Helping you bring color, texture, and protection to your concrete.

H&C® has all your decorative concrete product needs. With a wide product offering of stains, sealers, waterproofers, resurfacers and more — we’re making it easy for you to create your own look. Add years of life to new concrete, or revitalize old concrete for much less than the cost of replacement.
**H&C® Concrete Sealer Solid Color Solvent-Based** is an opaque, waterproofing sealer formulated to bond with concrete or masonry surfaces. It provides a long-lasting yet decorative finish. This product is to be used on exterior surfaces only. Formerly known as Silicone Acrylic Concrete Sealer, H&C Concrete Sealer Solid Color Solvent-Based is available in over 30 tintable colors, and a variety of popular prepackaged colors as well as a clear which has a gloss finish.

**KEY ADVANTAGES**

H&C Concrete Sealer Solid Color Solvent-Based provides a durable finish that extends the life of concrete and masonry surfaces. It penetrates deeply into the surface to form a tough shield so it won’t peel, fade or flake over time. It’s resistant to salt, acids, alkali, water, UV rays, oil and heavy traffic. Create a beautiful and expensive-looking landscape that is uniquely yours. Choose from our pre-mixed or custom-tinted colors.

**FEATURES & BENEFITS**

A solvent-based Silicone Acrylic formulation. For use on exterior horizontal or vertical surfaces. Designed to bond with the surface. Decorates, seals and protects concrete surfaces. Resistant to salts, acids, alkali, water, ultraviolet rays, traffic, oil, wet or dry abrasion. Resistant to premature color loss. Available in a variety of ready-to-use and tintable colors.

H&C® Low VOC Concrete Sealer Solid Color Solvent-Based

H&C Low VOC Concrete Sealer Solid Color Solvent-Based is an opaque, water-proofing sealer formulated to bond with concrete or masonry surfaces. It provides a long-lasting yet decorative finish. This product is to be used on exterior surfaces only. H&C Low VOC Concrete Sealer Solid Color Solvent-Based is available in over 30 tintable colors, and a variety of popular prepackaged colors as well as a clear which has a gloss finish.

KEY ADVANTAGES
H&C Low VOC Concrete Sealer Solid Color Solvent-Based provides a durable finish that extends the life of concrete and masonry surfaces. It penetrates deeply into the surface to form a tough shield so it won’t peel, fade or flake over time. It’s resistant to salt, acids, alkali, water, UV rays, oil and heavy traffic. Create a beautiful and expensive-looking landscape that is uniquely yours. Choose from our pre-mixed or custom-tinted colors.

FEATURES & BENEFITS
Designed to be used on bare, unsealed concrete block, brick, stucco, or any other masonry surface. For use on exterior horizontal or vertical surfaces. Suitable for driving surfaces. Satin finish preserves delicate architectural details. Resists UV rays, oil, gasoline and hot water. Available in a variety of ready-to-use and tintable colors.

H&C Concrete Stain Solid Color Water-Based is a low odor, water-based stain that provides long-lasting, durable and a decorative finish to interior or exterior concrete and masonry surfaces. H&C Concrete Stain Solid Color Water-Based is highly resistant to pool chemicals.

**KEY ADVANTAGES**

H&C Concrete Stain Solid Color Water-Based bonds to concrete and forms a tough shield so it doesn’t fade, peel or flake like paint. It is resistant to acids, ultraviolet rays, oil, gas and alkali while maintaining a decorative finish. Available in a variety of ready-to-use and tintable colors, as well as a clear, this stain is ideal for high pH surfaces. Fortified with silicone, this easy to apply solid color stain comes in prepackaged colors, and a variety of tintable colors!

**FEATURES & BENEFITS**

Can be used on new or existing concrete.

Can be used on previously painted concrete surfaces with proper preparation as well as asphalt surfaces.

Resistant to acids, UV rays, oil, gas & alkali.

Provides a mildew resistant coating.

VOC compliant in all states.

Suitable for interior use, low odor.

H&C® California Concrete Stain Solid Color Water-Based

H&C California Concrete Stain is a solid color low odor, water-based acrylic concrete stain that will provide superior protection and beauty to both interior or exterior concrete and masonry surfaces. H&C California Concrete Stain is highly resistant to pool chemicals, and many household chemicals.

KEY ADVANTAGES

H&C California Concrete Stain bonds to concrete and forms a tough shield so it doesn’t fade, peel or flake like paint. It is resistant to acids, ultraviolet rays, oil, gas and alkali while maintaining a decorative finish. Available in a variety of tintable colors, this stain is ideal for high pH surfaces. This easy to apply concrete stain is nationally compliant.

FEATURES & BENEFITS

Can be used on new or existing concrete.
Can be used on previously painted concrete surfaces with proper preparation as well as asphalt surfaces.
Resistant to acids, UV rays, oil, gas & alkali.
Provides a mildew resistant coating.
VOC compliant in all states.
Suitable for interior use, low odor.

**H&C® Shield-Crete® Epoxy Concrete Floor Coatings**

**H&C Shield-Crete Epoxy Concrete Garage Floor Coating Kit** is a 2-part epoxy kit that is durable as it is beautiful. A unique formulation requires minimal surface prep while providing excellent resistance to hot-tire pick-up. Shield-Crete Epoxy Concrete Garage Floor coating is the premium choice in garage floor epoxies. Shield-Crete can also be used on basement floors, or any interior concrete floor. It can be used in some full outdoor applications, but the sun’s UV rays may diminish the gloss finish, as well as fade the color over time.

**H&C Shield-Crete Epoxy Garage Floor Contractor Kits** cover up to 1000 square feet. The kit comes with everything you need for that large commercial or industrial project (Deco-Flakes, however, are sold separately). Contractor kits are available in pewter and beige only.

### KEY ADVANTAGES

Easy, 3-step application is resilient for years of wear and tear. Shield-Crete is permeable; meaning it allows your concrete to breathe while resisting hot tire pick-up. No induction, or sweat-in time is necessary, just mix and apply. You can pull your car back into the garage in 3 days, while other epoxy kits require 7 days before vehicular traffic. It is resistant to chemical agents and damage caused by gasoline, brake fluid, standing water and battery acid. Shield-Crete cleans up with just soap and water.

### AVAILABLE COLORS

- Pewter
- Beige
- Firebrick Red
- Ivory
- Jade Green
- Night Sky

Shield-Crete Deco-Flakes provide a unique decorative finish to your Shield-Crete Epoxy Concrete Garage Floor project. They are available in 5 blends: Pewter, ivory/beige, red, green and holographic. A one-pound bag is included in every Shield-Crete Epoxy kit, however they are also sold separately if extra flakes are desired. The one-pound bag is sufficient for every 200-250 square foot area (a one-car garage), at about 25% coverage. The flakes are vinyl, a form of latex, so they are extremely safe to use.

**KEY ADVANTAGES**

Deco-Flakes help hide imperfections on the floor like small cracks, or minor pitting. They add a bit of extra traction as well. The quart contains 24 ounces of flakes, slightly more than the 16 ounces/1 pound included in the kit. Feel free to use any blend with any of the 8 colors of Shield-Crete Epoxy Concrete Garage Floor Coating, mix and match!

**SHELl-CREASE DECO-FLAKES FEATURES & BENEFITS**

Provides a unique decorative finish and helps hide imperfections.

Easy application—Simply broadcast the flakes by tossing them high into the air.

Five chip blends for a distinct look—mix and match.

**Shield-Crete Acrylic Clear Glaze** is a low VOC (Volatile Organic Compounds) clear water-based acrylic sealer. It is designed to lock in the flakes of Shield-Crete® Epoxy Concrete Garage Floor Coating. The can is filled to cover a 2-1/2 car garage, or 400 square feet. This easy to apply, low odor product will provide superior protection and added gloss.

**KEY ADVANTAGES**

Shield-Crete Acrylic Clear Glaze is a high gloss, easy-to-use protective coating designed specifically for use on garage floors. It resists common chemical agents while maintaining a protective barrier for the decorative flakes in the Shield-Crete Epoxy kit. It makes it easier to keep your garage floor clean as well, long after you’ve completed the project for years to come.

**FEATURES & BENEFITS**

- Low VOC, one component clear water-based acrylic sealer.
- Provides superior protection for Shield-Crete Deco-Flakes, easier clean-up and glossier finish.
- Required when Deco-Flakes cover more than 50% of surface.

H&C® Semi-Transparent Decorative Stains

**H&C Semi-Transparent Decorative Stains** is an exciting alternative to reactive acid stains. There are no acids or harmful chemicals integrated in its design. Since no chemical reaction takes place, there is no extended waiting time for color to reach full development. H&C Semi-Transparent Decorative Stain penetrates the inherent porosity of cementitious products to produce vibrant color. Color may be “built up” without the worry of spending all the alkalinity, as with acid stain. H&C Water-Based Semi-Transparent Decorative Stain saves time on the job with no rinsing, no mopping, no neutralizing, and no residue.

**KEY ADVANTAGES**

H&C Semi-Transparent Decorative Stain lets you achieve a layered, faux or single color look in a lot less time than acid stains. Etching is required prior to application to open pores of the concrete. When layering stain, apply lighter colors first. Water-based or solvent-based sealers can be applied as topcoats.

**FEATURES & BENEFITS**

- No neutralization required.
- Easy clean up with just soap and water.
- Dilute up to 4:1 with water.
- Interior and exterior use.
- UV resistant.
- DIY friendly - Easy to apply.

H&C® Acetone Dye Stains

H&C Acetone Dye Stains lets you achieve a layered, faux or single color look in a lot less time than acid stains. Etching is required prior to application to open pores of the concrete. When layering stain, apply lighter colors first. Water-based or solvent-based sealers can be applied as topcoats. Ideal for polished concrete applications.

**KEY ADVANTAGES**

H&C Acetone Dye Stains come in 16 beautiful colors that are designed to be easy and ready to use. The colors may be mixed to achieve even more colors. Packaged in small bottles, taking up very little shelf space, these dye stains are vibrant and are the perfect accents to reactive stains.

**FEATURES & BENEFITS**

- The colors can be inter-mixed to achieve even more colors.
- Can be used along with integral and color hardeners.
- Dry to touch in 20-40 minutes.
- Zero VOC’s.
- No neutralizing required.
- Compact – very little shelf space.
- Perfect for polished concrete, or existing substrates.

**Coverage:** 300-400 sq./ft. per gal.**

**Drytime:** 30 Minutes Dry to Touch*  
  *Dry to touch will vary depending on temperature

H&C® Infusion™ Reactive Concrete Stain

**H&C Infusion Reactive Acid Stains** are the artistic way of giving a translucent, variegated appearance to bare, horizontal new or existing concrete. Every slab of concrete is a blank canvas with acid staining. Acid stains accentuate any imperfections in the concrete like small cracks, or contaminants, much like the opposite of painting or sealing the concrete with a solid color stain...no two projects will ever be the same!

**KEY ADVANTAGES**

Infusion Reactive Acid Stain is unique in that the colors are extremely vibrant, and they are easy to mix and match for numerous color options. A choice of water-based or solvent-based sealers are available, which will aid in the protection of the surface as well as developing the color’s brilliance. For high-traffic interior surfaces, use H&C’s low VOC Industrial Floor Finish for long lasting beauty and protection.

**FEATURES & BENEFITS**

- Gives new and existing concrete a new translucent, variegated appearance.
- Long lasting performance at a lower cost than other floor installations.
- Multiple colored effects can be created.
- Excellent for use in commercial, residential, institutional and industrial areas.
- Solvent-based, water-based sealers and floor finish complete and protect the floor look.

H&C® Concrete Resurfacer Texture Systems

**H&C Resurfacers, Instant and Heavy Traffic Texture System** is a high quality polymer modified portland and calcium aluminate cementitious system designed to add texture to new or existing concrete flatwork. Easy to apply, single component formulation. Each system creates an attractive and durable decorative finish that enhances all interior or exterior hardscapes.

**KEY ADVANTAGES**

H&C Resurfacers, Instant and Heavy Traffic Texture Systems have excellent adhesion and are cooler than regular concrete. They resist mildew and are skid resistant. The heavy traffic resurfacer is freeze/thaw resistant. This low maintenance, abrasion resistant polymer bagged good allows for multiple overcoat options, like any of H&C’s stains or sealers. Apply with a hopper gun for a knockdown appearance, or pour on and trowel down for a smooth finish.

**H&C HEAVY TRAFFIC FEATURES & BENEFITS**

Suitable for vehicular traffic. Durable attractive finish that enhances all landscapes. Low maintenance.

50 lb. bag covers up to 150 sq. ft.

**H&C INSTANT TEXTURE FEATURES & BENEFITS**

Create a decorative cementitious texture to existing concrete surfaces. Interior and exterior use. Stainable with H&C Concrete Sealer Solvent-Based or H&C Concrete Stain Water-Based. Cooler than regular concrete.

50 lb. bag covers up to 150 sq. ft.

**H&C Texture Resin & Dual Component Texture** is a durable skid-resistant 2-component overlay system designed for plain or unsightly concrete surfaces. Designed to withstand freeze/thaw cycles.

**KEY ADVANTAGES**

Upgrade unsightly concrete decks, patios, driveways, hallways and walkways etc., with H&C Texture Resin and Dual Component Texture. It provides a decorative, strengthened surface which is durable, resists staining, UV rays, abrasions and mildew.

H&C® Stampable Overlay & H&C® Liquid Release

**DRIVEWAYS**
**RETAIL SETTINGS**
**POOL DECKS & PATIOS**
**PARKING DECKS**
**SIDEWALKS**
**GARAGE FLOORS**

**H&C Stampable Overlay** is used to resurface driveways, patios, pool areas, malls, theme parks, parking lots, interiors and exteriors. It helps turn your ordinary concrete into beautiful works of art.

**H&C Liquid Release** is a blend of evaporating, residue free release agents for use in the imprinting process to allow the clean release of texturing tools from concrete or overlay surfaces.

**KEY ADVANTAGES**

**H&C Stampable Overlay** is ideal for restoration or repair on interior and exterior surfaces. This unique bag mix has superior bonding capabilities and is suitable for any climate. Use with H&C’s new Liquid Release product for a beautiful, unique look.

**H&C Liquid Release** is a zero VOC product and is to be used with H&C’s Stampable Overlay Single Component to ensure stamps don’t stick to the wet topping.

**FEATURES & BENEFITS – STAMPABLE OVERLAY**

Stampable cementitious topping for interior or exterior surfaces.

Use with H&C’s color packs.

Suitable for any climate, freeze/thaw cycles, and traffic bearing surfaces.

Use with H&C’s new Liquid Release product for a beautiful, unique look.

One 50 lb. bag covers approximately 20 sq. ft.

**FEATURES & BENEFITS – LIQUID RELEASE**

Zero VOC’s.

Use with H&C’s Stampable Overlay Single Component to ensure stamps don’t stick to the wet topping.

Available in 5-gallon pails covering up to 1200 sq. ft.

H&C® Quick Patch and Repair
H&C® Broom Finish and Repair

H&C Quick Patch and Repair may be used to repair above or below grade concrete. Can be used virtually on all concrete. Application can be made easily and quickly, producing a bond stronger than the surrounding concrete. It is excellent for use in repairing all types of concrete structures.

**KEY ADVANTAGES**

H&C Quick Patch and Repair is a single component cement based patching compound that provides a workable, no-slump patch. It sets up fast for a quicker return to service, final setup time is 15-30 minutes.

**FEATURES & BENEFITS**

Just add water.
Packaged in plastic bucket holding 5 pounds of product.
Maximum thickness is 1 inch.
Withstands over 6000 psi compression strength after 28 days cure.

H&C Broom Finish Repair is perfect for salt damaged driveways and sidewalks. It’s a cementitious non-slip surface that goes on very thin and has the typical broomed concrete look. It can be used with any H&C Color Pack to provide additional color options.

**FEATURES & BENEFITS**

Trowel and squeegee applied topping for interior or exterior surfaces.
Ability to slope and fill spalls and low areas.
High impact and abrasion resistant. Aids in slip resistance.
Finish coat is ready to be sealed to protect against staining.
Packaged in 5-gallon pails for easy mixing, storage and transporting.
Add H&C’s Color Packs for additional color.*

* Broom Finish Repair uses a gray portland cement so final color will vary from the color chart.

H&C® Clear Liquid Hardener & Densifier
For Polished Concrete Applications

H&C Clear Liquid Hardener & Densifier is an amorphous colloidal silica solution designed to both harden and densify concrete. This proprietary formulation penetrates and reacts with concrete faster than conventional systems and produces a harder, more uniform surface. H&C Clear Liquid Hardener & Densifier enhances stained or dyed concrete and is ideal for polished concrete applications.

KEY ADVANTAGES
H&C Clear Liquid Hardener & Densifier is water-based, VOC compliant, and is very easy to apply. It is ideal for polished concrete applications and other commercial decorative concrete flooring projects.

FEATUES & BENEFITS
Densifies and hardens new and existing concrete.
Penetrates and reacts with concrete quickly.
Produces a more uniform surface.
Resists blushing and yellowing.
Increases life expectancy of concrete.
Easy to apply and maintain.
Easy to polish - Minimizes labor costs.

**H&C® Lithium Protective Finish**

*For Polished Concrete Applications*

**H&C Lithium Protective Finish** is a lithium fortified high-gloss finish designed to penetrate and protect polished concrete surfaces by increasing the hardness, improving stain resistance, and providing superior reflectivity when burnished. H&C Lithium Protective Finish chemically bonds to concrete and will never peel, flake or fade.

**KEY ADVANTAGES**

- H&C Lithium Protective Finish is water-based, VOC compliant, and is very easy to apply. It is ideal for polished concrete applications and other commercial decorative concrete flooring projects.

**FEATURES & BENEFITS**

- Protects polished concrete.
- Increases concrete hardness.
- Improves stain resistance.
- Provides a highly reflective, streak-free surface.
- Easy to apply and maintain.
- Minimizes labor costs.

H&C® Decorative Concrete Sealer

H&C Decorative Concrete Sealer is a high solids sealer designed to add deep penetrating protection and long-lasting beauty to exterior concrete such as driveways, patios, walkways and garage floors. H&C Decorative Concrete Sealer is the perfect sealer for exterior decorative concrete projects, and is ideal for use with H&C Decorative Stains.

**KEY ADVANTAGES**

H&C Decorative Concrete Sealer is a durable, gloss, solvent sealer that is highly resistant to salt, acids, alkali, water, UV rays and abrasion. It inhibits hot tire pick up for long lasting beauty and protection.

**FEATURES & BENEFITS**

- Ideal for decorative concrete applications.
- High solids acrylic formulation.
- Enhances color depth.
- Durable, high gloss non-yellowing finish.
- Inhibits hot tire pick-up.
- Easy application with excellent flow and leveling.

**Coverage:**

- Concrete floors: 200-250 sq ft/gal
- Porous concrete: 150-200 sq ft/gal
- Concrete block: 125-150 sq ft/gal
- Brick (clay): 100-150 sq ft/gal

Coverage will vary depending on the porosity and texture of the substrate.

**Drying Time, @ 77°F, 50% RH:**

- Touch: 15 minutes
- Light Foot Traffic: 1 hour
- Light Traffic & Recoat: 12 hours
- Heavy Traffic: 72 - 96hrs

*NOTE: High humidity and/or low temperatures will affect drying time.

**VOC:** 542 g/L; 4.52 lb/gal

H&C Concrete Sealer Clear Gloss Oil-Based is a penetrating solvent-based sealer formulated with a silicone acrylic resin. It’s an excellent topcoat to H&C Concrete Sealer Solid Color Solvent-Based, adding durability and a high gloss finish to your project. Formerly known as Clear 23®, Concrete Sealer Clear Gloss Oil-Based dries clear and never discolors. It resists water, pool chemicals, most cleaning agents, ultraviolet rays and heavy traffic.

**KEY ADVANTAGES**

H&C Concrete Sealer Clear Gloss Oil-Based is a 23% solids high gloss coating for virtually any outdoor application. It seals and protects while providing a durable non-yellowing finish. Concrete Sealer Clear Gloss Oil-Based is the perfect gloss finish over H&C Concrete Sealers, Solid colors. It can be used as a decorative glaze on masonry walls, brick, and other cementitious materials.

**FEATURES & BENEFITS**

- Seals and protects cement surfaces.
- Provides a durable, glossy finish.
- Crystal clear, non-yellowing.
- Resists water, pool chemicals and UV rays.
- Protects from heavy traffic.

H&C® Low VOC Concrete Sealer Clear Gloss

H&C Low VOC Concrete Sealer Clear Gloss will enhance and protect previously coated, bare concrete, and other masonry surfaces. It is a solvent-based, low VOC compliant sealer used for exterior applications. VOC level is less than 250 grams/liter.

H&C Low VOC Concrete Sealer Clear Gloss complies with ASTM C309 standard specification for liquid membrane - forming compounds for curing concrete.

**KEY ADVANTAGES**

H&C Low VOC Concrete Sealer is an exempt solvent oil-based sealer with a gloss finish. It’s an ideal topcoat to the Low VOC Concrete Sealer Solid Color solvent-based products, or can be used on bare concrete. It is non-yellowing and protects against UV rays, water seepage and chemicals, making it suitable for driving surfaces. Don’t forget to use SharkGrip in the final coat to aid in slip resistance.

**FEATURES & BENEFITS**

- Low VOC.
- Seals and protects cement surfaces.
- Provides a durable, glossy finish.
- Crystal clear, non-yellowing.
- Resists water, pool chemicals and UV rays.
- Suitable for driving surfaces.
- Can be used as a cure and seal.*

H&C Concrete Sealer Wet Look Water-Based is a premium quality 100% clear acrylic sealer that will enhance and protect previously coated, bare concrete, and other masonry surfaces. It is a single component, VOC compliant sealer that can be applied to both interior or exterior applications. H&C Concrete Sealer Wet Look Water-Based will apply milky white to ensure complete coverage, but dries to a transparent, durable gloss finish.

KEY ADVANTAGES
H&C Concrete Sealer Wet Look is a water-based, low odor sealer that is user-friendly, as well as durable. Suitable for all kinds of surfaces, inside and out, our Wet Look Sealer is solvent-free, so it’s good for the environment! Clean up is simple with just soap and water, no messy residues. Stir in H&C’s SharkGrip™ Slip Resistant Additive to make inclined surfaces or damp areas safer. This product can be applied over previously painted or stained surfaces.

**Coverage:** sq ft/gal
- Standard Brick Paver: 100-150

**Drying Time, @ 77°F, 50% RH:**
- Temperature and humidity dependent
- To Touch: 1 hour
- Recoat: 4 hours
- Light traffic: 24 hours
- Heavy traffic: 72 hours

**VOC:** < 600 g/L

**KEY ADVANTAGES**

H&C’s Paver Sealer Gloss Solvent-based is a single component penetrating sealer that will enhance the appearance of pavers while providing excellent weather resistance.

**H&C® Paver Sealer Water-Based**

**H&C Paver Sealer Water-Based Natural** enhances the beauty of your pavers while locking in the joint sand. This single component, water-based sealer is VOC compliant and very easy to use.

For the gloss look on your pavers, apply **H&C Paver Sealer Water-Based Gloss** over the Paver Sealer Natural (which locks in the joint sand) for the ideal system. This gloss sealer will penetrate and protect your pavers if used alone as well, while the Natural will also lock in the joint sand between pavers.

**FEATURES & BENEFITS**

- Water and weather resistant.
- VOC compliant.
- Water-based.
- Applies milky white to ensure coverage, dries clear.
- Withstands vehicular traffic.
- Maintains natural look of pavers.
- Paver Sealer Natural locks in joint sand.

**KEY ADVANTAGES**

H&C Paver Sealer Water-Based Natural protects pavers from weed growth. Both Gloss and Natural protect and prolong the natural beauty only pavers can bring to an outdoor living area. H&C Paver Sealer Water-Based Natural & Gloss applies milky white and dries clear to ensure complete coverage, and is extremely easy to apply. They provide excellent weather resistance while protecting your investment against water damage. One gallon covers 100-150 square feet, depending on porosity. H&C Paver Sealer Water-Based Natural & Gloss are solvent-free and VOC compliant.

H&C Concrete & Driveway Protector is a clear water-based, siloxane water repellent that is designed to protect bare concrete and masonry surfaces. This low odor, zero VOC formulation allows for safe application.

**FEATURES & BENEFITS:**
- Protects against damaging freeze/thaw cycles.
- Reduces intrusion of water, de-icing salts and other contaminants.
- Penetrates deeply for long-lasting protection.
- User-friendly, soap and water clean-up.
- Nationally compliant formulation.
- Interior and exterior use.

**KEY ADVANTAGES**
H&C Concrete and Driveway Protector provides a long lasting, breathable barrier which exhibits superior resistance to airborne dust and dirt, salt, acid rain, efflorescence, alkali, freeze/thaw damage, cracking, spalling, staining and other damage related to water intrusion. It will not alter the color appearance or texture of the treated surface. It is user-friendly; with soap and water clean up.

H&C Concrete & Masonry Waterproofing Sealer is a clear, water-based acrylic sealer that protects against the damaging effects of rain, snow and ice. It is economical yet durable. It is not recommended for vehicular traffic.

**KEY ADVANTAGES**

H&C Concrete & Masonry Waterproofing Sealer is a weather resistant moisture barrier that protects most concrete and masonry surfaces against water-caused deterioration and damage.

H&C Concrete & Masonry Waterproofing Sealer guards against efflorescence, spalling from repeated freeze/thaw cycles, as well as deicing salts, and general weathering and degredation caused by water infiltration.

**FEATURES & BENEFITS**

- Interior and exterior use.
- Protects against water damage.
- Guards against repeated freeze-thaw cycles and damage from deicing salts.
- One coat is sufficient in most cases but a second coat may be applied in 2–4 hours.

H&C Super V™ Water Repellent is a self-emulsifying, siloxane concentrate which when mixed with water and agitated, forms a micro-emulsion suitable for application to above grade, dense or porous masonry surfaces. This can be applied to dry and even slightly damp surfaces.

H&C HB-100 and HB-150 Water Repellents are designed to weatherproof old and new concrete and masonry surfaces against nature's destructive forces. They provide a long lasting breathable barrier that resists cracking, airborne dust and dirt, salt, efflorescence, and spalling.

**SUPER V FEATURES & BENEFITS**
- Siloxane concentrate (available in 10% solids).
- Designed to maximize penetration.
- Water clean-up.

**HB-100 & HB-150 FEATURES & BENEFITS**
- A mineral spirits based water repellent.
- Invisible no film finish.
- Can be stained over.
- HB-100 is a 10% siloxane.
- HB-150 is a 15% siloxane.

**KEY ADVANTAGES**
- H&C Super V Water Repellent provides excellent water repellency, and is suitable for both dry and slightly damp surfaces. It ensures a long lasting breathable barrier and is permeable to water vapor. Super V shows superior resistance to water, acid rain, efflorescence, alkalis, acids, ultra-violet light and staining. It also minimizes iron staining by helping prevent reinforcing steel from corroding and deteriorating due to water intrusion.

- H&C HB-100 and HB-150 are clear oligomeric siloxane water repellents that minimize iron staining by helping to prevent reinforcing steel from corroding and deteriorating due to water intrusion.

H&C® Commercial Grade Water Repellents

**H&C SL-40** silane water repellent is a high performance water repellent that penetrates into the substrate and provides long term weatherproofing protection. It's a single component product that is ready to use and typically requires only one application. SL-40 will not darken the surface or leave a visible surface film. SL-40 penetrates deeper into the surface to chemically react with and bond to it.

**H&C SX-7** siloxane water repellents are designed to weatherproof old and new concrete and masonry surfaces against natures destructive forces. It provides a long lasting breathable barrier that resists cracking, airborne dust and dirt, salt, efflorescence, and spalling. SX-7 is a 7% siloxane.

**KEY ADVANTAGES**

**SL-40** silane water repellent is a proprietary 40% Silane that penetrates into concrete and an excellent moisture inhibitor. It will not change the traction or skid resistance of horizontal surfaces, and doesn’t require masking or cleaning of windows. H&C SL-40 Silane Water Repellent prevents efflorescence leaching, and prevents attack of deicing salts and chloride ions. Drums are available upon request.

**SX-7** has zero VOC’s, is a water-based formulation which allows for safe application in occupied buildings. The substrate will continue to breathe after the coating is applied.

</tbody>
</table>

**SL-40 FEATURES & BENEFITS**

- Can be reopened to foot traffic within one hour.
- Will not change the traction or skid resistant horizontal surfaces.
- Prevents damage from ice and deicing salts and chloride ions.

**SX-7 FEATURES & BENEFITS**

- Low odor for safe application to occupied buildings.
- Zero VOC, meets all known restrictions.
- Lasting protection on vertical and horizontal surfaces.
- Alkaline resistant.

**H&C® SharkGrip® Slip Resistant Additive**

H&C SharkGrip Slip Resistant Additive is a micronized polymer to be stirred into H&C coatings for slip resistance, fine texturing and gloss reduction. Use in areas that tend to be damp, wet or slippery.

**KEY ADVANTAGES**

SharkGrip easily stirs into most oil-based and water-based paints and other coatings, due to its low oil absorption and high solvent resistance. Its low density allows it to stay well suspended in thin materials such as stains and sealers.

**FEATURES & BENEFITS**

- Creates a slip-resistant surface when added to any H&C topcoat.
- Mixes easily.
- Easier to clean than sand textured surfaces.
- Easy on bare feet.

**H&C® Cleaner Degreaser & H&C® Etching Solution**

**H&C Cleaner Degreaser** is a concentrated heavy-duty cleaner that will remove most automotive fluids (oil, grease, brake and transmission fluid, antifreeze) from concrete and masonry surfaces.

**KEY ADVANTAGES**
H&C Cleaner Degreaser removes grease and oil stains and prepares the surface for paints, stains, and sealers. It increases any coating’s ability to bond with the surface by providing a clean substrate.

**FEATURES & BENEFITS**
- Removes grease and oil stains.
- Extra heavy duty.
- Prepares surface for staining/sealing.
- Increases penetration of H&C coating.
- Use full strength for tough stains or diluted for milder cleaning.

**H&C Concrete Etching Solution** is a phosphoric acid-based solution that opens the pores in the concrete so H&C Concrete stains and sealers can bond properly with the substrate.

**KEY ADVANTAGES**
H&C Etching Solution removes efflorescence (alkali salts) and can also reduce the pH level of new concrete and new mortar joints. As a phosphoric acid-based solution, it is user-friendly and won’t harm plants or vegetation should it come in contact with it. Simply spray any surrounding vegetation with water so the Etching Solution can roll off. This product is also safe to use indoors (basement floors, interior concrete floors), should the project warrant it.

**FEATURES & BENEFITS**
- Creates a porous surface.
- Prepares surface to be coated.
- Increases bond of H&C concrete coatings.
- Sprinkle on – hose off.
- Biodegradable – will not harm vegetation.
