TEMPORARY FOOD VENDOR CHECKLIST

KEEP THIS AS A REFERENCE TO MAKE SURE YOU MEET THE REQUIREMENTS.

___ 1. Check the amount of power you need to operate your equipment and lighting (number of AMPS) and verify with the event organizer that your booth will have that amount of power available. (Generators may be used for electricity.)

___ 2. A rented port-a-potty hand sink is recommended for hand washing, but a jug or container (camping cooler) with a tap and toggle switch can be used. A bucket must be provided to catch the wastewater from hand washing. Have on hand paper hand towels and dispensed hand soap for washing and drying hands.

___ 4. A tent shall be provided to protect the food service area. Additionally, sneeze guards shall be provided for food service areas readily accessible to patrons.

___ 5. All food and non-food items shall be stored 6” off the ground. Dunnage racks or pallets shall be used to keep all supplies off the ground.

___ 6. Dishwashing will not be allowed during a temporary food event; enough clean utensils shall be on site to get through the day. Store extra clean utensils in ziploc bags.

___ 7. One or more buckets for soaking and rinsing wiping cloths shall be provided. Use bleach in the water for sanitizing cloths at a rate of 50 ppm. Chemical test kits shall be provided to test concentration of sanitizer solution.

___ 8. Cleanable garbage containers with lids and bags for garbage disposal in the booth area shall be provided. Cardboard boxes are not allowed.

___ 9. Clean aprons or shirts, hats, and adequate hair control for all workers shall be provided.

___ 10. Mechanical refrigeration or freezers shall be provided for holding or maintaining cold potentially hazardous foods at 41°F or below. ICE WILL NOT BE ACCEPTED FOR HOLDING POTENTIALLY HAZARDOUS FOODS. Please contact the Health Department if there are any questions as to what foods are or are not potentially hazardous.

___ 11. Electric or propane fired equipment shall be used for holding hot potentially hazardous foods at 135°F or above. Sternos are not allowed.

___ 12. Probe thermometer for monitoring food temperatures shall be provided. The dial shall have a range of 0° to 220°F. Additional thermometers shall be located inside refrigerators and freezers.

___ 13. Dispensers for condiments (individual packets, squeeze bottles, and/or pump dispensers).

___ 14. Brooms, oil dry, etc. for booth clean-up during the day and at the end of the day.

___ 15. Containers to transport, store, or remove used charcoal and/or fryer grease.

___ 16. Single-use disposable gloves shall be provided for handling ready-to-eat foods.

___ 17. Water shall be obtained from a commercial source in a commercially-sealed container.

___ 18. Ground covering shall be made of concrete, tight wood, asphalt or cleanable platforms or duckboards.

___ 19. All foods which will be heated shall be reheated to 165°F within 2 hours. Leftover foods shall be discarded at the end of the business day and shall not be re-served during subsequent days of the temporary event.
IMPORTANT FOOD AND FIRE SAFETY INFORMATION

- Ice chests (coolers that use cubed ice or dry ice as a primary means of maintaining cold food temperatures) are NOT allowed as a form of cold holding potentially hazardous foods. Domestic mechanical chest freezers or commercial mechanical refrigerators are required.

- Fire safety requirements MUST be met.
  - Fire Extinguishers
    - A 10-lb ABC fire extinguisher must be readily available within your space.
  - Extension Cords
    - They must be placed so they do not become a “trip” hazard. Cords in the public way must be covered and secured with duct tape or other approved protective coverings.
    - They must be rated for its intended purpose. A standard lamp extension cord is NOT rated for a heating device.
    - Frayed or worn extension cords will not be permitted.
  - Propane Gas Tanks
    - All compressed gas cylinders/tanks must be secured to prevent them from falling or being accidentally knocked over.
    - Cylinders/tanks must be kept out of direct sunlight.
    - Tanks must be secured in an upright position to ensure the transmission of the vapor space and the relief valve.
    - Tanks must be located at least 5 feet from any heating source.
    - All combustibles must be kept clear of the heating devices.

A fire inspection may take place at any time. Any vendor not in compliance is subject to interruption of business until the problem is corrected. Please contact the Evanston Fire & Life Safety Department Prevention Bureau at (847) 866-5934 if you have any questions.

BOOTH SETUP - please show all equipment you will be using at the event and the location of all equipment. The diagram should represent what inspector will see during the on-site inspection. (Refer to “Sample Booth Drawing” for assistance.)
