VEIC employs more than 300 professionals and is headquartered in Burlington, Vermont, with offices in Washington D.C., Ohio, and New Jersey. Further information about VEIC can be found on our website: http://www.veic.org.

3. Scope of Enterprise Information Technology (IT) Security Assessment Services

In order to support a greater understanding of VEIC’s security readiness and to test existing systems as part of an Enterprise Information Technology Security Assessment, VEIC is seeking the following services from a qualified vendor:

Penetration and Vulnerability Testing
- External and Internal Network Penetration and Vulnerability Testing
  - ~250 external IP addresses to be penetration tested and scanned for vulnerabilities

Employee Training and Social Engineering Threat Prevention Program

VEIC is in the process of developing and enhancing its Information Security Awareness program to train staff to fulfill information security policies and procedures. Additionally, VEIC is concerned about the threats flowing from social engineering attacks. These attacks are non-technical and often involve tricking other people to break normal security procedures. The vendor will be expected to review existing training materials, provide guidance in the enhancement of those materials, and assist in the design of a social engineering threat prevention program to be delivered by VEIC. The vendor may also be requested to implement one social engineering test.

Security Program Consulting Service

VEIC’s Cyber Security Team is in the process of developing recommendations to be delivered to our Executive Management Team regarding the enhancement of our security programs, staffing, and policies. The vendor will be expected to review the following security-related items:

- The Cyber Security Team recommendations
- Security gap analysis and project identification tool
- Existing security applications and technologies
- Security-related staffing plans and structures
- Existing security-related policies and procedures

Following this review, the vendor shall provide recommendations for improvements.

4. Deliverables

Upon completion of the previously mentioned tests and reviews, the vendor shall provide to VEIC’s Cyber Security Team:

- Written reports on the penetration and vulnerability assessments, including specific recommendations to mitigate existing risks in the areas referenced under Section 3 “Penetration and Vulnerability Testing”;
- Written reports on the application penetration and vulnerability assessments, including specific recommendations to mitigate existing risks in the areas referenced under Section 3 “External Application Penetration and Vulnerability Testing”;
- Written recommendations for improvements in the areas referenced under Section 3 “Employee Training and Social Engineering Mitigation Strategies” and, if requested, documentation of findings from the social engineering test; and

5. Proposal Requirements

The proposal must describe the company’s approach to providing Enterprise Information Technology Security Assessments and include specific details about how the company would provide the services that are requested in this RFP. The proposal must also include the credentials and experience of the persons who would be designated to perform the required services. Alternative approaches are acceptable as well, as long as the respondent can explain how these will meet the objectives of the Scope of Services.

Pricing
The proposal must include project costs. Costs to implement a single social engineering test should be included separately.

Availability
The proposal should include information about the vendor’s availability to perform the requested services.

Qualifications

Exceptions to Standard Contract
The bidder is required to clearly state any exceptions to the VEIC standard contract terms, provided in Attachment A.

6. Current Technology Overview

VEIC’s LAN/WAN infrastructure is located centrally to VEIC’s office. VEIC currently runs 90% of its servers in a virtual environment. VEIC also enjoys a very broad remote user base with roughly 40% of its staff with the ability to work from home. VEIC’s network includes the following types of systems and assets:

- 70 physical and virtual servers
- ~200 databases
- Microsoft Windows as standard OS for server and desktop
