Working with you to care for your patients.

When OHSU Doernbecher Children’s Hospital opened its doors in 1926, it became the first full-service children’s hospital in the Pacific Northwest.

Today, we offer the most comprehensive pediatric care for children in the region. Our unique, wide-ranging team of health care experts includes specially trained physicians, nurses, therapists, child life therapists, chaplains, technicians and support personnel.

At Doernbecher, our physicians and staff members are available to partner with you in the care of your patients.

One Number for Providers
The Doernbecher Physician Consult line can assist with referrals, consults, transfers or other needs. All you need is one number: **503 346-0644** (toll free: **888 346-0644**)
As part of our health mission, we provide:

- A major referral center for cancer, heart disease, cardiac surgery, neurosurgery, diabetes, neonatal and pediatric intensive care, metabolic disorders, organ and stem cell transplantation and trauma.
- A comprehensive pediatric diabetes center.
- A comprehensive neonatal intensive care unit including all neonatal, medical and surgical specialists.
- A comprehensive pediatric intensive care unit with 24/7/365 in-house coverage.
- Hospitalist service.
- We are dedicated to meeting the needs of referring providers and their patients. Our provider relations manager, Susan Gray Madison R.N., M.S., serves as your personal contact and is committed to working with you and your staff to better partner in the care of your patients. Call 503 346-0644 or email graymadi@ohsu.edu.

Adolescent and Young Adult Clinic

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Adolescent and Young Adult Clinic provides health services for young people between the ages of 10 and 22. Adolescents may select the clinic for their primary health care needs or their primary care provider can refer them for consultation.

Services
- Primary care
- Behavioral and mental health care
- Consultation and care for eating disorders
- Reproductive care
- Management of chronic illnesses

Faculty/Staff
Barbara Long, M.D., M.P.H.
C. Wayne Sells, M.D., M.P.H.
Audiology/Hearing Loss

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

Doernbecher Pediatrics - Westside at Bethany Village
15220 NW Laidlaw Rd., Suite 1000
Portland, OR 97229

The Audiology/Hearing Loss Clinic focuses on the early identification and treatment of hearing loss. Children can be referred to this clinic by their primary care provider.

Services

• Hearing screening
• Comprehensive diagnostic testing
• Limited hearing aid evaluation and fitting, including auditory brain stem response testing, middle ear studies and otoacoustic emissions
• Educational consultation
• Coordination of care and referral

The CDRC Autism Program at OHSU provides services to children with established autism or suspected symptoms on the autism spectrum. The clinic is comprised of an interdisciplinary team of clinical psychologists, developmental pediatricians, speech/language pathologists, occupational therapists and audiologists. The goal of the program is to understand the individual differences and needs of each child and to provide specific diagnoses and recommendations to families.

Services

• Assessment
• Diagnosis
• Recommendations and treatments, including individualized parent training, naturalistic interventions (such as floor time, pivotal response training and incidental teaching), social skills groups, speech therapy and occupational therapy
• Ongoing consultation

Faculty/Staff

Robin McCoy, M.D.
Robert Nickel, M.D.
Rita Panoscha, M.D.
Sage Saxton, Psy.D.
Darryn Sikora, Ph.D.
The Pediatric Cardiology program provides state-of-the-art expertise in the entire spectrum of congenital and acquired cardiac diseases. Our pediatric cardiac consultative services are available at a variety of locations, including OHSU Doernbecher Children's Hospital, Doernbecher Pediatrics - Westside at Bethany Village, Albany, Bend, Coos Bay, Corvallis, Eugene, Klamath Falls, Medford, Pendleton, Roseburg, Salem and Vancouver. Children can be referred to this clinic by their primary care provider.

Services

- Full service cardiac evaluation for heart murmur, chest pain, syncope, congenital heart disease and acquired heart disease
- State-of-the-art echocardiographic services, including screening for fetal cardiac abnormalities
- Cardiac MRI
- Interventional catheterization techniques for non-operative catheter-based procedures such as balloon angioplasty for vascular obstructions
- Coil and closure devices for cardiac shunt lesions (ASD, PDA, VSD or collateral vessels)
- Complete electrophysiology service for evaluating and treating arrhythmia including pacemaker insertion and catheter ablation procedures

The Cardiothoracic Surgery program at OHSU provides nationally recognized excellence in cardiac surgical care for children and families from Oregon and the Pacific Northwest. The program includes an exceptional team of pediatric cardiac surgeons, pediatric cardiac anesthesiologists, pediatric perfusion specialists, pediatric intensive care physicians, pediatric cardiac operating room nurses and PICU nurses who specialize in the perioperative care of children before and after cardiac surgery.

### Services

- The OHSU Doernbecher cardiology program treats all neonatal and childhood heart problems from the less critical to the most complex.
- Cardiopulmonary bypass and brain protection for infants undergoing heart surgery
- Ross procedure, Hypoplastic left heart syndrome, tetralogy of Fallot, TGA and neonatal complete repair

Child Abuse and Suspected Child Abuse and Neglect (SCAN)

The Rosenfeld Center for the Study and Treatment of Child Abuse and the Suspected Child Abuse and Neglect (SCAN) team assess child abuse cases, both local and referred; report abuse episodes to the appropriate authorities and educate students, medical residents, faculty and community health professionals on legal, medical and social aspects of child abuse.

Please call us for information or assistance in reporting suspected child abuse or neglect (physical, emotional, sexual and/or failure to thrive), or to check on a child admitted to Doernbecher for child abuse issues. To report child abuse or neglect in Oregon, you also can call your county abuse hotline.

Faculty/Staff

Thomas Valvano, M.D.
Noelle Gibson, P.N.P.
The Child Development Clinic provides interdisciplinary diagnosis and consultation for infants and children who have established or suspected development problems and are referred by their primary care physicians. Our care team may include specialists in developmental pediatrics, speech/language pathology, audiology, psychology, special education, occupational therapy, physical therapy and social work. Children are referred to this clinic by their primary care provider.

**Services**

- Formal developmental and behavioral assessments of preschool children (5 years of age or younger)
- Treatment for children with complex disorders of learning and communication, including mental retardation, autism, language disorders, attention deficit disorders and neurobehavioral disorders

Eugene
Clinical Services Building
University of Oregon
901 E. 18th Ave.
Eugene, OR 97403

The CDRC improves the lives of individuals with disabilities or special health needs through leadership and effective partnerships with individuals, families, communities and public and private agencies. We serve as an exemplary local, state and national resource through our commitment to excellence in interdisciplinary clinical practice, research, education, policy development and community service.
Cleft Palate/Craniofacial Disorders

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Craniofacial Disorders Clinic provides evaluation and ongoing care coordination for children with cleft palate (with or without cleft lip) or other craniofacial disorders from birth through adulthood. Early nursing consultation is critical for success of initial feeding efforts and is a unique feature of this clinic. The clinic specializes in naso-alveolar molding (NAM) to reconstruct the palate, and also placement of a temporary speech appliance (obturator) clinic. We offer nonsurgical treatment of children with velopharyngeal insufficiency. Children are referred to this clinic by their primary care provider.

• Physical therapy
• Oral-maxillofacial surgery
• Assistive technology
• Nutrition
• Cardiology
• Metabolics
• Orthopedics
• Psychology
• Pediatric dentistry
• Orthodontics
• Social work
• Care coordination
The Dental program at Doernbecher cares for children with acute and chronic medical issues. We provide emergency dental care to Doernbecher inpatients and will provide consultation, if requested by the child’s physician.

The Pediatric Dental Surgery program is a joint effort supported by Doernbecher Children’s Hospital, OHSU School of Dentistry and private partners. The clinic was established to support other Doernbecher programs in the evaluation and treatment of special needs children.

In addition to Doernbecher patients, we welcome referrals from private practitioners in Oregon and Southwest Washington. Our clinic is available for consultation and treatment including sedation and general anesthesia.

We offer IV sedation services for patients with oral/dental needs that require short procedures. We work closely with oral and maxillofacial surgery for older patients in need of surgical care.

Down Syndrome

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Down Syndrome Clinic offers expertise in health and medical issues commonly experienced by children with Down syndrome and their families. We offer comprehensive, multidisciplinary assessments of children with Down Syndrome from newborns up to age 21, including developmental and medical evaluations, as well as functional assessments, in order to develop individualized goals for optimal health and development. Education and support regarding Down Syndrome are provided, including referral to local organizations and to books and web-based information. When appropriate, patients and families are referred to other specialists at Doernbecher Children’s Hospital including Otolaryngology, Cardiology, Dentistry, Feeding/Nutrition, Ophthalmology, Psychology and Psychiatry.

Faculty/Staff
Joseph Pinter, M.D., Director
Candace Ganz, Ed.D., CCC-SLP

Margaret Wolf, O.T.R./L.
The Doernbecher Cardiac Echo lab is a Pediatric ICAEL certified lab in pediatric thoracic echocardiography. It is the only lab in Oregon that is accredited in pediatric transesophageal and fetal echocardiography. It is staffed with pediatric certified echo sonographers and pediatric cardiologists to provide the most accurate, state-of-the-art echo available, including fetal echocardiography.

All echo requests must be accompanied by a faxed order that includes the following patient information:

- Name
- Birth date
- Phone number
- Reason for request
- ICD-9 code

We will contact the family to register them and schedule an appointment at a convenient time. Echo results will be faxed to the office of the requesting physician. If there is a significant finding, a pediatric cardiologist will contact the requesting physician by phone. For your convenience, a fax order sheet is available at www.ohsudoernbecher.com/referral
Pediatric Emergency Department

The Doernbecher Pediatric Emergency department is one of only two pediatric Level 1 trauma centers in Oregon. This state-of-the-art, family-centered facility offers your patients:

- Board-certified pediatric emergency specialists.
- Full spectrum of care from highly skilled specialists – our patients have immediate access to all of OHSU’s trauma and surgical resources, as well as Doernbecher’s pediatric specialists.
- 24-hour observation – Patients who should be monitored overnight have an alternative to being admitted to the hospital.
- Our rooms are fully equipped to administer acute care and include accommodations for overnight stay of patients and a family member, should this be necessary.
- Bedside registration – Thanks to computerized patient record equipment, most admitting procedures can be conducted in the exam room.
- Comforting environment – Patients enter our facility through a separate and secure, kid-friendly waiting room, complete with computer games and a big-screen TV.
- Free valet parking – available to all emergency patients.

Doernbecher Pediatrics -
The Vancouver Clinic
700 NE 87th Ave
Vancouver, WA 98664

The Harold Schnitzer Diabetes Health Center at Oregon Health & Science University serves adults and children who are living with diabetes. Our integrated, patient-centered and family-oriented approach helps reduce the burden of diabetes so our patients can live healthy, productive lives. Our multidisciplinary team includes many diabetes specialists, board-certified pediatric endocrinologists, specially trained nurses, a dietitian, a psychologist and diabetes educators. Each patient’s team is customized to his or her developmental level and particular needs.

The Pediatric Endocrinology Clinic evaluates and treats children with a wide range of endocrine problems, including diabetes; growth problems; pituitary hormone deficiencies; thyroid, adrenal, and gonadal disorders and precocious or delayed puberty. Our multidisciplinary team includes pediatric endocrinologists, a pediatric endocrine nurse, certified diabetes educators, pediatric dietitians skilled in nutritional management and a social worker specially trained in family counseling. The medical staff helps children and their families understand and manage their particular health situation.

Outreach clinics are held at three-to four-month intervals in Bend, Coos Bay, Eugene, Grants Pass, Klamath Falls, Medford, Ontario, Roseburg and Salem. Primary care physicians refer children to this program.

Over the last 30 years, children’s eating habits, levels of exercise, and genetics have led to children with worsening health. The most common health problem in these children is that of becoming overweight or obese. Doernbecher has always been committed to improving the health of our children, and we are determined to extend that commitment. The Doernbecher Healthy Lifestyle Clinic (DHLC) is a special clinic that evaluates the lifestyles of pediatric patients.

**Services**

- Assessment of child’s genetic history, eating habits, exercise patterns, screen time, and other important health influences on health
- Evaluation of other weight-related conditions including diabetes, high blood pressure, heart disease, gall stones, fatty liver disease, abnormal menstrual cycles and obstructive sleep apnea

**Faculty/Staff**

- We offer a multidisciplinary team dedicated to overweight or obese children. This group consists of a pediatrician, a pediatric dietician, a pediatric trained physical therapist and a pediatric behavioral health psychologist.
- Natasha Polensek, M.D.
- Kimberly Guion, Psy.D.
- Kerry Michaelis, P.T.
- Karrie Stuhlsatz, R.D., C.S.P., L.D.
OHSU Family Medicine has convenient Family Health Centers on the OHSU campus and in the Portland metro area, providing a full scope of pediatric services.

**Services**

- Well-child care
- Preventive care, such as immunizations
- Maternity and newborn care, including circumcisions
- Adolescent care, including sports physicals, birth control and gynecologic services
- Mental health services
- Treatment of injuries and infections
- Hospital care for children

The Pediatric Gastroenterology Clinic offers consultation, diagnostic evaluation and treatment for infants and children with gastrointestinal problems — such as abdominal pain, vomiting, encopresis, inflammatory bowel disease, gastroesophageal reflux, celiac disease, crohn’s disease and pediatric liver disease.

The Pediatric Gastroenterology Division includes board-certified pediatric gastroenterologists, a pediatric nurse practitioner with special expertise in treating children with constipation or encopresis, two pediatric gastroenterology nurses and a dedicated support team. Specialty lab services include gastrointestinal endoscopy, pH probe monitoring, liver biopsy and motility testing.

The division also offers a Liver clinic, a Feeding and Swallowing Disorders clinic and a clinic specializing in gastrointestinal disorders in autism patients.

The Genetics and Birth Defects Clinic helps primary care providers diagnose and care for children with common and uncommon genetic disorders. The clinic’s staff includes medical geneticists and genetic counselors. Each clinician is experienced in general clinical genetics and trained in subspecialty areas such as dysmorphology, cytogenetics, biochemical disorders or molecular genetics.

When appropriate, patients may consult with specialists in genetic ophthalmology, pediatric cardiology, endocrinology or neurology. If developmental or behavioral questions exist, developmental assessment of a child can also be performed in the clinic. Specialized laboratory services are available through the DNA diagnostic, cytogenetic and biochemical genetics laboratories. Children are referred to this clinic by their primary care provider.

Hemangioma and Birthmarks Clinic

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Hemangioma and Birthmarks Clinic is a multispecialty clinic that specializes in treating infants, children and adults with complex vascular lesions. These lesions include large or complex hemangiomas, lymphatic malformations, venous malformations, AVM’s, port wine stains and others.

Services
• Laser ablation
• Steroid injections
• Injection of sclerosing agents
• Surgical excision and reconstructive surgery
• Angiography and angiographic embolization
• MRI, CT, MRA and CTA imaging
• Percutaneous embolization
• Multidisciplinary team visit
• Medical management of hemangiomas (propranol, steroids, vincristine, others)

The Kenneth W. Ford Northwest Children’s Cancer Center is a comprehensive children’s cancer center. It is also the pediatric program of the OHSU Knight Cancer Institute. Our multi-speciality teams include full-time board-certified pediatric hematology/oncology specialists, nurses specially trained in pediatric hematology/oncology and a support team that includes the entire range of pediatric and surgical subspecialties. Social workers, child life specialists, pediatric nutritionists and pediatric pharmacists also staff the center.

Each year, our team treats more than 1,000 children and adolescents with cancer. The team also cares for children and adolescents with other potentially life-threatening blood disorders, such as aplastic anemia, hemophilia and sickle cell disease. In addition, Doernbecher houses the Comprehensive Pediatric Brain Tumor Program and the Hemophilia Center. It also is the only hospital in Oregon that performs pediatric stem cell and bone marrow transplants and has a pediatric survivor program for long-term follow-up and support.

The Hemophilia Clinic serves patients with hemophilia A (factor VIII deficiency), hemophilia B (factor IX deficiency) and other clotting disorders such as Von Willebrand’s disease. Our team of specialists includes pediatric and adult hematologists, a nurse practitioner, nurse coordinators, dentists, physical therapists, genetic counselors, nutritionist, education specialist, a social worker and a psychologist.

The Hemophilia Center uses a comprehensive model to deliver effective care coordinated in the community. Our emphasis is on educating providers, educators, patients and their families for successful management. The Hemophilia Center also manages a hemophilia factor concentrate program.

Services:
- Diagnosis
- Evaluation
- Management
- Treatment
- Factor replacement product

Hospitalists

OHSU Doernbecher Children’s Hospital
9th Floor
700 S.W. Campus Dr.
Portland, OR 97239

The Doernbecher Pediatric Hospitalist team cares for children admitted to the Pediatric Acute Care Center with general pediatric conditions.

Services

- General inpatient pediatric medicine
- Coordination of care for children with complex medical conditions
- Collaboration with consulting services and referring physicians to streamline inpatient care and transitions home.

Infectious Diseases

OHSU Doernbecher Children's Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The OHSU Doernbecher Children's Hospital Pediatric Infectious Disease Service provides expert consultation for children with infectious diseases. The service also provides telephone consultation for physicians in Oregon. The staff includes four full-time and two part-time board-certified pediatric infectious disease physicians and a registered nurse clinical research coordinator. Patients must be referred for consultation by a health care professional.

Doernbecher’s division of Infectious Diseases is active in clinical research protocols for new antiviral agents for treating viral infections in immunocompromised children, and laboratory studies for host defense and tuberculosis immunopathogenesis and tuberculosis vaccine and diagnostics development.

Doernbecher’s lactation consultants help mothers and babies who are having problems with breastfeeding. Patients may be scheduled for inpatient or outpatient visits and are seen by a team of nurses who are Board Certified Lactation Consultants.

Services

• **Prenatal Consultation**: Appointments created to help women understand how breastfeeding works and discuss questions or potential issues that may interfere with a successful lactation.

• **Consultation**: Private prenatal or postnatal appointments designed to support mothers in creation of breastfeeding plans. Lactation support for premature, late preterm and normal newborns.

• **Urgent consultations**: The lactation specialists are available to address urgent problems that are interfering with breastfeeding or babies who are not feeding well or failing to gain weight.

• **Retail services**: We offer a variety of products for purchase, including Medela breastpumps and bras.

• **Industry consultation**: We provide information for companies wishing to provide breastfeeding support in the workplace.

Faculty/Staff

Lipid Clinic

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Pediatric Lipid Clinic offers consultation, diagnostic evaluation and treatment for infants, children and adolescents with lipid disorders, such as hypercholesterolemia, hypertriglyceridemia, combined dyslipidemias and hypo-HDL cholesteroolemia. The physician consultation also includes an evaluation by a certified specialist in pediatric nutrition, who will spend extensive time counseling a child’s family.

The Pediatric Lipid Clinic staff includes a pediatric cardiologist and a pediatric dietician, along with a dedicated support team. The clinical staff works in consultation with other specialists from pediatric endocrinology, pediatric metabolism and adult lipid clinic, as warranted. Primary care physicians refer children to this clinic for treatment.

Faculty/Staff
Laurie Armsby, M.D.
The Metabolic Clinic is the only one of its kind in Oregon. It provides diagnostic and management services to children and adults with confirmed or suspected inborn metabolism errors. Special areas of expertise include disorders of amino acid and sugar metabolism, storage disorders and related degenerative neurological conditions and defects of mitochondrial function.

Team members include a pediatrician, registered dieticians and a nurse practitioner. Other specialists such as orthopedists and neurologists are available for consultation as needed. When appropriate, a nutritionist provides individualized consultation and special diet management.

The team conducts a metabolic clinic weekly at Doernbecher and holds outreach clinics in Bend, Eugene and Medford. Children are referred to this clinic by their primary care provider.

The Doernbecher Neonatal Care Center (DNCC) is a 46-bed neonatal facility, designed to accommodate the needs of Level II and/or Level III newborn infants and their families. This includes infants who are not more than 48 weeks post-conception and who need Level II/III care. Infants may be readmitted within one to two weeks after discharge from DNCC or another hospital. We accept other readmissions as needed to support the Department of Pediatrics at Doernbecher.

Faculty members share responsibilities for patient care, continuing education, research and clinical leadership and community service. Physicians also consult with health care professionals about referral to the DNCC and best care practices for their tiny patients.

The faculty and staff of our Nephrology Division provide comprehensive evaluation, treatment and consultation services for pediatricians and family practitioners who care for children with a wide range of conditions — including hematuria, proteinuria, hypertension, recurrent urinary tract infections, nephrocalcinosis and chronic kidney disease. The interdisciplinary team is comprised of two Board-certified pediatric nephrologists, a pediatric renal nutritionist, a pediatric nephrology nurse, a pediatric dialysis nurse, a transplant nurse and a social worker.

This team approach allows us to work closely with families and the primary care provider to coordinate all aspects of these complex patients’ care. This includes advice on diets for children with kidney diseases, balancing growth issues, monitoring labs and medication changes and the psychosocial issues that can accompany chronic kidney disease and transplantation. Primary care providers generally refer children to this service.

Services

- Comprehensive evaluation, treatment and consultation for children with kidney disease or hypertension
- Complete hemodialysis and peritoneal dialysis services for children with acute and chronic renal failure
- Care for patients before and after a kidney transplant

The Neurodevelopmental Clinic is a tertiary care referral resource for children with established or suspected problems with development. The program focus is on children whose development is affected by sensorimotor deficits stemming from nervous system damage or dysfunction. This clinic also provides developmental monitoring and assessment of NICU graduates who are at high risk for motor difficulties, developmental delays, learning disabilities or sensory impairments.

The staff includes developmental pediatricians, occupational therapists, physical therapists, speech-language pathologists and audiologists. Often other services are helpful and the team makes recommendations for referral to these as needed. Examples include psychology, special education, nutrition, assistive technology, dentistry, genetics, metabolics, neurology, neonatology, ophthalmology and orthopedics.

The Division of Pediatric Neurosurgery, within the OHSU Department of Neurological Surgery, provides comprehensive neurosurgical evaluation and care at OHSU Doernbecher Children’s Hospital and Clinics. Children are referred for care by their primary care physician or other specialists.

General pediatric neurosurgical care is available for children from infancy up to age 18. Prenatal counseling is also available for parents expecting a child with spina bifida, hydrocephalus or other problems. Special interdisciplinary programs are offered in the following areas: Craniofacial disorders and Cranial Synostosis (with Pediatric Plastic Surgery), Brain and Spinal Cord Tumors (with Pediatric Oncology and Radiation Oncology), Epilepsy Monitoring and Surgery (with Pediatric Neurology), Spina Bifida and Tethered Spinal Cord (with the CDRC), Spasticity and Movement Disorders (with Pediatric Neurology and Shriners Hospital for Children) and Pediatric Neurovascular Disorders (with Interventional Neuroradiology). The division also specializes in Chiari malformation, minimally invasive surgery using computer navigation, neuroendoscopy, intra-operative monitoring and intra-operative MRI.

Portland, OR 97229

Pediatric neurology provides comprehensive care for all children with neurologic problems and disabilities. Clinical activities focus on epilepsy, cerebral palsy, genetic/metabolic disorders, neuromuscular disorders and other developmental disabilities.

Neurology houses the state’s only pediatric epilepsy program offering comprehensive diagnosis and treatment options, including medical and surgical management options. Clinical care is closely coordinated with the referring physician. We also offer access to state-of-the-art technology for video-EEG telemetry and functional neuroimaging including MR spectroscopy. The division has close relationships with behavioral pediatrics, child psychiatry, neurological surgery and neuroradiology. Children are referred to this service by their primary care provider.

The Northwest Clinic for Voice and Swallowing is a comprehensive clinic that provides evaluation and treatment for children presenting with voice or swallowing disorders, related airway issues, or voice rehabilitation following surgery, including tracheostomy. Clinic evaluations include visits with both a pediatric speech-language pathologist and otolaryngologist who work as a team to develop a treatment plan to address the child’s voice or swallowing needs. Comprehensive testing and laryngeal imaging can be conducted through this clinic.

Nutrition

Doernbecher’s pediatric dietitians offer consultation, evaluation and medical nutrition therapy for children with normal and specialized nutritional needs. Pediatric dietitians work as key members of specialized health care teams in both inpatient and outpatient clinics — including diabetes, cystic fibrosis, feeding clinic/failure to thrive, hematology/oncology, neonatology, obesity, renal and eating disorders. Children are referred for outpatient treatment by their primary care physicians.

Services

• Comprehensive nutrition assessment, including diet analysis, anthropometric measurements, monitoring growth parameters and evaluation of laboratory data.
• Individualized nutrition care plans that include oral, gastrostomy and total parenteral nutrition feedings, depending on a child’s needs.

Occupational Therapy

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

Eugene CDRC
Clinical Services Building
University of Oregon
901 E. 18th Ave. Eugene, OR 97403

We provide comprehensive assessment and treatment services for individuals 0-21 years of age and their families. Additionally, we provide services to adults with developmental disabilities.

We provide assistance with adaptive equipment/technology, and we apply splints to prevent deformities.

We have knowledgeable occupational therapists with many years of education and experience in pediatric evaluation and treatment. In addition to conventional occupational therapy services, we have therapists specially trained in sensory integration, neurodevelopmental therapy, feeding therapy, constraint-induced movement therapy (CIMT), assistive technology, splinting, therapeutic listening, floor time, and child passenger safety.
The Elks Children’s Eye Clinic offers full optical, medical and surgical care of all pediatric eye problems. The clinic is one of only a few pediatric ophthalmology centers in the west dedicated to pediatric eye care, research and education, and has become one of the most respected university pediatric ophthalmology and strabismus groups in the country.

Staff physicians are internationally recognized for their work in birth defects of the eye, including cataracts, glaucoma, eye tumors, eye injuries and complications related to premature birth. They are actively involved in clinical and translational research, and are a statewide resource for vision screening in schools, preschools, the community and medical offices.

**Services**

- Diagnosis and management of strabismus (eye misalignment), amblyopia (lazy eye), pediatric ocular tumors, cataracts, glaucoma, blocked tear ducts, injuries, hereditary eye diseases and retinopathy of prematurity
- Infant vision assessment
- Routine eye care and other ophthalmological subspecialty consultation
- Contact lens fittings
- An optical shop, with an extensive selection of pediatric frames

Oregon Poison Center

The Oregon Poison Center (OPC) is a 24-hour health care information and treatment resource serving the state of Oregon. The Poison Center staff includes doctors and nurses trained in toxicology. They utilize their professional expertise as well as an extensive variety of computer databases, textbooks and journal articles to determine the appropriate treatment guidelines for patients. A careful assessment of a patient’s condition as well as the substance of exposure is necessary before determining treatment recommendations. The poison center staff also utilizes continuous follow up and evaluation to determine if treatment recommendations are effective in producing a positive patient outcome.

INFORMATION AND PATIENT TREATMENT RECOMMENDATIONS:

The Pediatric Orthopaedics and Rehabilitation Practice provides a full spectrum of treatment for children with musculoskeletal problems. The practice serves children with trauma-related injuries and congenital or developmental musculoskeletal disorders, including children with cerebral palsy and other sensorimotor impairments. Common problems seen in this practice are hip dysplasia, clubfoot and benign musculoskeletal lesions. A certified orthotist (a maker and fitter of orthopedic appliances) works with our orthopaedists to provide braces. Primary care physicians and orthopaedic surgeons refer children to the practice for evaluation and treatment.

Services

Diagnosis and treatment of the following conditions:

- Musculoskeletal conditions, including hip, knee, and foot deformities
- Bone dysplasia
- Cerebral palsy
- Upper extremity deformities
- Bone infections
- Malignant and nonmalignant tumors
- Fractures
- Trauma
- Sports-related injuries
- Scoliosis and spine disorders

Palliative Care

OHSU Doernbecher Children’s Hospital
Kenneth Ford Cancer Center, 10th floor
700 SW Campus Dr.
Portland, OR 97239

At Doernbecher Children’s Hospital, the Bridges program provides comprehensive palliative care for children with chronic life-threatening conditions who may live for many years or eventually be cured, as well as those who require active end-of-life care. Our team focuses on quality of life and relief of suffering, sometimes in conjunction with curative or life-prolonging care.

Our team of experts includes doctors, nurses, and social workers specially trained in palliative care. We also work closely with child life and chaplain services to provide child and family support. We work together to ensure that we meet each child’s physical, emotional, social and spiritual needs at all stages of care.

Services

• Care focusing on quality of life and relief of suffering
• Child and family support and education
• Staff education on palliative care
• Meeting families’ spiritual, religious and cultural requests
• Family portraits for terminally ill children
• Family bereavement services
• Assistance in identifying community home care or hospice resources
• Management of hospice care if requested by primary care provider or care team

PANDA Transport

The Pediatric and Neonatal Doernbecher Transport (PANDA) Team provides immediate ground or air transport to OHSU Doernbecher Children’s Hospital. PANDA serves Oregon, Washington, Idaho, Alaska, Montana, northern California and Utah and is the largest and busiest pediatric and neonatal transport program in Oregon. Most transports are for critically ill neonates and children from referring hospitals in Oregon and Southwest Washington to our Pediatric Intensive Care Unit (PICU) or Doernbecher Neonatal Care Center (DNCC).

Referring providers who call for a transport will speak with the attending physician. A DNCC or PICU attending physician is available 24 hours day by telephone to initiate, triage and provide medical direction for each transport.

Our goal is to mobilize the PANDA Transport Team and leave Doernbecher within 15 minutes of initiating the transport. The PANDA Team uses ground (ambulance), rotor wing (helicopter) and fixed-wing (airplane) modes of transport. Decisions about the mode of transport are based on safety, medical and cost-effectiveness factors.

PANDA TRANSPORT:

1-888-667-2632

The only pediatric transport team in Oregon accredited by the Commission Accreditation of Medical Transport Services.
Pediatric Intensive Care (PICU)

OHSU Doernbecher Children’s Hospital
8th Floor
700 S.W. Campus Dr.
Portland, OR 97239

The OHSU Doernbecher Children's Hospital Pediatric Intensive Care Unit (PICU) provides state-of-the-art critical care to any infant, child or adolescent who arrives with a serious illness or injury, or requires intensive care after a surgical procedure. As a part of OHSU, the Doernbecher PICU has a key role in developing and implementing educational and research activities in pediatric critical care medicine and nursing on a national level.

We are a tertiary referral center, serving children in Oregon, Washington, Idaho, Montana and northern California. The Doernbecher PICU is a 20-bed unit equipped with the latest technology to care for critically ill and injured children. Care is provided by eight board-certified Pediatric Intensive Care physicians who are on the unit 24/7.

Physical Therapy

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

Eugene CDRC
Clinical Services Building
University of Oregon
901 E. 18th Ave.
Eugene, OR 97403

The Physical Therapy Program addresses the developmental and functional motor needs of children of all abilities who have difficulty moving because of injury, disease, or other health conditions. We also provide services for adults who have developmental motor disorders.

Each child receives an individualized plan of care that addresses the particular motor needs of that patient and takes into account the concerns and goals of the patient and family. We consult with others in the community who are involved in the care of the patient to coordinate services. This collaboration ensures that the goals of treatment are best integrated into the patient’s home and community life.

Our physical therapists have extensive expertise evaluating and treating patients who experience motor disabilities, special health needs, or chronic disabling health conditions. Examples include:

• Cerebral palsy and related neuromotor disorders
• Spina bifida
• Orthopedic conditions
• Trauma
• Childhood cancer
• Hemophilia
• Genetic and metabolic conditions
• Muscle diseases
Plastic Surgery

OHSU Doernbecher Children's Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Pediatric Plastic Surgery Clinic provides evaluation and ongoing care coordination for children with congenital and reconstructive plastic surgical problems from birth through adulthood. Many plastic surgery services are delivered in a multidisciplinary setting including: cleft lip and palate, craniofacial, pediatric trauma, facial neoplasms and facial vascular lesions. Children are referred to the clinic by their primary care physicians.

Services

- Plastic surgery for cleft lip and palate, craniofacial problems, pediatric trauma, facial neoplasms and facial vascular lesions
- Reconstructive plastic surgery
- Oral/maxillofacial surgery
- Nasal Alveolar Molding (NAM) devices before surgery

Faculty/Staff

Psychiatry

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Child and Adolescent Psychiatry Outpatient Clinic offers primary and tertiary psychiatric services for youths with mental health needs. Board-certified child and adolescent psychiatrists provide direct patient care and supervision in the outpatient clinic and on the consultation-liaison service. Resident physicians in advanced training for child and adolescent psychiatry also provide services in the clinic and on the consultation-liaison service. Children are referred to the service by their primary care providers.

Services

• Psychiatric inpatient and outpatient consultation
• Urgent mental health consultation and stabilization
• Comprehensive psychiatric evaluation and treatment
• Individual psychotherapy for teens and children
• Medication evaluation and treatment
• Parent training
• Family therapy
• Coordination with primary care providers, non-psychiatric mental health providers and community agencies

Faculty/Staff

Ajit Jetmalani, M.D., Director
Kyle Johnson, M.D.
Craigan Usher, M.D.
Bonnie Nagel, Ph.D.
Psychological Services provides psychological evaluation, consultation and treatment to children, adolescents and their families. Inpatient and outpatient consultation focuses on a wide range of psychological issues, including assessment of behavioral or emotional problems related to a medical condition, development of coping strategies for invasive procedures, support for family members and friends and brief testing of developmental status. Children are referred to this service by their primary care physicians.

Services
- Interdisciplinary evaluations
- Inpatient and outpatient consultation
- Treatment/psychotherapy
- Comprehensive neuropsychological testing

Pulmonary Medicine and Cystic Fibrosis

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

Common pulmonary disorders seen in this clinic include cystic fibrosis, asthma, pneumonia, congenital lung malformations, recurrent aspiration, neuromuscular disease and sleep apnea. Children are seen by a pediatric pulmonologist, either by referral from their primary care provider or by calling us directly.

The Pediatric Pulmonary Function Laboratory is the only facility in Oregon dedicated to children's lung function testing. Doernbecher and OHSU also have Oregon’s only care center approved by the Cystic Fibrosis Foundation. In addition, we are the only facility in Oregon with a comprehensive children’s sleep disorder program.

Radiology

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

The Division of Pediatric Radiology in the Department of Radiology at OHSU is known for its dedication and excellence in pediatric imaging and diagnosis. The digital technology is state-of-the-art and the most sophisticated in the Pacific Northwest. Radiology uses low-dose grid pulsed fluoroscopy, significantly reducing the radiation dose to patients.

This department also has a unique cooperative effort with the Department of Anesthesiology, whose members perform and monitor sedation safely and efficiently. Imaging includes conventional X-rays, ultrasonography, fluoroscopy, magnetic resonance imaging (MRI), computed tomography (CT), nuclear medicine and positron emission tomography/computerized tomography (PET/CT).

Doernbecher radiology accepts outside referrals for all radiologic services. See referral form at ohsudoernbecher.com/referral

Rehabilitation Services

OHSU Doernbecher Children’s Hospital
Specialty Clinics, 7th Floor
700 S.W. Campus Dr.
Portland, OR 97239

Doernbecher provides comprehensive pediatric rehabilitation services, on an inpatient and outpatient basis, for children with a wide variety of conditions.

Our occupational therapy program focuses on helping children and youth participate in daily life activities, such as self-care, play and school-related activities. Interventions are designed to promote development, establish foundational skills and address sensorimotor processing. We provide individual, multi-disciplinary and interdisciplinary evaluations.

Our physical therapy program addresses the development and functional motor needs of children of all abilities who have difficulty moving because of injury, disease or other health conditions. We also provide services for adults who have developmental motor disorders.
Sedation Service

The Pediatric Sedation Service provides safe, efficient sedation services in non-operating room locations as needed to facilitate diagnostic and therapeutic procedures. Pediatric anesthesiologists work with sedation nurses to provide medical supervision and determine the level of care needed for the procedure or examination. Some procedures require very light sedation; others require deep sedation or general anesthesia. Sedation nurses provide the pre-procedure screening and education to help families and their children prepare for the sedation experience. The nurses also provide monitoring and recovery services.

The Pediatric Sleep Disorder Program is a multidisciplinary program involving physicians from child psychiatry, pediatric pulmonary medicine and pediatric otolaryngology. The disorders treated include obstructive sleep apnea, restless leg syndrome, narcolepsy, insomnia, behavioral sleep disorders, parasomnias (sleep terrors and sleep walking) and delayed sleep phase syndrome. Sleep studies, such as polysomnograms and multiple sleep latency tests, are performed at the OHSU Sleep Lab. The lab is located at the Marriott Residence Inn at Riverplace, where we are able to simulate an at-home sleep environment. Treatments include education, behavioral interventions, pharmacotherapy and potentially surgery or continuous positive airway pressure (CPAP) for sleep-disordered breathing.

The Speech and Language Program provides comprehensive services for children and young adults. Speech-language pathologists evaluate and treat patients with typical and atypical function in the areas of language comprehension and expression, speech sound production, voice and resonance, fluency, cognition and feeding and swallowing. In addition to direct clinical service, our faculty and staff is involved in prevention and advocacy, research, education and administration. The program places a major focus on difficult-to-manage speech and language conditions that require coordination of services between a child’s primary care provider, school and family. Children are referred to the clinic by their primary care provider.
Spina Bifida – CDRC

**OHSU Doernbecher Children’s Hospital**
Specialty Clinics, 7th floor
700 S.W. Campus Dr.
Portland, OR 97239

**Eugene CDRC**
Clinical Services Building
University of Oregon
901 E. 18th Ave.
Eugene, OR 97403

The Portland Spina Bifida Clinic and the Eugene Spina Bifida Clinic staff care for patients of all ages with neural tube defects. Clinic activities include prevention through case finding, diagnosis and evaluation. The team makes recommendations to primary care physicians regarding intervention, long term management and coordination of care.

The program primarily serves children and young adults from birth through age 21. However, people with neural tube defects may be referred to the program at any age. The program counsels families who have had a prenatal diagnosis of neural tube defect to help prepare the family for delivery, infant care, and ongoing management. Children are referred to the clinic by their primary care physicians.

Stem Cell/Bone Marrow Transplant Program

OHSU Doernbecher Children’s Hospital
10th Floor
700 S.W. Campus Dr.
Portland, OR 97239

Doernbecher is the only pediatric hospital offering blood and bone marrow transplants in Oregon. The program is accredited by the Foundation for the Accreditation of Cellular Therapy and the National Marrow Donor Program. Our dedicated team of doctors, nurse practitioners, nurses and associated health care staff specializes in caring for children and adolescents receiving blood stem cell or bone marrow transplantation. We treat patients with a variety of cancers and nonmalignant conditions such as immunodeficiencies, metabolic disorders and inherited blood disorders. Our program offers autologous transplants and allogeneic transplants using related donors, unrelated donors or cord blood.

Services:
• Consultation for new patients and second opinions
• HLA-typing and donor search
• Bone marrow harvest and stem cell collections
• Inpatient and outpatient transplant care
• Long-term follow-up clinic
• Opportunity for participation in clinical research trials

*Confidential email contact: pedbmt@ohsu.edu

Faculty/Staff
Bill Chang, M.D., Ph.D.
Peter Kurre, M.D.
Eneida Nemecek, M.D., M.S. – Medical Director
Evan Shereck, M.D.
Tara Bernhart, R.N., F.N.P.

Amy Kenagy, R.N., P.N.P.
Allison Moore, R.N. – Transplant Nurse/Donor Search Coordinator
Erica Soler, R.N., P.N.P.
Our pediatric general surgery team provides comprehensive surgical care for infants, children and adolescents. A collaborative team of specialists provide patients with individualized surgical care for a variety of conditions affecting the thoracic area, abdomen and pelvis including appendicitis and hernias, as well as rare or complex conditions such as solid tumors, pectus and other chest wall abnormalities, anorectal malformations and multiple congenital anomalies.

**Services**

- Minimally invasive surgery
- Specialized endoscopic procedures
- Pectus excavatum/pectus carinatum repair
- Tumor resection
- Vascular access for IV therapy/chemotherapy
- Antegrade continence enemas
- Colorectal problems

Preparations for anxiolytic medications or conscious sedation is available for invasive clinic procedures. Additionally, the general surgery clinic offers specialty services for patients with ostomies and bowel management issues.

*night coverage only
Telemedicine

The OHSU Doernbecher Telemedicine Network allows access to pediatric specialists, 24/7, to patients in community hospitals throughout the state of Oregon. Through our network, physicians at participating hospitals may consult with Doernbecher pediatric critical care specialists through wireless technology to help diagnose and collaborate in development of treatment plans.

Telemedicine can:

• Provide immediate access to a Doernbecher consultant
• Assist in the diagnosis and best possible treatment plan for the patient, which improves outcomes
• Avoid costly and stressful transfers for patients, keeping them in their local communities
• Reduce cost of care
• Increase satisfaction of local physicians and their patients

Pediatric Intensivists
Miles Ellenby, M.D.
Laura M. Ibsen, M.D.

Michele Pierce, N.N.P.
Ann Stepto, N.N.P.
Jamie Wegner, N.N.P.
Pediatric urology provides comprehensive medical and surgical care for the infant and child with structural and functional abnormalities of the urinary tract. Our urologists regularly provide surgical reconstruction of the penis, bladder, ureters and kidneys. We also provide care for children with exstrophy, hypospadias, epispadias, hydronephrosis, vesicoureteral reflux and many other abnormalities of the genitourinary tract.

In addition, our pediatric urology program provides a voiding and incontinence clinic for children. This is especially important for those children with day and nighttime wetting and associated urinary tract infections. Conscious sedation is available for children who are anxious or who have had a bad experience with urological testing. Children are referred to this program by their primary care provider.
