared Line, Busy Lamp Field List, Network Directory and Network Call Log features are hidden for IP phones in neutral version, which are designed for BroadWorks environment. Please contact your system administrator for more information.

In This Guide

Topics provided in this guide include:

- Chapter 1  Overview
- Chapter 2  Getting Started
- Chapter 3  Customizing Your Phone
- Chapter 4  Basic Call Features
- Chapter 5  Advanced Phone Features

Summary of Changes

This section describes the changes to this guide for each release and guide version.

Changes for Release 71, Guide Version 71.150

Major updates have occurred to the following sections:

- Bluetooth Headset on page 55
- Remote Phone Book on page 49
- Line Keys on page 60
- Anonymous Call on page 115
- Troubleshooting on page 141
- Appendix A - Time Zones on page 153

User Guide for the SIP-T46G IP Phone
Overview

This chapter provides the overview of the SIPT46G IP phone. Topics include:

- Hardware Component Instructions
- Icon Instructions
- LED Instructions
- User Interfaces
- Documentations

If you require additional information or assistance with your new phone, contact your system administrator.

Hardware Component Instructions

The main hardware components of the SIPT46G IP phone are the LCD screen and the keypad.
Hardware component instructions of the SIP-T46G IP phone are:

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1 LCD Screen | Shows information about calls, messages, soft keys, time, date and other relevant data:  
• Call information—caller ID, call duration  
• Icons (for example, 📣 )  
• Missed call text or second incoming caller information  
• Prompt text (for example, "Saving file, please wait")  
• Time and date |
| 2 Power Indicator LED | Indicates phone power and some feature statuses. |
| 3 Line Keys | Use these keys to activate up to six accounts and assign various features. |
| 4 HEADSET Key | Toggles and indicates the headset mode. |
| 5 MUTE Key | Toggles and indicates mute feature. |
| 6 MESSAGE Key | Accesses voice messages. |
| 7 HOLD Key | Places a call on hold or resumes a held call. |
| 8 REDIAL Key | Redials a previously dialed number. |
| 9 TRANSFER Key | Transfers a call to another party. |
| 10 Speakerphone Key | Toggles the hands-free speakerphone mode. |
| 11 Volume Key | Adjusts the volume of the handset, headset, speaker, and ringer. |
| 12 Keypad | Provides the digits, letters and special characters in context-sensitive applications. |
| 13 Keys | Scroll through the displayed information. |
| 14 Soft Keys | Label automatically to identify their context-sensitive features. |
## Icon Instructions

Icons appearing on the LCD screen are described in the following table:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>

**LED Instructions**

### Power Indicator LED

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>The phone is initializing.</td>
</tr>
<tr>
<td>Fast flashing red</td>
<td>The phone is ringing.</td>
</tr>
<tr>
<td>Slow flashing red</td>
<td>The phone receives a text message or voice mail.</td>
</tr>
<tr>
<td>Off</td>
<td>The phone is powered off, powered on or idle.</td>
</tr>
</tbody>
</table>

### Line key LED

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid green</td>
<td>The line is seized.</td>
</tr>
<tr>
<td></td>
<td>The line is in conversation.</td>
</tr>
<tr>
<td>Fast flashing green</td>
<td>The line receives an incoming call.</td>
</tr>
<tr>
<td>Slow flashing green</td>
<td>The call is placed on hold.</td>
</tr>
<tr>
<td>Off</td>
<td>The line is inactive.</td>
</tr>
</tbody>
</table>

### Line key LED (configured as BLF key)

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>The monitored user is busy.</td>
</tr>
<tr>
<td>Fast flashing red</td>
<td>The monitored user receives an incoming call.</td>
</tr>
<tr>
<td>Off</td>
<td>The monitored user is idle.</td>
</tr>
<tr>
<td></td>
<td>The monitored user does not exist.</td>
</tr>
</tbody>
</table>

### Line key LED (used as page switch key)

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>There is a parked call on the line key of the non-current page.</td>
</tr>
<tr>
<td>Fast flashing green</td>
<td>The line receives an incoming call on the line key of the non-current page.</td>
</tr>
<tr>
<td>Fast flashing red</td>
<td>The monitored user receives an incoming call on the line key of the non-current page.</td>
</tr>
<tr>
<td>Off</td>
<td>The line keys are idle.</td>
</tr>
</tbody>
</table>
User Interfaces

Two ways to customize configurations of your SIP-T46G IP phone:

- The user interface on the IP phone.
- The user interface in a web browser on your PC.

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many cases, it is possible to use either the phone user interface and/or the web user interface interchangeably. However, in some cases, it is only possible to use one or the other interface to operate the phone and change settings.

Phone User Interface

You can customize your phone by pressing the Menu soft key to access the phone user interface. The Advanced option is only accessible to the administrator, and the default administrator password is “admin” (case-sensitive). For more information on customizing your phone with the available options from the phone user interface, refer to Customizing Your Phone on page 19.

Web User Interface

In addition to the phone user interface, you can also customize your phone via web user interface. In order to access the web user interface, you need to know the IP address of your new phone. To obtain the IP address, press the OK key on the phone. Enter the IP address (e.g., http://192.168.0.10 or 192.168.0.10) in the address bar of web browser on your PC. The default administrator user name and password are both “admin” (case-sensitive).

The options you can use to customize the IP phone via phone user interface and/or via web user interface are listed in the following table:

<table>
<thead>
<tr>
<th>Options</th>
<th>Phone User Interface</th>
<th>Web User Interface</th>
</tr>
</thead>
<tbody>

**Note**

Getting Started

This chapter provides the following basic installation instructions and information for obtaining the best performance with the SIP-T46G IP phone. Topics include:

- Packaging Contents
- Phone Installation
- Phone Initialization
- Phone Status
- Basic Network Settings
- Registration
- Idle Screen

If you require additional information or assistance with your new phone, contact your system administrator.

Packaging Contents

The following components are included in your SIP-T46G IP phone package:

- SIP-T46G IP Phone
  ![SIP-T46G IP Phone](image)
- Phone Stand
  ![Phone Stand](image)
- Wall Mount Bracket (Optional)

- Power Adapter (Optional)

- Handset & Handset Cord

- Ethernet Cable

- Quick Installation Guide & Quick Reference Guide
Phone Installation

If your phone is already installed, proceed to Phone Initialization on page 14.

This section introduces how to install the phone:

1) Attach the stand or the optional wall mount bracket
2) Connect the handset and optional headset
3) Connect the network and power

1) Attach the stand or the optional wall mount bracket

Desk Mount Method
Wall Mount Method (Optional)

Note
The wall mount bracket should be purchased separately. For more information on how to attach the wall mount bracket, refer to Yealink Wall Mount Quick Installation Guide for T4X IP Phones.

2) Connect the handset and optional headset

Note
The headset, wireless headset adapter EHS36 and Bluetooth USB dongle BT40 should be purchased separately.

The EXT port can also be used to connect an expansion module EXP40.

3) Connect the network and power

You have two options for power and network connections. Your system administrator will advise you which one to use.

- AC power (Optional)
- Power over Ethernet (PoE)

**AC Power (Optional)**

To connect the AC power:

1. Connect the DC plug on the power adapter to the DC5V port on the phone and
connect the other end of the power adapter into an electrical power outlet.

2. Connect the included or a standard Ethernet cable between the Internet port on the phone and the one on the wall or switch/hub device port.

**Power over Ethernet**

With the included or a regular Ethernet cable, the SIP-T46G IP phone can be powered from a PoE-compliant switch or hub.

**To connect the PoE:**

1. Connect the Ethernet cable between the Internet port on the phone and an available port on the in-line power switch/hub.

**Note**

If in-line power switch/hub is provided, you don’t need to connect the phone to the power adapter. Make sure the switch/hub is PoE-compliant.

The phone can also share the network with another network device such as a PC (personal computer). It is an optional connection.

**Important** Do not unplug or remove power to the phone while it is updating firmware and configurations.
Phone Initialization

After your phone is powered on, the system boots up and performs the following steps:

**Automatic Phone Initialization**

The phone finishes the initialization by loading the saved configuration. The LCD screen displays "Initializing...Please wait" during this process.

**DHCP (Dynamic Host Configuration Protocol)**

The phone attempts to contact a DHCP server in your network to obtain valid IPv4 network settings (e.g., IP address, subnet mask, default gateway address and DNS address) by default.

---

**Note**

If your network does not use DHCP, proceed to Basic Network Settings on page 15.

Phone Status

You can view phone status via phone user interface or web user interface.

Available information of phone status includes:

- Network status (e.g., IPv4 status, IPv6 status, IP address mode and MAC address).
- Phone status (e.g., device model, firmware version and product ID).
- Account status (e.g., register status of SIP accounts).

**To view the phone status via phone user interface:**

1. Press (ok), or press Menu -> Status.
2. Press ↑ or ↓ to scroll through the list and view the specific information.

![Status Menu Example](image)

**To view the phone status via web user interface:**

1. Open the web browser on your computer.
2. Enter the IP address in the browser’s address bar, and then press the Enter key.
3. Enter the user name (admin) and password (admin) in the login page.
4. Click **Confirm** to login.

   The phone status is displayed on the first page of the web user interface.

**Basic Network Settings**

If your phone cannot contact a DHCP server for any reason, you need to configure network settings manually. The IP phone can support either or both IPv4 and IPv6 addresses.

**To configure the IP address mode via phone user interface:**

1. Press **Menu** -> **Advanced** (password: admin) -> **Network** -> **WAN Port**.
2. Press \( \downarrow \) or \( \uparrow \) to select IPv4, IPv6 or IPv4 & IPv6 from the **IP Address Mode** field.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**To configure a static IPv4 address via phone user interface:**

1. Press **Menu** -> **Advanced** (password: admin) -> **Network** -> **WAN Port** -> **IPv4**.
2. Press \( \downarrow \) or \( \uparrow \), or the **Switch** soft key to select the **Static IP** from the **Type** field.
3. Enter the desired values in the **IP Address**, **Subnet Mask**, **Gateway**, **Primary DNS** and **Secondary DNS** fields respectively.

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**To configure a static IPv6 address via phone user interface:**

1. Press **Menu** -> **Advanced** (password: admin) -> **Network** -> **WAN Port** -> **IPv6**.
2. Press \( \text{ or } \) or the Switch soft key to select the Static IP from the Type field.

3. Enter the desired values in the **IP Address**, IPv6 IP Prefix, Gateway, Primary DNS and Secondary DNS fields respectively.

4. Press the Save soft key to accept the change or the Back soft key to cancel.

If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. Set the WAN port as a PPPoE port. The PPPoE port will perform a PPP negotiation to obtain the IP address. Contact your system administrator for the PPPoE user name and password.

**To configure PPPoE via phone user interface:**

2. Press \( \text{ or } \) or the Switch soft key to select the PPPoE from the Type field.
3. Enter the user name and password in the corresponding fields.

4. Press the Save soft key to accept the change or the Back soft key to cancel.

**Note**

Using the wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. For more information on these parameters, contact your system administrator.
Registration

Generally, your phone will be deployed with multiple other phones. In this case, your system administrator will configure the phone parameters beforehand, so that after you start up your phone, the phone will be registered and ready for use. If your phone is not registered, you may have to register it. For more information on how to register your phone, refer to Account Management on page 70.

Idle Screen

If the phone has successfully started up, the idle LCD screen will be shown as below.

![Idle Screen](image)

**Idle Screen description:**

<table>
<thead>
<tr>
<th>No.</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>This area shows the phone’s time and date.</td>

Customizing Your Phone

You can customize your SIP-T46G IP phone by personally configuring certain settings, for example, contrast, time & date and ring tones. You can add contacts to the phone’s local directory manually or from call history. You can also personalize different ring tones for different callers.

This chapter provides basic operating instructions for customizing your phone. Topics include:

- General Settings
- Audio Settings
- Contact Management
- Call History Management
- System Customizations

If you require additional information or assistance with your new phone, contact your system administrator.

General Settings

Wallpaper

You can customize the wallpaper of the SIP-T46G IP phone. You can change the wallpaper image via phone user interface or web user interface. You can also upload custom wallpaper images via web user interface. The file format of wallpaper image must be .jpg, .png or .bmp. Contact your system administrator for the detailed requirement of the file format.

To change the wallpaper via phone user interface:

1. Press Menu -> Basic -> Display -> Wallpaper.
2. Press \( \text{ } \) or \( \text{ } \), or the **Switch** soft key to select the desired wallpaper image.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Wallpaper is configurable via web user interface at the path **Settings -> Preference**.

To upload the customized wallpaper via web user interface:

1. Click on **Settings -> Preference**.
2. In the **Upload Wallpaper** field, click **Browse** to select the wallpaper image from your local system.

3. Click **Upload** to upload the file.
4. Click **Confirm** to accept the change.

The customized wallpaper appears in the pull-down list of **Wallpaper**.

### Backlight

You can configure backlight to adjust the brightness of the LCD screen. **Backlight On Intensity** is used to adjust the backlight intensity of the LCD screen. Backlight time specifies the delay time to turn off or dusky the backlight when the IP phone is inactive. **Backlight Idle Intensity** decides whether the IP phone turns off or dusky the backlight of the LCD screen after a period of inactivity.

You can configure the backlight status on the LCD screen as the following types:

- **Always On**: Backlight is on permanently.
- **1min, 2min, 5min, 10min, 30min**: Backlight goes out or turns dusky when the phone has been inactive for approximately 1min, 2min, 5min, 10min or 30min.
To configure the backlight via phone user interface:

1. Press **Menu** -> **Basic** -> **Display** -> **General**.

![General menu](image)

2. Press < or >, or the **Switch** soft key to select the desired level from the **Backlight On Intensity** field.

3. Press < or >, or the **Switch** soft key to select the desired value from the **Backlight Idle Intensity** field.

4. Press < or >, or the **Switch** soft key to select the desired time from the **Backlight Time** field.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Backlight is configurable via web user interface at the path **Settings** -> **Preference**.

**Contrast**

You can configure the contrast of the expansion module (EXP40) to a comfortable level. Ensure the expansion module has been connected to the phone.

To configure the contrast via phone user interface:

1. Press **Menu** -> **Advanced** (password: admin) -> **Phone Settings** -> **Contrast**.

![Contrast menu](image)

2. Press < or >, or the **Switch** soft key to increase or decrease the intensity of contrast.

   The default contrast level is 6.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.
Language

The default language of the phone user interface is English. The phone will detect and use the same language as which of your web browser for the web user interface. If the language of your web browser is not supported by the phone, the web user interface will use English by default. You can change the language for the phone user interface and the web user interface respectively.

Note
Not all of the supported languages are available for selection. The available languages depend on the language packs currently loaded to the IP phone. Please contact your system administrator for more information on the available languages of your new phone.

To change the language for the phone user interface:

1. Press Menu -> Basic -> Language.
2. Press ▲ or ▼ to select the desired language.
3. Press the Save soft key to accept the change.
   Text displayed on the phone user interface will change to the selected language.

To change the language for the web user interface:

1. Click on Settings -> Preference.
2. Select the desired language from the pull-down list of Language.

3. Click Confirm to accept the change. Text displayed on the web user interface will change to the selected language.

Time & Date

The time and date are displayed on the LCD screen when the phone is idle. You can configure the phone to obtain the time and date from the SNTP server automatically, or configure the time and date manually. If the phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, contact your system administrator for more information.

To configure the SNTP settings via phone user interface:

1. Press Menu -> Basic -> Time & Date -> General -> SNTP Settings.
2. Press 4 or 5, or the Switch soft key to select the time zone that applies to your area from the Time Zone field. The default time zone is “+8 China(Beijing)
3. Enter the domain names or IP addresses in the NTP Server 1 and NTP Server 2 fields respectively.
4. Press [或 ✪] , or the Switch soft key to select the desired value from the Daylight Saving field.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

Note
Please refer to Appendix A - Time Zones for the list of available time zones on the IP phone.

To configure the time and date manually via phone user interface:
2. Enter the specific date and time.
3. Press the Save soft key to accept the change.

The time and date displayed on the LCD screen will change accordingly.

To configure the date and time format via phone user interface:
1. Press Menu->Basic->Time & Date->Format.
2. Press \( \downarrow \) or \( \uparrow \), or the `Switch` soft key to select the desired date format from the `Date Format` field.

3. Press \( \downarrow \) or \( \uparrow \), or the `Switch` soft key to select the desired time format (12 Hour or 24 Hour) from the `Time Format` field.

4. Press the `Save` soft key to accept the change or the `Back` soft key to cancel.

There are 7 available date formats. For example, for the date format “WWW DD MMM”, “WWW” represents the abbreviation of the week, “DD” represents the two-digit day, and “MMM” represents the first three letters of the month.

The date formats you need to know:

<table>
<thead>
<tr>
<th>Date Format</th>
<th>Example (2013-7-27)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WWW MMM DD</td>
<td>Sat Jul 27</td>
</tr>
<tr>
<td>DD-MMM-YY</td>
<td>27-Jul-13</td>
</tr>
<tr>
<td>YYYY-MM-DD</td>
<td>2013-07-27</td>
</tr>
<tr>
<td>DD/MM/YYYY</td>
<td>27/07/2013</td>
</tr>
<tr>
<td>MM/DD/YY</td>
<td>07/27/13</td>
</tr>
<tr>
<td>DD MMM YYYY</td>
<td>27 Jul 2013</td>
</tr>
<tr>
<td>WWW DD MMM</td>
<td>Sat 27 Jul</td>
</tr>
</tbody>
</table>

Time and date is configurable via web user interface at the path `Settings -> Time & Date`.

**Administrator Password**

The Advanced option is only accessible to the administrator. The default administrator password is “admin”. For security reasons, you should change the default administrator password as soon as possible.

To change the administrator password via phone user interface:

1. Press `Menu` -> `Advanced` (password: admin) -> `Set Password`.
2. Enter the old password in the `Current Password` field.
3. Enter the new password in the **New Password** field.
4. Enter the new password again in the **Confirm Password** field.

![Password Setting Screen]

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Administrator password is configurable via web user interface at the **Security -> Password**.

**Key as Send**

You can set the “#” or “*” to perform as a send key while dialing.

**To configure key as send via phone user interface:**

1. Press **Menu -> Call Features -> Others -> General**.
2. Press 4 or 5, or the **Switch** soft key to select # or * from the **Key as Send** field, or select **Disabled** to disable this feature.

![General Settings Screen]

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Key as send is configurable via web user interface at the **Features -> General Information**.

**Keypad Lock**

You can lock the keypad of your phone temporarily when you are not using it. This feature helps to protect your phone from unauthorized use.
Keypad lock consists of the following:

**Menu Key:** The Menu soft key is locked. You cannot access the menu of the phone until unlocked.

**Function Keys:** The function keys are locked. You cannot use the MESSAGE, REDIAL, HOLD, MUTE, TRANSFER, OK, X, navigation keys, soft keys and line keys until unlocked.

**All Keys:** All keys are locked except the Volume key. You are only allowed to dial emergency numbers, reject incoming calls by pressing the X key, answer incoming calls by lifting the handset, pressing the Speakerphone key, the HEADSET key or the OK key, mute an active call by pressing the X key, place an active call on hold by pressing the Hold soft key, resume the held call by pressing the Resume soft key, and end the call by hanging up the handset or pressing the Speakerphone key.

**Note**
The emergency number setting, if desired, must be made before lock activation. For more information, refer to Emergency Number on page 78.

To activate the keypad lock via phone user interface:

1. Press **Menu**->**Advanced** (password: admin) ->**Phone Settings**->**Keypad Lock**.
2. Press (4) or (5), or the **Switch** soft key to select **Enabled** from the **Keypad Lock Enable** field.
3. Press (4) or (5), or the **Switch** soft key to select the desired type from the **Keypad Lock Type** field.

![Keypad Lock Screen](image)

4. Press the **Save** soft key to accept the change.

Long press **#** to lock the keypad immediately when the phone is idle.
The LCD screen prompts “Keypad Lock!” and displays the icon 🎉.

You can configure the interval (in seconds) to automatically lock the keypad instead of long pressing #.

To configure the interval of automatic keypad lock via web user interface:

1. Click on **Features** -> **Phone Lock**.
2. Enter the desired time in the **Phone Lock Time Out (0~3600s)** field.
3. Click **Confirm** to accept the change.

**Note**

The default timeout is 0 second, that is, you can long press # to lock the keypad only. Interval of automatic keypad lock is configurable via web user interface only.

To unlock the keypad, you must know the keypad unlock PIN of the phone. The default keypad unlock PIN is “123”.

To change the keypad unlock PIN via phone user interface:

1. Press **Menu** -> **Basic** -> **Phone Unlock PIN**.
2. Enter the desired values in the **Current PIN**, **New PIN** and **Confirm PIN** fields respectively.

![Phone Unlock PIN](image)

3. Press the **Save** soft key to accept the setting or the **Back** soft key to cancel.

**Note**
The unlock PIN length must be within 15 characters.

**To unlock the keypad via phone user interface:**

1. Press any locked key, the LCD screen prompts “Unlock PIN”.

![Unlock PIN](image)

2. Enter the PIN in the **Unlock PIN** field.
3. Press the **OK** soft key to unlock the keypad.

   The icon disappears from the LCD screen.
   
   You can long press `#` or wait for a period of time (if configured) to lock the keypad again.

**Note**
You can also unlock the keypad by administrator password.

**To deactivate the keypad lock via phone user interface:**

1. Press `Menu` -> **Advanced** (password: admin) -> **Phone Settings** -> **Keypad Lock**.
2. Press \( \text{or } \), or the Switch soft key to select Disabled from the Keypad Lock Enable field.

![Keypad Lock screenshot]

3. Press the Save soft key to accept the change.

Keypad lock is configurable via web user interface at the path Features->Phone Lock.

**Audio Settings**

**Volume**

You can press the volume key to adjust the ringer volume when the phone is idle. You can also press the volume key to adjust the receiver volume of currently engaged audio devices (handset, speakerphone or headset) when the phone is in use.

**To adjust the volume when the phone is idle:**

1. Press \( \) to adjust the ringer volume.

![Volume adjustment screenshot]

**Note** If ringer volume is adjusted to minimum, the \( \) icon will appear on the LCD screen.
To adjust the volume when the phone is during a call:
1. Press to adjust the volume of currently engaged audio device (handset, speakerphone or headset).

![Image of phone interface](image)

### Ring Tones

Ring tones are used to indicate incoming calls. You can select different ring tones to distinguish different accounts registered on your phone, or to distinguish your phone from your neighbor’s.

**To select a ring tone for the phone via phone user interface:**
1. Press `Menu` -> `Basic` -> `Sound` -> `Ring Tones`.
2. Press `▲` or `▼` to select the desired ring tone.

![Image of ring tones](image)

3. Press the `Save` soft key to accept the change or the `Back` soft key to cancel.

**To select a ring tone for the account via web user interface:**
1. Click on `Account`.
2. Select the desired account from the pull-down list of `Account`.
3. Click on `Basic`.
4. Select the desired ring tone from the pull-down list of `Ring Type`. 
If **Common** is selected, this account will use the ring tone selected for the phone.
Refer to the above instruction.

5. Click **Confirm** to accept the change.

**Note**

A ring tone for the account is configurable via web user interface only.
The ring tone for an incoming call on the phone may be different. For example, when the phone receives an incoming call from a contact stored in the local directory, it will play the ring tone assigned to the contact in the local directory (refer to **Adding Contacts**). If no ring tone is assigned to the contact, the phone will play the ring tone assigned to the associated group (refer to **Groups**). Otherwise, the phone will play the ring tone assigned to the account. If no ring tone is assigned to the contact and account, the phone will play the ring tone assigned to the phone.

To upload a custom ring tone for your phone via web user interface:

1. Click on **Settings** -> **Preference**.
2. In the **Local Ringtone** field, click **Browse** to locate a ring tone (the file format must be .wav) file from your local system.
3. Click **Upload** to upload the file.

**Note**
All custom ring tone files must be within 100KB. Uploading custom ring tones for your phone is configurable via web user interface only.

**Contact Management**

This section provides the operating instructions for managing contacts. Topics include:

- Directory
- Local Directory
- Blacklist
- Remote Phone Book

**Directory**

Directory provides easy access to frequently used lists. The lists may contain Local Directory, History, Remote Phone Book and LDAP.

**To configure the directory via web user interface:**

1. Click on **Directory** -> **Setting**.
2. In the **Directory** block, select the desired list from the **Disabled** column and then click **»**.
   
   The selected list appears in the **Enabled** column.
3. Repeat the step 2 to add more lists to the **Enabled** column.
4. To remove a list from the **Enabled** column, select the desired list and then click «.
5. To adjust the display order of enabled lists, select the desired list and then click up or down.
The LCD screen displays the list(s) in the adjusted order.

6. Click **Confirm** to accept the change.

**Note**

Directory is configurable via web user interface only.

**To check directory via phone user interface:**

1. Press the **Directory** soft key when the phone is idle.
   
The LCD screen displays the enabled list(s) in the directory.

   ![Directory screen](image)

If there is only one list in the directory, press the **Directory** soft key to enter this list directly.

**Note**

If the remote phone book and LDAP are not configured in advance, you cannot see remote phone book and LDAP lists on the phone user interface. For more information on remote phone book, refer to **Remote Phone Book** on page 49. For more information on the LDAP, contact your system administrator.
Local Directory

The built-in phone directory can store the names and phone numbers of your contacts. You can store up to 1000 contacts and 50 groups in your phone's local directory. There are four default groups in the local directory: All Contacts, Company, Family and Friend. You can add new groups and contacts; edit, delete or search for a contact; or simply dial a contact number from the local directory.

Groups

**To add a group to the local directory:**

1. Press the **Directory** soft key.
   
   The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

   ![Local Group Table](image)

   If Local Directory is removed from the directory, press **Menu -> Directory -> Local Group** to enter the local directory.

2. Press the **Add Group** soft key.
3. Enter the desired group name in the **Group Name** field.
4. Press (or ) to select the desired group ring tone from the **Ring Tones** field.
   
   If **Auto** is selected, this group will use the ring tone assigned to the account. For more information on the ring tone for the account, refer to **Ring Tones** on page 31.

   ![Group Manager](image)

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.
You can also edit or delete the Company, Family and Friend contact groups.

**To edit a group in the local directory:**

1. Press the **Directory** soft key.
   - The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

   ![Local Group](image1)

   If Local Directory is removed from the directory, press **Menu -> Directory -> Local Group** to enter the local directory.

2. Select the desired contact group.

3. Press the **Option** soft key and then select **Detail** from the prompt list.

   ![Local Group](image2)

4. Press ⬅️ or ➡️ to highlight the group information and then edit.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.
To delete a group from the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

   ![Local Group](image)

   If Local Directory is removed from the directory, press Menu > Directory > Local Group to enter the local directory.

2. Select the desired contact group.

3. Press the Option soft key and then select Delete from the prompt list.

   The LCD screen prompts the following warning:

   ![Delete the selected group?](image)

4. Press the OK soft key to confirm the deletion or the Cancel soft key to cancel.

**Adding Contacts**

You can add contacts to the local directory in the following ways:

- Manually
- From call history
- From remote phone book

**Adding Contacts Manually**

To add a contact to the local directory manually:

1. Press the Directory soft key.
The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

If Local Directory is removed from the directory, press Menu > Directory > Local Group to enter the local directory.

2. Select the desired contact group and press the Enter soft key.
3. Press the Add soft key.
4. Enter the name and the office, mobile or other numbers in the corresponding fields.

5. Press ▼ or ▲, or the Switch soft key to select the desired account from the Account field.
   If Auto is selected, the phone will use the first available account when placing calls to the contact from the local directory.

6. Press ▼ or ▲, or the Switch soft key to select the desired ring tone from the Ring field.
   If Auto is selected, this contact will use the ring tone assigned to the group.

7. Press ▼ or ▲, or the Switch soft key to select the desired photo from the Photo field.

8. Press the Save soft key to accept the change or the Back soft key to cancel.

Note
If the contact has existed in the directory, the LCD screen will prompt “Contact name already existed!”.
**Adding Contacts from Call History**

To add a contact to the local directory from the call history:

1. Press the **History** soft key.
2. Press ↑ or ↓ to highlight the desired entry.
3. Press the **Option** soft key, and then select **Add to Contacts** from the prompt list.

4. Enter the contact name.
5. Press the **Save** soft key to accept the change.

The entry is successfully saved to the local directory.

---

**Adding Contacts from remote phone book**

To add a contact to the local directory from remote phone book:

1. Press **Directory->Remote Phone Book**.
   
   If Remote Phone Book is removed from the directory, press **Menu->Directory->Remote Phone Book** to enter remote phone book.
2. Select the desired remote group and press the **Enter** soft key.
3. Press ↑ or ↓ to highlight the desired entry.
4. Press the **Option** soft key, and then select **Add to Contacts** from the prompt list.
5. Press the **Save** soft key to save the contact to the local directory.

   If the contact has already existed in the local directory, the LCD screen will prompt “Overwrite the original contact?”: Press the **OK** soft key to overwrite the original contact in the local directory or the **Cancel** soft key to cancel.

For more information on remote phone book operating, refer to Remote Phone Book on page 49.
Editing Contacts

To edit a contact in the local directory:

1. Press the Directory soft key.
   The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

2. Select the desired contact group and press the Enter soft key.

3. Press up or down to highlight the desired contact.

4. Press the Option soft key, and then select Detail from the prompt list.

5. Press left or right to highlight the contact information and then edit.

6. Press the Save soft key to accept the change or the Back soft key to cancel.
Deleting Contacts

To delete a contact from the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

2. Select the desired contact group and press the Enter soft key.

3. Press or to highlight the desired contact.

4. Press the Option soft key, and then select Delete from the prompt list.

5. Press the OK soft key to confirm the deletion or the Cancel soft key to cancel.

You can also delete all contacts by pressing the Option soft key, and then select Delete All.

Uploading Contact Photos

To upload a new custom photo for the contact via web user interface:

1. Click on Directory -> Local Directory.

2. Click Browse, and then select a photo from your local computer.

3. Click Upload Photo to upload the photo.
You can also click **Delete Photo** to delete the photo.

![Directory Screen](image)

**Note**

The phone only supports the .png, .jpg and .bmp format files. You can only delete the custom photo.

To change the custom photo for the contact via web user interface:

1. Click on **Directory ->Local Directory**.
2. Click to select the desired entry which you want to edit.
3. Select the desired photo from the pull-down list of **Photo**.
4. Click **Edit** to accept the change.

When you place a call to the contact or receive a call from the contact, the LCD screen will show the contact photo.
Placing Calls to Contacts

To place a call to a contact from the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

   If Local Directory is removed from the directory, press Menu -> Directory -> Local Group to enter the local directory.

2. Select the desired contact group and press the Enter soft key.

3. Press ▲ or ▼ to highlight the desired contact.

4. Do one of the following:

   - If only one number of the contact is stored in the local directory, press the Send soft key to dial out the number.

   - If multiple numbers of the contact are stored in the local directory, press the Send soft key to display a list of numbers.

     Press ▲ or ▼ to highlight the desired number.

     Press the Send soft key to dial out the number.

Searching for Contacts

To search for a contact in the local directory:

1. Press the Directory soft key.
The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

If Local Directory is removed from the directory, press **Menu > Directory > Local Group** to enter the local directory.

2. Press the **Search** soft key.

3. Enter a few continuous characters of the contact name or the contact number using the keypad.

The contacts whose name or phone number matches the characters entered will appear on the LCD screen. You can dial from the result list.

**Search Source List in Dialing**

You can search for a contact from the desired lists when the phone is in the dialing screen. The lists can be Local Directory, History, Remote Phone Book and LDAP.

**To configure search source list in dialing via web user interface:**

1. Click on **Directory > Setting**.

2. In the **Search Source List In Dialing** block, select the desired list from the **Disabled** column and click **Add**.

   The selected list appears in the **Enabled** column.

3. Repeat step 2 to add more lists to the **Enabled** column.

4. To remove a list from the **Enabled** column, select the desired list and then click **Remove**.

5. To adjust the display order of the enabled list, select the desired list, and click **Order**.
The LCD screen displays the search results in the adjusted order.

6. Click **Confirm** to accept the change.

**Note**

Search source list in dialing is configurable via web user interface only.

**To search for an entry in the enabled search source lists:**

1. Pick up the handset, press the speakerphone key or press the line key.
2. Enter a few continuous characters of the entry’s name or the entry’s phone number using the keypad.

The entries in the enabled search source lists whose name or phone number matches the characters entered will appear on the LCD screen. You can press ▲ or ▼ to scroll to the desired entry and then place a call to the entry.
Importing/Exporting Contact Lists

You can manage your phone’s local directory via phone user interface or web user interface. But you can only import or export the contact list via web user interface.

To import an XML file of contact list via web user interface:

1. Click on Directory->Local Directory.
2. Click Browse to locate a contact list file (file format must be .xml) from your local system.
3. Click Import XML to import the contact list.
   The web user interface prompts “The original contact will be covered, Continue?”.
4. Click OK to complete importing the contact list.

To import a CSV file of contact list via web user interface:

1. Click on Directory->Local Directory.
2. Click Browse to locate a contact list file (file format must be .csv) from your local system.
3. (Optional.) Check the Show Title checkbox.
   It will prevent importing the title of the contact information which is located in the first line of the CSV file.
4. Click Import CSV to import the contact list.
5. (Optional.) Mark the On radio box in the Delete Old Contacts field.
   It will delete all existing contacts while importing the contact list.
6. (Optional.) Select the contact information you want to import into the local directory from the pull down list of **Index**.

7. Click **Import** to complete importing the contact list.

**To export a contact list via web user interface:**

1. Click on **Directory** -> **Local Directory**.
2. Click **Export XML** (or **Export CSV**).
3. Click **Save** to save the contact list to your local system.

**Note**

Importing/exporting contact lists is available via web user interface only.

**Blacklist**

The built-in phone directory can store the names and phone numbers for a blacklist. You can store up to 30 contacts; add, edit, delete or search for a contact in the blacklist directory; even call a contact from the blacklist directory, but incoming calls from the blacklist directory contacts will be rejected automatically.

**To add a contact to the blacklist directory manually:**

1. Press **Menu** -> **Directory** -> **Blacklist**.
2. Press the **Add** soft key.
3. Enter the name and the office, mobile or other numbers in the corresponding fields.

4. Press  or , or the Switch soft key to select the desired account from the Account field.
   If Auto is selected, the phone will use the first available account when placing calls to the contact from the blacklist directory.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

To add a contact to the blacklist directory from the local directory:

1. Press Directory soft key.
   The IP phone enters the local directory directly as there is only Local Directory in the directory by default.

   If Local Directory is removed from the directory, press Menu -> Directory -> Local Group to enter the local directory.

2. Select the desired contact group and press the Enter soft key.

3. Press  or  to highlight the desired contact.

4. Press the Option soft key and then select Add to Blacklist from the prompt list.
The LCD screen prompts the following warning:

5. Press the OK soft key to confirm the setting.

For operating instructions on editing, deleting, placing calls to and/or searching for contacts in the blacklist directory, refer to the operating instructions of Local Directory on page 34.

Remote Phone Book

You can add local contacts, search for a contact, or simply dial a contact number from the corporate directory.

You can configure your new phone to access up to 5 corporate directories. All remote phone books must be less than 0.5MB in size. For the access URL of the corporate directory, contact your system administrator.

To configure an access URL for remote phone book via web user interface:

1. Click on Directory -> Remote Phone Book.
2. Enter the access URL in the Remote URL field.
3. Enter the name in the Display Name field.

4. Click Confirm to accept the change.

Note: An access URL for remote phone book is configurable via web user interface only.
To access your corporate directory via phone user interface:

   If Remote Phone Book is removed from the directory, press Menu -> Directory -> Remote Phone Book to enter remote phone book.

2. Select the desired remote group, and then press the Enter soft key.
   The phone connects to load the corporate directory, and then the corporate contact list appears on the LCD screen.

3. Press the Back soft key to back to the previous interface.

To search for a contact in the corporate directory:

   If Remote Phone Book is added to the directory, press Directory -> Remote Phone Book to enter remote phone book.

2. Select the desired remote group, and then press the Enter soft key to load the corporate directory.

3. Press the Search soft key.

4. Enter a few continuous characters of the contact name or continuous numbers of the contact number using the keypad.

The contacts whose name or phone number matches the characters entered will appear on the LCD screen. You can place a call from the result list.
To place a call from the corporate directory:

1. Press **Menu** > **Directory** > **Remote Phone Book**.
   
   If Remote Phone Book is added to the directory, press **Directory** > **Remote Phone Book** to enter remote phone book.

2. Select the desired remote group, and then press the **Enter** soft key to load the corporate directory.

3. Select the desired contact in the corporate directory.

4. Press the **Send** soft key.

In addition, you can enable the phone to present the caller identity stored in the corporate directory when receiving a call.

To enable the presentation of caller identity stored in remote phone book via web user interface:

1. Click on **Directory** > **Remote Phone Book**.

2. Select **Enabled** from the pull-down list of **Search Remote Phonebook Name**.

3. Enter the refresh period in the **Search Flash Time (Seconds)** field.
   
   The default value is 21600 seconds.

4. Click **Confirm** to accept the change.

**Call History Management**

The SIP-T46G IP phone maintains call history lists of Missed calls, Placed calls, Received calls and Forwarded calls. Call history lists support 400 entries in all. You can view the call history, place a call, add a contact or delete an entry from the call history list. You should enable history record in advance.
To enable history record via phone user interface:

1. Press Menu -> Call Features -> Others -> General.
2. Press or , or the Switch soft key to select Enabled from the History Record field.
3. Press the Save soft key to accept the change or the Back soft key to cancel.

To view the call history:

1. Press the History soft key.
   The LCD screen displays all call records.
2. Press or to switch between All, Missed, Placed, Received and Forwarded call lists.
3. Press or to select the desired entry.
4. Press the Option soft key, and then select Detail from the prompt list.
   The detailed information of the entry appears on the LCD screen.

To place a call from the call history list:

1. Press the History soft key.
2. Press or to switch between All, Missed, Placed, Received and Forwarded call lists.
3. Press or to select the desired entry.
4. Press the Send soft key.

To add a contact to the local directory (or blacklist directory) from the call history list:

1. Press the History soft key.
2. Press or to switch between All, Missed, Placed, Received and Forwarded call lists.
3. Press or to select the desired entry.
4. Press the Option soft key, and then select Add to Contacts (or Add to Blacklist) from the prompt list.
5. Enter the desired values in the corresponding fields.
6. Press the Save soft key.
For more information, refer to Contact Management on page 33.

**To delete an entry from the call history list:**

1. Press the History soft key.
2. Press ( or ) to switch between All, Missed, Placed, Received and Forwarded call lists.
3. Press ( or ) to select the desired entry.
4. Press the Delete soft key.

**To delete all entries from the call history list:**

1. Press the History soft key.
2. Press ( or ) to switch between All, Missed, Placed, Received and Forwarded call lists.
3. Press the Option soft key, and then select Delete All from the prompt list.
4. Press the OK soft key.
   The LCD screen prompts “Delete all records?”.
5. Press the OK soft key to confirm the deletion or the Cancel soft key to cancel.

### System Customizations

#### Headset Use

If you want to use a wired headset, physically connect your headset and activate the headset mode for use. For more information on physically connecting a headset, refer to Phone Installation on page 11.

If you want to use a wireless headset, insert the Bluetooth USB dongle into the USB port on the back of the phone. For more information on using a Bluetooth headset, refer to Bluetooth Headset on page 55.

This section provides the introduction of the wired headset.

**Note**

If both a Bluetooth headset and a wired headset are connected, only the Bluetooth headset can be used.

#### Headset Mode Activation/Deactivation

**To activate the headset mode:**

1. Press ( on the phone.
   The HEADSET key LED illuminates solid green when the headset mode is activated.
   Press the line key or the Answer soft key to answer an incoming call. The call will be connected to your headset automatically.
Enter the desired number and press the **Send** soft key, then the phone will place a call using the headset automatically. For more information on using the headset to place a call, refer to Placing Calls on page 83.

**To deactivate the headset mode:**

1. Press 🎤 again on the phone.
   
   The HEADSET key LED goes out when the headset mode is deactivated.

**Headset Prior**

You can use headset in priority when enabling headset prior. This feature is especially useful for permanent or full-time headset users.

**To enable headset prior via web user interface:**

1. Click on **Features**->**General Information**.
2. Select **Enabled** from the pull-down list of **Headset Prior**.
3. Click **Confirm** to accept the change.

**To use headset prior, you should activate the headset mode in advance:**

1. Physically connect the headset.
2. Press 🎤 to activate the headset mode.

**Note**

If headset prior is enabled, the headset mode will not be deactivated until you press the HEADSET key again.

Headset prior is configurable via web user interface only.
Customizing Your Phone

Dual Headset

You can use two headsets when enabling dual headset. To use this feature, you must physically connect headsets to the headset jack and handset jack respectively. Once the phone connects to a call, the headset connected to the headset jack will have full-duplex capabilities, while the one connected to the handset jack will only be able to listen.

To enable dual headset via web user interface:

1. Click on Features->General Information.
2. Select Enabled from the pull-down list of Dual-Headset.
3. Click Confirm to accept the change.

Note  Dual headset is configurable via web user interface only.

Bluetooth Headset

The SIP-T46G IP phone supports Bluetooth. Bluetooth enables low-bandwidth wireless connections within a range of 10 meters (32 feet). The best performance is in the 1- to 2-meter (3- to 6-foot) range.

You can activate/deactivate the Bluetooth mode, and then pair and connect the Bluetooth headset with your phone. You can also disconnect and delete your Bluetooth headset from the phone.

Note  Ensure that the Bluetooth USB dongle is properly connected into the USB port on the back of the phone. For more information, refer to Phone Installation on page 11.
To activate the Bluetooth mode via phone user interface:

1. Press Menu→Basic→Bluetooth.
2. Press or , or the Switch soft key to select On from the Bluetooth field.
3. Press the Save soft key to accept the change.
   The LCD screen displays the Bluetooth icon .

To deactivate the Bluetooth mode via phone user interface:

1. Press Menu→Basic→Bluetooth.
2. Press or , or the Switch soft key to select Off from the Bluetooth field.
3. Press the Save soft key to accept the change.
   The Bluetooth icon disappears from the phone.

Bluetooth mode is configurable via web user interface at the path Features→Bluetooth.
Before you pair a Bluetooth headset, check the indicator on the Bluetooth headset to make sure the Bluetooth headset is discoverable. For more information, refer to the documentation from the Bluetooth headset manufacturer.

To pair and connect your Bluetooth headset to your phone:

1. Press Menu→Basic→Bluetooth.
2. Press the Scan soft key to search the Bluetooth devices.
The LCD screen prompts the following message:

The phone proceeds to scan the local Bluetooth devices. When the phone completes scan, it will display the found Bluetooth devices on the LCD screen.

3. Select the desired Bluetooth headset and press Connect soft key.

4. Enter the PIN in the Password field.
   The default PIN is “0000” or “1234”.

5. Press the OK soft key.
   After a while, the Bluetooth headset is automatically connected to your phone.
The Bluetooth icon 📱 appears on the LCD screen.

With the Bluetooth headset paired and connected, you can use the Bluetooth headset to place and answer calls. For more information, refer to the documentation from the Bluetooth headset manufacturer.

To view the Bluetooth headset information:

1. Press **Menu**→**Basic**→**Bluetooth**→**Paired Bluetooth Device**.

   The LCD screen displays a list of paired and connected Bluetooth headsets.

2. Select the desired Bluetooth headset.

3. Press the **Option** soft key, and then select **Detail** from the prompt list to view the Bluetooth headset information:

   - **Device Name**: the name of the Bluetooth headset.
   - **MAC Address**: the MAC address of the Bluetooth headset.
• **Auto Connection**: Enables or disables the Bluetooth headset to connect with the phone automatically.

To change the priority of paired Bluetooth devices:
1. Press **Menu** → **Basic** → **Bluetooth** → **Paired Bluetooth Device**.
2. Select the desired Bluetooth headset.
3. Press the **Option** soft key, and then select **Move Up** or **Move Down** from the prompt list.
   
   The top one has the highest priority. When there is no Bluetooth headset connected, the phone will automatically connect to the Bluetooth headset with the highest priority.

   You can disconnect the Bluetooth headset from your phone. When you disconnect the Bluetooth headset, it still displays in the **Paired Bluetooth Device** list. You can easily connect it to your phone again.

To disconnect your Bluetooth headset from your phone:
1. Press **Menu** → **Basic** → **Bluetooth** → **Paired Bluetooth Device**.
2. Select the connected Bluetooth headset.
3. Press the **Disconnect** soft key.
   
   The Bluetooth headset is disconnected. To connect it to your phone again, press the **Connect** soft key.

   You can delete your Bluetooth headset from your phone. When you delete the Bluetooth headset, it disappears from the **Paired Bluetooth Device** list. To connect it to your phone again, you need to scan and connect it again.

To delete your Bluetooth headset from your phone:
1. Press **Menu** → **Basic** → **Bluetooth** → **Paired Bluetooth Device**.
2. Select the Bluetooth headset you want to delete.
3. Press the **Option** soft key, and then select **Delete** from the prompt list.
   
   The LCD screen prompts the following warning “Delete the selected item?”. 
4. Press the **OK** soft key to confirm the deletion or the **Cancel** soft key to cancel.

### Note
You can also delete all headsets by pressing the **Option** soft key and then select **Delete All**. For more information, refer to the above steps.

If you cannot connect a Bluetooth headset to the phone successfully, we recommend you to delete the Bluetooth headset in the **Paired Bluetooth Device** list (if existed) before pairing it.

## DSS Keys

Two types of DSS keys: Line Keys and Programmable Keys. Details will be introduced in the following. The SIP-T46G IP phone supports 27 line keys.

### Line Keys

You can assign predefined functionalities to line keys. You can also define a label for line key feature which will appear on the LCD screen. Line keys allow you to quickly access features such as call return and voice mail. The line key LEDs will indicate the monitored status when the line keys are assigned with particular features, such as BLF. The default key type of line key 1-6 is Line. The default key type of line key 7-27 is N/A, which indicates that this line key provides no functionality until configuration.

To assign functionality to the line key via phone user interface:

1. Press **Menu**->**Call Features**->**DSS Keys**.
2. Select the desired line key, and then press the **Enter** soft key.
3. Select the desired key type from the **Type** field.
4. (Optional.) Select the desired key event type from the **Key Event** field.
5. (Optional.) Select the desired line from the **Account ID** field.
6. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.
7. (Optional.) Enter the corresponding value in the **Value** field.
8. (Optional.) Enter the corresponding value in the **Extension** field.
9. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Line key is configurable via web user interface at the path **DSSKey**->**Line Key**.

### Note
When the phone is idle, you can also long press the line key to configure it directly on the phone.
You can assign functionalities to 27 line keys. These 27 line keys are indicated on three pages. When you assign functionality to line keys located in line key 1-10, the labels of line keys are indicated on the first page. The following figure shows an example:

When you assign functionality to line key located in line key 11-27, the label of the line key 10-18 are indicated on the second page, and the labels of the line key 19-27 are indicated on the third page. The right bottom line key is used to switch pages. The following figure shows an example:

The following table lists the page icon status:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="2" /></td>
<td>Indicates the current page of line keys.</td>
</tr>
<tr>
<td><img src="image" alt="1 3" /></td>
<td>Indicates the non-current page of line keys.</td>
</tr>
</tbody>
</table>

You can configure the page icon and page switch key LED to indicate different statuses. This feature is disabled by default. For more information on the page switch key LED status, refer to LED Instructions on page 5.

The following table lists the page icon status to indicate different statuses:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="1" /></td>
<td>Fast flashing: The BLF monitored user receives an incoming call on the non-current page.</td>
</tr>
</tbody>
</table>
Solid red:  
There is a parked call on the non-current page.

Fast flashing:  
The line receives an incoming call on the non-current page.

To configure the page icon to indicate status via web user interface:

1. Click on DSSKey > Line Key.
2. Select Enabled from the pull-down list of Enable Page Tips.
3. Click Confirm to accept the change.

Note: The page icon status is configurable via web user interface only.

Line key features are explained in the following subchapters in detail:

- Line
- Speed Dial
- Voice Mail
- Directed Pickup
- Group Pickup
- DTMF
- Prefix
- Local Group
- XML Group
- XML Browser
- LDAP
- Conference
- Forward
Customizing Your Phone

- Transfer
- Hold
- DND
- SMS
- Group Listening
- Zero Touch
- URL
- Keypad Lock
- Directory

For more information, contact your system administrator.

**Line**

You can use this key feature to accept the incoming calls, place active calls on hold or resume a held call. It performs the same as a hard line key.

**Dependencies:** Type (Line)
- **Account ID** (the account this feature will be applied to)
- **Value** (Default/Lock/Float)

**Usage:** When receiving an incoming call, the DSS key LED flashes green:
1. Press the DSS key to accept the incoming call.
2. Press the DSS key to place the active call on hold.
3. Press the DSS key again to resume the held call.

If you select **Lock** from the **Value** field, the line keys located in the same position of the other page will be automatically assigned Line feature with **Lock** filled in the **Value** field. Then you can use this key on every page. This feature is only applicable to line key 1-9.

If you select **Float** from the **Value** field, the phone will automatically switch to the page the line key located, when the line key receives an incoming call.

**Speed Dial**

You can use this key feature to speed up dialing the numbers often used or hard to remember.

**Dependencies:** Type (Speed Dial)
- **Account ID** (the account this feature will be applied to)
- **Label** (key label displayed on the LCD screen)
- **Value** (the number you want to dial out)

**Usage:** Press the DSS key to dial out the number specified in the **Value** field, using the account selected from the **Account ID** field.
Voice Mail

You can use this key feature to connect voice mail quickly. For more information, refer to Voice Mail on page 136.

Dependencies: Type (Key Event)

- Key Event (Voice Mail)
- Account ID (the account this feature will be applied to)
- Label (key label displayed on the LCD screen)
- Value (the voice mail access code)

Usage: Press the DSS key to dial out the voice mail access code, you can follow the voice prompt to listen to the voice mails.

Directed Pickup

You can use this key feature to answer someone else’s incoming call on the phone.

Dependencies: Type (Key Event)

- Key Event (Directed Pickup)
- Account ID (the account this feature will be applied to)
- Label (key label displayed on the LCD screen)
- Value (the directed pickup code followed by the specific phone number)

Usage: Press the DSS key on your phone when the specific phone number receives an incoming call. The call is answered on your phone.

Group Pickup

You can use this key feature to answer incoming calls in a group that is associated with their own group.

Dependencies: Type (Key Event)

- Key Event (Group Pickup)
- Account ID (the account this feature will be applied to)
- Label (key label displayed on the LCD screen)
- Value (the group pickup feature code)

Usage: Press the DSS key on your phone when a phone number in the group receives an incoming call. The call is answered on your phone.

DTMF

You can use this key feature to send the specification of arbitrary key sequences via DTMF.

Dependencies: Type (Key Event)

- Key Event (DTMF)
- Label (key label displayed on the LCD screen)
Value *(DTMF sequence)*

**Note**
DTMF sequence can only contain "0-9", "*", "+" and "A-D".

**Usage:** Press the DSS key during an active call to send the key sequence specified in the *Value* field.

**Prefix**

You can use this key feature to add a specified prefix number before the dialed number.

**Dependencies:**
- **Type (Key Event)**
  - **Key Event (Prefix)**
  - **Label** *(key label displayed on the LCD screen)*
  - **Value** *(the prefix number)*

**Usage:** Press the DSS key during an active call to send the key sequence specified in the *Value* field.

**Local Group**

You can use this key feature to access the contact group in the local directory quickly.

For more information, refer to *Local Directory* on page 34.

**Dependencies:**
- **Type (Key Event)**
  - **Key Event (Local Group)**
  - **Local Group** *(the contact group name you want to access)*
  - **Label** *(key label displayed on the LCD screen)*

**Usage:** Press the DSS key when the phone is idle, then the phone will enter into the dialing screen and display the prefix number which you specified in the *Value field*. You can enter other digits and then dial out.

**XML Group**

You can use this key feature to access remote group in your corporate directory quickly. You should configure remote phone book in advance. For more information, refer to *Remote Phone Book* on page 49.

**Dependencies:**
- **Type (Key Event)**
  - **Key Event (XML Group)**
  - **XML Group** *(the remote group name you want to access if remote phone book is configured)*
  - **Label** *(key label displayed on the LCD screen)*

**Usage:** Press the DSS key to access the contact group specified in the *Local Group* field.

**XML Browser**

You can use this key feature to access the XML browser quickly. The XML browser allows you to create custom services which meet your functional requirements on the server. You can customize practical applications, such as weather report, stock information,
Google search, etc.

Dependencies: **Type (Key Event)**
- **Key Event (XML Browser)**
- **Label (key label displayed on the LCD screen)**
- **Value (the access URL for XML browser)**

Usage: Press the DSS key to access the XML browser specified in the Value field.

LDAP

You can use this key feature to access the LDAP search interface quickly.

Dependencies: **Type (Key Event)**
- **Key Event (LDAP)**
- **Label (key label displayed on the LCD screen)**

Usage:
1. Press the DSS key to access the LDAP search interface.
2. Enter a few continuous characters of the contact name or continuous numbers of the contact number using the keypad.

The contacts whose name or phone number matches the characters entered will appear on the LCD screen.

Conference

You can use this key feature to set up a conference call. For more information, refer to Conference on page 107.

Dependencies: **Type (Key Event)**
- **Key Event (Conference)**
- **Label (key label displayed on the LCD screen)**
- **Value (the number you want to add to the conference)**

Usage: Press the DSS key during an active call to set up a conference with the number specified in the Value field.

**Note**

When leaving the Value field blank, the DSS key performs the same as the Conference soft key during a call.

Forward

You can use this key feature to forward an incoming call to someone else. For more information, refer to Call Forward on page 98.

Dependencies: **Type (Key Event)**
- **Key Event (Forward)**
- **Label (key label displayed on the LCD screen)**
- **Value (the number you want to forward to)**
Usage:
1. Press the DSS key to forward an incoming call to the number specified in the **Value** field.
2. When call forward is in phone mode, press the DSS key to activate call forward for the phone.
3. When call forward is in custom mode, press the DSS key to access the custom call forward interface. You can activate or deactivate call forward for one or all accounts.

**Note**

If the **Value** field is left blank, the DSS key performs the same as the **Forward** soft key when receiving an incoming call.

When call forward is activated, the forward key LED will illuminate solid green.

Transfer

You can use this key feature to handle the call differently depending on the transfer mode on DSS key when there is an active call on the phone.

**Dependencies:** **Type (Key Event)**

- **Key Event (Transfer)**
- **Label** (key label displayed on the LCD screen)
- **Value** (the number you want to transfer to)

**Usage:**

- When the transfer mode on DSS key is **Blind Transfer**, press the DSS key to complete the blind transfer to the number specified in the **Value** field.
- When the transfer mode on DSS key is **Attended Transfer**, press the DSS key to dial out the number specified in the **Value** field, and then perform the attended or semi-attended transfer.
- When the transfer mode on DSS key is **New Call**, press the DSS key to place a new call to the number specified in the **Value** field.

**Note**

Transfer mode via DSS key is configurable via web user interface at the path **Features -> Transfer**. For more information on how to configure the transfer mode via DSS key, refer to **Busy Lamp Field (BLF)** on page 117.

When leaving the **Value** field blank, the DSS key performs the same as the **TRANSFER** key or the **Transfer** soft key during a call. For more information, refer to **Call Transfer** on page 105.

Hold

You can use this key feature to place an active call on hold or retrieve a held call.

**Dependencies:** **Type (Key Event)**

- **Key Event (Hold)**
Label (key label displayed on the LCD screen)

Usage:
1. Press the DSS key during an active call to place the call on hold.
2. Press the DSS key again to retrieve the held call.

DND

You can use this key feature to activate or deactivate DND. You can also use this key feature to access the custom DND interface. For more information, refer to Do Not Disturb (DND) on page 94.

Dependencies: Type (Key Event)

Key Event (DND)

Label (key label displayed on the LCD screen)

Usage:
When DND is in phone mode:
1. Press the DSS key to activate DND.
2. Press the DSS key again to deactivate DND.

When DND is in custom mode:
1. Press the DSS key to access the custom DND interface. You can activate or deactivate DND for one or all accounts.

Note: When DND is activated, the DND key LED will illuminate solid green, and the incoming calls will be rejected automatically.

SMS

You can use this key feature to access text message quickly. For more information, refer to Short Message Service (SMS) on page 133.

Dependencies: Type (Key Event)

Key Event (SMS)

Label (key label displayed on the LCD screen)

Usage: Press the DSS key when the phone is idle to access text message.

Group Listening

You can use this key feature to activate the Speakerphone and Handset/Headset mode at the same time. It is suitable for the group conversation which has more than one person at one side. You are able to speak and listen through the handset/headset, meanwhile the others nearby can only listen through the speaker.

Dependencies: Type (Key Event)

Key Event (Group Listening)

Label (key label displayed on the LCD screen)
Customizing Your Phone

Usage:
1. During a call, press the DSS key to activate the group listening mode.
   You can then speak and listen through the handset/headset, other people at your side can listen through speaker at the same time.
2. Press the DSS key again to deactivate the group listening mode.

Zero Touch

You can use this key feature to configure auto provision and network parameters quickly.

Dependencies: Type (Key Event)

   Key Event (Zero Touch)

   Label (key label displayed on the LCD screen)

Usage:
1. Press the DSS key to access the zero touch screen.
2. Press the OK soft key within a few seconds.
3. Configure the network parameters in the corresponding fields.
4. Press the Next soft key.
5. Configure the auto provision parameters in the corresponding fields.
6. Press the OK soft key.
   The phone will reboot to update configurations.

URL

You can use this key feature to trigger the phone to send an HTTP GET request containing a specific URL.

Dependencies: Type (URL)

   Label (key label displayed on the LCD screen)

   URL (the URL contained in the HTTP GET request)

Usage: Press the DSS key to trigger the phone to send an HTTP GET request containing the URL specified in the URL field.

Keypad Lock

You can use this key feature to immediately lock the keypad of your phone instead of long pressing \[\#\]. For more information, refer to Keypad Lock on page 26.

Dependencies: Type (Key Event)

   Key Event (Keypad Lock)

   Label (key label displayed on the LCD screen)

Usage: Press the DSS key to immediately lock the keypad of your phone instead of long pressing \[\#\].
Directory

You can use this key feature to easily access frequently used lists. For more information, refer to Directory on page 33.

Dependencies: **Type (Key Event)**

**Key Event (Directory)**

**Label (key label displayed on the LCD screen)**

**Usage**: Press the DSS key to immediately access to frequently used lists.

**Note** The DSS key performs the same function as the Directory soft key when the phone is idle.

Programmable Keys

You can customize the soft keys, navigation keys and function keys.

**To customize the programmable keys via web user interface:**

1. Click on DSSKey -> Programmable Key.
2. Customize specific features for these keys.

![Programmable Keys Configuration](image)

3. Click **Confirm** to accept the change.

**Note** Programmable keys are configurable via web user interface only.

Account Management

You can register one or multiple accounts on the SIP-T46G IP phone. You can also configure each line key to associate with an account or configure multiple line keys to associate with an account.
Account Registration

To register an account via phone user interface:

2. Select the desired account and then press the Enter soft key.
3. Select Enabled from the Account Status field.
4. Enter the desired values in Label, Display Name, Register Name, User Name, Password and SIP Server1/2 fields respectively. Contact your system administrator for more information.
5. Press the Save soft key to accept the change or the Back soft key to cancel. You can repeat steps 2 to 5 to register more accounts.

The following figures show single or multiple accounts registered on the phone:

Single account:

![Single account](image1)

Multiple accounts:

![Multiple accounts](image2)
To disable an account via phone user interface:

1. Press **Menu** > **Advanced** (password: admin) -> **Account**.
2. Select the desired account and then press the **Enter** soft key.
3. Select **Disabled** from the **Account Status** field.
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Registering an account is configurable via web user interface at the path **Account** > **Register**.

**Multiple Line Keys per Account**

You can configure multiple line keys to associate with an account. This enhances call visualization and simplifies call handling.

If this is the case, the LCD screen resembles the following figure:

![LCD Screen Example](image)

Incoming calls to this account will be distributed evenly among the available line keys. Outgoing calls will be distributed similarly.

Your phone can be configured to have a combination of accounts with a single line key and accounts with multiple line keys.

**Dial Plan**

Dial plan is a string of characters that governs the way your SIP-T46G IP phone processes the inputs received from your phone keypad. The SIP-T46G IP phone supports the following dial plan features:

- Replace Rule
- Dial-now
- Area Code
- Block Out
Basic expression syntaxes you need to know:

<table>
<thead>
<tr>
<th>Syntax</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>.</td>
<td>The dot &quot;.&quot; can be used as a placeholder or multiple placeholders for any character. Example: &quot;12.&quot; would match &quot;123&quot;, &quot;1234&quot;, &quot;12345&quot;, &quot;12abc&quot;, etc.</td>
</tr>
<tr>
<td>x</td>
<td>An &quot;x&quot; can be used as a placeholder for any character. Example: &quot;12x&quot; would match &quot;121&quot;, &quot;122&quot;, &quot;123&quot;, &quot;12a&quot;, etc.</td>
</tr>
<tr>
<td>[]</td>
<td>The square brackets &quot;[]&quot; can be used as a placeholder for a single character which matches any of a set of characters. Example: &quot;91[5-7]1234&quot; would match &quot;9151234&quot;, &quot;9161234&quot;, &quot;9171234&quot;, etc.</td>
</tr>
<tr>
<td>()</td>
<td>The parentheses &quot;( )&quot; can be used to group together patterns, for instance, to logically combine two or more patterns. Example: &quot;((1-9)</td>
</tr>
<tr>
<td>$</td>
<td>The &quot;$&quot; should be followed by the sequence number of a parenthesis. The &quot;$&quot; plus the sequence number means the whole character or characters placed in the parenthesis. The number directs to the right parenthesis when there are more than one. Example: A replace rule configuration: Prefix: &quot;9((5-7))(.)&quot;, Replace: &quot;5$2&quot;. When you enter &quot;96123&quot; to dial out on your phone, the number will be replaced as &quot;5123&quot; and then dialed out. &quot;$2&quot; means the characters in the second parenthesis, that is, &quot;123&quot;.</td>
</tr>
</tbody>
</table>

**Replace Rule**

You can configure one or more replace rules (at most 100) to remove the specified string and replace it with another string. You can configure a pattern with wildcards (refer to the expression syntax in the table above), so that any string that matches the pattern will be replaced. This feature is convenient for you to dial out a long number. For example, a replace rule is configured as "Prefix: 1" and "Replace: 1234567", when you try to dial out the number "1234567", you just need to enter "1" on the phone and then press the Send soft key.

**To add a replace rule via web user interface:**

1. Click on Settings -> Dial Plan -> Replace Rule.
2. Enter the string (e.g., 2xx) in the Prefix field.
3. Enter the string (e.g., 12345) in the Replace field.
4. Enter the desired line ID in the **Account** field or leave it blank.

5. Click **Add** to add the replace rule.

When you enter the number “234” using the keypad and then press the **Send** soft key, the phone will dial out “12345” instead.

**Note**

Valid values of **Account** field can be one or more digits among 1, 2, 3, 4, 5 and 6. Every two digits must be separated by a “,”. For example, when you enter the value “1, 2” in the **Account** field, this replace rule will apply to account1 and account2.

If you leave the **Account** field blank or enter 0, then the replace rule will apply to all accounts.

To edit a replace rule via web user interface:

1. Click on **Settings** -> **Dial Plan** -> **Replace Rule**.
2. Select the desired replace rule by checking the checkbox.
3. Edit the values in the **Prefix** and **Replace** fields.
4. Enter the desired line ID in the **Account** field or leave it blank.
5. Click **Edit** to accept the change.

To delete one or more replace rules via web user interface:

1. Click on **Settings** -> **Dial Plan** -> **Replace Rule**.
2. Select the one or more replace rules by checking the checkbox(es).
3. Click **Del** to delete the replace rule(s).

**Note**

Replace rule is configurable via web user interface only.
Dial-now

You can configure one or more dial-now rules (at most 100) on your phone. When the dialed number matches the dial-now string, the number will be dialed out automatically. For example, a dial-now rule is configured as “2xx”, then any entered three-digit string beginning with 2 will be dialed out automatically on the phone.

To add a dial-now rule via web user interface:

1. Click on Settings -> Dial Plan -> Dial-now.
2. Enter the desired value (e.g., 1234) in the Rule field.
3. Enter the desired line ID in the Account field or leave it blank.

   For more information on the valid value of the Account field, refer to Replace Rule on page 73.

   ![Dial Plan Configuration](image)

4. Click Add to add the dial-now rule.

   When you enter the number “1234” using the keypad, the phone will dial out “1234” automatically without pressing any key.

   **Note**

   You can also edit or delete the dial-now rule, refer to Replace Rule on page 73 for more information.

   Dial-now rule is configurable via web user interface only.

Delay Time for Dial-Now Rule

You can configure the delay time for dial-now rules. That is, you can configure your phone to dial out the phone number automatically, which matches a dial-now rule, after the specified delay time.

To configure the delay time for dial-now rule via web user interface:

1. Click on Features -> General Information.
2. Enter the time within 1-14 (in seconds) in the **Time-Out For Dial-Now Rule** field.

3. Click **Confirm** to accept the change.

**Note**
Delay time for dial-now rule is configurable via web user interface only.

### Area Code

Area codes are also known as Numbering Plan Areas (NPAs). They usually indicate geographical areas in a country. This feature is necessary only when dialing the number outside the code area. For example, area code is configured as “Code: 011, Min Length: 4, Max Length: 11”. When you dial out the number “56789” (the length of the number is between 4 and 11), the phone will add the area code and dial out the number “01156789”.

To configure the area code and lengths via web user interface:

1. Click on **Settings > Dial Plan > Area Code**.
2. Enter the desired values in the **Code, Min Length (1-15)** and **Max Length (1-15)** fields.
3. Enter the desired line ID in the **Account** field or leave it blank.
For more information on the valid value of the **Account** field, refer to Replace Rule on page 73.

![Image of Yealink phone settings interface]

4. Click **Confirm** to accept the change.

**Note**

The default values of minimum and maximum length are 1 and 15 respectively.

Area code is configurable via web user interface only.

**Block Out**

You can block some specific numbers (at most 10) from being dialed on your phone. When you dial a block out number on your phone, the dialing will fail and the LCD screen will prompt "Forbidden Number".

**To add a block out number via web user interface:**

1. Click on **Settings** > **Dial Plan** > **Block Out**.
2. Enter the desired value in the **BlockOut Number** field.
3. Enter the desired line ID in the **Account** field or leave it blank.
For more information on the valid value of the Account field, refer to Replace Rule on page 73.

![Image](image_url)

4. Click Confirm to add the block out number.

**Note**

Block out number is configurable via web user interface only.

**Emergency Number**

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when necessary. The emergency telephone number may differ from country to country. It is typically a three-digit number so that it can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.

**Note**

Contact your local phone service provider for available emergency numbers in your area.

**To specify emergency numbers via web user interface:**

1. Click on Features->Phone Lock.
2. Enter the emergency number in the Emergency field.
For multiple emergency numbers, enter “,” between every two numbers. The default emergency numbers are 110, 911 and 120.

3. Click **Confirm** to accept the change.

**Note**

Emergency number is configurable via web user interface only.

**Live Dialpad**

You can enable live dialpad on the SIP-T46G IP phone, which enables the IP phone to automatically dial out the phone number without pressing any other key. You can also configure a delay, where the phone will dial out the phone number automatically after the specified period of time.

**To enable the live dialpad via web user interface:**

1. Click on **Settings** -> **Preference**.
2. Select **Enabled** from the pull-down list of **Live Dialpad**.
3. Enter the desired delay time in the **Inter Digit Time (1~14s)** field. The default delay time is 4s.

![Yealink Settings](image)

4. Click **Confirm** to accept the change.

**Note**

Live dialpad is configurable via web user interface only.

## Hotline

You can dial a hotline number immediately upon lifting the handset, pressing the speakerphone key or the line key. You can also configure a delay, where the phone will dial out the hotline number automatically after the specified period of time.

**To configure the hotline number via phone user interface:**

1. Press **Menu->Call Features->Others->Hotline**.
2. Enter the desired number in the **Number** field.
3. Enter the delay time in the **Hotline Delay 0-10(s)** field.

![Hotline Configuration](image)

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.
Hotline is configurable via web user interface at the path **Features->General Information.**
Basic Call Features

The SIP-T46G IP phone is designed to be easily used like a regular phone on a public switched telephone network (PSTN). You can place calls, answer calls, transfer a call to someone else, or conduct a conference call.

This chapter provides basic operating instructions for the SIP-T46G IP phone. Topics include:

- Placing Calls
- Answering Calls
- Ending Calls
- Redialing Numbers
- Recent Call In Dialing
- Auto Answer
- Auto Redial
- Call Completion
- Call Return
- Call Mute
- Call Hold/Resume
- Do Not Disturb (DND)
- Call Forward
- Call Transfer
- Call Waiting
- Conference
- Call Park
- Call Pickup
- Anonymous Call
- Anonymous Call Rejection

If you require additional information or assistance with your new phone, contact your system administrator.

Placing Calls

You can place a call in three ways using your SIP-T46G IP phone:

- Using the handset
- Using the speakerphone
- Using the headset

You can also dial the number first, and then choose the way you want to speak to the other party.

You can also search and dial a contact from call history, local directory or remote phone book. For more information, refer to Contact Management on page 33 and Call History Management on page 51.

During a call, you can alternate between Speakerphone, Headset, and Handset modes by pressing the Speakerphone key, the HEADSET key, or picking up the handset.

The call duration of active calls is visible on the LCD screen. In the figure below, the call to the number “1000” has lasted 40 seconds.

![Call Duration](image)

**To place a call using the handset:**

1. Pick up the handset.
2. Enter the desired number using the keypad.
3. Press , , or the soft key.

The # key is configured as a send key by default. You can also set the * key as the send key, or set neither. For more information, refer to the Key as Send on page 26.

**Note**

You can also dial using the SIP URI or IP address. To obtain the IP address of a phone, press the OK key. The maximum SIP URI or IP address length is 32 characters. For example, SIP URI: 3606@sip.com, IP: 192.168.1.15.

Your phone may not support direct IP dialing. Contact your system administrator for more information.

**To place a call using the hands-free speakerphone mode:**

Do one of the following:

- With the handset on-hook, press or the line key to obtain a dial tone.
  - Enter the desired number using the keypad.
  - Press , or the Send soft key.
Basic Call Features

- With the handset on-hook, enter the desired number using the keypad.
  Press \[\text{#} \], \[\text{#} \], \[\text{OK} \], or the Send soft key.

**To place a call using the headset:**

Do one of the following:

- With the optional headset connected, press \[\text{Q} \] to activate the headset mode.
  Press the line key to obtain a dial tone.
  Enter the desired number using the keypad.
  Press \[\text{OK} \], \[\text{#} \], or the Send soft key.

- With the optional headset connected, press \[\text{Q} \] to activate the headset mode.
  Enter the desired number using the keypad.
  Press \[\text{OK} \], \[\text{#} \], or the Send soft key.

**Note**
To permanently use the headset mode, refer to Headset Prior on page 54.

**To place multiple calls:**

You can have more than one call on your SIP-T46G IP phone. To place a new call during an active call, do one of the following:

- Press the line key. The active call is placed on hold.
  Enter the desired number using the keypad.
  Press \[\text{OK} \], \[\text{#} \], or the Send soft key.

- Press \[\text{ Hold} \] or the Hold soft key to place the original call on hold.
  Press the New Call soft key.
  Enter the desired number using the keypad.
  Press \[\text{OK} \], \[\text{#} \], or the Send soft key.

You can press \[\text{ } \] or \[\text{ } \] to switch between calls, and then press the Resume soft key to retrieve the desired call.

**Answering Calls**

When you are not in another call, you can answer a call in three ways:

- Using the handset
- Using the speakerphone
• Using the headset

**Note**

You can ignore incoming calls by pressing the **X** key, the **Reject** soft key or the **Silence** soft key. You can also activate Do Not Disturb mode to ignore the incoming calls without ring on your phone. For more information, refer to **Do Not Disturb (DND)** on page 94.

You can forward incoming calls to someone else by pressing the **Forward** soft key. For more information, refer to **Call Forward** on page 98.

**Answering When Not in Another Call**

Call duration and destination will always appear on the LCD screen for the active call.

To answer a call using the handset:

1. Pick up the handset.

To answer a call using the hands-free speakerphone mode:

Do one of the following:

- Press **.**
- With the handset on-hook and the headset mode deactivated, press the **Answer** soft key.
- With the handset on-hook and the headset mode deactivated, press the line key (the line key LED flashes green).

To answer a call using the headset:

Do one of the following:

- Press **.**
- With the headset mode activated, press the **Answer** soft key.
- With the headset mode activated, press the line key (the line key LED flashes green).

**Answering When in Another Call**

If you have an active call, and an incoming call arrives on the phone, do one of the following:

- Press the **Answer** soft key.
  The incoming call is answered and the original call is placed on hold.
- Press **** to access the new call.
  Press **OK** or the **Answer** soft key.
  The incoming call is answered and the original call is placed on hold.
Ending Calls

To end a call:

Do one of the following:

- If you are using the handset, press the End Call soft key or hang up the handset.
- If you are using the headset, press the End Call soft key.
- If you are using the speakerphone, press or the End Call soft key.

Note: To end a call placed on hold, you can press the End Call soft key to end the call directly, or press the Resume soft key to resume the call before ending it.

Redialing Numbers

To redial the last dialed number from your phone:

1. Press twice. A call to your last dialed number is attempted.

To redial a previously dialed number from your phone:

1. Press when the phone is idle.
2. Press or to select the desired entry from the placed calls list, and then press or the Send soft key.

Recent Call In Dialing

To view the placed calls list when the phone is in the pre-dialing interface, you should enable recent call in dialing in advance.

To enable recent call in dialing via web user interface:

1. Click on Directory -> Setting.
2. Select **Enabled** from the pull-down list of **Recent Call In Dialing**.

![Recent Call In Dialing](image)

3. Click **Confirm** to accept the change.

**Note**

Recent call in dialing is configurable via web user interface only.

**To view placed calls list when the phone is in the pre-dialing interface:**

1. Pick up the handset, press the speakerphone key or press the line key. The LCD screen displays the placed calls list.

![Placed Calls List](image)

**Auto Answer**

You can use auto answer to automatically answer an incoming call on a line. Auto answer is configurable on a per-line basis.

**To configure auto answer via phone user interface:**

1. Press **Menu**->**Call Features**->**Auto Answer**.
2. Select the desired line and then press the **Enter** soft key.

3. Press (.LEFT ARROW) or (RIGHT ARROW), or the **Switch** soft key to select **Enabled** from the **Auto Answer** field.

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel. The **Auto Answer** icon appears on the LCD screen.

Auto answer is configurable via web user interface at the path **Account->Basic**.

**Note** Auto answer is only applicable when there is no other call in progress on the phone.

**Auto Redial**

You can enable auto redial to redial the phone number automatically when the called party is busy. You can also configure the times settings for auto redial and the time to wait between redial attempts.

**To configure auto redial via phone user interface:**

1. Press **Menu->Call Features->Others->Auto Redial**.
2. Press (LEFT ARROW) or (RIGHT ARROW), or the **Switch** soft key to select **Enabled** from the **Auto Redial** field.
3. Enter the desired time (in seconds) in the **Redial Interval** field. The default time interval (in seconds) is 10.
4. Enter the desired times in the **Redial Times** field.
The default value is 10.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Auto redial is configurable via web user interface at the path **Features->General Information**.

**To use auto redial:**

When the called party is busy, the LCD screen prompts the following:

1. Press the **OK** soft key to activate auto redial. The following prompt will appear on the LCD screen of the phone:

2. Wait for a period of time or press the **OK** soft key to redial the phone number. The phone will retry as many times as configured until the called party is idle.
Call Completion

You can use call completion to notify the caller who failed to reach a desired callee when the callee becomes available to receive a call.

To configure call completion via phone user interface:

1. Press **Menu->Call Features->Others->Call Completion**.
2. Press (4) or (5), or the **Switch** soft key to select **Enabled** from the **Call Completion** field.
3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call completion is configurable via web user interface at the path **Features->General Information**.

To use call completion:

When the called party is busy, the following prompt will appear on the LCD screen of the phone:

1. Press the **OK** soft key, the phone returns to the idle screen and call completion is activated.
2. When the called party becomes idle, the LCD screen prompts the following:

![LCD Screen Prompt](image)

3. Press the **OK** soft key to redial the number.

**Note**
Call completion is not available on all servers. For more information, contact your system administrator.

### Call Return

You can press a call return key to place a call back to the last incoming call.

**To configure a call return key via phone user interface:**

1. Press **Menu** > **Call Features** > **DSS Keys**.
2. Select a desired DSS key.
3. Press 
   or 
   , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press 
   or 
   , or the **Switch** soft key to select **Call Return** from the **Key Event** field.
5. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.

![Configuring Call Return Key](image)

6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call return key is configurable via web user interface at the path **DSSKey** > **Line key**.
Call Mute

You can mute the microphone of the active audio device during an active call, and then the other party cannot hear you.

To mute a call:

1. Press during an active call.
   The LCD screen indicates that the call is on mute. The mute key LED illuminates solid red when the call is on mute.

   ![Mute Screen](image)

To un-mute a call:

1. Press again to un-mute the call.

Call Hold/Resume

You can place an active call on hold. Only one active call can be in progress at any time. Other calls can be made and received while placing the original call on hold. When you place a call on hold, your IP PBX may play music on hold to the other party while waiting.

To place a call on hold:

1. Press or the Hold soft key during a call.
   The LCD screen indicates that the call is on hold.

   ![Hold Screen](image)
The line key LED flashes green. The phone will beep softly every 30 seconds to remind you that you still have a call on hold.

**To resume a held call:**

1. Press 🔄 or the **Resume** soft key.

**Multiple Calls on Hold:**

If multiple calls are placed on hold, do one of the following:

- Press ↑ or ↓ to switch between the calls, and then press the **Resume** soft key to retrieve the desired call.

- Press the corresponding line key to retrieve the call.

If more than two calls are on hold, a numbered prompt appears on the LCD screen, for example "2/4", indicating that this is the second call out of four calls.

## Do Not Disturb (DND)

You can use DND to reject incoming calls automatically on the phone. Callers will receive a busy message.

You can enable/disable DND for the phone system, or you can customize DND for each or all accounts. Two DND modes:

- **Phone** (default): DND is effective for the phone system.

- **Custom**: DND can be configured for each or all accounts.

You can receive incoming calls from authorized numbers when DND is enabled.

**To configure the DND mode via web user interface:**

1. Click on **Features**->**Forward & DND**.
2. In the DND block, mark the desired radio box in the Mode field.

3. Click Confirm to accept the change.

**Note**

DND mode is configurable via web user interface only.

**To activate DND in phone mode:**

1. Press the DND soft key when the phone is idle.
   
   The icon on the idle screen indicates that DND is enabled.

   Incoming calls will be rejected automatically and "n New Missed Call(s)" ("n" indicates the number of the missed calls) will appear on the LCD screen.

**To activate DND in custom mode for a specific account:**

1. Press the DND soft key when the phone is idle.
The LCD screen displays a list of accounts on the phone.

2. Press ↬ or ← to select the desired account.
3. Press ↓ or ↑ soft key to select On to activate DND.
4. Press the Save soft key to accept the change.

The icon appears on the idle screen, and the associated line icon changes to 📠.

Incoming calls on the specific line will be rejected automatically, and the LCD screen will prompt “n New Missed Call(s)” (“n” indicates the number of the missed calls).

To activate DND in custom mode for all accounts:

1. Press the DND soft key when the phone is idle.
   The LCD screen displays a list of accounts registered on the phone.

2. Press the All On soft key to activate DND for all accounts.
3. Press the Save soft key to accept the change.
   The icon appears on the idle screen, and all line icons change to .
   Incoming calls will be rejected automatically, and the LCD screen will prompt "New Missed Call(s)" ("n" indicates the number of the missed calls).

![Image of phone screen showing missed call notification]

**Note**
The prompt message displays only if Missed Call Log for the line is enabled. Missed call log is configurable via web user interface at the path Account->Basic.

Do not disturb is local to the phone, and may be overridden by the server settings. For more information, contact your system administrator.

To configure the DND authorized numbers via web user interface:

1. Click on Features->Forward & DND.
2. Select Enabled from the pull-down list of DND Emergency.
3. Enter the numbers in the DND Authorized Numbers field.
   For multiple numbers, enter "","" between every two numbers.
4. Click **Confirm** to accept the change.

When DND is enabled on the phone, the phone can still receive incoming calls from the numbers specified in the **DND Authorized Numbers** field.

**Note**

DND authorized number is configurable via web user interface only.

## Call Forward

You can configure your phone to forward incoming calls to another party by the static forwarding. You can also forward calls while your phone is ringing, refer to the dynamic forwarding.

### Static Forwarding

Three types of static forwarding:

- **Always Forward**: Incoming calls are immediately forwarded.
- **Busy Forward**: Incoming calls are immediately forwarded if the phone is busy.
- **No Answer Forward**: Incoming calls are forwarded if not answered after a period of time.

You can enable/disable call forward for the phone system, or you can customize call forward for each or all accounts. Two call forward modes:

- **Phone** (default): Call forward is effective for the phone system.
- **Custom**: Call forward can be configured for each or all accounts.

To configure the call forward mode via web user interface:

1. Click on **Features** -> **Forward & DND**.
2. In the **Forward** block, mark the desired radio box in the **Mode** field.
3. Click **Confirm** to accept the change.

**Note**
Call forward mode is configurable via web user interface only.

**To enable call forward in phone mode:**

1. Press `Menu` > `Call Features` > `Call Forward`.
2. Press ↓ or ↑ to select the desired forwarding type, and then press the Enter soft key.
3. Depending on your selection:
   a.) If you select **Always Forward**:
      1) Press ↓ or ↑, or the Switch soft key to select Enabled from the Always Forward field.
      2) Enter the destination number you want to forward all incoming calls to in the Forward To field.
      3) (Optional.) Enter the always forward on code or off code respectively in the On Code or Off Code field.

   ![Always Forward](image)

   b.) If you select **Busy Forward**:
      1) Press ↓ or ↑, or the Switch soft key to select Enabled from the Busy Forward field.
      2) Enter the destination number you want to forward incoming calls to when the phone is busy in the Forward To field.

(Additional details and images about the Always Forward and Busy Forward options could be provided here.)
3) (Optional.) Enter the busy forward on code or off code respectively in the On Code or Off Code field.

![Busy Forward](image)

![No Answer Forward](image)

c.) If you select No Answer Forward:

1) Press \(\downarrow\) or \(\uparrow\), or the Switch soft key to select Enabled from the No Answer Forward field.

2) Enter the destination number you want to forward unanswered incoming calls to in the Forward To field.

3) Press \(\downarrow\) or \(\uparrow\), or the Switch soft key to select the ring time to wait before forwarding from the After Ring Time field.

The default ring time is 12 seconds.

4) (Optional.) Enter the no answer forward on code or off code respectively in the On Code or Off Code field.

4. Press the Save soft key to accept the change or the Back soft key to cancel.

The \(\rightarrow\) icon on the idle screen indicates the call forward is enabled.

To enable call forward in custom mode:

1. Press Menu -> Call Features -> Call Forward.
2. Press \(\downarrow\) or \(\uparrow\) to select the desired account, and then press the Enter soft key.
3. Press \(\downarrow\) or \(\uparrow\) to select the desired forwarding type, and then press the Enter soft key.
4. Depending on your selection:

   a.) If you select Always Forward, you can enable it for a specific account.
Basic Call Features

1) Press \( \leftarrow \) or \( \rightarrow \), or the **Switch** soft key to select **Enabled** from the **Always Forward** field.

2) Enter the destination number you want to forward all incoming calls to in the **Forward To** field.

3) (Optional.) Enter the always forward on code or off code respectively in the **On Code** or **Off Code** field.

You can also enable always forward for all accounts. After always forward was enabled for a specific account, do the following:

1) Press \( \uparrow \) or \( \downarrow \) to highlight the **Always Forward** field.

2) Press the **All Lines** soft key.

   The LCD screen prompts “Copy to all lines?”.

3) Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.

b.) If you select **Busy Forward**, you can enable it for a specific account.

1) Press \( \leftarrow \) or \( \rightarrow \), or the **Switch** soft key to select **Enabled** from the **Busy Forward** field.

2) Enter the destination number you want to forward incoming calls to when the phone is busy in the **Forward To** field.
3) (Optional.) Enter the busy forward on code or off code respectively in the On Code or Off Code field.

![Busy Forward Interface]

You can also enable busy forward for all accounts. After busy forward was enabled for a specific account, do the following:

1) Press ↑ or ↓ to highlight the Busy Forward field.
2) Press the All Lines soft key.

The LCD screen prompts “Copy to all lines?”.

![Busy Forward Prompt]

3) Press the OK soft key to accept the change or the Cancel soft key to cancel.

c.) If you select No Answer Forward, you can enable it for a specific account.

1) Press ↑ or ↓, or the Switch soft key to select Enabled from the No Answer Forward field.
2) Enter the destination number you want to forward unanswered incoming calls to in the Forward To field.
3) Press ↑ or ↓, or the Switch soft key to select the ring time to wait before forwarding from the After Ring Time field.

The default ring time is 12 seconds.
4) (Optional.) Enter the no answer forward on code or off code respectively in the On Code or Off Code field.

You can also enable no answer forward for all accounts. After no answer forward was enabled for a specific account, do the following:

1) Press ↑ or ↓ to highlight the No Answer Forward field.
2) Press the All Lines soft key.
   The LCD screen prompts “Copy to all lines?”.

3) Press the OK soft key to accept the change or the Cancel soft key to cancel.

5. Press the Save soft key to accept the change or the Back soft key to cancel.
   The icon appears on the idle screen, and the associated line icon changes to .

Call forward is configurable via web user interface at the path Features->Forward & DND.

**Note**
You can also enter the SIP URL or IP address in the Forward To field. For more information on using the SIP URL or IP address, refer to Placing Calls on page 83.

Call forward is local to the phone, and may be overridden by the server settings. Call forward on code or off code may be different between servers. For more information, contact your system administrator.
To disable call forward in phone mode:

Do one of the following:

- Press \( \text{F3} \) when the phone is idle.
- Press Menu -> Call Features -> Call Forward.
  
  Press \( \text{up} \) or \( \text{down} \) to select the desired forwarding type, then press the Enter soft key.
  
  Press \( \text{up} \) or \( \text{down} \), or the Switch soft key to select Disabled to disable the call forward.
  
  Press the Save soft key to accept the change.

To disable call forward in custom mode for a specific account:

1. Press Menu -> Call Features -> Call Forward or press \( \text{F3} \) when the phone is idle.
2. Press \( \text{up} \) or \( \text{down} \) to select the desired account, then press the Enter soft key.
3. Press \( \text{up} \) or \( \text{down} \) to select the desired forwarding type, then press the Enter soft key.
4. Press \( \text{up} \) or \( \text{down} \), or the Switch soft key to select Disabled to disable the call forward.
5. Press the Save soft key to accept the change.

**Dynamic Forwarding**

To forward an incoming call to another party:

1. When the phone is ringing, press the Forward soft key.
2. Enter the number you want to forward the incoming call to.

![Forward to Screen](image)

3. Press \( \text{ok} \), \( \#_{25} \), or the Send soft key.
   
   The LCD screen prompts a call forward message.
Call Transfer

You can transfer a call to another party in one of the three ways:

- **Blind Transfer**: Transfer a call directly to another party without consulting.
- **Semi-Attended Transfer**: Transfer a call when the target phone is ringing.
- **Attended Transfer**: Transfer a call with prior consulting.

**To perform a blind transfer:**

1. Press or the Transfer soft key during a call.
2. Enter the number you want to transfer the call to.
3. Press to complete the transfer.

Then the call is connected to the number to which you are transferring.

**To perform a semi-attended transfer:**

1. Press or the Transfer soft key during a call.
2. Do one of the following:
   - Press the Directory soft key, and then select Local Directory. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 33 for more information).
   - Press the Directory soft key, and then select Local Calllog. Select the desired list and press or to select the entry (Directory should be configured in advance. Refer to Directory on page 33 for more information).
   - Press the Directory soft key, and then select Remote Phone Book. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 33 and Remote Phone Book on page 49 for more information).
3. Press or to dial out.
4. Press or the Transfer soft key to complete the transfer when receiving ringback.
To perform an attended transfer:

1. Press or the Transfer soft key during a call.
2. Do one of the following:
   - Enter the number you want to transfer the call to.
   - Press the Directory soft key, and then select Local Directory. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 33 for more information).
   - Press the Directory soft key, and then select Local Calllog. Select the desired list and press or to select the entry (Directory should be configured in advance. Refer to Directory on page 33 for more information).
   - Press the Directory soft key, and then select Remote Phone Book. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 33 and Remote Phone Book on page 49 for more information).
3. Press or to dial out.
4. After the party answers the call, press or the Transfer soft key to complete the transfer.

If you are using a handset, the transfer can be completed by hanging up the handset.
You can cancel the transfer before the call is connected by pressing the Cancel soft key.

Call Waiting

You can enable or disable call waiting on the phone. If call waiting is enabled, you can receive another call when there is an active call on the phone. Otherwise, another incoming call is automatically rejected by the phone with a busy message when there is an active call on the phone. You can also enable or disable the phone to play a warning tone when receiving another call.

To configure call waiting via phone user interface:

1. Press Menu > Call Features > Call Waiting.
2. Press or , or the Switch soft key to select Enabled from the Call Waiting field.
3. Press or , or the Switch soft key to select Enabled from the Play Tone field.
4. (Optional.) Enter the call waiting on code or off code respectively in the **On Code** or **Off Code** field.

![](cell_waiting.png)

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call waiting is configurable via web user interface at the path **Features->General Information**.

**Conference**

You can create a conference with two parties using the phone’s local conference. You can create a conference between an active call and a call on hold by pressing the Conference soft key. The SIP-T46G also supports network conference.

**Note**

Network conference is not available on all servers. For more information, contact your system administrator.

**Local Conference**

The SIP-T46G IP phone supports up to 3 parties (including yourself) in a conference call. This is the default method of conference called Local Conference.

To set up a local conference call:

1. Place a call to the first party.

2. When the first party answers the call, press the **Conference** soft key to place a new call.
   The active call is placed on hold.

3. Enter the number of the second party and press **OK**, **#**, or the **Send** soft key.
4. When the second party answers the call, press the **Conference** soft key again to join all parties in the conference.

![Conference Soft Key](image)

To join two calls in a conference:

1. Place two calls using two different accounts on the phone (for example, place the first call using account 1, and then place the second call using account 2).
2. Press ( ) or ( ) to select the call for conference and make sure the call is active (for example, select the call on account 1).
3. Press the **Conference** soft key to join the two calls in the conference on the selected account.

**During the conference call, you can do the following:**

- Press ( ) or the **Hold** soft key to place the conference on hold.
- Press the **Split** soft key to split the conference call into two individual calls.
- Press the **Manage** soft key, and then press ( ) or ( ) to select the desired party:
  - Press the **Far Mute** soft key to forbid the party from speaking.
  - Press the **Remove** soft key to remove the party from the conference call.
  - Press the **Back** soft key to return to the previous interface.
- Press ( ) to mute the conference call.
- Press the **End Call** soft key to drop the conference call.

**Network Conference**

You can use network conference feature on the SIP-T46G IP phone to conduct a conference with multiple participants.

This feature allows you to perform the following:

- Join two calls together into a conference call.
- Invite another party into an active conference call.

To use this feature, contact your system administrator for the network conference URI in advance.
To configure network conference via web user interface:

1. Click on **Account** -> **Advanced**.
2. Select **Network Conference** from the pull-down list of **Conference Type**.
3. Enter the conference URI (e.g., conference@example.com) in the **Conference URI** field.
4. Click **Confirm** to accept the change.

**Note**

Network conference is configurable via web user interface only.

To set up a network conference call:

1. Place a call to the first party.
2. Press the **Conference** soft key to place a new call.
   
   The active call is placed on hold.
3. Enter the number of the second party and press `#`, `#`, or the **Send** soft key.
4. When the second party answers the call, press the **Conference** soft key to add the second party to the conference.
5. Press the **Conference** soft key to place a new call.
   
   The conference is placed on hold.
6. Enter the number of the new party and then press `#`, `#`, or the **Send** soft key.
7. When the new party answers the call, press the **Conference** soft key to add the new party to the conference.
8. Repeat steps 5 to 7 until you have added all intended parties.
The procedures to set up a network conference call on specific servers may be different from introduced above. Contact your system administrator for more information.

**Call Park**

You can use call park to place a call on hold, and then retrieve the call from another phone in the system (for example, a phone in another office or conference room). You can park an active call by pressing the call park key on the phone. If the call is parked successfully, the response is either a voice prompt confirming that the call was parked, or a visible prompt on the LCD screen.

**Note**
Call park is not available on all servers. Contact your system administrator for more information.

**To configure a call park key via phone user interface:**

1. Press **Menu** > **Call Features** > **DSS Keys**.
2. Select the desired DSS key.
3. Press or , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press or , or the **Switch** soft key to select **Call Park** from the **Key Event** field.
5. Press or , or the **Switch** soft key to select the desired line from the **Account ID** field.
6. Enter the call park code in the **Value** field.
7. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
8. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call park key is configurable via web user interface at the path **DSSKey** > **Line Key**.

**To use call park:**

1. User on phone A places a call to phone B.
2. User on phone A wants to take the call in a conference room for privacy, then presses the call park key on phone A.
3. User on phone A walks to an available conference room where the phone is
designated as phone C. The user dials the call park retrieve code to retrieve the parked call.

The system establishes call between phone C and B.

**Note**
The call park code and call park retrieve code are predefined on the system server. Contact your system administrator for more information.

If the parked call is not retrieved within a period of time assigned by the system, the phone performing call park feature will receive call back.

**Call Pickup**

You can use call pickup to answer someone else’s incoming call on the phone. The SIP-T46G IP phone supports directed call pickup and group call pickup. Directed call pickup is used for picking up a call that is ringing at a specific phone number. Group call pickup is used for picking up a call that is ringing at any phone number in the group. The pickup group should be predefined, contact your system administrator for more information.

You can pick up an incoming call by using the DPickup/GPickup soft key. To use call pickup, you need to configure the call pickup code beforehand on a global or per-line basis via web user interface.

**Note**
If there are many incoming calls at the same time, pressing the GPickup soft key on the phone will pick up the call that rings first.

**Directed Call Pickup**

To enable directed call pickup and configure the directed call pickup code on a global basis via web user interface:

1. Click on **Features->Call Pickup**.
2. Select **Enabled** from the pull-down list of **Directed Call Pickup**.
3. Enter the directed call pickup code in the **Directed Call Pickup Code** field.
4. Click **Confirm** to accept the change.
To configure the directed call pickup code on a per-line basis via web user interface:

1. Click on **Account**.
2. Select the desired account from the pull-down list of **Account**.
3. Click on **Advanced**.
4. Enter the directed call pickup code in the **Directed Call Pickup Code** field.

5. Click **Confirm** to accept the change.

To pick up a call directly:

1. Pick up the handset.
2. The **DPickup** soft key appears on the LCD screen.
3. Press the **DPickup** soft key on your phone when a phone receives an incoming call.
4. Enter the phone number which receives an incoming call.
5. Press the **DPickup** soft key again.
   
   The call is answered on your phone.
You can also configure a DSS key as a directed pickup key via phone user interface or web user interface. You can pick up a call by pressing the directed pickup key directly.

**Group Call Pickup**

To enable the group call pickup and configure the group call pickup code on a global basis via web user interface:

1. Click on **Features** -> **Call Pickup**.
2. Select **Enabled** from the pull-down list of **Group Call Pickup**.
3. Enter the group call pickup code in the **Group Call Pickup Code** field.
4. Click **Confirm** to accept the change.

To configure the group call pickup code on a per-line basis via web user interface:

1. Click on **Account**.
2. Select the desired account from the pull-down list of **Account**.
3. Click on **Advanced**.
4. Enter the group call pickup code in the **Group Call Pickup Code** field.

5. Click **Confirm** to accept the change.

**To pick up a call in the group:**

1. Pick up the handset.
2. The **GPickup** soft key appears on the LCD screen.

3. Press the **GPickup** soft key on your phone when a phone in the group receives an incoming call.
   
   The call is answered on your phone.

You can also configure a DSS key as group pickup key via phone user interface or web user interface. You can pick up a call by pressing the group pickup key directly.

**Note**

The directed call pickup code and group call pickup code are predefined on the system server. Contact your system administrator for more information.

The call pickup code configured on a per-line basis takes precedence over that configured on a global basis.
Anonymous Call

You can use anonymous call to block the identity and phone number from showing up to the called party when you call someone. For example, you want to call to consult some of the services, but don’t want to be harassed. Anonymous call is configurable on a per-line basis. You can also configure the phone to send anonymous code to the server to activate/deactivate anonymous call on the server side.

Note
Anonymous call is not available on all servers. Contact your system administrator for the anonymous call on code and off code.

To configure anonymous call via phone user interface:

1. Press **Menu**->**Call Features**->**Anonymous**.
2. Select the desired line and then press **Enter** soft key.
3. Press  or  , or the **Switch** soft key to select **Enabled** from the **Send Anonymous** field.
4. (Optional.) Press  or  , or the **Switch** soft key to select the desired value from the **Anonymous Code** field.
5. (Optional.) Enter the anonymous call on code in the **On Code** field.
6. (Optional.) Enter the anonymous call off code in the **Off Code** field.
7. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Anonymous call is configurable via web user interface at the path **Account**->**Basic**.

To place an anonymous call:

1. Using the specific line on the phone to place a call to phone B.
The LCD screen of phone B prompts an incoming call from anonymity.

Anonymous Call Rejection

You can use anonymous call rejection to reject incoming calls from anonymous callers. Anonymous call rejection automatically rejects incoming calls from callers who deliberately block their identities and numbers from showing up. Anonymous call rejection is configurable on a per-line basis.

To configure anonymous call rejection via phone user interface:

1. Press Menu > Call Features > Anonymous.
2. Select the desired line and then press Enter soft key.
3. Press ← or → to scroll to the Anonymous Rejection field.
4. Press ← or →, or the Switch soft key to select Enabled from the Anonymous Rejection field.
5. (Optional.) Enter the anonymous call rejection on code in the On Code field.
6. (Optional.) Enter the anonymous call rejection off code in the Off Code field.
7. Press the Save soft key to accept the change or the Back soft key to cancel.

Anonymous call rejection is configurable via web user interface at the path Account -> Basic.
Advanced Phone Features

This chapter provides operating instructions for the advanced features of the SIP-T46G IP phone. Topics include:

- Busy Lamp Field (BLF)
- Call Recording
- Hot Desking
- Intercom
- Multicast Paging
- Music on Hold
- Automatic Call Distribution (ACD)
- Messages

If you require additional information or assistance with your new phone, contact your system administrator.

Busy Lamp Field (BLF)

You can use BLF to monitor a specific line for status changes on the phone. For example, you can configure a BLF key on the phone for monitoring the status of a friend’s line (busy or idle). The BLF key LED illuminates solid red when the friend’s line is in use. For more information on BLF key LED indications, refer to LED Instructions on page 5.

You can press a BLF key to dial out the monitored phone number when the monitored line is idle. You can receive a visual and an audio alert (if enabled), and also pick up the call when the monitored line receives an incoming call. For more information, contact your system administrator.

To configure a BLF key via phone user interface:

1. Press Menu -> Call Features -> DSS Keys.
2. Select the desired DSS key.
3. Press 4 or 5, or the Switch soft key to select BLF from the Type field.
4. Press 4 or 5 or the Switch soft key to select the desired line from the Account ID field.
5. Enter the phone number or extension you want to monitor in the Value field.
6. (Optional.) Enter the string that will appear on the LCD screen in the Label field.
7. (Optional.) Enter the pickup code in the **Extension** field.

![BLF Key Configuration](image)

8. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

BLF key is configurable via web user interface at the path **DSSKey > Line Key**.

You can enable audio alert for BLF pickup on the phone. This allows the monitoring phone to play a warning tone when the monitored line receives an incoming call. You can also enable visual alert for BLF pickup on the phone. This allows the LCD screen of the monitoring phone to display the caller ID when the monitored line receives an incoming call.

**To enable visual and audio alert via web user interface:**

1. Click on **Features > Call Pickup**.
2. Select **Enabled** from the pull-down list of **Visual Alert for BLF Pickup**.
3. Select **Enabled** from the pull-down list of **Audio Alert for BLF Pickup**.

![Web Interface for BLF Configuration](image)

4. Click **Confirm** to accept the change.

**Note**

Visual and audio alerts are configurable via web user interface only.
When the monitored line receives an incoming call, the followings occur on the phone:

- The phone plays a warning tone (if enabled).
- The BLF key LED flashes red.
- The caller ID appears on the LCD screen (if enabled).

In the following figure, the LCD screen shows an incoming call from 3606 on the monitored line.

![Calls for Pickup](image)

**Note** If your phone is locked and the type of the keypad lock is configured as Function Keys or All Keys, you cannot use the Pickup, Dial, NewCall and Cancel soft keys until unlocked.

When there is an active call on the IP phone, you can transfer the active call to the monitored phone number directly by pressing the BLF key. The phone transfers the active call differently depending on the transfer mode via DSS key. For more information on performing call transfer, refer to Call Transfer on page 105.

**To configure the transfer mode via DSS key via web user interface:**

1. Click on Features > Transfer.
2. Select the desired transfer mode from the pull-down list of Transfer Mode Via Dsskey. Depending on your selection:
   - If you select Blind Transfer, press the BLF key to blind transfer the call to the monitored phone number.
   - If you select Attended Transfer, press the BLF key to dial out the monitored phone number. Then you can perform the attended or semi-attended transfer.
If you select **New Call**, press the BLF key to place a new call to the monitored user.

3. Click **Confirm** to accept the change.

**Note**  
Transfer mode via DSS key is configurable via web user interface only.

### Call Recording

You can record calls by pressing a record key on the phone. The SIP-T46G IP phone supports record and URL record.

Two ways of call recording:

- **Record**: The phone sends SIP INFO message containing a specific header “Record: on/off” to trigger a recording.
- **URL Record**: The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

**Note**  
Call record is not available on all servers. Contact your system administrator for more information.

To configure a record key via phone user interface:

1. Press **Menu** > **Call Features** > **DSS Keys**.
2. Select the desired DSS key.
3. Press “4” or “8”, or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press “4” or “8”, or the **Switch** soft key to select **Record** from the **Key Event** field.
5. (Optional.) Enter a string that will appear on the LCD screen in the Label field.

6. Press the Save soft key to accept the change or the Back soft key to cancel.

To configure a URL record key via phone user interface:
1. Press Menu->Call Features->DSS Keys.
2. Select the desired DSS key.
3. Press ( or ) or the Switch soft key to select URL Record from the Type field.
4. (Optional.) Enter a string that will appear on the LCD screen in the Label field.
5. Enter the URL (e.g., http://10.1.2.224/phonerecording.cgi) in the URL Record field.

6. Press the Save soft key to accept the change or the Back soft key to cancel.

Record and URL record key are configurable via web user interface at the path DSSKey->Line Key.

The Record and URL Record keys control the recording, and are available:
- During an active call
- When calls are on hold or mute
- During a blind or attended transfer
- During a conference call
- When the phone prompts you to answer an incoming call

The Record and URL Record keys are not available when:
- There are no connected calls on your phone
• You place a new call

To record a call:

1. Press the Record or URL Record key during a call.
   If the recording starts successfully, the recording icon will appear on the LCD screen and the Record or URL Record key LED will flash green.
2. Press the Record or URL Record key again to stop recording.
   The recording icon disappears from the LCD screen and the Record or URL Record key LED goes out.

Recording status indications you need to know:

<table>
<thead>
<tr>
<th>Circumstance</th>
<th>Icons on the LCD screen</th>
</tr>
</thead>
<tbody>
<tr>
<td>A recording is started</td>
<td>🎤 appears on the LCD screen</td>
</tr>
<tr>
<td>A recording cannot be started</td>
<td>🎤 appears for 1 second</td>
</tr>
<tr>
<td>A recording cannot be stopped</td>
<td>🎤 appears for 1 second, then goes back</td>
</tr>
<tr>
<td>The recording box is full</td>
<td>🎤 appears for 1 second</td>
</tr>
<tr>
<td>The call cannot be recorded</td>
<td>🎤 appears for 1 second</td>
</tr>
</tbody>
</table>

You can listen to the recordings stored on your server system. For example, you can dial an access code to listen to the recordings.

Note
The way in which you listen to the recordings may be different on different servers. Contact your system administrator for more information.

Hot Desking

Hot desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for hot desking is cost reduction. This feature is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long at all, which means actual personal offices would be often vacant, consuming valuable space and resources.

You can use hot desking on the SIP-T46G IP phone to log out of the existing accounts and then log into a new account. As a result, many users can share the phone resource in different time. To use this feature, you need to configure a hot desking key in advance.

Note
Hot desking is not available on all servers. Contact your system administrator for more information.
To configure a hot desking key via phone user interface:

1. Press Menu -> Call Features -> DSS Keys.

2. Select the desired DSS key.

3. Press \( \text{or} \) \( \text{or} \), or the Switch soft key to select Key Event from the Type field.

4. Press \( \text{or} \) \( \text{or} \), or the Switch soft key to select Hot Desking from the Key Event field.

5. (Optional.) Enter a string that will appear on the LCD screen in the Label field.

6. Press the Save soft key to accept the change or the Back soft key to cancel.

Hot desking key is configurable via web user interface at the path DSSKey -> Line Key.

To use hot desking:

1. Press the hot desking key when the phone is idle.

   The LCD screen prompts the following warning:

2. Press the OK soft key, registration configurations of all accounts on the phone will be cleared immediately.
The login wizard will be shown as below:

```
1. Register Name: 
2. User Name: 
3. Password: 
4. SIP Server1: 
5. SIP Server2: 
```

3. Enter the login information in each field.
4. Press the Save soft key to login or the Back soft key to cancel.

**Intercom**

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary. You can press the intercom key to automatically connect with a remote extension for outgoing intercom calls, and the remote extension will automatically answer the incoming intercom calls.

**Note**

Intercom is not available on all servers. Contact your system administrator for more information.

**Outgoing Intercom Calls**

To configure an intercom key via phone user interface:

1. Press **Menu->Call Features->DSS Keys.**
2. Select the desired DSS key.
3. Press 4 or 1, or the **Switch** soft key to select **Intercom** from the **Type** field.
4. Select the desired line from the **Account ID** field.
5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Enter the remote extension number in the **Value** field.

![Line Key 1](image)

7. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Intercom key is configurable via web user interface at the path `DSSKey->Line Key`.

**To place an intercom call:**

1. Press the intercom key when the phone is idle.
   
   The phone is automatically connected to the extension specified in the **Value** field.

2. Press the intercom key again or the **Cancel** soft key to end the intercom call.

**Incoming Intercom Calls**

The SIP-T46G IP phone supports automatically to answer an incoming intercom call by default. The phone automatically plays a warning tone when it receives an incoming intercom call. In addition, you can enable the phone to mute the microphone when it automatically answers an incoming intercom call. You can also enable the phone to automatically answer an incoming intercom call while there is already an active call on the phone. The active call is placed on hold.

Intercom features you need to know:

<table>
<thead>
<tr>
<th>Intercom Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accept Intercom</td>
<td>Enable or disable the IP phone to automatically answer an incoming intercom call.</td>
</tr>
<tr>
<td>Intercom Mute</td>
<td>Enable or disable the microphone on the IP phone for intercom calls.</td>
</tr>
<tr>
<td>Warning Tone</td>
<td>Enable or disable the IP phone to play a warning tone when it receives an incoming intercom call.</td>
</tr>
<tr>
<td>Intercom Barge</td>
<td>Enable or disable the IP phone to automatically answer an incoming intercom call while there is already an active call on the phone.</td>
</tr>
</tbody>
</table>

**To configure intercom features via phone user interface:**

1. Press **Menu->Calls>Features->Intercom**.
2. Make the desired changes.

![Intercom Configuration](image)

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

These specific parameters are configurable via web user interface at the path **Features > Intercom**.

**Accept Intercom**

You can enable or disable the phone to automatically answer an incoming intercom call. If **Accept Intercom** is enabled, the phone automatically answers an incoming intercom call. If **Accept Intercom** is disabled, the phone rejects incoming intercom calls and sends a busy message to the caller. **Accept Intercom** is enabled by default.

**Note**

Your administrator can set a period of delay time before the phone automatically answers intercom calls. Contact your system administrator for more information.

**Intercom Mute**

You can mute or un-mute the microphone on the phone for intercom calls automatically. If **Intercom Mute** is enabled, the microphone is muted for intercom calls. If **Intercom Mute** is disabled, the microphone works for intercom calls. **Intercom Mute** is disabled by default.

**Warning Tone**

You can enable or disable the phone to play a warning tone when receiving an intercom call. If **Warning Tone** is enabled, the phone plays a warning tone before answering the intercom call. If **Warning Tone** is disabled, the phone automatically answers the intercom call without warning. **Warning Tone** is enabled by default.

**Intercom Barge**

You can enable or disable the phone to automatically answer an incoming intercom call while there is already an active call on the phone. If **Intercom Barge** is enabled, the phone automatically answers the intercom call and places the active call on hold. If **Intercom Barge** is disabled, the phone handles an incoming intercom call like a waiting call. **Intercom Barge** is disabled by default.
Multicast Paging

You can use multicast paging to quickly and easily forward time sensitive announcements out to people within the multicast group. You can configure a multicast paging key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address(es) without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address(es) without involving SIP signaling. You can specify up to 10 multicast addresses.

Sending RTP Stream

To configure a multicast paging key via phone user interface:

1. Press Menu->Call Features->DSS Keys.
2. Select the desired DSS key.
3. Press or , or the Switch soft key to select Key Event from the Type field.
4. Press or , or the Switch soft key to select Multicast Paging from the Key Event field.
5. (Optional.) Enter the string that will appear on the LCD screen in the Label field.
6. Enter the multicast IP address and port number (e.g., 224.5.6.20:10008) in the Value field.

The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

7. Press the Save soft key to accept the change or the Back soft key to cancel.

Multicast paging key is configurable via web user interface at the path DSSKey->Line Key.

You can also configure the phone to use a default codec for sending multicast RTP stream via web user interface.

To configure a default codec for multicast paging via web user interface:

1. Click on Features->General Information.
2. Select the desired codec from the pull-down list of **Multicast Codec**. The default codec is G722.

![Image of Yealink phone settings](image)

3. Click **Confirm** to accept the change.

**Note**

If G722 codec is used for multicast paging, the LCD screen displays the icon ![HD](image) to indicate that is providing high definition voice.

Default codec for multicast paging is configurable via web user interface only.

**To send RTP stream:**

1. Press the multicast paging key when the phone is idle.

The phone sends RTP to a preconfigured multicast address (IP: Port). Any phone in the local network then listens to the RTP on the preconfigured multicast address (IP: Port). For both sending and receiving of the multicast RTP, there is no SIP signaling involved.

The multicast paging key LED illuminates solid green.

The following figure shows a multicast RTP session on the phone:
2. Press the **Hold** soft key to place the current multicast RTP session on hold.
3. Press the **End Call** soft key to cancel the multicast RTP session.

### Note

Multicast RTP is one way only from sender to the multicast address(es) (receiver). For outgoing RTP multicasts, all other existing calls on the phone will be placed on hold.

### Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address(es) without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network.

How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

#### Paging Barge

Paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress takes precedence over all incoming multicast paging calls.

Valid values in the Paging Barge field:

- **1 to 10**: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- **Disabled**: The voice call in progress shall take precedence over all incoming paging calls.

#### Paging Priority Active

Paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

To configure multicast listening addresses via web user interface:

1. Click on **Directory->Multicast IP**.
2. Select the desired value from the pull-down list of **Paging Barge**.
3. Select the desired value from the pull-down list of **Paging Priority Active**.
4. Enter the multicast IP address(es) and port number (e.g., 224.5.6.20:10008) which the phone listens for incoming RTP multicast in the **Listening Address** field.
5. Enter the label in the **Label** field. Label will appear on the LCD screen when receiving the multicast RTP stream.

![Multicast IP Configuration](image)

6. Click **Confirm** to accept the change.

**Note**

The priorities of listening addresses are predefined: 1 with the highest priority, 10 with the lowest.

Both the multicast paging sender and the receiver play a warning tone when establishing a multicast paging call.

Multicast listening addresses are configurable via web user interface only.

### Music on Hold

Music on hold (MoH) is the business practice of playing recorded music to fill the silence that would be heard by the party placed on hold. To use this feature, you should specify a SIP URI pointing to a Music on Hold Server account. When a call is placed on hold, the phone will send a SIP INVITE message to the Music on Hold Server account. The Music on Hold Server account automatically answers to the SIP INVITE messages and immediately plays audio from some source located anywhere (LAN, Internet) to the held party. Contact your system administrator for the SIP URI.

**To configure music on hold server via web user interface:**

1. Click on **Account**.
2. Select the desired account from the pull-down list of **Account**.
3. Click on **Advanced**.
4. Enter the SIP URI (e.g., sip:moh@sip.com) in the **Music Server URI** field.

![Image of SIP URI setting](image)

5. Click **Confirm** to accept the change.

When you have placed a call on hold, the held party can hear the music.

**Note**

All involved parties cannot use encrypted RTP (SRTP).

Music on hold server is configurable via web user interface only.

---

**Automatic Call Distribution (ACD)**

ACD is often used in offices for customer service, such as call centers. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. ACD on the SIPT46G IP phone allows the ACD system to distribute large volumes of incoming calls to the registered ACD users. To use this feature, you should configure an ACD key in advance.

**Note**

Make sure ACD is enabled on your IP phone. For more information on enabling ACD, contact your system administrator.

**To configure an ACD key via phone user interface:**

1. Press **Menu** -> **Call Features** -> **DSS Keys**.
2. Select the desired DSS key.
3. Press 4 or 5, or the **Switch** soft key to select **ACD** from the **Type** field.
4. (Optional.) Enter the string that will appear on the LCD screen in the Label field.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

ACD key is configurable via web user interface at the path DSSKey > Line Key.

To log into the ACD system:

1. Press the ACD key when the phone is idle.

   The LCD screen prompts you the following information:
   - **User ID**: the identity used to log into the queue.
   - **Password**: the password used to log into the queue.

2. Press the Login soft key to log into.

**Note**

Contact your system administrator for the User ID and Password to access the ACD system.

After configuring an ACD key, you can press the ACD key to log into the ACD system. After logging in, you are ready to receive calls from the ACD system. You can press the ACD key to show your current ACD user status. You can press the Available/Unavailable soft key to change your ACD user status. ACD user status synchronizes on both IP phone and ACD system.

When you set the ACD user status to be available, the ACD key LED illuminates solid green, and then the server begins distributing calls to your phone.

When you set the ACD user status to be unavailable, the ACD key LED flashes green, and then the server temporarily stops distributing calls to your phone. To log out of the
ACD system, press the **Logout** soft key.

**Note**  
It is recommended you configure no more than one ACD key per phone. At any time, at most one ACD key can be in progress on your phone.

## Messages

### Short Message Service (SMS)

You can send and receive text messages using the SIP-T46G IP phone. New text messages can be indicated both acoustically and visually. When receiving a new text message, the phone will play a warning tone. The power indicator LED will slow flash red, and the LCD screen will prompt receiving new text messages with the number of waiting messages (e.g., 1 New Text Message) and an icon.

![Message Icon](image)

**Note**  
SMS is not available on all servers. Contact your system administrator for more information.

To read a text message:

1. Press **Menu->Messages->Text Message->Inbox**.

![Message List](image)
2. Select the desired message and press the **View** soft key.

**Note**

If the phone prompts receiving new text messages, you can also press the **View** soft key to read the new messages directly.

---

**To send a text message:**

1. Press **Menu**->**Messages**->**Text Message**->**New Message**.
2. Compose the new text message. You can press the **abc** soft key to change the input mode.
3. Press the **Send** soft key.
4. (Optional.) Press 0 or 1, or the **Switch** soft key to select the desired account from the From field.
5. Enter the number you want to send the message to in the To field.
6. Press the **Send** soft key to send the message or the **Back** soft key to cancel.

Sending a text message is configurable via web user interface at the path **Features**->**SMS**.

**To reply a text message:**

1. Press **Menu**->**Messages**->**Text Message**->**Inbox**.
2. Select the desired message and press the **Reply** soft key.
3. Compose the new text message. You can press the **abc** soft key to change the input mode.
4. Press the **Send** soft key after completing the content.

**To delete a text message:**

1. Press **Menu**->**Messages**->**Text Message**->**Inbox (Sent Box, Outbox or Draftbox)**.

---

134
2. Select the desired message and then press the **Option** soft key.

![Message Selection Screen]

3. Select **Delete** to delete the desired message.

   The LCD screen prompts "Delete the selected message".

4. Press the **OK** soft key to delete this message or the **Cancel** soft key to cancel.

   You can also delete all text messages by pressing the **Option** soft key and then select **Delete All**. For more information, refer to the above steps.

   **Note**

   You can also delete a specific message after retrieving by pressing the **Delete** soft key.
Voice Mail

You can leave voice mails for someone else on the SIP-T46G IP phone. You can also listen to the voice mails stored in a centralized location. When receiving a new voice mail, the phone will play a warning tone, and the power indicator LED will slow flash red. The LCD screen will prompt receiving a new voice mail with the number of waiting voice mails (e.g., New Voice Mail(1)) and an icon.

Note
Voice Mail is not available on all servers. Contact your system administrator for more information.

To leave a voice mail:

You can leave a voice mail for someone else when he/she is busy or inconvenient to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

To configure voice mail access codes via phone user interface:

2. Press the navigation keys to highlight the account which you want to set.
3. Press the 123 soft key to select the proper input mode and then enter the voice mail access code (e.g., *97).
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**Note**
Voice mail access code must be predefined on the system server. Contact your system administrator for the more information.

**To listen to the voice mails:**

1. When the phone user interface prompts receiving new voice mails and the power indicator LED slow flashes red, press [ or the **Connect** soft key to dial out the voice mail access code.
2. Follow the voice prompt to listen to voice mails.

**Note**
Before listening to voice mails, make sure the voice mail access code has been configured.
When all new voice mails are retrieved, the power indicator LED will go out.

**To view the voice mail via phone user interface:**

1. Press **Menu**->**Messages**->**Voice Mail**->**View Voice Mail**.
   
The LCD screen displays the amount of new and old voice mails

![View Voice Mail](image)

2. Select an account and then press the **Connect** soft key to listen to voice mails.

**Message Waiting Indicator (MWI)**

The SIP-T46G IP phone supports MWI when receiving a new voice message. If someone leaves you a voice mail, you will receive a message waiting indicator. MWI will be indicated in three ways: a warning tone, an indicator message (including a voice mail icon) on the LCD screen, and the power indicator LED slow flashes red. This will be cleared when you retrieve all voice mails or delete them.
The MWI service is unsolicited for some servers, so the SIP-T46G IP phone only handles the MWI messages sent from the server. But for other servers, the MWI service is solicited, so the SIP-T46G IP phone must enable subscription for MWI.

**Note**

MWI service is not available on all servers. Contact your system administrator for more information.

The MWI subscription parameters you need to know:

<table>
<thead>
<tr>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subscribe for MWI</td>
<td>Enable or disable a subscription for MWI service.</td>
</tr>
<tr>
<td>MWI Subscription Period</td>
<td>Period of MWI subscription. The IP phone sends a refresh SUBSCRIBE request before initial SUBSCRIBE expiration.</td>
</tr>
</tbody>
</table>
| Subscribe MWI to VM      | Enable or disable a subscription to the voice mail number for MWI service.  
To use this feature, you should also configure the voice mail number. |

**Note**

Whether the phone sends SUBSCRIBE messages for MWI service to the account or the voice number MWI service depends on the server. Contact your system administrator for more information.

To configure subscribe for MWI via web user interface

1. Click on **Account**.
2. Select the desired account from the pull-down list of **Account**.
3. Click on **Advanced**.
4. Select **Enabled** from the pull-down list of **Subscribe for MWI**.
5. Enter the period time in the **MWI Subscription Period (Seconds)** field.

6. Click **Confirm** to accept the change.

The IP phone will subscribe to the account number for MWI service by default.

**To enable Subscribe MWI to Voice Mail via web user interface:**

1. Click on **Account**.
2. Select the desired account from the pull-down list of **Account**.
3. Click on **Advanced**.
4. Select **Enabled** from the pull-down list of **Subscribe MWI To Voice Mail**.
5. Enter the desired voice mail number in the **Voice Mail** field.

6. Click **Confirm** to accept the change.
The IP phone will subscribe to the voice mail number for MWI service using Subscribe MWI to Voice Mail.

**Note**  
MWI subscription is configurable via web user interface only.
This chapter provides general troubleshooting information to help you solve the problems you might encounter when using your SIPT46G IP phone.

If you require additional information or assistance with your new phone, contact your system administrator.

**Why is the LCD screen blank?**

- Ensure that the phone is properly plugged into a functional AC outlet.
- Ensure that the phone is plugged into a socket controlled by a switch that is on.
- If the phone is plugged into a power strip, try to plug it directly into a wall outlet instead.
- If the phone is powered from PoE, ensure you use a PoE-compliant switch or hub.

**Why does the phone display “Cable Disconnected”?**

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is operational.

**Why doesn’t the phone display time and date correctly?**

Check if you have configured the phone to obtain the time and date from the SNTP server automatically. If the phone fails to connect the SNTP server, you need to configure the time and date manually.

**How do I find the basic information of the IP phone?**

Press the OK key when the IP phone is idle to check the basic information of the IP phone, such as IP address and firmware version. For more basic information, refer to Phone Status on page 14.

**How to obtain the MAC address of a phone when the phone is not powered on?**

Three ways to obtain the MAC address of a phone:

- You can ask your supplier for shipping information sheet which includes MAC addresses according to the corresponding PO (Purchase Order).
- You can find the MAC address in the label of carton box.
- You can also find the MAC address from the phone’s bar code on the back of the phone.
Why can’t I get a dial tone?

- Check for any loose connections and that the phone has been installed properly. For the installation instructions, refer to Phone Installation on page 11.

- Switch between the Handset, Headset (if present) or Hands-Free Speakerphone to check whether the dial tone is present for one of the audio modes.
  
  If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Why doesn’t the phone ring?

Check the ringer volume on the phone. To adjust the ringer volume setting, press the Volume key when the phone is on-hook and idle. For more information, refer to Volume on page 30.

Why can’t I receive calls?

- Check the SIP registration with your system administrator.

- Check that DND (Do Not Disturb) mode is deactivated on your phone. Refer to Do Not Disturb (DND) on page 94.

- Check that call forward is disabled on the phone. Refer to Call Forward on page 98.

- Check whether the caller number is stored in the blacklist directory. Refer to Blacklist on page 47.

Why is my handset not working?

Check that the handset cord is fully connected to both the handset jack on the phone and handset. Refer to Phone Installation on page 11.

Why is my headset not working?

- Check that the headset cord is fully connected to the headset jack on the phone. Refer to Phone Installation on page 11.

- Check that the headset mode is activated. Refer to Headset Use on page 53.

- Check that the headset volume is adjusted to an appropriate level. Refer to Volume on page 30.

What is the difference between user name, register name and display name?

Both user name and register name are defined by the server. A user name is used to identify the account while a register name matched with a password is used for authentication if the server requires. Display name is the caller ID that will be displayed on the callee’s LCD screen. Server configuration may override the local configuration.
Why does the phone play a tone when there is a call on hold? How to disable it?

When there is a call on hold, the phone will play a hold tone every 30 seconds. Call hold tone is enabled by default. Call hold tone and the interval of playing a hold tone are configurable via web user interface only.

To configure call hold tone and call hold tone delay via web user interface:

1. Click on Features->General Information.
2. Select Enabled or Disabled from the pull-down list of Play Hold Tone.
3. Enter the desired time in the Play Hold Tone Delay field.

4. Click Confirm to accept the change.

Why does the wallpaper has bad display?

Do one of the following:

- Check that the custom image is clear.
- Check that the file format of the custom image for the wallpaper is .jpg, .png or .bmp.
- Check that the custom image is not too large or small. The phone will adjust the image with the short side to display.
- Check that the picture resolution of the wallpaper. The wallpaper resolution of T46G IP phone is 480*272 pixels.
Why I can’t send an SMS to any other phone?

SMS depends on support from a SIP server. Contact your system administrator for more information.

How to change the user password?

To change the user password via web user interface:

1. Click on Security -> Password.
2. Select user from the pull-down list of User Type.
3. Enter the new user password in the New Password field and Confirm Password field.
4. Click Confirm to accept the change.

You can also contact your system administrator for help.

Note

If logging into the web user interface of the phone with the user credential, you need to enter the current user password in the Old Password field.

User password is configurable via web user interface only.

How to make a call using SRTP?

You can enable SRTP to encrypt the audio stream(s) of phone calls. The parties participating in the call should enable SRTP on a per-line basis.

To enable SRTP on a per-line basis via web user interface:

1. Click on Account.
2. Select the desired account from the pull-down list of Account.
3. Click on Advanced.
4. Select the desired value (Optional or Compulsory) from the pull-down list of **RTP Encryption (SRTP)**.

5. Click **Confirm** to accept the change.

**Note**

SRTP is not available on all servers. Contact your system administrator for more information.

SRTP is configurable via web user interface only.

**How to reboot the phone?**

**To reboot the phone via web user interface:**

1. Click on **Settings -> Upgrade**.
2. Click **Reboot** to reboot the IP phone.
You can also long press the X key to reboot the phone directly. Any reboot of the phone may take a few minutes.

**How to export PCAP trace?**

We may need you to provide a PCAP trace to help analyze your problem.

**To export a PCAP trace via web user interface:**

1. Click on **Settings -> Upgrade**.
2. Click **Start** to begin capturing signal traffic.
3. Recreate the error to be documented in the trace.
4. Click **Stop** to stop the capture.
5. Click **Export** to open file download window, and then save the file to your local system.

![Image of web user interface showing PCAP export process](image)

**How to export system log?**

We may need you to provide a system log to help analyze your problem.

**To export the system log to local PC via web user interface:**

1. Click on **Settings -> Configuration**.
2. Select 6 from the pull-down list of **System Log Level**.
3. Click **Confirm** to accept the change.
   
   The web user interface prompts “Do you want to restart your machine?”. The configuration will take effect after reboot.
4. Click **OK** to reboot the phone.
   
   After the IP phone finishes reboot, the system log level is set as 6, the debug level.
5. Mark the **Local** radio box in the **Export System Log** field.
6. Click **Export** to open file download window, and then save the file to your local system.

![Troubleshooting Image]

You can also export the system log to a syslog server, contact your system administrator for more information.

**How to export/import the phone configurations?**

We may need you to provide the phone configurations to help analyze problem. In some instance, you may need to import configurations to your phone.

To export the phone configurations via web user interface:

1. Click on **Settings -> Configuration**.
2. Click **Export** to open file download window, and then save the file to your local system.

To import the phone configurations via web user interface:

1. Click on **Settings -> Configuration**.
2. Click **Browse** to locate a configuration file from your local system.
3. Click Import to import the configuration file.

Note
The file format of configuration file must be .bin.

How to upgrade firmware?

To upgrade firmware via web user interface:

1. Click on Settings -> Upgrade.
2. Click Browse to locate the firmware from your local system.
3. Click Upgrade to upgrade the firmware.
   
   The browser pops up the dialog box “Firmware of the SIP Phone will be updated. It will take 5 minutes to complete. Please don’t power off!”.
4. Click OK to confirm upgrading.

How to reset the phone?

Reset the phone to factory configurations after you have tried almost all troubleshooting suggestions but do not solve the problem. You need to note that all customized settings will be overwritten after reset.

To reset the phone via phone user interface:

1. Press Menu -> Advanced (password: admin) -> Reset & Reboot -> Reset to Factory.
2. Press  or , or the Switch soft key to select the desired type from Reset Option field.
3. Press the Save soft key.
Troubleshooting

The LCD screen prompts the following warning:

![Reset to Factory](image)

4. Press the OK soft key.

The LCD screen prompts “Welcom Initializing…Please wait”.

![Welcome](image)

The phone will be reset to factory successfully after startup.

**Note**

Reset of the phone may take a few minutes. Do not power off until the phone starts up successfully.
Regulatory Notices

Service Agreements
Contact your Yealink Authorized Reseller for information about service agreements applicable to your product.

Limitations of Liability
TO THE FULL EXTENT ALLOWED BY LAW, YEALINK EXCLUDES FOR ITSELF AND ITS SUPPLIERS ANY LIABILITY, WHETHER BASED IN CONTRACT OR TORT (INCLUDING NEGLIGENCE), FOR INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND, OR FOR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE, USE, PERFORMANCE, FAILURE, OR INTERRUPTION OF ITS PRODUCTS, EVEN IF YEALINK OR ITS AUTHORIZED RESELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND LIMITS ITS LIABILITY TO REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASER ICE PAID, AT YEALINK’S OPTION. THIS DISCLAIMER OF LIABILITY FOR DAMAGES WILL NOT BE AFFECTED IF ANY REMEDY PROVIDED HEREIN SHALL FAIL OF ITS ESSENTIAL PURPOSE.

Safety Instructions
Save these instructions. Read these safety instructions before use!
The following basic safety precautions should always be followed to reduce risk of fire, electrical shock, and other personal injury.

⚠️ General Requirements
- Before you install and use the device, read the safety instructions carefully and observe the situation during operation.
- During the process of storage, transportation, and operation, please always keep the device dry and clean.
- During the process of storage, transportation, and operation, please avoid collision and crash of the device.
- Please attempt not to dismantle the device by yourself. In case of any discrepancy, please contact the appointed maintenance center for repair.
- Without prior written consent, no organization or individual is permitted to make any change to the structure or the safety design of the device. Yealink is under no circumstance liable to consequences or legal issues caused by such changes.
- Please refer to the relevant laws and statutes while using the device. Legal rights of others should be respected as well.

⚠️ Environmental Requirements
- Place the device at a well-ventilated place. Do not expose the device under direct sunlight.
Keep the device dry and free of dusts.
Place the device on a stable and level platform.
Please place no heavy objects on the device in case of damage and deformation caused by the heavy load.
Keep at least 10 cm between the device and the closest object for heat dissipation.
Do not place the device on or near any inflammable or fire-vulnerable object, such as rubber-made materials.
Keep the device away from any heat source or bare fire, such as a candle or an electric heater.
Keep the device away from any household appliance with strong magnetic field or electromagnetic field, such as a microwave oven or a refrigerator.

⚠ Operating Requirements

Do not let a child operate the device without guidance.
Do not let a child play with the device or any accessory in case of accidental swallowing.
Please use the accessories provided or authorized by the manufacturer only.
The power supply of the device shall meet the requirements of the input voltage of the device. Please use the provided surge protection power socket only.
Before plugging or unplugging any cable, make sure that your hands are completely dry.
Do not spill liquid of any kind on the product or use the equipment near water, for example, near a bathtub, washbowl, kitchen sink, wet basement or near a swimming pool.
Do not tread on, pull, or over-bend any cable in case of malfunction of the device.
During a thunderstorm, stop using the device and disconnect it from the power supply. Unplug the power plug and the Asymmetric Digital Subscriber Line (ADSL) twisted pair (the radio frequency cable) to avoid lightning strike.
If the device is left unused for a rather long time, disconnect it from the power supply and unplug the power plug.
When there is smoke emitted from the device, or some abnormal noise or smell, disconnect the device from the power supply, and unplug the power plug immediately. Contact the specified maintenance center for repair.
Do not insert any object into equipment slots that is not part of the product or auxiliary product.
Before connecting a cable, connect the grounding cable of the device first. Do not disconnect the grounding cable until you disconnect all other cables.

⚠ Cleaning Requirements

Before cleaning the device, stop using it and disconnect it from the power supply.
Use a piece of soft, dry and anti-static cloth to clean the device.
Keep the power plug clean and dry. Using a dirty or wet power plug may lead to electric shock or other perils.
