BOOKLIST for ADN Program
Winter Quarter (September 29, 2016)

Use International Standard Book Numbers (ISBN) to identify the books below with any book vendor. *Required* textbooks are necessary for academic success; you must buy and study from them in order to succeed in a course as outlined in the course syllabus. *Recommended* textbooks provide material that will boost your academic performance in that course, but are not always necessary for academic success. Faculty may or may not use recommended textbooks in class or during clinical. Please confer with course faculty prior to purchasing recommended textbooks.

Rented, used, and e-book formats may be available at a reduced cost to the student. A dagger (†) preceding a title indicates the book is appropriate for renting. A keyboard symbol (⌨) preceding a title indicates the book is available in an e-book format. When renting a textbook, it may not include CDs, DVDs, or access codes for other protected electronic content, even if the book had those features when it was sold new. These features may be required for successful completion of the course in which the book is used. If you believe a textbook is supposed to include a disk or an unused access code, check before renting. Galen is not responsible for purchases made in error.
