The 26th Annual Gravens Conference on the Physical and Developmental Environment of the High Risk Infant

The Gravens Conference on the Physical and Developmental Environment of the High Risk Infant, in collaboration with the March of Dimes, is dedicated to providing a forum for the continuing education of professionals working to improve the health outcomes of premature and sick newborns and their families, and to improve the professional environment for caregivers. In particular, the conference focuses on the science of development, developmental care practices, NICU design, family support programs, and the influential role the NICU environment has on neurodevelopment of the infant, function of the caregiving staff, and support for the family.

The conference committee invites you to submit an abstract for oral or poster presentation regarding NICU design, the study of creative approaches to developmental and environmental issues of the NICU, care practices and/or programs to assist parents and families. The theme for the 2013 conference is ‘Rhythm, Regulations and Relationships.’ This conference offers an opportunity to share your work and experiences with colleagues.

Please visit www.cme.hsc.usf.edu for detailed information. Click on ‘course calendar’ and select February 2013.

Abstracts are due by October 15, 2012. Send them to Bobbi Rose at brose@health.usf.edu
