Universal Hot Surface Igniter
CQ8000A

FURNACE IGNITER REPLACEMENT

Universal Hot Surface Igniter replaces these and other hot surface igniters

KEY FEATURES

- Designed for replacement installation
- Replaces over 100 original igniter models in many different furnace models from major furnace manufacturers
- Unique visual cross reference included in instructions
- Includes 6 brackets for best fit installation and improved igniter placement
- Backed by the full experience and innovation of Honeywell

- Latest Silicon Nitride igniter technology
  - Resistance to handling damage
  - Up to three times longer life than original equipment
  - Fast heat up
- Match and mount simplicity
  - Simply remove the old igniter and compare it with the diagrams on the packaging guide to determine the correct mounting bracket for your installation
- Do it yourself and save
  - One-third the cost of estimated professional installation

SPECIAL FEATURES:

- Letters below igniter pictures indicate which bracket may be required for installation.
- Table data is correct to the best of Honeywell’s knowledge as of this publication’s date. However, some appliances may have igniter applications that are beyond the capabilities of this kit.
- For Carrier sealed combustion furnaces, you must use bracket E and retain the existing orange gasket for use with bracket E.
