Make GSA Your Source for Tools and Hardware Supplies.

GSA provides support to military and civilian agencies acquiring tools and hardware supplies and also offers flexible options designed to accommodate specific requirements and agency regulations. Together, these benefits present comprehensive and flexible choices suitable for meeting most of your product requirements.

**Highlights of GSA’s Requisition and Acquisition Methods:**

**Requisitioning from GSA**
GSA Global Supply™ procures supplies that meet the recurring needs of civilian and military agencies. Because GSA Global Supply has already procured the most in-demand supplies on the government’s behalf, obtaining these products through GSA Global Supply is a simple requisition between agencies; no comparison shopping is necessary. Standard shipping is included with most orders, and “direct delivery” products are clearly identified.

This catalog features some of GSA Global Supply’s most popular tools, hardware and cleaning supplies. To view GSA Global Supply’s complete offering, visit [www.GSAglobalsupply.gsa.gov](http://www.GSAglobalsupply.gsa.gov).

For additional information about ordering from GSA Global Supply, see page 1 of this publication.

**Purchasing from a GSA Vendor**
By offering supplies that cover the breadth of the commercial marketplace, the GSA Multiple Award Schedules (MAS) program enables your agency to choose from thousands of products available from hundreds of pre-qualified vendors. Typically, this method of procurement is quicker and easier than open-market procurements. For more information, visit [www.gsa.gov/acquisitionsolutions](http://www.gsa.gov/acquisitionsolutions).

**Special Order Program**
There are times when your product requirements are greater than what is in a catalog or appears on a website, time is of the essence, or you need support to navigate the ever changing procurement process. For those times, GSA Global Supply can meet your most complex, mission-critical requirements through the Special Order Program (SOP). This full-service acquisition management service complies with the Federal Acquisition Regulation (FAR) and other applicable federal policies, laws and regulations, such as environmental orders, AbilityOne mandates, and trade agreements. Our certified contracting professionals offer acquisition management services that completely support the pre-solicitation, pre-award, award and post-award phases of a project. For more information on SOP, contact us at SpecialOrderProgram@gsa.gov or (855) 809-6044.

**Ensuring Re-Use with GSA Personal Property Management**
Screening available excess personal property is the federal government’s priority source of supply. With today’s increased environmental consciousness and reduced budgets, reusing excess property has become a source of pride, a documentable benefit and a way to avoid costs associated with new equipment. Remember, reuse is the ultimate form of recycling.

To help you acquire the excess property your agency needs, GSA offers GSAXcess®, the personal-property tool for reporting and viewing excess property within the federal government. At [www.gsa.gov/gsaxcess](http://www.gsa.gov/gsaxcess), reporting, searching and selecting excess property are all convenient and user-friendly.

Part-Number Ordering

Many GSA Global Supply catalogs feature items with National Stock Numbers (NSNs) and others with GSA part numbers. FEDSTRIP/MILSTRIP customers can order GSA part-numbered items by entering “GSA” as the Routing Identifier Code (RIC), and using one of the following Document Identifiers (Doc ID):

- AOB: For domestic shipment
- AO2: For overseas shipment

Both NSNs and GSA part-numbered items carry the same customer benefits. All are FAR-compliant and AbilityOne Guaranteed. All can be shipped anywhere on the globe. All are backed by GSA Global Supply customer service.

DOD EMALL

All GSA Global Supply items appear on the DOD EMALL Web site. Customers must use their AAC/DoDAAC to purchase GSA items.
