PRODUCT DATA SHEET

DESCRIPTION: SP-6888® is a range of surface coatings based on “State of the Art” epoxy chemistry. SP-6888® is similar to SP-6888® R.G. with the benefit of being a pure 100% epoxy. The cathodic disbanding resistance of SP-6888® is excellent at temperatures up to 80°C (176°F). SP-6888® is available in Brush Grade and Spray Grade. SP-6888® is also available in Cartridges for coating repairs.

ADVANTAGES: • 100% Solids – No VOCs.
• High build single coat application.
• Isocyanate free.
• Excellent resistance to high temperature cathodic disbonding up to 80°C (176°F).
• Excellent adhesion to grit blasted steel surfaces, Fusion Bond Epoxy (FBE), liquid epoxy, and urethane coatings.

USES: • Internal lining for pipelines.
• Coating of pipe, valves and fittings.
• Rehabilitation of existing pipelines.
• Girth weld coatings.
• Slip bore and directional drilling applications.
• Tank linings.

APPLICATION: • Spray Grade: Graco Hydra-Cat - Tip Size: .019 - .031
• Brush Grade: Brush or Roller
• Cartridge: Manual Dispenser

CLEANING MATERIALS: • SP-100 Equipment Wash
• SP-110 Tool Cleaner
• SP-120 Internal Storage Lubricant
SURFACE PREPARATION:

Steel Substrate: 
- **Cleanliness:** Near White
- **Standards:** NACE 2, Sa 2½ (Swedish Scale, ISO 8501-1)  
  SSPC SP-10 (The Society for Protective Coatings)
- **Profile:** 62.5 microns minimum to 125 microns maximum  
  (2.5 mils to 5.0 mils)

FBE: 
- **Profile:** 62.5 microns (2.5 mils) minimum

MIXING RATIO: 
- Brush Grade or Spray Grade; By Volume: 3 Parts Base to 1 Part Hardener.
- Cartridge; By Volume: 2 Parts Base to 1 Part Hardener.

HOSE BUNDLE: Heated hose bundle consisting of 3/8” ID base and ¼” ID hardener line with ¼” solvent flush line outside of the bundle. Glycol heat trace or equivalent capable of 80°C (176°F)  
  * Insulated whip hoses not recommended for glycol heat trace*

TIP SIZE: .019 – .033

RECOMMENDED SPRAY PREHEAT TEMPERATURES IN DRUM / PAIL:

BASE: 70°C (158°F) to 80°C (176°F)
HARDENER: 20°C (68°F) to 30°C (86°F) (Ambient-typically not heated)

Pre-heating of the base material is required to balance the viscosity of base and hardener.
In cases of extreme weather conditions the recommended temperatures may change, please consult your SPC representative.
RECOMMENDED FILM THICKNESS:

- **Standard Corrosion Protection**: 0.50 mm minimum to 1.25 mm (20 mils to 50 mils).
- **Directional & Mechanical Protection**: 1.00 mm minimum to 1.78 mm (40 mils to 70 mils).
- Depends upon application; consult with SPC Representative.

RE-COAT INTERVAL:

**Brush Grade:**
- @ 25°C (77°F) Maximum: 120 Minutes
- @ 80°C (176°F) Maximum: 3 Minutes

**Spray Grade:**
- @ 25°C (77°F) Maximum: 120 Minutes
- @ 80°C (176°F) Maximum: 2 Minutes

BACKFILLING:
Mechanical stress including backfilling or lowering in, shall not be applied to the coating until it has reached a Shore D Hardness ≥80.

COMPATIBILITY WITH OTHER ANTI CORROSION COATINGS:
SP-6888® is compatible with all SPC and fusion bonded epoxy (FBE) anti-corrosion coatings. For compatibility with other anti-corrosion coatings, please consult with SPC.

Ambient Temperature ... Brush Grade, Spray Grade or Cartridge: -40°C to 50°C (-40°F to 122°F)

Substrate Temperature... The acceptable substrate (metal surface) temperature range for the application of SP-6888® is 10°C (50°F) to 100°C (212°F). Preheating of the substrate is required if the surface to be coated is below 10°C (50°F). The substrate temperature must be a minimum of 3°C (5°F) above the dew point temperature before proceeding with the coating operation. Refer to the Curing Table (APPENDIX “A”).

Storage / Shelf Life ...... Store in a cool, dry, well-ventilated area at temperatures between 5°C (41°F) and 50°C (122°F). Keep in a tightly sealed container when not in use. The Shelf Life of SP-6888® is a maximum of 24 months from the date of manufacture if the materials are in unopened containers.

Substrate: 12 mm (0.5 in.) Thick Steel Panels

Brush Grade Material Temperature:  Base and Hardener: 25°C (77°F)

Spray Grade Material Temperature:  Base: 70°C (158°F)  
                                      Hardener: 25°C (77°F)

Dry Film Thickness: 0.50 mm (20 mils) DFT as per ASTM D1640

Note: The information above is to serve as a guide only. The test results were compiled under laboratory-controlled conditions. Field results may vary due to variable conditions such as radiant heat loss and the cooling effects of wind.
