A very special thanks for the contribution and support of Miriam Trehearne.
This document provides information teachers will require in order to implement the English Language Arts curriculum for Grade 7.

The information contained in this document, as well as the full English Language Arts K to 7 Integrated Resource Package (IRP), is available at www.bced.gov.bc.ca/irp/irp.htm

The following paragraphs provide brief descriptions of the components of the IRP.

**INTRODUCTION**

The Introduction provides general information about English Language Arts K to 7, including special features and requirements.

Included in this section are

- a graphic overview of the curriculum, including the curriculum aim and goals
- a rationale for teaching English Language Arts K to 7 in BC schools
- descriptions of the curriculum organizers – groupings for Prescribed Learning Outcomes that share a common focus
- key concepts, which are a framework of the foundational ideas underlying the Prescribed Learning Outcomes from K to 7
- a suggested timeframe for each curriculum organizer

**CONSIDERATIONS FOR PROGRAM DELIVERY**

This section of the IRP contains additional information to help educators develop their school practices and plan their program delivery to meet the needs of all learners, including sections on the differences between this curriculum and its predecessor, and research and references underlying the curriculum.

**PREScribed LEARNING OUTCOMES**

This section contains the Prescribed Learning Outcomes, the legally required content standards for the provincial education system. The learning outcomes define the required knowledge, skills, and attitudes for each subject. They are statements of what students are expected to know and be able to do by the end of each grade.

This document contains the Prescribed Learning Outcomes for Grade 7. Also included for reference are the Prescribed Learning Outcomes for Grade 6.

**STUDENT ACHIEVEMENT**

This section of the IRP contains information about classroom assessment and measuring student achievement, including specific Suggested Achievement Indicators for each Prescribed Learning Outcome. Suggested Achievement Indicators are statements that describe what students should be able to do in order to demonstrate that they fully meet the expectations set out by the Prescribed Learning Outcomes. Suggested Achievement Indicators are not mandatory; they are provided to assist in the assessment of how well students achieve the Prescribed Learning Outcomes.

Also included in this section are Key Elements, which provide an overview of the English Language Arts curriculum and the pedagogical understandings required for instruction and delivery.

**CLASSROOM ASSESSMENT MODEL**

This section contains a series of classroom assessment examples that address clusters of learning outcomes organized around oral language, reading and viewing, and writing and representing. The examples do not address all the Prescribed Learning Outcomes for the grade and are not designed to be used for summative assessment. The examples are provided to support classroom assessment and are closely aligned with the BC Performance Standards. They are suggestions only – teachers may use or modify them as they plan for the implementation of this curriculum.

**LEARNING RESOURCES**

This section contains general information on learning resources, and provides an Internet link to titles, descriptions, and ordering information for the recommended learning resources in the English Language Arts K to 7 Grade Collections.

**GLOSSARY**

The Glossary defines bolded terms as used in the Prescribed Learning Outcomes and Student Achievement sections of this curriculum.
INTRODUCTION

English Language Arts Grade 7
English Language Arts Grades 1 to 7*: At a Glance

**Aim**

The aim of English Language Arts is to provide students with opportunities for personal and intellectual growth through speaking, listening, reading, viewing, writing, and representing to make meaning of the world and to prepare them to participate effectively in all aspects of society.

**Goals**

- comprehend and respond to oral and written language critically, creatively, and articulately
- communicate ideas, information, and feelings critically, creatively, and articulately, using various media
- think critically and creatively, and reflect on and articulate their thinking and learning
- develop a continuously increasing understanding of self and others

**Curriculum Organizers**

</table>

* At the Kindergarten level, the curriculum organizers have been modified from the above in order to address developmental appropriateness (see page 4).
The complete Integrated Resource Package (IRP) sets out the provincially prescribed curriculum for English Language Arts K to 7. The development of the IRP has been guided by the following principles of learning:

- Learning requires the active participation of the student.
- People learn in a variety of ways and at different rates.
- Learning is both an individual and a group process.
- Learning is most effective when students reflect on the process of learning and set goals for improvement.

In addition to these principles, the IRP recognizes that British Columbia’s schools include young people of varied backgrounds, interests, abilities, and needs. Wherever appropriate for the curriculum, ways to meet these needs and to ensure equity and access for all learners have been integrated as much as possible into the Prescribed Learning Outcomes, Suggested Achievement Indicators, and the Classroom Assessment Model.

Rationale

Language is fundamental to thinking, learning, and communicating in all cultures. The skilled use of language is associated with many opportunities in life, including further education, work, and social interaction. As students come to understand and use language more fully, they are able to enjoy the benefits and pleasures of language in all its forms, from reading and writing, to literature, theatre, public speaking, film, and other media. They also come to understand language as a human system of communication – dynamic and evolving, but also systematic and governed by rules.

The English Language Arts K to 7 curriculum provides students with opportunities to experience the power of language by dealing with a range of texts and with the full range of contexts and purposes associated with the use of language:

- People use language to comprehend a wide range of literary and information communications and to respond knowledgeably and critically to what they read, view, and hear. Students’ ability to understand and draw conclusions from communications – whether written, spoken, or displayed visually – and to defend their conclusions rationally is a major goal of education and the particular focus of the English Language Arts K to 7 curriculum.
- People use language to communicate their ideas through a variety of print and non-print media. In both academic and business contexts, students need to be able to communicate with precision, clarity, and artistry; apply the conventions of language; gather and organize information and ideas; and use communication forms and styles that suit their abilities, specific purposes, and the needs of the audience.
- People use language as a fundamental part of their personal, work, and social lives – to establish and maintain relationships, for enjoyment and diversion, and to learn. Learning to interact successfully with others is essential for students’ success in school, lifelong learning, and maintaining productive, satisfying lives.

The development of literacy is a key focus of this curriculum. The rapid expansion in the use of technology and media has expanded the concept of what it is to be literate. Literacy today involves being able to understand and process oral, written, electronic, and multi-media forms of communication. This curriculum acknowledges that students learn and develop at different rates and that the timeframe for literacy development will vary.

Society expects graduates to think critically, solve problems, communicate clearly, and learn and work both independently and with others. The English Language Arts K to 7 curriculum contributes to this outcome by providing a framework to help students

- present and respond to ideas, feelings, and knowledge sensitively and creatively
- explore Canadian and world literature as a way of knowing, of developing personal values, and of understanding
- learn about Canada’s cultural heritage as expressed in language
- use language confidently to understand and respond thoughtfully and critically to factual and imaginative communications in speech, print, and other media
- develop the reading and writing skills required of informed citizens prepared to face the challenges of further education and a changing workplace.
• express themselves critically, creatively, and articulately for a variety of personal, social, and work-related purposes
• use language appropriate to the situation, audience, and purpose and become comfortable with a range of language styles, from public to personal, and from literary to standard business English
• realize their individual potential as communicators

**Curriculum Organizers**

A curriculum organizer consists of a set of Prescribed Learning Outcomes that share a common focus. Clear and specific learning outcomes guide assessment and instruction and should be shared with both students and parents to enable all stakeholders to have common vocabulary and understandings. The Prescribed Learning Outcomes for English Language Arts Grades 1 to 7 are grouped under the curriculum organizers shown in the chart below. These three organizers and related suborganizers have been framed to highlight the important aspects of student learning in English Language Arts and as one means of presenting Prescribed Learning Outcomes in an organized manner. They are not intended to suggest a sequence of instruction or a linear approach to course delivery; nor do they suggest that organizers work in isolation from one another. (See section entitled “Considerations for Program Delivery: Integration of the Language Arts.”)

Fewer suborganizers and a simpler curriculum organization at the Kindergarten level are consistent with the need for a focus on the foundational aspects of English Language Arts for beginning students. The teaching of literacy in Kindergarten should be taught in a “purposefully joyful and playful way” (i.e., through purposeful, but engaging and playful activities). Play is an essential experience that extends, enhances, and enriches a child’s learning. Play does not compete with the learning of foundational literacy skills but rather it is through playful activities that this learning occurs.

**Oral Language (Speaking and Listening)**

“Oral language is the foundation of literacy learning. Talk is the bridge that helps students make connections between what they know and what they are coming to know” (Booth, 1994, p. 254). Students use language to monitor and reflect on experiences and to reason, plan, predict, and make connections both orally and in print.

<tr>
<td>• Features of Oral Language</td>
<td>• Features of Reading and Viewing</td>
<td>• Features of Writing and Representing</td>
</tr>
</tbody>
</table>
The Oral Language section of the curriculum focusses on

- **Purposes** – providing students opportunities to develop their capacity to interact effectively with peers and adults, to present material orally, and to listen attentively, respectfully, and with purpose

- **Strategies** – increasing students’ awareness of and engagement in the processes, skills, and techniques they can use to be more successful in their oral interactions and presentations

- **Thinking** – extending students’ capacity to use oral language to make connections to text, develop ideas, increase vocabulary repertoire, and use metacognition to assess their strengths and set goals to scaffold improvement

- **Features** – increasing students’ knowledge of the forms of oral expression and the expectations of various audiences, as well as their capacity to control syntax, diction, and other aspects of their oral communication

### Reading and Viewing

“As teachers of literacy, we must have as an instructional goal, regardless of age, grade, or achievement level, the development of students as purposeful, engaged, and ultimately independent comprehenders. No matter what grade level you teach, no matter what content you teach, no matter what texts you teach with, your goal is to improve students’ comprehension and understanding” (Rasinski et al, 2000, p. 1).

The Reading and Viewing section of the curriculum focusses on

- **Purposes** – providing opportunities for students to read and view various types of text (written and visual) in order to improve both literal and higher-level comprehension, and to increase fluency in reading

- **Strategies** – increasing students’ repertoire of approaches to creating text, including those that apply before (e.g., notetaking, brainstorming), during (e.g., experimenting with word choice), and after (e.g., editing, presenting) writing and representing

- **Thinking** – expanding students’ capacity to set and achieve goals to improve their writing and representing, and to extend thinking by using writing and representing to connect to their ideas, the ideas of others, and those presented in texts

- **Features** – developing students’ command of grammar, spelling, punctuation, and paragraphing, and of the expectations associated with particular forms of writing and representing (e.g., short stories, lab reports, web pages)

### Writing and Representing

Learning to write assists children in their reading; in learning to read, children also gain insights that help them as writers. But writing is more than an aid to learning to read; it is an important curricular goal. Through writing children express themselves, clarify their thinking, communicate ideas, and integrate new information into their knowledge base (Centre for the Improvement of Early Reading [CIERA], 1998a, p. 1).

The Writing and Representing section of the curriculum focusses on

- **Purposes** – giving students opportunities to create various kinds of texts; personal, imaginative, and informational, including texts that contain a combination of writing and graphic representations

- **Strategies** – developing students’ repertoire of strategies and techniques they can use before, during, and after reading and viewing in order to comprehend and extend their understandings of texts

- **Thinking** – developing students’ metacognitive capacity to identify and achieve goals for improving their reading and viewing, and to respond to texts in an increasingly thoughtful and sophisticated manner

- **Features** – developing students’ awareness of the different types of written and visual text, the characteristics that distinguish them, and the impact of the stylistic effects used (e.g., rhyme)

### Key Concepts

The Key Concepts are derived from Prescribed Learning Outcomes for English Language Arts K to 7. The information is provided as a quick overview, and is designed to summarize the fundamental concepts for English Language Arts for each grade. This is not a list of Prescribed Learning Outcomes, but a framework of the key ideas that form the basis for English Language Arts.

Suggested Timeframe

Although decisions concerning the allocation of instructional time are subject to teachers’ professional judgment, the curriculum has been designed to create opportunities for greater balance and integration among the three aspects of learning in English Language Arts: oral language, reading and viewing, and writing and representing.

Since it is anticipated that instruction related to learning outcomes in these three areas will frequently be integrated within instructional units (e.g., a unit focused on the study of a particular text), teachers may not necessarily find it useful to correlate instructional time with curriculum organizers. It is consistent with the aim of this subject, however, for teachers to place the most emphasis on outcomes that address developmental needs, and specifically on instructional activities that further students’ thinking skills rather than merely extending their knowledge. This emphasis should be reflected both in the allocation of time and in the weighting scheme for grading student performance.

The following tables show the average percentages of total time that could be devoted to delivering the Prescribed Learning Outcomes in each curriculum organizer at various grade levels.

<table>

CONSIDERATIONS FOR PROGRAM DELIVERY

English Language Arts Grade 7
This section of the IRP contains additional information to help teachers develop their school practices and plan their program delivery to meet the needs of all learners. Included in this section is information about

- Alternative Delivery policy
- addressing local needs
- involving parents and guardians
- confidentiality
- inclusion, equity, and accessibility for all learners
- working with the school and community
- working with the Aboriginal community
- information and communications technology
- copyright and responsibility
- language learning: a shared responsibility
- expanded definition of text
- expanded range of texts
- grade-appropriate texts
- integration of the language arts
- highlights of the 2006 English Language Arts curriculum
- research
- references

**ALTERNATIVE DELIVERY POLICY**

The Alternative Delivery policy does not apply to English Language Arts K to 7.

The Alternative Delivery policy outlines how students, and their parents or guardians, in consultation with their local school authority, may choose means other than instruction by a teacher within the regular classroom setting for addressing Prescribed Learning Outcomes contained in the Health curriculum organizer of the following curriculum documents:

- Health and Career Education K to 7, and Personal Planning K to 7 Personal Development curriculum organizer (until September 2008)
- Health and Career Education 8 and 9
- Planning 10

The policy recognizes the family as the primary educator in the development of children’s attitudes, standards, and values, but the policy still requires that all Prescribed Learning Outcomes be addressed and assessed in the agreed-upon alternative manner of delivery.

It is important to note the significance of the term “alternative delivery” as it relates to the Alternative Delivery policy. The policy does not permit schools to omit addressing or assessing any of the Prescribed Learning Outcomes within the health and career education curriculum. Neither does it allow students to be excused from meeting any learning outcomes related to health. It is expected that students who arrange for alternative delivery will address the health-related learning outcomes and will be able to demonstrate their understanding of these learning outcomes.

For more information about policy relating to alternative delivery, refer to [www.bced.gov.bc.ca/policy/](http://www.bced.gov.bc.ca/policy/)

**ADDRESSING LOCAL NEEDS**

English Language Arts K to 7 includes opportunities for individual teacher and student choice in the exploration of topics to meet certain learning outcomes. This flexibility enables educators to plan their programs by using topics and examples that are relevant to their local context and to the particular interests of their students. When selecting topics it may be appropriate to incorporate student input.

Where specific topics have been included in the learning outcomes, the intent is for all students to have an opportunity to address these important issues. The inclusion of these topics is not intended to exclude any additional issues that may also be relevant for individual school communities.

**INVOLVING PARENTS AND GUARDIANS**

The family is the primary educator in the development of students’ attitudes and values. The school plays a supportive role by focussing on the Prescribed Learning Outcomes in the English Language Arts K to 7 curriculum. Parents and guardians can support, enrich, and extend the curriculum at home.

An excellent way for parents to provide support for students’ literacy success is by showing enjoyment of both reading and writing, encouraging and sustaining conversation, and demonstrating how to express viewpoints respectfully. Activities such as
family read-alouds, writing journals on vacations and sharing what has been written, playing vocabulary games, and making frequent trips to the library are ways for parents to support literacy at home.

It is highly recommended that schools inform parents and guardians about the English Language Arts K to 7 curriculum, and teachers (along with school and district administrators) may choose to do so by

- informing parents/guardians and students of the Prescribed Learning Outcomes for the course
- responding to parent and guardian requests to discuss the course, unit plans, and learning resources

CONFIDENTIALITY

The Freedom of Information and Protection of Privacy Act (FOIPPA) applies to students, to school districts, and to all curricula. Teachers, administrators, and district staff should consider the following:

- Be aware of district and school guidelines regarding the provisions of FOIPPA and how it applies to all subjects, including English Language Arts K to 7.
- Do not use students’ Personal Education Numbers (PENs) on any assignments that students wish to keep confidential.
- Ensure students are aware that if they disclose personal information that indicates they are at risk for harm, then that information cannot be kept confidential.
- Inform students of their rights under FOIPPA, especially the right to have access to their own personal information in their school records. Inform parents of their rights to access their children’s school records.
- Minimize the type and amount of personal information collected, and ensure that it is used only for purposes that relate directly to the reason for which it is collected.
- Inform students that they will be the only ones recording personal information about themselves unless they, or their parents, have consented to teachers collecting that information from other people (including parents).
- Provide students and their parents with the reason(s) they are being asked to provide personal information in the context of the English Language Arts K to 7 curriculum.
- Inform students and their parents that they can ask the school to correct or annotate any of the personal information held by the school, in accordance with Section 29 of FOIPPA.
- Ensure students are aware that their parents may have access to the schoolwork they create only insofar as it pertains to students’ progress.
- Ensure that any information used in assessing students’ progress is up-to-date, accurate, and complete.

For more information about confidentiality, refer to www.mser.gov.bc.ca/privacyaccess/

INCLUSION, EQUITY, AND ACCESSIBILITY FOR ALL LEARNERS

British Columbia’s schools include young people of varied backgrounds, interests, and abilities. The Kindergarten to Grade 12 school system focuses on meeting the needs of all students. When selecting specific topics, activities, and resources to support the implementation of English Language Arts K to 7, teachers are encouraged to ensure that these choices support inclusion, equity, and accessibility for all students. In particular, teachers should ensure that classroom instruction, assessment, and resources reflect sensitivity to diversity and incorporate positive role portrayals, relevant issues, and themes such as inclusion, respect, and acceptance.

Government policy supports the principles of integration and inclusion of students for whom English is a second language and of students with special needs. Most of the Prescribed Learning Outcomes and Suggested Achievement Indicators in this IRP can be met by all students, including those with special needs and/or ESL needs. Some strategies may require adaptations to ensure that those with special and/or ESL needs can successfully achieve the learning outcomes. Where necessary, modifications can be made to the Prescribed Learning Outcomes for students with Individual Education Plans (IEPs).
For more information about resources and support for students with special needs, refer to www.bced.gov.bc.ca/specialed/

For more information about resources and support for ESL students, refer to www.bced.gov.bc.ca/esl/

**Working with the School and Community**

This curriculum addresses a wide range of skills and understandings that students are developing in other areas of their lives. It is important to recognize that learning related to this curriculum extends beyond the English Language Arts classroom.

School and district-wide programs – such as student government, active schools, work experience, and service clubs – support and extend learning in English Language Arts K to 7. Community organizations may also support the curriculum with locally developed learning resources, guest speakers, workshops, and field studies. Teachers may wish to draw on the expertise of these community organizations and members.

**Working with the Aboriginal Community**

The Ministry of Education is dedicated to ensuring that the cultures and contributions of Aboriginal peoples in BC are reflected in all provincial curricula. To address these topics in the classroom in a way that is accurate and that respectfully reflects Aboriginal concepts of teaching and learning, teachers are strongly encouraged to seek the advice and support of local Aboriginal communities. Aboriginal communities are diverse in terms of language, culture, and available resources, and each community will have its own unique protocol to gain support for integration of local knowledge and expertise. To begin discussion of possible instructional and assessment activities, teachers should first contact Aboriginal education co-ordinators, teachers, support workers, and counsellors in their district who will be able to facilitate the identification of local resources and contacts such as elders, chiefs, tribal or band councils, Aboriginal cultural centres, Aboriginal Friendship Centres, and Métis or Inuit organizations.

In addition, teachers may wish to consult the various Ministry of Education publications available, including the “Planning Your Program” section of the resource, *Shared Learnings*. This resource was developed to help all teachers provide students with knowledge of, and opportunities to share experiences with, Aboriginal peoples in BC.

For more information about these documents, consult the Aboriginal Education web site: www.bced.gov.bc.ca/abed/welcome.htm

**Information and Communications Technology**

The study of information and communications technology is increasingly important in our society. Students need to be able to acquire and analyse information, to reason and communicate, to make informed decisions, and to understand and use information and communications technology for a variety of purposes. Development of these skills is important for students in their education, their future careers, and their everyday lives.

Literacy in the area of information and communications technology can be defined as the ability to obtain and share knowledge through investigation, study, instruction, or transmission of information by means of media technology. Becoming literate in this area involves finding, gathering, assessing, and communicating information using electronic means, as well as developing the knowledge and skills to use and solve problems effectively with the technology. Literacy also involves a critical examination and understanding of the ethical and social issues related to the use of information and communications technology. When planning for instruction and assessment in English Language Arts K to 7, teachers should provide opportunities for students to develop literacy in relation to information and communications technology sources, and to reflect critically on the role of these technologies in society.

**Copyright and Responsibility**

Copyright is the legal protection of literary, dramatic, artistic, and musical works; sound recordings; performances; and communications.
signals. Copyright provides creators with the legal right to be paid for their work and the right to say how their work is to be used. The law permits certain exceptions for schools (i.e., specific things permitted) but these are very limited, such as copying for private study or research. The copyright law determines how resources can be used in the classroom and by students at home.

In order to respect copyright it is necessary to understand the law. It is unlawful to do the following, unless permission has been given by a copyright owner or a collective that has the right to licence:

- photocopy copyrighted material to avoid purchasing the original resource for any reason
- photocopy or perform copyrighted material beyond a very small part – in some cases the copyright law considers it “fair” to copy whole works, such as an article in a journal or a photograph, for purposes of research and private study, criticism, and review
- show recorded television or radio programs to students in the classroom unless these are cleared for copyright for educational use (there are exceptions such as for news and news commentary taped within one year of broadcast that by law have record-keeping requirements – see the web site at the end of this section for more details)
- photocopy print music, workbooks, instructional materials, instruction manuals, teacher guides, and commercially available tests and examinations
- show video recordings at schools that are not cleared for public performance
- perform music or do performances of copyrighted material for entertainment (i.e., for purposes other than a specific educational objective)
- copy work from the Internet without an express message that the work can be copied

Permission from or on behalf of the copyright owner must be given in writing. Permission may also be given to copy or use all or some portion of copyrighted work through a licence or agreement. Many creators, publishers, and producers have formed groups or “collectives” to negotiate royalty payments and copying conditions for educational institutions. It is important to know what licences are in place and how these affect the activities schools are involved in. Some licences may also require royalty payments that are determined by the quantity of photocopying or the length of performances. In these cases, it is important to assess the educational value and merits of copying or performing certain works to protect the school’s financial exposure (i.e., only copy or use that portion that is absolutely necessary to meet an educational objective).

It is important for education professionals, parents, and students to respect the value of original thinking and the importance of not plagiarizing the work of others. The works of others should not be used without their permission.

For more information about copyright, refer to http://cmec.ca/copyright/indexe.stm

**Language Learning:**

**A Shared Responsibility**

Students, parents, teachers, and the community share responsibility for language learning. Students use language to examine new knowledge and experiences. They make choices about which texts to read, view, or listen to and about their responses to such texts. Students need to take responsibility for their language learning.

Language development begins in the home. Parents, other caregivers, and family members can actively support language learning by encouraging their children to use the language arts of speaking, listening, reading, viewing, writing, and representing in real-life contexts.

Because of its universality, language allows students to make connections across many areas of study. Integration must occur between English Language Arts and other curriculum areas. Teachers who are subject-area specialists support language development when they teach the specialized language and forms of their subject.

English Language Arts teachers play a special role as they help students develop strategies for using and responding to oral language and texts. They
provide explicit instruction where appropriate, and provide students with learning opportunities that integrate language processes and scaffold learning.

**Expanded Definition of Text**
In this document, the term “text” is used to describe oral, visual, or written language forms including electronic media. These varied forms of text are often used in combination with one another. The expanded definition of text acknowledges the diverse range of materials with which we interact and from which we construct meaning.

**Expanded Range of Texts**
Wherever possible, learning outcomes have been framed to allow teachers and students to address prescribed requirements using various types of texts. In addition to introducing texts in oral and visual forms, as well as written forms, teachers are encouraged to devote attention to a broad range of non-fiction texts, fiction, and poetry. Students need knowledge, skills, and strategies in the six language arts to compose, comprehend, and respond effectively to a range of texts. To promote a deeper cultural awareness among students, teachers are also encouraged to devote attention to texts by both Aboriginal and non-Aboriginal authors from Canada and to texts that embody a range of voices from around the world. Teacher-librarians are a tremendous resource who can provide assistance in selecting grade-appropriate texts and may also offer other activities and suggestions to encourage the love of reading.

**Grade-Appropriate Texts**
The Prescribed Learning Outcomes require students who meet expectations to be able to read and comprehend “grade-appropriate texts.” There is expected to be a range of grade-appropriate texts at each grade level. The determination of the range of texts appropriate at each grade will be the responsibility of each school district in British Columbia. Text appropriateness will vary depending on students’ background knowledge of the content and of the text style. To determine whether a student is reading grade-appropriate texts with comprehension, consideration should be given to multiple performance snapshots of reading. Many characteristics of text may be used to determine the level of a text, including number of pages, type and size of font, sentence complexity, and sophistication of themes and ideas. A number of performance-based assessment tools and resources currently used throughout school districts in British Columbia are useful in providing information on reading achievement. Some examples are listed in the subsection entitled “Formative Assessment and Student Self-Assessment to Support Learning” in “Highlights of the 2006 English Language Arts Curriculum.”

**Integration of the Language Arts**
All the language arts (i.e., speaking, listening, reading, viewing, writing, and representing) are interrelated and interdependent: facility in one strengthens and supports the others. Students become confident and competent users of all six language arts through having many opportunities to speak, listen, read, write, view, and represent in a variety of contexts.
CONSIDERATIONS FOR PROGRAM DELIVERY

HIGHLIGHTS OF THE 2006 ENGLISH LANGUAGE ARTS CURRICULUM

This 2006 curriculum revision incorporates components from the 1996 provincial English Language Arts curriculum, the contributions of many educators, and much of the content and intent of the 1998 Common Curriculum Framework for English Language Arts, Kindergarten to Grade 12 (Western Canadian Protocol for Collaboration in Basic Education, now referred to as “Western and Northern Canadian Protocol for Collaboration in Basic Education”). The 2006 English Language Arts K to 7 curriculum emphasizes the following:

1. the link between literacy and thinking
2. the connections among oral language, reading, and writing
3. comprehension and metacognition in literacy learning
4. the gradual release of responsibility
5. literacy learning across the curriculum
6. early literacy development and intervention
7. oral language to support learning
8. reading comprehension and fluency
9. a systematic approach to writing
10. classroom diversity and differentiated instruction
11. assessment to inform instruction and support learning
12. alignment with the BC Performance Standards

1. The Link Between Literacy and Thinking

Language and literacy development occur on a continuum of learning from birth through adulthood. The continuum moves from invention to convention, from inexperienced to experienced, from early attempts to maturity, from context-dependent to more differentiated (Whitmore & Goodman, 1995, p. 157).

Catherine Snow (2005, p. 1) defines literacy as “the capacity to construct and express meaning through reading, writing, and talking about texts.” In the primary years, the core of young children’s literacy development is their striving to convey meaning through speaking, writing, and representing, and to make meaning through listening, reading, and viewing. Early reading and writing often begin with retelling, and move to response, personal interpretation, and fact-finding. As the developmental continuum between literacy and learning continues, a large part of what students learn from Grade 4 onward is learned through reading and writing. In the intermediate years,

All language arts are integrated: facility in one strengthens and supports the other.

Using Reading, Writing, Speaking, and Listening in Combination to Make Meaning

there is a growing emphasis on reading to gain information from literature, poetry, and factual or multi-media texts, and to use this information to make connections, form hypotheses, analyse, synthesize, evaluate, and make judgments.

“A literacy of thoughtfulness is primarily a process of making meaning (not just receiving it) and negotiating it with others (not just thinking alone). It is fundamentally constructive” (Brown, as cited in Ministry of Education and Ministry Responsible for Multiculturalism and Human Rights, Vol. 1, 1991, p. 29). This construction and production of meaning is at the heart of the English Language Arts curriculum. Children develop as readers, writers, and thinkers through experiences with rich texts and real language in many different forms – poetry, fiction, and non-fiction. They need many opportunities to read, discuss, and respond to a wide range of texts across all subject areas and for a variety of purposes – including reading, writing, and talking about texts of individual choice.

Through their school years, students learn to make increasingly insightful connections between their own and others’ experiences, to inquire systematically into important matters, and to access, analyse, and evaluate information and arguments. They learn to consider a variety of perspectives, and to express their own thoughts, ideas, feelings, and values with growing clarity and confidence. With modelling, practice, and support, their thinking and understanding are deepened as they work with engaging content and participate in rich, focussed conversations.

To foster this development, teachers provide a wide variety of texts worth reading, and time to write about significant topics. They structure opportunities for students to talk about their reading, writing, and thinking, and involve them in challenging, open-ended tasks through which they create and demonstrate understanding.

2. Connections Among Speaking, Listening, Reading, Viewing, Writing, and Representing
When students are taught language arts in an integrated fashion they use the language arts interdependently to create meaning. For example: structured talk may lead to writing; viewing graphs and images may lead to reading; writing or representing responses may occur before, during, and after reading. Students become confident and competent users of all six language arts through having many opportunities to speak, listen, read, write, view, and represent in a variety of contexts, and to reflect on their learning as they do so.

“In the junior grades, students learn to read like writers and write like readers by talking and thinking about the meaning, form, language, and effect of what they read and write. Purposeful talk about a wide range of texts helps students extend their knowledge of themselves and the world, make new connections, and acquire insights that will deepen their reading comprehension and enrich their written work” (Ontario Ministry of Education, 2004, p. 29).

3. Comprehension and Metacognition
Comprehension is the process of making meaning with and from text, whether the text is oral, written, visual, or multi-media. This curriculum emphasizes the teaching of strategies that literate people use to make meaning as they speak, listen, read, view, write, and represent. These include both specific strategies to use when interacting with different kinds of text, and more general strategies for self-monitoring, self-correcting, reflecting, and goal-setting to improve learning.

Students who can monitor their learning, assess their strengths and weaknesses, and set goals for improvement become independent, lifelong learners. By thinking about how they think and learn, they gain personal control over the strategies they use when engaged in literacy activities. This control develops through metacognition – that is, becoming aware of and more purposeful in how to use strategies to improve learning. “It is important to give learners time and opportunities to make their thought processes explicit and to reflect on their learning strategies, in order for them to gain self-control. Acquiring and using metacognitive skills has emerged as a powerful idea for promoting a thinking skills curriculum” (McGuiness, 1999, p. 2). Even very young students can develop metacognitive strategies and skills when teachers explain, model, and help them practise talking about their thinking in systematic ways.
4. The Gradual Release of Responsibility
In effective literacy instruction, teachers choose their instructional activities to model and scaffold comprehension and metacognition strategies that are just beyond students’ independent level. This is called the “Zone of Proximal Development” (Vygotsky, 1978), and it is where learning can be supported most effectively and extended with instruction. That is, students are introduced to strategies that are new and challenging, but not so difficult that they become frustrated. As students become more proficient in using new strategies through guided practice and interaction with one another, the teacher can gradually release responsibility for the strategies to students, to encourage their independence (Pearson & Gallagher, 1983). This process is called the “Gradual Release of Responsibility,” also referred to as the gradual release of support. The ultimate goal is for students to make the strategies their own, and to know how, when, and why to apply them when speaking, listening, reading, viewing, writing, representing, and thinking about their thinking.

With this in mind, teachers focus their instruction on effective comprehension strategies for reading, writing, speaking, listening, and thinking that are within students’ Zone of Proximal Development. For each strategy, they
- explain and demonstrate, through explicit modelling and/or thinking aloud, the purpose and use of a strategy
- coach or guide students in pairs or small, interactive groups, as they work with the strategy
- provide opportunities for students to use the strategy independently
- monitor how students use the strategy in combination with other strategies they have learned, and encourage them to apply and adapt the strategies in more complex situations

5. Literacy Learning Across the Curriculum
It is a misconception that students in the primary grades learn to read and write while those in the intermediate grades read and write to learn. In fact, all students should be doing both simultaneously and continuously. Student learning is enhanced when teachers at all grades, teaching all subject matter, see themselves as teachers of literacy. In their studies of fourth-grade classrooms, Allington and Johnson (2001) found that in the classrooms of exemplary teachers “… integration across subjects, time, and topics was common rather than a compartmentalized curriculum. The integration not only worked to foster students’ motivation and engagement but also to add a coherence to the instructional day” (p. 161).

More time for literacy learning does not mean less time for learning other subjects. In fact, literacy learning provides a way into the increasingly complex ideas and texts that students encounter in all subjects as they advance through the grades. By integrating literacy learning into all subjects, teachers prepare their students to read and write subject-specific material, help them become strategic thinkers and problem solvers, and provide them with opportunities to apply literacy skills and strategies in many different meaningful contexts.

“Learning consists of gradually discovering the meaning of a discipline – that is, coming to understand the questions the discipline asks about the world, the methods it uses, and the main theories it constructs” (Develay, 1996, p. 106).

The inquiry approach is one way to provide students with opportunities to apply a wide range of reading, writing, listening, speaking, and thinking strategies in all curriculum subjects. The foundation of inquiry is the asking of thoughtful questions. Teachers help students pose questions and design tasks for seeking answers to their questions. This builds literacy skills in action and simultaneously deepens a student’s thinking process and ability to find solutions. A number of learning outcomes can be addressed in an inquiry task. By designing learning tasks that are not routine but have a degree of open-endedness, uncertainty, and challenge, teachers encourage students to make deep, personal meaning, and to arrive at a variety of solutions with increasing independence.

6. Early Literacy Development and Intervention
Children arrive at Kindergarten with vastly different family and cultural backgrounds, vocabulary knowledge, and exposure to literacy.
This diversity of experiences, linguistic backgrounds, and abilities results in a range of early literacy levels in the Kindergarten classroom. Because of individual and experiential variations, it is common to find within a Kindergarten classroom a five-year range of literacy-related skills and functioning (Riley, as cited in NAEYC, 1998, p. 2). The challenges resulting from this diversity are further intensified by the fact that it is essential for early learners to have positive experiences that make them feel successful and that motivate them to seek further involvement in listening, speaking, reading, and writing.

Purposeful play provides an important medium for students’ literacy development in the early years. Young children are active learners who constantly seek out opportunities to explore and make sense of their world. During play they learn from one another as they talk, listen, and make meaning together. For example, they learn to attend to tasks, take turns, solve problems, and express ideas. They learn to take risks and make choices. Through interactive play, children gradually discover that other people have ideas about thinking and doing that are different from their own. It is important, then, for classrooms to provide an atmosphere that encourages risk-taking, structures that encourage children to interact with one another, and an environment where they can make choices about their learning.

Within this context, teachers can model and guide literate behaviour during play. “Simply giving children an opportunity to engage in free play will not guarantee that literacy will develop. The teacher plays an important role in modeling and guiding literate behavior during play. Children are more likely to engage in literacy activities during play when teachers introduce the literacy objects such as books, writing tools and signs, and model their use” (Morrow, as cited in Jamison Rog, 2002, p. 29).

“The major instructional tension associated with kindergarten literacy objectives is less about what children should learn than how they can be helped to learn it in an appropriate manner” (Snow, Burns, & Griffin, 1998, p. 177). Thus the teacher’s role in knowing each child’s background and current abilities, as well as the strategies and structures needed to scaffold their learning, are central to that child’s success. This assumes

- knowledge of child development
- knowledge of literacy and how best to optimize literacy development for all children
- knowledge of intervention strategies for children who need additional support

Children who are particularly likely to have difficulty with learning to read and write in the primary grades are those who begin school with less prior knowledge and skill in relevant domains: most notably, general verbal abilities, the ability to attend to the sounds of language as distinct from its meaning, familiarity with the basic purposes and mechanisms of reading and writing, and letter knowledge. Children from poor neighbourhoods, children with limited proficiency in English, children with hearing impairments, children with preschool language impairments, and children whose parents had difficulty learning to read are particularly at risk of arriving at school with weaknesses in these areas and hence of falling behind from the outset (Snow, Burns, & Griffin, 1998, p. 3).

In the early grades, school success is synonymous with reading success. A child’s reading level at the end of Grade 3 more accurately predicts school success than any other variable, including family income, educational attainment of parent or guardian, ethnic or cultural identity, and home language (Carter, 1985). According to a study by Juel (1988), the probability that a child who is a poor reader at the end of Grade 1 will remain a poor reader at the end of Grade 4 is 88% (Snow, Burns, & Griffin, 1998, p. 172). It is research such as this that has helped focus attention on the importance of explicit instruction and early intervention.

The most effective prevention strategy is excellent instruction (Snow, Burns, & Griffin, 1998, p. 172). “Research affirms that quality classroom instruction in kindergarten and the primary grades is the single best weapon against reading failure. Indeed, when done well, classroom instruction has been shown to overwhelm the effects of student background and supplementary tutoring” (Snow, Burns, & Griffin, 1998, p. 343).
7. Oral Language to Support Learning

Children’s oral language development is considered to be a key foundation for successful literacy (Chaney & Burk, 1998; BC Primary Program, 2000; McCormick, 1999; Strickland, Ganske, & Monroe, 2002). Indeed, the evidence is compelling that a foundation in spoken language competence is important for the successful achievement of academic and social competence (Tomblin, 2005).

To maximize oral language development, it is important that teachers
• build a personal relationship with each student
• create a safe climate of respectful listening
• provide frequent, sustained opportunities for language development, including structured partner talk and small-group interaction
• interact regularly on a one-to-one basis with each student
• challenge students to talk, think, and explore their knowledge of the world
• ask open-ended questions to help students make meaning
• support students as they develop language and learning strategies necessary to articulate and extend their interactions with the world
• give students adequate wait time for thinking to occur
• encourage students to question and justify (Adapted from Clay, in Crevola and Vineis, 2004, p. 5)

Students need to be able to use language appropriately for a broad range of functions, and to perceive the functions for which others use language. The oral language students acquire when they are young helps them connect words, sounds, and meaning with print. The oral language acquired later helps students build more sophisticated understandings, explore relationships among ideas, and explore questions in their reading and writing.

Throughout the elementary years, students’ oral language abilities are interwoven with learning to read and write. As James Britton describes, classroom writing and reading float on a sea of talk (1970, p. 29). Close, McClaren, and Stickley (2002) report that “…structured talk deepens and integrates learning, and leads learners to make new connections. The active engagement developed through partner interaction leads to longer periods of full focus and much more powerful learning…. Structured partner talk is one of the best tools for maintaining engagement, building accountability and for sustaining learning” (p. 2).

Oral language is both a means whereby students learn about reading and writing and a key goal of literacy instruction. This curriculum recognizes the importance of parents, teachers, and the entire school community working together to support students’ oral language learning. Children should be encouraged to use oral language for a variety of purposes both at school and at home.

8. Increased Focus on Reading Comprehension and Fluency

The ability to read is a cornerstone for success in school and in life. It is important to develop capable readers who are knowledgeable about the reading process, who are able to successfully make meaning from text, who enjoy reading, and who regularly choose to read.

In reading, comprehension is a process that involves interaction between reader and text, as well as among readers. The following graphic illustrates the four cueing systems of written language (some educators exclude pragmatics and refer to “three” cueing systems) that readers use when reading for meaning. The systems are not independent of one another, and may be used consciously or automatically depending on the stage of development and needs of the reader. All the systems need to be taught with the goal in mind that reading is always about making meaning, and that each of these systems supports that goal.
Research indicates that effective readers use a variety of comprehension strategies before, during, and after reading to integrate their use of the four cueing systems and construct meaning from text. Some of these strategies are listed in the chart to the right.

### Strategies that support comprehension

- Accessing prior knowledge to make connections with the text
- Predicting
- Asking questions before reading, during reading, and after reading
- Visualizing and creating images using the senses
- Drawing inferences before, during, and after reading
- Distinguishing important from less important ideas in the text
- Summarizing
- Synthesizing information within and across texts and reading experiences

---

Comprehension strategies are most effective when they are purposeful. One way to group strategies by their purpose is as follows:

- **Connecting strategies** used *before* reading, such as accessing prior knowledge, asking questions about the text, and setting a goal for reading
- **Processing strategies** used *during* reading, such as making new connections and revising former understandings through interaction with the text
- **Transforming and personalizing strategies** used *after* reading, such as summarizing, synthesizing, evaluating, and applying new information so that it is retained for future use (Brownlie, Feniak, & Schnellert, 2006; Close, McClaren, & Stickley, 2002)

Students need strategy instruction in addition to being provided with many opportunities to read a wide range of texts across all subject areas and for a variety of purposes. The direct teaching of reading comprehension strategies over time enables readers to engage more actively with text, to monitor their comprehension, and to try alternative strategies when understanding breaks down. As students learn and practise comprehension strategies, they become more proficient at reading independently, and are able to read more and more complex texts.

Fluency is another aspect of reading that affects comprehension. Fluency serves as a bridge between word recognition and comprehension. Fluent readers can identify words accurately and with ease, enabling them to focus most of their attention on comprehension. Fluent readers are more able to make connections among ideas in a text and between texts, and their prior knowledge. In other words, they can recognize words and comprehend at the same time.

Fluency develops gradually over time and through extensive reading practice. The level of fluency varies with readers, depending on their familiarity with the words in a text and the content of the text. Even able adult readers struggle with reading texts containing highly technical vocabulary in subjects about which they have limited prior knowledge.

It is important to remember that fluent readers read at the speed of their speech, so it naturally follows that rates of fluency will vary from student to student.

Early readers put a great deal of energy into recognizing and pronouncing words (using the graphophonic cueing system), so their oral reading is rarely fluent. To become fluent, use of graphophonic cues must become automatic, allowing them to attend to the syntactic and semantic cues. However, even when older students learn to recognize many words with ease and can read grade-appropriate texts at a reasonable rate, their oral reading still may not sound fluent because they are not yet using pragmatic cues or thinking about their interaction with the author’s intentions. For students to develop fluency, teachers must model fluency and provide opportunities for repeated oral reading and independent reading. Choral reading, reading in role, readers’ theatre, paired reading, and buddy reading are some effective ways to help students develop fluency. Teacher feedback to students is also essential in developing their fluency (Osborn & Lehr, 2003, p. 10).

**9. Valuing a Systematic Approach to Teaching Writing**

“We believe that writing is learned in the act of writing with the support of a knowledgeable teacher” (Reid, Schultze, & Petersen, 2005, p. 8). From their first days in school, children learn to write in safe environments where teachers model writing, co-establish criteria for writing, sit alongside students to encourage and give feedback as they write, celebrate successes, and help students set goals for future writing development.

Learning to write with meaning involves a range of different strategies. Like reading strategies, these can be organized by their purposes:

- **Prewriting** — generating ideas for getting started, often including building criteria and setting goals
- **Drafting** — writing down ideas
- **Revising** — meaning-based refining and polishing
- **Editing** — grammar and style refining and polishing
- **Presenting and Publishing** — preparing a presentation or representation and sharing it with others
As students learn to use strategies for each of these purposes, the teacher scaffolds students’ independence through the gradual release of support. One way to organize writing so that the teacher can introduce a range of writing strategies, and students can move toward independence at different rates, is called Writers’ Workshop, a phrase coined by Donald Graves in the early 1980s. In Writers’ Workshop, all students write for a significant block of time. The teacher uses focused mini-lessons to introduce new strategies within students’ Zone of Proximal Development. The teacher may also structure opportunities for guided practice in pairs, small groups, or with the entire class. Students learn to support one another’s writing development through interdependent activities such as peer editing and proofreading. One-to-one and small-group conferences allow the teacher to monitor students’ levels of independence and provide intervention where needed.

In the early grades when students are learning to express meaning using writing and representing tools, teachers also scaffold writing development through a range of activities involving the gradual release of support. The diagram below shows the types of activities and degrees of teacher support involved in teaching early writing.

---

**Modelled Writing**
Modelling is generally done with the whole class or a group. The teacher thinks aloud (writes aloud) while composing. As the teacher thinks aloud he/she is making the writing process more obvious to the students.

**Shared Writing**
The teacher and students compose the text together. The teacher is still doing the most work and thinking aloud. The process is similar to shared reading and can be done with a small group or a whole class.

**Interactive Writing**
Interactive writing is also referred to as “sharing the pen.” The students may each be working on their own copy on a chalkboard or white board and also sharing the pen by contributing to the class text. This approach works best with a small group.

**Guided Writing**
A small group of students with a common need is brought together for a mini-lesson, and the students are supported as needed. They then practise the strategies in the group setting or independently.

**Independent Writing**
The students are given time to write independently for an uninterrupted segment of time (e.g., 30 minutes).

**Writing Share (Author’s Chair)**
Students can learn a great deal from sharing their writing. Discussing the writing can be very valuable before writing, during writing, and after writing. Writing share works best when the peers have something specific to focus on as they listen. The writer brings a piece of unfinished writing and tells the group where the writing needs help, or brings a finished piece and gets feedback from the group. The writer must also learn how to share effectively so all can hear.

**Writing Conferences**
A writing conference (generally less than five minutes) usually occurs one-to-one, with teacher and student, at the request of either the teacher or student. The conference time is meant to focus on one small area or one piece of the writing.

---

Modelling and explanation are important in writing, just as in reading, to help students understand
  • what strong writing looks like (e.g., strategies used by good writers)
  • how to assess their own and others’ writing (e.g., teacher and students rewrite a weak piece of writing together and compare the two versions)
  • how to improve their writing through both revision and editing

Throughout the developmental stages until students become independent writers, and continuing as they refine their skills, the use of an analytic writing system allows teachers and students to define for themselves the criteria for quality writing, and to discuss how to use criteria as a guide to improve their writing. Using an analytic system involves teaching students the vocabulary they need when talking about different aspects of their writing, and discussing the criteria for quality in each aspect of a written piece. Educators can also organize their assessments around the descriptors used in an analytical framework. This makes feedback to students more meaningful, and helps to align assessment with instruction.

There are many such analytical frameworks, but two are used extensively in BC and are discussed here. These are the BC Performance Standards for Writing, and the Traits of Writing. These two analytic systems are compared in the chart below.

The BC Performance Standards for Writing are organized around three types of writing:
• personal, impromptu writing
• writing poems and stories
• writing to communicate ideas and information

Within each type of writing, different aspects of a piece of writing can be examined, using criteria found on the BC Performance Standards scales. To support students’ development in each type of writing, teachers may use one of the Performance Standards scales to develop criteria for quality writing with students. They may show students how to use these criteria in the process of drafting, revising, and editing, perhaps by modelling with their own writing or an anonymous writing sample. Teachers also use the Performance Standards as an assessment tool when they evaluate students’ writing. By creating a snapshot showing a student’s level of development in each aspect of writing, the teacher can provide meaningful feedback to the student and plan for focused instruction where needed.

The Traits of Writing is another systematic approach to writing throughout the grades. It also incorporates a useful assessment tool to reinforce effective writing instruction. Through analytic assessment teachers and students
• develop a shared understanding of what “good writing” looks like
• use a common vocabulary to describe qualities of writing
• practise assessing with consistency and accuracy

The Traits of Writing parallel the Gradual Release of Responsibility model of teaching that is a foundational principle of this curriculum. The teacher models each trait explicitly using picture books and/or short pieces of writing, after which the teacher creates opportunities for students to assess anonymous writing samples (see the “Glossary” for a definition of “anonymous writing samples”) and then revise the samples. Teachers model their own writing and invite student input for revision on one trait at a time, thus making achievement manageable.

This systematic approach works most effectively when teachers
• teach students the language of the traits to speak and think like writers
• use picture books and/or short pieces of writing to explicitly model examples of the trait being taught
• provide anonymous writing samples for students to read, score, and discuss to help them develop a common standard of writing
• teach one trait of writing at a time
• provide opportunities for students to write short, focussed pieces
• revise for one trait at a time
• help students self-assess for the trait taught
• assess samples of student work after students have gained some experience with a trait
• write their own pieces and invite students to help revise for one trait
• link writing across the curriculum to the Traits of Writing to reinforce students’ skills as writers and their understanding of the process

The relationship between student writing and grammar has been the subject of lengthy debate for decades. Teaching grammar outside of the students’ writing experiences, such as using grammar worksheets, does not result in a transfer of skills or learning to the next writing experience. Grammar skills should be taught in the context of the writing experience, using students’ and teachers’ own writing.

10. Diversity
Today’s classrooms are enriched by diverse groups of students. As teachers teach the curriculum, they aim to include all students, working toward common expectations with different amounts of support, different texts, different strategies, and a variety of class organizational patterns. One size does not fit all.

The literacy needs of students in any classroom are likely to be complex and varied. Some students will be able to read challenging texts with insight, while others will need assistance to develop fluency and comprehension. Some students will be comfortable
discussing ideas in small or large groups; at the same time, others will be learning the basic language of instruction and will need to develop confidence to express themselves orally and in writing.

To promote success for all learners, teachers must adapt their instruction to respond to the diverse literacy needs of their students, including those with special needs. Two critical elements in this kind of instruction are voice (opportunities for students to participate in decisions about their learning and to be engaged in a classroom community) and choice (options from which students can select). “Voice and choice are the foundation of classroom structures like Writers’ Workshop and Literature Circles” (Brownlie, Fenik, & Schnellert, 2006, p. 128). In both of these structures, students’ individual growth is maximized by offering qualitatively different instruction or assessment feedback, based on their needs, interests, and skills.

Another aspect of addressing diversity and supporting voice and choice is appropriate text selection. The curriculum requires students who meet expectations to be able to read and comprehend “grade-appropriate texts.” There is expected to be a range of grade-appropriate texts available to students at each grade level. Each school district in British Columbia will determine the range of texts appropriate for its students. Text appropriateness will vary, depending on students’ background knowledge of the content and of the text style.

In addition to reading, students are expected to work toward Prescribed Learning Outcomes in oral language, and in writing and representing. This can be accomplished through a variety of different learning experiences, and without demanding the same product from every student. Voice and choice in writing and speaking topics, and in genres and styles are other ways to differentiate instruction, address diverse students’ needs, and motivate their learning.

11. Formative Assessment and Student Self-Assessment to Support Learning
The primary purpose of assessment in English Language Arts is to improve students’ literacy skills. With this focus, teachers shift the emphasis from assessment practices that are primarily useful for summarizing or reporting on student learning (assessment of learning) to assessment practices that are useful in guiding and informing instruction (assessment for learning) and assessment practices that involve students in self-assessment and setting goals for their own learning (assessment as learning). Assessment information used for and as learning is generally descriptive and performance-based. Teachers use the information to revise instructional priorities, and to help their students and themselves become reflective learners. The “Classroom Assessment Model” section of this document provides further information and specific examples developed by BC teachers to illustrate these kinds of formative assessment practices.

Assessment should provide students with multiple ways to demonstrate what they know and are able to do with many different types of text. The charts on the following two pages show how student-involved assessment can be used to guide instruction, and provide suggested assessment practices that will help close the achievement gap and support learning for all students.

Prepared assessment materials and structured procedures can be helpful to teachers in establishing common standards and criteria for assessment, provided that they are appropriate for the students and situation in which assessment will take place. Teachers using prepared assessment materials (Brownlie & Jeroski, 2006) frequently follow the assessment cycle outlined below:

- choose an assessment resource that will provide information that can be used in teaching
- analyse the student results
- use this information to choose a target skill or strategy, then plan for teaching using this information
- periodically reassess to see if teaching is making a difference
- when students are ready to move on, choose a new target area

In this cycle, the teacher’s personal knowledge of the students plays a large part in determining which target strategies will be compatible with their Zone of Proximal Development.
### Beginning with the End in Mind with Students

## Closing the Achievement Gap: Six Essential Elements of Assessment

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. Setting and Using Criteria</strong></td>
<td><strong>2. Self-Assessment</strong></td>
</tr>
<tr>
<td>When we set criteria with students, the learning becomes more explicit. Students can confirm, consolidate and integrate new knowledge. Setting criteria with students scaffolds future learning. It helps teach students what quality looks like.</td>
<td>When students self-assess in relation to criteria, they have an opportunity to take stock of where they are in relation to where they need to be. Rita Shelton Deverell, a journalist speaking on a CBC program, said that an expert is someone who has a deep understanding of his or her own experience. Self-assessment gives students a chance to figure out what they know and what they need to learn next.</td>
</tr>
<tr>
<td><strong>3. Feedback FOR Learning</strong></td>
<td><strong>4. Setting Goals</strong></td>
</tr>
<tr>
<td>Feedback that supports learning describes strengths upon which further learning can build and areas that need to be improved. It gives learners the information they need to adjust so they can get better. When we assess during the learning and evaluate at the end of the learning, we give students time to practice and learn before judging the evidence.</td>
<td>Brain research is indicating that closing in on a goal triggers a part of the brain linked to motivation. Students involved in self-assessment and goal setting in relation to criteria learn more.</td>
</tr>
<tr>
<td><strong>5. Collecting Evidence</strong></td>
<td><strong>6. Communicating Using Evidence of Learning</strong></td>
</tr>
<tr>
<td>Collecting evidence of learning from a variety of sources over time looking for patterns and trends is one way to increase the reliability and validity of classroom assessment findings. As students learn, there are three sources of evidence: products, observations, and conversations. Students can organize their evidence - their proof of meeting the learning destination in many different ways.</td>
<td>The presence of others influences what we attend to. It forces us to step back and reflect, to think about and assess what we are doing. When the student presents the evidence, the teacher assists by helping the student in responding to questions, and the audience reviews and gives feedback. There is an opportunity for everyone to better understand the learning and to provide necessary support.</td>
</tr>
</tbody>
</table>

Materials adapted from Davies, Anne, *Standards-Based Grading and Reporting*, 2006, displayed with special permission of Connections Publishing, All Rights Reserved.
BC educators have developed several performance-based assessment approaches that engage teachers and students in assessment for and as learning. For example, the following assessments provide information for students and teachers on the three aspects of reading described in the Performance Standards – strategies, comprehension, and response and analysis:

- District Assessment of Reading Team (DART) developed by Brownlie, F. and a consortium of BC School Districts
- Quick Comprehension Assessment (QCA) developed by Jeroski, S. for Pearson Education Canada. (This is one component of a resource called Reaching Readers and Writers!)
- Reading Assessment District (RAD) developed for Pearson Education Canada. (This is a database of assessment resources.)
- Reading and Responding developed by Brownlie, F. and Jeroski, S. for Thomson Nelson Canada
- SmartReading developed by Close, S. and educators in the New Westminster School District
- Standard Reading Assessment, as described in Brownlie, F., Feniak, C., and Schnellert, L. (2006)
- Other locally developed performance-based assessment (e.g., ORCA – Oral Reading Comprehension Assessment, Greater Victoria School District)

Other reading assessment resources that provide information to match students with books and to work with individual students are

- PM Benchmarks, Thomson Nelson
- Developmental Reading Assessment, Pearson Education Canada

12. Alignment with the BC Performance Standards
The BC Performance Standards for Reading and the BC Performance Standards for Writing for Grades 1 to 10 were developed in 2000 using reading and writing samples from BC students. Teams of teachers assessed the samples and developed descriptive rubrics that provide a common language and framework to guide student assessment. Use of the Performance Standards by groups of teachers has resulted in collaborative professional networks of educators who refer to the Performance Standards to further their instruction and assessment.

This curriculum has been developed with the Performance Standards in mind. The Suggested Achievement Indicators are largely congruent with the descriptors in the Performance Standards.

RESEARCH

“Curriculum can be seen as a metaphor for a journey of learning and growth that is consciously developed” (Schubert, 1986, p. 6).

Children learn to read by a variety of methods and materials. No one approach is so distinctly better in all situations and respects than the others that it should be considered the one best method (Bond & Dykstra, as cited in Allington, 2006, p. 12).

The 2006 BC English Language Arts K to 7 curriculum was developed based on current research and best practice. Although the research may reflect a variety of perspectives and methodologies, it supports developmentally appropriate and effective language arts teaching and learning.

Prescribed Learning Outcomes

The IRA and NAEYC define developmentally appropriate goals and expectations as “challenging but achievable, with sufficient adult support” (NAEYC, 1998, p. 31).

The Prescribed Learning Outcomes are the legally required content standards for the provincial education system. They define what students are expected to know and be able to do by the end of each grade, and guide both assessment and instruction.

The Prescribed Learning Outcomes are valid; they accurately represent the tasks that credible research indicates children need to accomplish to be successful literacy learners. The English Language Arts K to 7 curriculum was developed based on the research work and position statements of the respected individuals and organizations listed in the “References.”

The Prescribed Learning Outcomes are listed by curriculum organizer and demonstrate high but
REALISTIC AND DEVELOPMENTALLY APPROPRIATE STANDARDS
IN LINE WITH THOSE OF OTHER CANADIAN PROVINCES/
JURISDICTIONS. ALTHOUGH GROUPED INTO THREE ORGANIZERS
(ORAL LANGUAGE; READING AND VIEWING; WRITING AND
REPRESENTING), THIS CURRICULUM IS INTEGRATED AND
DEVELOPED ACROSS ORGANIZERS AND, IN FACT, ACROSS ALL
SUBJECT AREAS. IT IS IMPORTANT TO NOTE THAT LEARNING
SHOULD BE VIEWED AS SEAMLESS ACROSS GRADES AND THAT
THE ORGANIZERS AND SUBORGANIZERS DO NOT SUGGEST OR
IMPLY A SEQUENCE OF INSTRUCTION OR A LINEAR APPROACH.

SUGGESTED ACHIEVEMENT INDICATORS
SUGGESTED ACHIEVEMENT INDICATORS ARE STATEMENTS
THAT DESCRIBE KNOWLEDGE ACQUIRED, SKILLS APPLIED,
OR THE SPECIFIC LEVEL OF ATTITUDES DEMONSTRATED BY
STUDENTS IN RELATION TO A CORRESPONDING PRESCRIBED
LEARNING OUTCOME. THEY DESCRIBE EVIDENCE A TEACHER
MIGHT LOOK FOR TO DETERMINE WHETHER OR NOT A STUDENT
HAS MET THE INTENT OF THE LEARNING OUTCOME AND WHERE
THAT STUDENT MIGHT BE ON THE DEVELOPMENTAL
CONTINUUM.

THE PRESCRIBED LEARNING OUTCOMES ARE MANDATED
LEARNING STANDARDS WHILE THE SUGGESTED ACHIEVEMENT
INDICATORS ARE PROVIDED TO TEACHERS AS SUGGESTED

DEscribes the following principles of child development and learning that inform developmentally appropriate practice.

a) Domains of children’s development – physical, social, emotional and cognitive – are closely related. Development in one domain influences and is influenced by development in other domains.
b) Development occurs in a relatively orderly sequence, with later abilities, skills and knowledge building on those already acquired.
c) Development proceeds at varying rates from child to child as well as unevenly within different areas of each child’s functioning.
d) Early experiences have both cumulative and delayed effects on individual children’s development; optimal periods exist for certain types of development and learning.
e) Development proceeds in predictable directions toward greater complexity, organization and internalization.
f) Development and learning occur in and are influenced by multiple social and cultural contexts.
g) Children are active learners, drawing on direct physical and social experiences as well as culturally transmitted knowledge to construct their own understandings of the world around them.
h) Development and learning result from interaction of biological maturation and the environment, which includes both the physical and social worlds that children live in.
i) Play is an important vehicle for children’s social, emotional and cognitive development, as well as a reflection of their development.
j) Development advances when children have the opportunities to practice newly acquired skills as well as when they experience a challenge just beyond the level of their present mastery.
k) Children demonstrate different modes of knowing and learning and different ways of representing what they know.
l) Children develop and learn best in the context of a community where they are safe and valued, their physical needs are met, and they feel psychologically secure.

2. The position statement of the NAEYC (1996) provides the following guidelines for constructing an appropriate curriculum:

a) Developmentally appropriate curriculum provides for all areas of a child's development: physical, emotional, social, linguistic, aesthetic, and cognitive.

b) Curriculum includes a broad range of content across disciplines that is socially relevant, intellectually engaging, and personally meaningful to children.

c) Curriculum builds upon what children already know and are able to do (activating prior knowledge) to consolidate their learning and to foster their acquisition of new concepts and skills.

d) Effective curriculum plans frequently integrate across traditional subject-matter divisions to help children make meaningful connections and provide opportunities for rich conceptual development; focusing on one subject is also a valid strategy at times.

e) Curriculum promotes the development of knowledge and understanding, processes and skills, as well as the dispositions to use and apply skills and to go on learning.

f) Curriculum content has intellectual integrity, reflecting the key concepts and tools of inquiry of recognized disciplines in ways that are accessible and achievable for young children, ages 3 through 8. Children directly participate in study of the disciplines, for instance, by conducting scientific experiments, writing, performing, solving mathematical problems, collecting and analyzing data, collecting oral history, and performing other roles of experts in the disciplines.

g) Curriculum provides opportunities to support children's home culture and language while also developing all children's abilities to participate in the shared culture of the program and the community.

h) Curriculum goals are realistic and attainable for most children in the designated age range for which they are designed.

i) When used, technology is physically and philosophically integrated in the classroom curriculum and teaching.

Making the case for a research-based approach in language and literacy, this joint position statement focuses on children as active constructors of meaning. It argues that adults play a critical role in children's literacy development – engaging their interest, creating challenging but achievable goals and expectations, and supporting their learning.

Among key points, the statement emphasizes:

- Young children need to engage in learning about literacy through meaningful experiences.
- Reading and writing should be viewed as a continuum; children do not progress along the developmental continuum in a rigid sequence.
- Given the individual differences among children, teachers should come to understand the difference between normal variation in developing literacy skills and extraordinary variation (for example, when intervention is necessary).
- Teachers need to regularly and systematically use multiple indicators to assess and monitor children's progress in reading and writing.

The research-based position statement stresses that for children to become skilled readers (and writers), they need to develop a rich language and conceptual knowledge base, a broad and deep vocabulary, and verbal reasoning abilities to understand messages conveyed through print.

At the same time, it recognizes that children also must develop code-related skill: an understanding that spoken words are composed of smaller elements of speech (phonological awareness), the idea that letters represent these sounds (the alphabetic principle), and the knowledge that there are systematic correspondences between sounds and spellings.

But to attain a high level of skill, young children need many opportunities to develop oral language, reading and writing interactively, not in isolation. Meaning, not sounds or letters, drives children's earliest experiences with print. Therefore, the position statement points out, although specific skills like alphabet knowledge are important to literacy development, children must acquire these skills in co-ordination and interaction with meaningful experiences.

The position statement ends with a developmental continuum that is defined grade by grade, preschool to third grade. "The grade connected markers or goals communicate to teachers that there is such a thing as a developmentally appropriate goal while emphasizing the importance of seeing children as individuals within the continuum" (Neuman, Copple, & Bredekamp, 2000, p. 2).

### Considerations for Program Delivery

4. **Key Elements in successful programs for improving literacy achievement in middle and high schools** (Biancarosa & Snow, 2004, pp. 16-21).

   According to a recently released report on middle and high school literacy prepared for the Carnegie Corporation of New York, 15 key elements were identified in successful programs for improving adolescent literacy achievement in middle and high schools:

   1. **Direct, explicit comprehension instruction.** Teachers should teach comprehension approaches explicitly by explaining to students how and when to use them. Teachers should also explain why they are teaching particular strategies and have students employ them in multiple contexts with texts from a variety of genres and subject areas.

   2. **Effective instructional principles embedded in subject content.** Language arts teachers need to expand their instruction to include approaches and texts that will facilitate not only comprehension but also learning from texts across subject areas. Teachers of other subject areas should reinforce the reading and writing strategies that are most effective for their subject.

   3. **Motivation and self-directed learning.** Building students' choice into instruction helps keep students engaged.

   4. **Text-based collaborative learning.** When students work in small groups they should interact with each other around a text or texts.

   Learning is decentralized in small groups because the meaning drawn from a text is negotiated through a group process.

   5. **Strategic tutoring.** Students who struggle with fluency and decoding and students needing short-term focused help benefit the most from individual tutoring where they learn “how to learn.”

   6. **Diverse texts.** Students need access to different texts that present a wide range of topics at a variety of reading levels.

   7. **Intensive writing.** Students need time to improve their writing skills; this also helps improve their reading comprehension.

   8. **A technology component.** Technology should be used both as an instructional tool and an instructional topic.

   9. **Ongoing formative assessment of students.** The best instructional improvements are informed by an ongoing assessment of students' strengths and needs.

Integrating Research into Practice

**Through the Curriculum**

The English Language Arts K to 7 curriculum reflects current research in literacy instruction. Successful literacy programs include the following 10 essential characteristics:

1. Literacy learning in Kindergarten is critical to later success.

2. A comprehensive and co-ordinated literacy program is crucial.

3. Professional learning communities support a comprehensive and co-ordinated literacy program.

4. An extended and uninterrupted block of time for literacy learning is essential.

5. Literacy experiences must strongly support student engagement.

6. Ongoing assessments are used to drive instruction and support learning.

7. Focussed teaching is essential.

8. A resource-rich environment makes a big difference.

9. Struggling and/or reluctant literacy learners benefit from research-based interventions.

10. Successful family-school partnerships improve student literacy learning.
1. **Literacy learning in Kindergarten is critical to later success.**

“Research consistently points to the importance of ensuring that children enter first grade with the attitudes and knowledge about literacy that will enable them to succeed in learning to read” (Snow, Burns, & Griffin, 1998, p. 194).

“Enhancing children’s letter knowledge and phonological awareness skills should be a priority goal in the kindergarten classroom” (Snow, Burns, & Griffin, 1998, p. 188).

“There is accumulated evidence that instructing children in phonemic awareness activities in kindergarten (and first grade) enhances reading achievement. Although a large number of children will acquire phonemic awareness skills as they learn to read, an estimated 20% will not without additional training” (NAEYC, 1998, p. 6).

Oral language is the foundation on which literacy is built. Throughout their elementary years, students’ oral language abilities are interwoven with learning to read and write. In fact, work reported by Dickinson and Tabors (2001) indicates that children’s Kindergarten vocabulary levels impact their ability to decode and are highly predictive of their later reading comprehension to Grade 7.

In addition to the importance of oral language in Kindergarten, research also emphasizes two additional goals: “The first is to ensure that students leave kindergarten familiar with the structural elements and organization for print. By the end of kindergarten, children should be familiar with the forms and format of books and other print resources and be able to recognize and write most of the alphabet; they should also have some basic phonemic awareness; that is, the understanding of the segmentability of spoken words into smaller units. The second major goal of kindergarten is to establish perspectives and attitudes on which learning about and from print depend; it includes motivating children to be literate and making them feel like successful learners” (Snow, Burns, & Griffin, 1998, p. 179).

2. **A comprehensive and co-ordinated literacy program is crucial.**

The ability to read and write does not develop naturally without careful planning and instruction (NAEYC, 1998, p. 3).

Students spend most of their language arts block actively engaged in activities that support authentic reading, writing and discussion. “There is wide agreement among literacy researchers that students who read more become more proficient in reading fluency and comprehension as well as general vocabulary and cognitive development (Worthy, 2002, p. 568, citing Stanovitch, 1986).

“...many excellent third grade readers will falter or fail in later grade academic tasks if the teaching of reading is neglected in the middle and secondary grades” (Biancarosa & Snow, 2004, p. 1).

All teachers, at all grades, teaching all subjects, are teachers of literacy. Teachers do not just teach content knowledge but also ways of reading and writing specific to that subject area. Effective literacy programs see all teachers across subject and grade levels co-ordinating their instruction to reinforce important strategies and concepts.

Students use reading, writing, and talking to learn content and continue to learn how to read, write, and converse. They also become more thoughtful; they learn to think more critically.

Media literacy and critical literacy must be strongly linked. Students must be supported in developing both expressive and receptive language skills using media such as film, television, and the Internet. Although it is not explicitly stated in the curriculum (because of the expanded definition of text), teachers are encouraged to use film, television, and the
Internet as sources of learning to address the Prescribed Learning Outcomes.

Students must see reading and writing as purposeful and reciprocal processes and must see themselves as successful literacy learners across all subject areas. Students develop these skills, strategies, and dispositions toward literacy learning from working with knowledgeable teachers, parents, and peers.

3. **Professional learning communities support a comprehensive and co-ordinated literacy program.**

   “Teacher teams that meet regularly allow teachers to plan for consistency in instruction across subject areas, which is an important step toward a comprehensive and coordinated literacy program” (Biancarosa & Snow, 2004, p. 21).

When teachers have the opportunity to work together to reflect on and about their practice, to co-plan, and to discuss student work in terms of standards, enhanced student learning follows. Effective professional learning communities engage in the following activities:

- reflection/dialogue on practice
- implementation of new teaching strategies
- use of relevant data to inform deliberations
- sustained focus on a topic of study
- participant control over group procedures and content, ensuring that all viewpoints are valued
- time for teachers to study together (Taylor & Richardson, 2001, p. 3)

In intermediate grades where students are taught by a variety of teachers, co-ordinating literacy instruction across content areas is essential to strengthen and support learning. Furthermore, communication between teachers results in a holistic view of students’ learning.

4. **An extended and uninterrupted block of time for literacy learning is essential.**

   “A good first principle in organizing a school more efficiently is to provide every classroom with at least two and one-half hours of uninterrupted time…” (Allington, 2006, p. 50).

   Teachers who allocate more time to reading and language arts are the teachers whose students show the greatest gains in literacy development (Allington & Cunningham, 1996, p. 106).

Long blocks of uninterrupted time are most beneficial for literacy success. Often these blocks of time are used for curriculum integration. The integration fosters student motivation and engagement and adds a coherence to the instructional day (Allington & Johnson, 2001, p. 161).

Reading deeply and writing thoughtfully take time. The long blocks of time also support the work of exemplary teachers who make greater use of longer assignments allowing students to delve deeply. In such classrooms, research indicates that students read whole books, completed individual and small-group research projects, and worked on tasks that integrated several content areas (e.g., reading, writing, and social studies) (Allington, 2002).

Whether in small groups (e.g., guided reading, book clubs, literature circles), large groups, or individually, students should spend most of their time in activities that support authentic reading and writing, the writing often in response to the reading. “In many exemplary classrooms, children are reading and writing for half the day!” (Allington, 2006, p. 184).
5. Literacy experiences must strongly support student engagement.

“The amount of time students are truly engaged in learning is the most potent predictor of literacy learning” (Allington & Cunningham, 1996, p. 118).

Students will be more engaged when “provided time for active, creative responses to texts using discussion and multiple modes of response (writing, sketching, dramatizing, singing, projects, and so on) to promote critical analysis and creation of a range of new literacies” (McLaughlin & DeVoogd, 2004, p. 37).

“One of the best ways to increase student thinking is to make sure you have a curriculum that provides kids with things worth thinking about and a curriculum that offers kids enough depth that they can actually think” (Allington, as cited in Preller, 2001, p. 1).

Several factors determine engagement. These include

- effective classroom management (including routines and classroom organization)
- a positive sense of community
- motivating and doable classroom experiences
- task difficulty and task interest
- engaging the emotions of students
- students involved in setting their own learning goals and determining how to reach those goals
- multiple ways of demonstrating understanding

Students become and remain more engaged when they are provided with meaningful and relevant, while challenging but achievable literacy experiences.

6. Ongoing assessments are used to drive instruction and support learning.

“The best judges of students’ literacy development are classroom teachers who observe them engaged in literacy tasks day after day” (Johnston, as cited in Worthy, Broaddus, & Ivey, 2001, p. 22).

“Good assessment always begins with a vision of success” (Stiggins in Spandel, 2001, p.1).

Teachers use a combination of assessments, including observations of naturally occurring classroom events along with specifically devised assessment tools (McGee & Richgels, 2003, p. 33).

The more authentic the performance task, the more readily students see a reason for their learning (McTighe & O’Connor, 2005, p. 17).

“Good formative assessment can have positive effects on student learning and achievement particularly when the assessments are linked to clear criteria” (Biancarosa, 2005, p. 21).

Daily formative assessments, often informal, are used to identify student progress, to determine the next goal for student learning, to plan interventions, to identify the need for alternative resources or techniques, and to encourage students to reflect on their learning.

The line between assessment and instruction is often seamless as teachers use daily classroom interactions and assignments as the basis for making judgments and providing feedback to students, often based on co-created criteria. Feedback improves learning when it gives each student specific guidance on both strengths and weaknesses.
Considerations for Program Delivery

Teachers also need to consider the following points:

- Students should use metacognitive strategies for self-assessment and to think about their learning.
- Students building and setting criteria supports self- and peer assessment.
- Summative assessments measure students’ overall progress toward Prescribed Learning Outcomes.

7. Focussed teaching is essential.

“All children need instruction, but some children need incredible amounts of close, personal instruction and repeated demonstrations of how readers and writers go about reading and writing” (Allington, 1994, p. 23).

“Students need more structured modeling, demonstrating, and coaching and less assigning” (Allington & Cunningham, 1996, p. 45).

Students benefit from direct explicit instruction especially in the area of comprehension (Biancarosa & Snow, 2004).

“All children need instruction, but some children need incredible amounts of close, personal instruction and repeated demonstrations of how readers and writers go about reading and writing” (Allington, 1994, p. 23).

“Students need more structured modeling, demonstrating, and coaching and less assigning” (Allington & Cunningham, 1996, p. 45).

Students benefit from direct explicit instruction especially in the area of comprehension (Biancarosa & Snow, 2004).

“Attention therefore should be given not only to increasing the amount of writing instruction students receive and the amount of writing they do, but also to increasing the quality of the writing instruction and assignments” (Biancarosa & Snow, 2004, p. 19).

“The talk is respectful, supportive, and productive. The teachers not only model the kinds of conversations that they expect, but creating these conversational communities becomes a focus throughout the year” (E. Close, 2001, p. 1).

Teaching has a clear focus, is matched to the learning needs of each student and moves the student toward more independence. Using the Gradual Release of Responsibility model (Pearson & Gallagher, 1983), students move from a high level of teacher support with the teacher modelling, demonstrating, and explaining strategies, to student-guided practice, and then to independent practice.

Developmentally appropriate teaching involves work with whole class strategic instruction, small flexible groups based on student needs and interests, and individual application.

Proficient reading in third grade and above is sustained and enhanced by teachers who provide deep and wide opportunities to read, introduce and teach different kinds of texts, and support students’ reasoning about text. In addition, teachers need to focus their instruction on students’ acquisition of new knowledge and vocabulary, particularly through wide reading, but also through explicit attention to acquiring networks of new concepts through instruction (adapted from CIERA, 1998, p. 1).

Explicit writing instruction is crucial at all grades. Through writing mini-lessons, students learn the craft of writing as they read, listen, discuss, and write, often in response to good literature.

8. A resource-rich environment makes a big difference.

“...student choice and control in reading materials and activities foster both reading enjoyment and engagement” (Worthy, Broaddus, & Ivey, 2001, p. 58).

“This multi-sourced instruction allows students to work in materials of appropriate complexity and supports a high level of engagement, a sense of ownership, and a personalization of instruction” (E. Close, 2001, p. 2).

A print-rich environment is crucial. Books, magazines, and newspapers should be abundant. All students, reading at all different reading levels, need to be able to access interesting works of many different genres that tie in with cross-curricular studies and interests – texts they can read and want to read.
Students in classrooms with library centres read about 50 percent more than other students without such centres (Allington & Cunningham, 1996, p. 97). In fact, Allington (2006, p. 71) found that the most successful teachers had about 1500 books in their classrooms. Allington (2006, p. 70) recommends at least 500 different books in every classroom with those split evenly between narratives and informational books and about equally between books that are on or near grade-level difficulty and books that are below grade-level.

Information technology and multimedia resources provide new ways to access information and new forms of learning.

9. Struggling and/or reluctant literacy learners benefit from research-based interventions.

“At-risk and delayed readers have the best chance for success if classroom instruction and remedial instruction are not only of high quality but are also congruent” (Gaskins, 1998, p. 537).

Only 10% of struggling readers in the upper elementary grades struggle with decoding... while many more struggle with comprehension (Biancarosa & Snow, 2004, p. 3).

“Key elements of research-based interventions include: improving classroom instruction; enhancing access to intensive, expert instruction; expanding available instructional time; and availability of support for older struggling readers” (Allington, 2006, p. 141).

Many struggling readers in upper elementary grades have minimal or low-level comprehension but are excellent decoders. A much smaller number struggle with decoding, which ultimately affects reading comprehension as well. Still others can read very well but choose not to do so. Although they are described as aliterate, they too are struggling readers.

Unfortunately, research indicates that there are no quick fixes. Some students will take more time and more instruction. The goal for all readers is making meaning. Support and intervention work toward this goal.

10. Successful family-school partnerships improve student literacy learning.

Family involvement improves student achievement, attitudes towards learning and self-esteem (International Reading Association, 2002).

Research indicates that parent-school links in the area of literacy learning are key determinants of student success and this is true regardless of the family’s educational background or social status. “It is that connection between home and school, between knowledgeable teachers and willing parents, that can make all the difference in children’s literacy learning” (Rasinski, 1995, p. 5).

Summary

Effective teachers make instructional decisions based on their knowledge of literacy learning (based on sound research), clearly defined developmentally appropriate learning outcomes, and their knowledge of individual student’s strengths and needs. High standards, rich, meaningful, and engaging content, developmentally appropriate teaching practices, and assessment that drives instruction work together to scaffold successful language arts learning.

Successful intervention complements high-quality classroom instruction; it does not replace it. This is true for struggling readers of all ages.

PRESCRIBED LEARNING OUTCOMES

English Language Arts Grade 7
Prescribed Learning Outcomes are content standards for the provincial education system; they are the prescribed curriculum. Clearly stated and expressed in measurable and observable terms, learning outcomes set out the required knowledge, skills, and attitudes – what students are expected to know and be able to do – by the end of the specified course.

Understanding the Prescribed Learning Outcomes

Schools have the responsibility to ensure that all Prescribed Learning Outcomes in this curriculum are met; however, schools have flexibility in determining how delivery of the curriculum can best take place.

It is expected that student achievement will vary in relation to the learning outcomes. Evaluation, reporting, and student placement with respect to these outcomes are dependent on the professional judgment and experience of teachers, guided by provincial policy.

Prescribed Learning Outcomes for English Language Arts K to 7 are presented by curriculum organizer and suborganizer, and are coded alphanumerically for ease of reference; however, this arrangement is not intended to imply a required instructional sequence.

This document contains the Prescribed Learning Outcomes for Grade 7. Also included for reference are the Prescribed Learning Outcomes for Grade 6.

Wording of the Prescribed Learning Outcomes

All learning outcomes complete the stem, “It is expected that students will…”

When used in a Prescribed Learning Outcome, the word “including” indicates that any ensuing item must be addressed. Lists of items introduced by the word “including” represent a set of minimum requirements associated with the general requirement set out by the outcome. The lists are not necessarily exhaustive, however, and teachers may choose to address additional items that also fall under the general requirement set out by the outcome.

Conversely, the abbreviation “e.g.” (for example) in a Prescribed Learning Outcome indicates that the ensuing items are provided for illustrative purposes or clarification, and are not required. Presented in parentheses, the list of items introduced by “e.g.” is neither exhaustive nor prescriptive, nor is it put forward in any special order of importance or priority. Teachers are free to substitute items of their own choosing that they feel best address the intent of the Prescribed Learning Outcome.

Domains of Learning

Prescribed Learning Outcomes in BC curricula identify required learning in relation to one or more of the three domains of learning: cognitive, psychomotor, and affective. The following definitions of the three domains are based on Bloom’s taxonomy.

The cognitive domain deals with the recall or recognition of knowledge and the development of intellectual abilities. The cognitive domain can be further specified as including three cognitive levels: knowledge, understanding, and application, and higher mental processes. These levels are determined by the verb used in the learning outcome, and illustrate how student learning develops over time.

- Knowledge includes those behaviours that emphasize the recognition or recall of ideas, material, or phenomena.
- Understanding and application represents a comprehension of the literal message contained in a communication, and the ability to apply an appropriate theory, principle, idea, or method to a new situation.
- Higher mental processes include analysis, synthesis, and evaluation. The higher mental processes level subsumes both the knowledge and the understanding and application levels.

The affective domain concerns attitudes, beliefs, and the spectrum of values and value systems.

The psychomotor domain includes those aspects of learning associated with movement and skill demonstration, and integrates the cognitive and affective consequences with physical performances.
PREScribed LEarning OUTCOMES

By Grade
GRADE 6

Prescribed Learning Outcomes: English Language Arts

It is expected that students will:

**Oral Language (Speaking and Listening)**

**Purposes (Oral Language)**

A1 use speaking and listening to interact with others for the purposes of
   - contributing to group success
   - discussing and comparing ideas and opinions (e.g., debating)
   - improving and deepening comprehension
   - discussing concerns and resolving problems
   - completing a variety of tasks

A2 use speaking to explore, express, and present a range of ideas, information, and feelings for different purposes and audiences, by
   - using prior knowledge and/or other sources of evidence
   - staying on topic in focussed discussions
   - presenting in a clear, focussed, organized, and effective manner
   - explaining and effectively supporting a viewpoint

A3 listen purposefully to understand and analyse ideas and information, by
   - summarizing and synthesizing
   - generating questions
   - visualizing and sharing
   - making inferences and drawing conclusions
   - interpreting the speaker’s verbal and nonverbal messages, purposes, and perspectives
   - analysing
   - ignoring distractions
**Prescribed Learning Outcomes: English Language Arts**

**Strategies (Oral Language)**

**A4** select and use strategies when interacting with others, including
- accessing prior knowledge
- making and sharing connections
- asking questions for clarification and understanding
- taking turns as speaker and listener
- paraphrasing to clarify meaning

**A5** select and use strategies when expressing and presenting ideas, information, and feelings, including
- setting a purpose
- accessing prior knowledge
- generating ideas
- making and sharing connections
- asking questions to clarify and confirm meaning
- organizing information
- practising delivery
- self-monitoring and self-correcting in response to feedback

**A6** select and use strategies when listening to make and clarify meaning, including
- accessing prior knowledge
- making predictions about content before listening
- focussing on the speaker
- listening for specifics
- generating questions
- recalling, summarizing, and synthesizing
- drawing inferences and conclusions
- distinguishing between fact and opinion
- visualizing
- monitoring comprehension

**Thinking (Oral Language)**

**A7** demonstrate enhanced vocabulary knowledge and usage

**A8** use speaking and listening to respond, explain, and provide supporting evidence for their connections to texts

**A9** use speaking and listening to improve and extend thinking, by
- questioning and speculating
- acquiring new ideas
- analysing and evaluating ideas
- developing explanations
- considering alternative viewpoints
- summarizing and synthesizing
- problem solving

**A10** reflect on and assess their speaking and listening, by
- referring to class-generated criteria
- considering and incorporating peer and adult feedback
- setting goals and creating a plan for improvement
- taking steps toward achieving goals
Features (Oral Language)
A11 recognize and apply the features of oral language to convey and derive meaning, including
- context (e.g., audience, purpose, situation)
- text structure
- a variety of sentence lengths, structures, and types
- smooth transitions and connecting words
- syntax (i.e., grammar and usage)
- diction
- nonverbal communication
- receptive listening posture
A12 recognize the structures and patterns of language in oral texts, including
- literary devices
- sound devices
- structural sequencing cues
- idiomatic expressions

Reading and Viewing

Purposes (Reading and Viewing)
B1 read fluently and demonstrate comprehension and interpretation of a range of grade-appropriate literary texts, featuring variety in theme and writing techniques, including
- stories from Aboriginal and other cultures
- literature from Canada and other countries
- short stories and novels exposing students to unfamiliar contexts
- short plays that are straightforward in form and content
- poetry in a variety of forms
B2 read fluently and demonstrate comprehension of grade-appropriate information texts with some specialized language, including
- non-fiction books
- textbooks and other instructional materials
- visual or graphic materials
- reports and articles from magazines and journals
- reference materials
- appropriate web sites
- instructions and procedures
- advertising and promotional materials
B3 read and reread just-right texts for at least 30 minutes daily for enjoyment and to increase fluency and comprehension
B4 demonstrate comprehension of visual texts with specialized features (e.g., visual components of media such as magazines, newspapers, web sites, comic books, broadcast media, videos, advertising, and promotional materials)
### Grade 6, continued

**Prescribed Learning Outcomes: English Language Arts**

#### Strategies (Reading and Viewing)

- **B5** select and use strategies before reading and viewing to develop understanding of text, including
  - setting a purpose and considering personal reading goals
  - accessing prior knowledge to make connections
  - making predictions
  - asking questions
  - previewing texts

- **B6** select and use strategies during reading and viewing to construct, monitor, and confirm meaning, including
  - predicting
  - making connections
  - visualizing
  - asking and answering questions
  - making inferences and drawing conclusions
  - using ‘text features’
  - self-monitoring and self-correcting
  - figuring out unknown words
  - reading selectively
  - determining the importance of ideas/events
  - summarizing and synthesizing

- **B7** select and use strategies after reading and viewing to confirm and extend meaning, including
  - self-monitoring and self-correcting
  - generating and responding to questions
  - making inferences and drawing conclusions
  - reflecting and responding
  - visualizing
  - using ‘text features’ to locate information
  - using graphic organizers to record information
  - summarizing and synthesizing

#### Thinking (Reading and Viewing)

- **B8** respond to selections they read or view, by
  - expressing opinions and making judgments supported by explanations and evidence
  - explaining connections (text-to-self, text-to-text, and text-to-world)
  - identifying personally meaningful selections, passages, and images

- **B9** read and view to improve and extend thinking, by
  - analysing texts and developing explanations
  - comparing various viewpoints
  - summarizing and synthesizing to create new ideas

- **B10** reflect on and assess their reading and viewing, by
  - referring to class-generated criteria
  - setting goals and creating a plan for improvement
  - taking steps toward achieving goals
## Prescribed Learning Outcomes: English Language Arts

### Features (Reading and Viewing)
B11 explain how structures and features of text work to develop meaning, including
- **form**, function, and **genre** of text (e.g., brochure about smoking to inform students; genre is persuasive)
- ‘text features’ (e.g., copyright, table of contents, headings, index, glossary, diagrams, sidebars, hyperlinks, pull-quotes)
- literary elements (e.g., characterization, mood, viewpoint, foreshadowing, conflict, protagonist, antagonist, theme)
- non-fiction elements (e.g., topic sentence, development of ideas with supporting details, central idea)
- literary devices (e.g., imagery, onomatopoeia, simile, metaphor)
- idiomatic expressions

### Writing and Representing

#### Purposes (Writing and Representing)

C1 write a variety of clear, focussed **personal writing** for a range of purposes and audiences that demonstrates connections to personal experiences, ideas, and opinions, featuring
- clearly developed **ideas** by using effective supporting details, explanations, comparisons, and insights
- **sentence fluency** through sentence variety and lengths with increasing rhythm and flow
- effective **word choice** through the use of an increasing number of new, varied, and powerful words
- an **honest voice**
- an **organization** that is meaningful, logical, and effective, and showcases a central idea or **theme**

C2 write a variety of effective **informational writing** for a range of purposes and audiences that communicates ideas to inform or persuade, featuring
- clearly developed **ideas** by using focussed and useful supporting details, analysis, and explanations
- **sentence fluency** through clear, well-constructed sentences that demonstrate a variety of lengths and patterns, with an increasingly fluid **style**
- effective **word choice** through the use of new vocabulary, words selected for their specificity, and powerful adverbs and verbs
- a **voice** demonstrating an appreciation and interest in the topic
- an **organization** with an inviting lead that clearly indicates the purpose, and flows smoothly with logically sequenced paragraphs or sections to a satisfying conclusion that summarizes the details

C3 write a variety of **imaginative writing** for a range of purposes and audiences, including short stories, passages, and poems modelled from literature, featuring
- well-developed **ideas** through the use of interesting **sensory detail**
- **sentence fluency** through a variety of sentence lengths and patterns, with increasing fluidity
- effective **word choice** by using engaging figurative and sensory language
- an authentic **voice**
- an **organization** that includes an enticing opening, followed by a sequence of effective detail which elaborates events, ideas, and images, that lead to an imaginative or interesting conclusion

C4 create meaningful visual representations for a variety of purposes and audiences that communicate personal response, information, and ideas relevant to the topic, featuring
- development of **ideas** using clear, focussed, and useful details, and by making connections to personal feelings, experiences, opinions, and information
- an expressive **voice**
- an **organization** in which key ideas are evident
### Prescribed Learning Outcomes: English Language Arts

#### Strategies (Writing and Representing)

**C5** select and use strategies before writing and representing, including
- setting a purpose
- identifying an audience, *genre*, and *form*
- analysing examples of successful writing and representing in different *forms* and *genres* to identify key criteria
- developing class-generated criteria
- generating, selecting, developing, and organizing ideas from personal interest, prompts, *texts*, and/or research

**C6** select and use strategies during writing and representing to express and refine thoughts, including
- referring to class-generated criteria
- analysing models of literature
- accessing multiple sources of information
- consulting reference materials
- considering and applying feedback from conferences to revise *ideas*, *organization*, *voice*, *word choice*, and *sentence fluency*
- ongoing revising and editing

**C7** select and use strategies after writing and representing to improve their work, including
- checking their work against established criteria
- reading aloud and listening for fluency
- revising to enhance writing traits (e.g., *ideas*, *sentence fluency*, *word choice*, *voice*, *organization*)
- editing for conventions (e.g., grammar and usage, capitalization, punctuation, spelling)

#### Thinking (Writing and Representing)

**C8** use writing and representing to express personal responses and relevant opinions about experiences and *texts*

**C9** use writing and representing to extend thinking, by
- developing explanations
- analysing the relationships in ideas and information
- exploring new ideas (e.g., examining alternative viewpoints, transposing writing from one *form* to another)

**C10** reflect on and assess their writing and representing, by
- referring to class-generated criteria
- setting goals and creating a plan for improvement
- taking steps toward achieving goals

#### Features (Writing and Representing)

**C11** use the features and conventions of language to express meaning in their writing and representing, including
- complete simple, compound, and complex sentences
- subordinate (i.e., dependent) clauses
- comparative and superlative forms of adjectives
- past, present, and future tenses
- effective paragraphing
- effective use of punctuation and quotation marks
- conventional Canadian spelling for familiar and frequently used words
- spelling unfamiliar words by applying strategies (e.g., phonic knowledge, use of common spelling patterns, dictionaries, thesaurus)
- legible writing appropriate to context and purpose

### Prescribed Learning Outcomes: English Language Arts

#### Strategies (Reading and Viewing)

**B5** select and use various **strategies** before reading and viewing to develop understanding of **text**,
including
- setting a purpose and considering personal reading goals
- accessing prior knowledge to make and share connections
- making predictions
- asking questions
- previewing **texts**

**B6** select and use various **strategies** during reading and viewing to construct, monitor, and confirm meaning, including
- predicting
- making connections
- visualizing
- asking and answering questions
- making inferences and drawing conclusions
- using **‘text features’**
- self-monitoring and self-correcting
- figuring out unknown words
- reading selectively
- determining the importance of ideas/events
- summarizing and synthesizing

**B7** select and use various **strategies** after reading and viewing to confirm and extend meaning, including
- self-monitoring and self-correcting
- generating and responding to questions
- making inferences and drawing conclusions
- reflecting and responding
- visualizing
- using **‘text features’** to locate information
- using **graphic organizers** to record information
- summarizing and synthesizing

#### Thinking (Reading and Viewing)

**B8** respond to selections they read or view, by
- expressing opinions and making judgments supported by reasons, explanations, and evidence
- explaining connections (**text**-to-self, **text**-to-**text**, and **text**-to-world)
- identifying personally meaningful selections, passages, and images

**B9** read and view to improve and extend thinking, by
- analysing and evaluating ideas and information
- comparing various viewpoints
- summarizing and synthesizing to create new ideas

**B10** reflect on and assess their reading and viewing, by
- referring to class-generated criteria
- setting goals and creating a plan for improvement
- taking steps toward achieving goals
Features (Reading and Viewing)

B11 explain how structures and features of text work to develop meaning, including
- form, function, and genre of text (e.g., brochure about smoking to inform students; genre is persuasive)
- ‘text features’ (e.g., copyright, table of contents, headings, index, glossary, diagrams, sidebars, hyperlink, pull-quotes)
- literary elements (e.g., characterization, mood, viewpoint, foreshadowing, conflict, protagonist, antagonist, theme)
- non-fiction elements (e.g., topic sentence, development of ideas with supporting details, central idea)
- literary devices (e.g., imagery, onomatopoeia, simile, metaphor, symbolism, personification)
- idiomatic expressions

Writing and Representing

Purposes (Writing and Representing)

C1 write a variety of clear, focussed personal writing for a range of purposes and audiences that demonstrates connections to personal experiences, ideas, and opinions, featuring
- clearly developed ideas by using effective supporting details, explanations, analysis, and insights
- sentence fluency through sentence variety and patterns with increasingly natural rhythm and flow
- effective word choice through the use of precise nouns, and powerful verbs and modifiers
- an honest and engaging voice
- an organization that is meaningful, logical, and effective, and showcases a central idea or theme

C2 write a variety of effective informational writing for a range of purposes and audiences that communicates ideas to inform or persuade, featuring
- clearly developed ideas by using focussed and useful supporting details, analysis, and explanations
- sentence fluency through strong, well-constructed sentences that demonstrate a variety of lengths and patterns, with an increasingly fluid style
- effective word choice by using content words, precise nouns, and powerful verbs and modifiers
- a voice demonstrating an appreciation and interest in the topic
- an organization that includes an inviting lead that clearly indicates the purpose, followed by a well-developed and clear sequence of paragraphs or sections that lead to a strong conclusion

C3 write a variety of imaginative writing for a range of purposes and audiences, including short stories, passages, and poems modelled from literature, featuring
- strategically developed ideas by using interesting sensory detail
- sentence fluency by using a variety of sentence lengths and patterns, with increasing fluidity
- effective word choice by using purposeful figurative and sensory language with some sophistication and risk-taking
- an engaging and authentic voice
- an organization that includes an enticing opening, followed by a purposeful sequence of well-developed ideas that lead to an imaginative or interesting conclusion

C4 create meaningful visual representations for a variety of purposes and audiences that communicate a personal response, information, and ideas relevant to the topic, featuring
- development of ideas by making connections to personal feelings, experiences, opinions, and information
- an expressive and individualistic voice
- an organization in which key ideas are evident

STUDENT ACHIEVEMENT

English Language Arts Grade 7
This section of the document contains information about classroom assessment and student achievement, including specific Achievement Indicators to assist in the assessment of student achievement in relation to each Prescribed Learning Outcome. Also included in this section are Key Elements, which provide an overview of the English Language Arts curriculum and the pedagogical understandings required for instruction and delivery.

UNDERSTANDING THE KEY ELEMENTS

Key Elements provide an overview of the English Language Arts curriculum and the pedagogical understandings required for instruction and delivery.

UNDERSTANDING THE ACHIEVEMENT INDICATORS

To support the assessment of provincially prescribed curricula, this IRP includes sets of Achievement Indicators in relation to each learning outcome. The Achievement Indicators are arranged by curriculum organizer and suborganizer for each grade; however, this order is not intended to imply a required sequence of instruction and assessment.

Achievement Indicators define the specific level of knowledge acquired, skills applied, or attitudes demonstrated or by the student in relation to a corresponding Prescribed Learning Outcome. They describe what evidence to look for to determine whether or not a student has fully met the intent of the learning outcome.

In some cases, Achievement Indicators may also include suggestions as to the type of task that would provide evidence of having met the learning outcome (e.g., problem solving; a constructed response such as a list, comparison, analysis, or chart; a product created and presented such as a report, poster, or model; a particular skill demonstrated).

Achievement Indicators support the principles of assessment for learning, assessment as learning, and assessment of learning. They provide teachers and parents with tools that can be used to reflect on what students are learning, as well as provide students with a means of self-assessment and ways of defining how they can improve their own achievement.

Achievement Indicators are not mandatory; they are suggestions only, provided to assist in the assessment of how well students achieve the Prescribed Learning Outcomes.

Achievement Indicators may be useful to provincial examination development teams and inform the development of exam items. However, examination questions, item formats, exemplars, rubrics, or scoring guides will not necessarily be limited to the Achievement Indicators included in the Integrated Resource Packages.

Specifications for provincial examinations are available online at www.bced.gov.bc.ca/exams/specs/
ASSessment for Learning is criterion-referenced, in which a student’s achievement is compared to established criteria rather than to the performance of other students. Criteria are based on Prescribed Learning Outcomes, as well as on Suggested Achievement Indicators or other learning expectations.

Students benefit most when assessment feedback is provided on a regular, ongoing basis. When assessment is seen as an opportunity to promote learning rather than as a final judgment, it shows students their strengths and suggests how they can develop further. Students can use this information to redirect their efforts, make plans, communicate with others (e.g., peers, teachers, parents) about their growth, and set future learning goals.

Assessment for learning also provides an opportunity for teachers to review what their students are learning and what areas need further attention. This information can be used to inform teaching and create a direct link between assessment and instruction. Using assessment as a way of obtaining feedback on instruction supports student achievement by informing teacher planning and classroom practice.

Assessment as Learning
Assessment as learning actively involves students in their own learning processes. With support and guidance from their teacher, students take responsibility for their own learning, constructing meaning for themselves. Through a process of continuous self-assessment, students develop the ability to take stock of what they have already learned, determine what they have not yet learned, and decide how they can best improve their own achievement.

Although assessment as learning is student-driven, teachers can play a key role in facilitating how this assessment takes place. By providing regular opportunities for reflection and self-assessment, teachers can help students develop, practise, and become comfortable with critical analysis of their own learning.
**Assessment of Learning**

Assessment of learning can be addressed through summative assessment, including large-scale assessments and teacher assessments. These summative assessments can occur at the end of the year or at periodic stages in the instructional process.

Large-scale assessments, such as Foundation Skills Assessment (FSA) and Graduation Program exams, gather information on student performance throughout the province and provide information for the development and revision of curriculum. These assessments are used to make judgments about students’ achievement in relation to provincial and national standards.

Assessment of learning is also used to inform formal reporting of student achievement.

For more information about assessment for, as, and of learning, refer to the following resource developed by the Western and Northern Canadian Protocol (WNCP): *Rethinking Assessment with Purpose in Mind*.

This resource is available online at [www.wncp.ca/](http://www.wncp.ca/)

**Criterion-Referenced Assessment and Evaluation**

In criterion-referenced evaluation, a student’s performance is compared to established criteria rather than to the performance of other students. Evaluation in relation to prescribed curriculum requires that criteria be established based on the learning outcomes.

Assessment for Learning

- teacher assessment, student self-assessment, and/or student peer assessment

- criterion-referenced – criteria based on Prescribed Learning Outcomes identified in the provincial curriculum, reflecting performance in relation to a specific learning task

- involves both teacher and student in a process of continual reflection and review about progress

- teachers adjust their plans and engage in corrective teaching in response to formative assessment

Assessment as Learning

- self-assessment

- provides students with information on their own achievement and prompts them to consider how they can continue to improve their learning

- student-determined criteria based on previous learning and personal learning goals

- students use assessment information to make adaptations to their learning process and to develop new understandings

Assessment of Learning

- teacher assessment

- may be either criterion-referenced (based on Prescribed Learning Outcomes) or norm-referenced (comparing student achievement to that of others)

- information on student performance can be shared with parents/guardians, school and district staff, and other education professionals (e.g., for the purposes of curriculum development)

- used to make judgments about students’ performance in relation to provincial standards
Criteria are the basis for evaluating student progress. They identify, in specific terms, the critical aspects of a performance or a product that indicate how well the student is meeting the Prescribed Learning Outcomes. For example, weighted criteria, rating scales, or scoring guides (reference sets) are ways that student performance can be evaluated using criteria.

Wherever possible, students should be involved in setting the assessment criteria. This helps students develop an understanding of what high-quality work or performance looks like.

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Identify the Prescribed Learning Outcomes and Suggested Achievement Indicators (as articulated in this IRP) that will be used as the basis for assessment.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 2</td>
<td>Establish criteria. When appropriate, involve students in establishing criteria.</td>
</tr>
<tr>
<td>Step 3</td>
<td>Plan learning activities that will help students gain the attitudes, skills, or knowledge outlined in the criteria.</td>
</tr>
<tr>
<td>Step 4</td>
<td>Prior to the learning activity, inform students of the criteria against which their work will be evaluated.</td>
</tr>
<tr>
<td>Step 5</td>
<td>Provide examples of the desired levels of performance.</td>
</tr>
<tr>
<td>Step 6</td>
<td>Conduct the learning activities.</td>
</tr>
<tr>
<td>Step 7</td>
<td>Use appropriate assessment instruments (e.g., rating scale, checklist, scoring guide) and methods (e.g., observation, collection, self-assessment) based on the particular assignment and student.</td>
</tr>
<tr>
<td>Step 8</td>
<td>Review the assessment data and evaluate each student’s level of performance or quality of work in relation to criteria.</td>
</tr>
<tr>
<td>Step 9</td>
<td>Where appropriate, provide feedback and/or a letter grade to indicate how well the criteria are met.</td>
</tr>
<tr>
<td>Step 10</td>
<td>Communicate the results of the assessment and evaluation to students and parents/guardians.</td>
</tr>
</tbody>
</table>
STUDENT ACHIEVEMENT

Grade 7
The Key Elements section provides an overview of the important elements of the English Language Arts K to 7 document. It is divided into two parts:

- Overview
- Pedagogical Understandings for English Language Arts

**Overview**
The Overview describes the Enduring Understandings for a cluster of grades. These Enduring Understandings are the “big ideas” of the curriculum document, broad statements underlying the “why” of English Language Arts. They are more than goals for a unit or grade; they are the rationale for engaging in English Language Arts, and are embedded in the knowledge, skills, and attitudes described in the Prescribed Learning Outcomes.

In addition, the Overview includes a Snapshot which is derived from the Prescribed Learning Outcomes for a particular grade. The Snapshot offers a brief description of what students who fully meet expectations should know and be able to do. The Snapshot does not replace the Prescribed Learning Outcomes, and as such, is not legally required, but is included to give teachers an overview of expectations at each grade level.

**Pedagogical Understandings for English Language Arts**
Five interrelated components comprise the Pedagogical Understandings section. Foundational to the English Language Arts curriculum is the framework of the “Gradual Release of Responsibility,” whereby students gradually assume responsibility for independently demonstrating competency in a particular skill or process.

Secondly, a specific focus on metacognition is included in this section. Like the “Gradual Release of Responsibility,” metacognition is a concept that runs through the organizers and suborganizers of the English Language Arts document. Overt and explicit modelling, guiding, and supporting students in learning to “think about their thinking” is integral to English Language Arts K to 7.

Finally, this section contains specific information regarding the three organizers of this curriculum: oral language, reading and viewing, and writing and representing. Each of these components contains key research regarding oral language, reading, and writing, as well as an overview of skills, processes, contexts, and strategies appropriate to each grade. Students learn to speak, listen, read, and write through teacher modelling, demonstration, and practice in a variety of contexts, as well as by stepping back to identify what effective learners do to be successful and then applying that knowledge to their own learning.

Pedagogical Understandings for English Language Arts

Metacognition

Oral Language

Reading and Viewing

Writing and Representing
Grade 7 Overview

Enduring Understandings for Grades 4 to 7

- Meaning-making is a constructive and creative process.
- We learn about ourselves, others, and the world through speaking and listening, reading, and writing.
- Effective readers, writers, speakers, and listeners use a variety of strategies and skills to share, construct, clarify, and confirm meaning.
- We use talk, dialogue, and discussion to develop, synthesize, and clarify ideas.
- Oral, written, and visual communications have their own conventions. Awareness and use of these conventions make us better communicators.
- Playing and experimenting with language and creating original texts help us to appreciate the artistry of language.
- Successful learners reflect on their thinking and learning to find ways to improve.
- Good thinkers use interpretation, analysis, and evaluation to deepen thinking and enhance understanding.
- Critical thinkers consider points of view, examine bias, question the author’s purpose, and take context into account.
- An understanding of literature is key to an understanding of oneself, one’s community, and the world.

What students should know and be able to do

Refer to the Prescribed Learning Outcomes:

Oral Language

• create personal writing with clearly developed ideas that connects experiences, ideas, opinions, and feelings

What students should know and be able to do

Refer to the Prescribed Learning Outcomes:

Reading and Viewing

• communicate ideas and information through writing that is clear and focussed

What students should know and be able to do

Refer to the Prescribed Learning Outcomes:

Writing and Representing

• create imaginative writing that conveys meaning, featuring an authentic voice

Snapshot

Summary derived from the Prescribed Learning Outcomes for Grade 7

• interact with others to share ideas and opinions, complete tasks, and resolve problems or concerns

• present ideas, information, and feelings orally in informal and formal situations

• listen to recall, analyse, and synthesize ideas and information

• build on a repertoire of strategies to construct and confirm meaning

• read and view a variety of grade-appropriate texts with comprehension and fluency

• select and read books for enjoyment and comprehension, and to improve fluency

• explain their reactions and responses to text and make connections that require some inference and insight, citing a text, as appropriate

• use the features, structures, and patterns of language to make meaning from what they hear, read, and view

• write to extend thinking by developing explanations, analysing the relationship between ideas, and exploring new ideas

• use some features and conventions of language to enhance meaning and artistry

• reflect on and assess their learning, and set goals for improvement
PEDAGOGICAL UNDERSTANDINGS FOR ENGLISH LANGUAGE ARTS:
GRADUAL RELEASE OF RESPONSIBILITY

An apprenticeship approach to instruction applies to all language arts teaching. The Gradual Release of Responsibility (Pearson and Gallagher, 1983) diagram shown below outlines the process by which the teacher explicitly models a concept or strategy and, over time, apprentices the students into personalized application facilitated by metacognition and self-regulation.

**Gradual Release of Responsibility**

**Teacher Modelling**
- explains
- demonstrates
- thinks aloud

**Guided Practice**
- teacher and students practise
- teacher scaffolds the students’ attempts and gives feedback
  - students share their thinking with each other

**Independent Practice**
- students apply strategy on their own
- students receive feedback from teacher and other students

**Application of Strategy**
- students apply strategy to new situations
**Pedagogical Understandings for English Language Arts: Metacognition**

Metacognition is “thinking about thinking” which results in students’ individual understanding of their own learning processes. It involves the awareness and understanding of how one thinks and uses strategies as an effective learner. In English Language Arts K to 7, metacognitive strategies weave throughout the organizers and suborganizers of the curriculum document. Activities such as planning how to approach a given learning task, monitoring comprehension, and evaluating progress toward the completion of a task are metacognitive in nature. Metacognition involves:

- connecting new information to former knowledge
- analysing and reflecting on tasks
- selecting thinking strategies deliberately
- planning, monitoring, and evaluating thinking processes
- monitoring own learning
- making adjustments and revising the learning
- reflecting on one’s own thinking or others’ thinking
- reflecting on and evaluating the effects of a thinking strategy, or learning process, on learning
- setting new goals for learning

The internal language used by students when reflecting on their learning helps shape their expectations of themselves as learners. The criteria below could be used to describe a good thinker. These criteria can be used to guide and assess student performance, and may be translated into language for self-assessment. At some grade levels, these criteria are future goals that students are working toward rather than expectations to achieve during the school year.

### Criteria for a Good Thinker (Grades 4 to 7)

**A good thinker**

- bases judgments on evidence
- is honest with self
- is not persuaded without reason
- can tolerate and deal with ambiguity
- asks questions
- is open-minded and flexible
- is intellectually independent
- identifies assumptions and points of view that shape thinking
- looks for both connections and inconsistencies among ideas
- extends personal thinking by assimilating new ideas and information
- is self-directed, self-disciplined, self-monitoring, and self-correcting
Students use oral language to comprehend, talk about, and think about ideas and information. They use oral language to interact and communicate with others in informal and formal groupings for various purposes.

### Strategies for Oral Language

Students in Grade 7 use the following strategies:

- **Interacting** – access prior knowledge, make and share connections, ask questions for clarification and understanding, take turns as a speaker and listener, paraphrase to clarify meaning
- **Expressing/Presenting** – set a purpose, access prior knowledge, generate ideas, make and share connections, ask questions to clarify and confirm meaning, organize information, practise delivery, self-monitor and self-correct in response to feedback
- **Listening** – access prior knowledge, make predictions about content, focus on the speaker, listen for specifics, generate questions, recall, summarize, synthesize, draw inferences and conclusions, distinguish between fact and opinion, visualize, monitor comprehension
**PEDAGOGICAL UNDERSTANDINGS FOR ENGLISH LANGUAGE ARTS: ORAL LANGUAGE, CONTINUED**

The criteria below could be used to describe a good speaker and listener at the intermediate grades. These criteria can be used to guide and assess student performance, and may be translated into language for self-assessment. At some grade levels, these criteria are future goals that students are working toward rather than expectations to achieve during the school year.

<table>
<thead>
<tr>

</tr>
<tr>
<td>• uses vocabulary and presentation style that are appropriate for the audience</td>
</tr>
<tr>
<td>• uses tone, pace, volume, grammar, syntax, and conversational conventions that are appropriate for the situation</td>
</tr>
<tr>
<td>• sustains extended conversations by encouraging the speaker and contributing ideas</td>
</tr>
<tr>
<td>• is attentive, respectful and open to cultural, gender, and individual differences in conversation (i.e., listens with “eyes,” “ears,” and “heart”)</td>
</tr>
<tr>
<td>• uses language effectively to clarify, persuade, and inspire</td>
</tr>
<tr>
<td>• monitors presentation and is sensitive to audience response</td>
</tr>
<tr>
<td>• uses a variety of strategies to overcome difficulties in communication (e.g., a noisy environment, distractions, interruptive questions from audience)</td>
</tr>
<tr>
<td>• self-evaluates and sets goals for improvement</td>
</tr>
</tbody>
</table>
Oral language development and its relationship to later reading achievement is central to literacy. Children's oral language development is considered to be a key foundation for successful literacy. (Chaney & Burk, 1998; Primary Program 2000; McCormick, 1999; Strickland, Ganske, & Monroe, 2002)

Research has clearly established the importance of developing oral fluency to later successes in acquiring print. Oral language acts as an underlying foundation to achievement in reading. (Snow, Burns, & Griffin, 1998)

The basis of the relationship between early spoken language and later reading development is generally thought to be causal in nature, such that spoken language skills are fundamental precursors to later successful reading. (Tomblin, 2005, p. 3)

Reading is a language-based activity. Beginning readers use the language they have gained through speaking and listening to help them understand the printed word. (Psutka, 2003)

Early education is the time in which young children develop skills, knowledge and interest in the code-based and meaning aspects of (written and) spoken language. (Justice, 2005, p. 1)

We learn to talk by talking. We learn to listen by listening. The more we talk and listen to others talking, the better our ability to manipulate language, the better our ability to think and therefore to read and write, for both of these are thinking activities. (Moore, 1991, p. 15)

Talk is not only a medium for thinking, it is also an important means by which we learn how to think. From a Vygotskian perspective thinking is an internal dialogue, an internalization of dialogues we’ve had with others. Our ability to think depends upon the many previous dialogues we have taken part in – we learn to think by participating in dialogues. (Dudley-Marling & Searle, 1991, p. 60)

Talk...provides a bridge between literature and the social world of readers. Through classroom conversations, we enable students to develop social and literary awareness; our shared talk creates a comfortable place within which to explore and negotiate our interpretations of literary texts and the world in which we live. (Hynds, 1988, p. 177)

As language arts teachers, one of the most important things we can do for our students is to give them the belief that they can use language to influence the world around them....If students develop that belief, they will attempt to use language to attain goals more readily, they will be less reluctant to participate in classroom activities, and they will improve their behaviour in other aspects of their education and in aspects of their social life. (Backlund, 1988, p. 228)

The primacy of the spoken word in human intercourse cannot be too strongly emphasized. Important though the written word is, most communication takes place in speech; and those who do not listen with attention and cannot speak with clarity, articulateness and confidence are at a disadvantage in almost every aspect of their personal, social and working lives. (Jones, 1988, p. 26)
**Pedagogical Understandings for English Language Arts: Reading and Viewing**

In order for students to acquire the skills of reading a variety of texts, teachers must model, coach, and support reading in the classroom. Students learn and apply strategies successful readers use by reading in a variety of classroom contexts. As they engage in reading, they explore and learn the skills, strategies, and competencies of the reading process and of shared learning in a group setting.

---

### Reading and Viewing in Grades 4 to 7

<table>
<thead>
<tr>
<th>Conferences</th>
<th>Independent Reading and Viewing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students meet individually with the teacher for a variety of purposes: to read; for individual reading assessment; to demonstrate fluency and comprehension; to discuss their reading strategies, purposes, goals, self-assessment; and to develop an understanding of their progress.</td>
<td>Students read on their own for pleasure, to complete research, to follow personal interests, or to complete assigned tasks. They practise the skills and strategies they are learning.</td>
</tr>
</tbody>
</table>

#### Reading in the Intermediate Classroom

<table>
<thead>
<tr>
<th>Guided Reading</th>
<th>Small and Large Groups</th>
</tr>
</thead>
<tbody>
<tr>
<td>With the guidance of a teacher, students work individually or in small groups to learn and practise reading skills and strategies.</td>
<td>Students work in small and large groups for a variety of purposes: to read together, to exchange ideas and clarify meaning, to support and encourage one another, and to reflect on and respond to the text they are reading.</td>
</tr>
</tbody>
</table>

### Strategies for Reading and Viewing

Students in Grade 7 use the following strategies:

- **Before** – set a purpose, consider own reading goals, access prior knowledge to make and share connections, make predictions, ask questions, preview texts
- **During** – predict, make connections, visualize, ask and answer questions, make inferences and draw conclusions, use ‘text features’, self-monitor and self-correct, figure out unknown words, read selectively, determine the importance of ideas and events, summarize and synthesize
- **After** – self-monitor and self-correct, generate and respond to questions, make inferences and draw conclusions, reflect and respond, visualize, use ‘text features’, use graphic organizers to record information, summarize and synthesize
PEDAGOGICAL UNDERSTANDINGS FOR ENGLISH LANGUAGE ARTS: READING AND VIEWING, CONTINUED

The criteria below could be used to describe a good reader and viewer at the intermediate grades. These criteria can be used to guide and assess student performance, and may be translated into language for self-assessment. At some grade levels, these criteria are future goals that students are working toward rather than expectations to achieve during the school year.

Criteria for a Good Reader and Viewer (Grades 4 to 7)

A good reader and viewer
• accesses prior knowledge
• asks questions
• makes predictions
• integrates three cueing systems and cross-checks for meaning
• self-monitors and recognizes when text is not making sense
• uses strategies to overcome problems during reading and viewing
• makes connections before, during, and after reading and viewing
• uses mental images to deepen and extend meaning
• distinguishes the main ideas and their supporting details
• interprets both literal and inferential meaning
• synthesizes and extends meaning
• evaluates the text or visual material and considers its relevance to broader questions and issues
• self-evaluates and sets goals for improvement
**Pedagogical Understandings for English Language Arts:**
Read ing and Viewing, continued

---

**Research Findings Related to Reading**

*“The Six Ts of Effective Elementary Literacy Instruction” from Richard Allington*

1. **Time.** Effective teachers have students do more guided reading, more independent reading, and more reading in social studies and science. In many exemplary classrooms, children are reading and writing for half the day.

2. **Texts.** Students have books they can actually read with a high level of accuracy, fluency, and comprehension. All students, then, rarely have the same book. Students engage in enormous quantities of successful reading and become independent, good readers. Motivation for reading is dramatically influenced by reading success.

3. **Teaching.** Effective teachers don’t simply “assign and assess”; they are involved in active instruction. Explicit demonstrations of cognitive strategies are modelled; instruction is offered in a balance of side-by-side lessons, small group lessons, and whole group lessons. But whole group lessons are brief and focused.

4. **Talk.** There’s more of it, and it’s more conversational than interrogational. Discussion is purposeful and personalized, not scripted or packaged. Thoughtful classroom talk focuses on making children’s thinking visible and building understanding.

5. **Tasks.** Leaving behind low-level worksheet tasks, effective teachers demonstrate greater use of longer assignments, tasks that integrate several content areas and substantive work with more complexity. Exemplary teachers provide students similar but different tasks.

6. **Testing Students.** Student work is evaluated based on effort and improvement. Rubrics shift responsibility for improvement to the students, so “luck” doesn’t play a part. Most effective teachers use almost no test-preparation materials, feeling that good instruction is what makes the difference.

---

**Core Understandings from Reading Research**

Through the analysis of current research the following 13 fundamental, or core, understandings relating to reading were identified:

1. Reading is a construction of meaning from text. It is an active, cognitive, and affective process.

2. Background knowledge and prior experience are critical to the reading process.

3. Social interaction is essential at all stages of reading development.

4. Reading and writing are reciprocal processes; development of one enhances the other.

5. Reading involves complex thinking.

6. Environments rich in literacy experiences, resources, and models facilitate reading development.

7. Engagement in the reading task is key in successfully learning to read and developing as a reader.

8. Children’s understandings of print are not the same as adults’ understandings.

9. Children develop phonemic awareness and knowledge of phonics through a variety of literacy opportunities, models, and demonstrations.

10. Readers learn productive strategies in the context of real reading.

11. Students learn best when teachers employ a variety of strategies to model and demonstrate reading knowledge, strategy, and skills.

12. Students need many opportunities to read, read, read.

13. Monitoring the development of reading processes is vital to student success.

---

Pedagogical Understandings for English Language Arts: Writing and Representing

Teachers model, coach, and support students in learning to write in a variety of groupings (whole class, small groups, pair, individually). Using models such as the Gradual Release of Responsibility, students practise, with increasing independence, the skills and processes of writing, applying strategies during the process to increase success at writing. Although the diagram below is organized into discrete stages, in reality, strategies may be used continuously throughout the writing process.

Writing in Grades 4 to 7

**Prewriting**
- Students prepare for writing by engaging in discussions, interacting with others, and participating in activities such as brainstorming and pair/share to gather information before writing.
- Students identify topic, purpose, and audience.
- Students participate in developing class-generated criteria.
- Students gather necessary data and information (e.g., using text or Internet, accessing prior experiences, using genre models, interviewing others, writing letters requesting information).
- Students use various organizers to sort and manage the quantity of material they collect (e.g., frames, outlines, clusters, concept maps).

**Drafting**
- Students work with ideas, thoughts, and information to draft and enhance preliminary texts (e.g., check back to planning, reread and revise, pay attention to style and conventions).
- Students refer to class-generated criteria.
- Students examine models of literature.
- Students combine multiple sources of information and consult reference material.
- Students consider and apply feedback from conferences to revise writing traits.
- Students engage in ongoing editing.

**Revising**
- Students share their work and check against class-generated criteria.
- Students consider and apply feedback and revise trait(s) to enhance clarity.
- Students self-assess using class-generated criteria and reflect on their success.

**Publishing and Presenting**
- Students publish and present their texts for real audiences and learn from example.
- Students come to see themselves as writers.
- Students create portfolios, newsletters, poems, memoirs, web pages, diaries, essays, informational reports, stories.

**Editing**
- Students edit by rereading and reflecting on their own writing, and conferencing with peers and the teacher.
- Students edit for accuracy in spelling, punctuation, grammar, and usage, and may use a self-editing checklist.

**Revising**

**Editing**

**Strategies for Writing and Representing**

Students in Grade 7 use the following strategies:

- **Before** – set a purpose; identify an audience, genre and form; analyse examples of successful writing and representing to identify key criteria; develop class-generated criteria; generate, select, develop and organize ideas from personal interest, prompts, texts and research
- **During** – refer to class-generated criteria, analyse models of literature, access multiple sources of information, consult reference materials, consider and apply feedback from conferences, revise and edit
- **After** – check work against established criteria, read aloud and listen for fluency, revise to enhance writing traits, edit for conventions
The criteria below could be used to describe a good writer and representer at the intermediate grades. These criteria can be used to guide and assess student performance, and may be translated into language for self-assessment. At some grade levels, these criteria are future goals that students are working toward rather than expectations to achieve during the school year.

### Criteria for a Good Writer and Representer (Grades 4 to 7)

**A good writer and representer**

- generates ideas
- organizes information
- identifies a purpose
- defines an audience and considers its characteristics
- develops a “voice” and style suitable to the purpose, content, and audience
- controls word choice and sentence construction
- conveys meaning clearly
- demonstrates fluency and coherence in flow of ideas
- recognizes the value of feedback
- revises and rewrites
- adheres to conventions
- finds satisfaction in writing
- self-evaluates and sets goals for improvement
“12 Writing Essentials for All Grades” from Regie Routman

Teach these essentials well in connection with any purposeful writing, and, with guidance, students will be able to use them in whatever form of writing they do:

1. **Write for a specific reader and a meaningful purpose.** Write with a particular audience in mind (this may be the author herself or himself) and define the writing task.

2. **Determine an appropriate topic.** Plan the writing, do the necessary research, narrow the focus, and define what's most important to include.

3. **Present ideas clearly, with a logical, well-organized flow.** Structure the writing in an easy-to-follow style and format using words, sentences, and paragraphs; put like information together; stay on the topic; know when and what to add or delete; incorporate transitions.

4. **Elaborate on ideas.** Include details and facts appropriate to stated main ideas; explain key concepts; support judgments; create descriptions that evoke mood, time, and place; and develop characters.

5. **Embrace language.** “Fool with words” – experiment with nouns, verbs, adjectives, literary language, sensory details, dialogue, rhythm, sentence length, paragraphs – to craft specific, lively writing for the reader.

6. **Create engaging leads.** Attract the reader's interest right from the start.

7. **Compose satisfying endings.** Develop original endings that bring a sense of closure.

8. **Craft authentic voice.** Write in a style that illuminates the writer's personality – this may include dialogue, humour, point of view, a unique form.

9. **Reread, rethink, and revise while composing.** Access, analyse, reflect, evaluate, plan, redraft, and edit as one goes – all part of the recursive, non-linear nature of writing.

10. **Apply correct conventions and form.** Produce legible letters and words; employ editing and proofreading skills; use accurate spelling, punctuation, capitalization, and grammar; adhere to the formal rules of the genre.

11. **Read widely and deeply – and with a writer's perspective.** Read avidly; notice what authors – and illustrators, too; develop an awareness of the characteristics of various genres (fiction, poetry, persuasive pieces) and how those genres work, and apply that knowledge and craft to one's own writing.

12. **Take responsibility for producing effective writing.** Consider relevant responses and suggestions and willingly revise; sustain writing effort; monitor and evaluate one's own work and set goals; publish, when possible and appropriate, in a suitable and pleasing presentation style and format; do whatever is necessary to ensure the text is meaningful and clear to the reader as well as accurate, legible, and engaging.

These writing essentials are applicable from Kindergarten through high school and beyond. The factors that change are:

- The amount of excellent support the student needs (demonstrations and explicit teaching).
- The complexity of texts the student composes.
- The variety of forms or genres the author attempts.
- The learner's level of independence.

Prescribed Learning Outcomes

It is expected that students will:

A1 use speaking and listening to interact with others for the purposes of
- contributing to group success
- discussing and analysing ideas and opinions (e.g., debating)
- improving and deepening comprehension
- discussing concerns and resolving problems
- negotiating consensus or agreeing to differ
- completing a variety of tasks

Suggested Achievement Indicators

The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome.

By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:

- share ideas relevant to class activities and discussions (e.g., teacher or student-selected pairs or small groups, whole class brainstorming, literature circles, book clubs)
- speak and listen in partner, small group, and whole class discussion to accomplish a substantive task (e.g., suggest a plan of action for a student council, present a mock trial of an historical figure, take turns in a structured debate)
- share ideas in structured discussions and dialogues to explore issues, varying viewpoints, and conflicts
- ask questions to sustain and extend interactions
- listen to classmates and others without interrupting, speak respectfully to others, and use language and tone appropriately when disagreeing
- offer ideas and experiences that build on the ideas of others
- speak and listen to respond to others’ needs, feelings, and reactions, taking into account verbal and nonverbal cues (e.g., tone, inflection, body language, facial expression)
- synthesize viewpoints of others, identify similarities and differences between viewpoints, and discuss ways differences can be resolved or minimized

Quick Navigation Tips

- Prescribed Learning Outcomes are mandated by the School Act; they are legally required, not optional.
- The Prescribed Learning Outcomes are numbered for ease of use and do not indicate a linear delivery.
- General Learning Expectations are summaries of the Prescribed Learning Outcomes in the relevant organizer (they are not legally required).
- Achievement Indicators are a comprehensive range of indicators of what the learning might look like for each learning outcome. They may also be used as assessment criteria. They are suggested, and teachers may substitute, adapt, or add to these indicators.
- Bolded terms in the Prescribed Learning Outcomes and Suggested Achievement Indicators are defined in the Glossary section.
- See the Considerations for Program Delivery section and Key Elements for essential understandings underlying the curriculum.

Oral Language (Speaking and Listening)

Purposes (Oral Language)

General Learning Expectation: Students use oral language to interact effectively with others for a wide range of purposes, to present complex ideas and information formally and informally, and to demonstrate an increased capacity to listen purposefully and respond critically.
### Prescribed Learning Outcomes

| A2 | use speaking to explore, express, and present a range of ideas, information, and feelings for different purposes and audiences, by |
|    | – using prior knowledge and/or other sources of evidence |
|    | – staying on topic in focused discussions |
|    | – presenting in a clear, focused, organized, and effective manner |
|    | – explaining and effectively supporting viewpoints |

### Suggested Achievement Indicators

- identify purpose (e.g., to explain, persuade, entertain) and audience (e.g., parents, peers, principal) for speaking and presenting
- present/discuss in their own words information that is accurate, states a clear topic, is sequenced logically, and includes specific and relevant examples and details (e.g., summarize a politician’s position on an issue, present a dramatization of life as a slave in ancient Egypt)
- explain their own viewpoints and give reasons, and, if applicable, support judgments through references to a text, prior knowledge, or other sources of evidence
- when delivering a persuasive presentation, state a clear position or perspective in support of an argument or proposal, describe the points in support of the argument, and employ well-articulated evidence
- use vocabulary appropriate to topic and audience (e.g., content-specific words and phrases, such as “civilization”)
- use tone, volume, pacing, phrasing, and gesture to engage audience and enhance meaning
- use speaking to explore new ideas and opinions, and support and build on the ideas and opinions of others (e.g., “When we started listening to the speech, I thought I agreed with the speaker, but when she/he got to the part about..., I realized that I had a different opinion.”)
Oral language, reading, and writing need to be taught and learned in an integrated way.
**STRATEGIES (ORAL LANGUAGE)**

*General Learning Expectation:* Students selectively use a range of strategies to increase success at interacting, speaking, and listening in a variety of situations, including preparing and delivering short formal and informal oral presentations (e.g., use logical or sequential organizers, incorporate nonverbal elements).

<table>
<thead>

<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome.</td>
</tr>
<tr>
<td>By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:</td>
<td></td>
</tr>
</tbody>
</table>

**A4** select and use various **strategies** when interacting with others, including
- accessing prior knowledge
- making and sharing connections
- asking questions for clarification and understanding
- taking turns as speaker and listener
- paraphrasing to clarify meaning

- refer to relevant **texts** they have read or heard, or contribute relevant experiences to the topic or task
- connect and relate prior experiences, insights, and ideas to those of a speaker
- make connections to personal and shared ideas and experiences by talking in pairs and small groups
- ask thoughtful questions and respond to questions with appropriate elaboration
- balance role of self as speaker and listener and follow the rules of conversation
- explain and show understanding of other viewpoints

**A5** select and use various **strategies** when expressing and presenting ideas, information, and feelings, including
- setting a purpose
- accessing prior knowledge
- generating ideas
- making and sharing connections
- asking questions to clarify and confirm meaning
- organizing information
- practising delivery
- self-monitoring and self-correcting in response to feedback

- identify audience and purpose for specific oral presentations (e.g., persuade class, share literature response with a peer)
- discuss what they already know about the topic and elicit ideas from others
- select a focus, an organizational **structure**, and a viewpoint, matching the purpose, message, and occasion
- emphasize key points to assist the listener in following the main ideas and concepts
- practise with peer support, ask for feedback, and incorporate suggestions (e.g., select and rehearse some specific phrases and gestures to engage audience)
- monitor volume, tone, intonation, pace, expression, and gesture depending on the situation (e.g., when delivering an announcement at a school assembly vs. speaking to peers, preparing cue cards)
- use appropriate **strategies** for making connections with the audience (e.g., position themselves so others can see and hear, use body language such as smiling or making eye contact)
- adjust presentation in response to feedback (e.g., maintain effective communication even when in disagreement)
### Prescribed Learning Outcomes

<table>
<thead>
<tr>
<th>A6</th>
<th>select and use various strategies when listening to make and clarify meaning, including</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- accessing prior knowledge</td>
</tr>
<tr>
<td></td>
<td>- making predictions about content before listening</td>
</tr>
<tr>
<td></td>
<td>- focussing on the speaker</td>
</tr>
<tr>
<td></td>
<td>- listening for specifics</td>
</tr>
<tr>
<td></td>
<td>- generating questions</td>
</tr>
<tr>
<td></td>
<td>- recalling, summarizing, and synthesizing</td>
</tr>
<tr>
<td></td>
<td>- drawing inferences and conclusions</td>
</tr>
<tr>
<td></td>
<td>- distinguishing between fact and opinion</td>
</tr>
<tr>
<td></td>
<td>- visualizing</td>
</tr>
<tr>
<td></td>
<td>- monitoring</td>
</tr>
<tr>
<td></td>
<td>- comprehension</td>
</tr>
</tbody>
</table>

### Suggested Achievement Indicators

- make logical predictions about content based on recalling prior knowledge (including knowledge of genre and story structure, and knowledge of the speaker and the context)
- generate focus questions before listening
- identify key words and phrases to focus listening
- identify key phrases or visual organizers used to focus or extend understanding (e.g., transition terms such as “consequently,” “in conclusion”; visuals indicating key points)
- make accurate notes using logical categories or headings
- use simple techniques for recall (e.g., “There are three steps to remember...”)
- recognize when a message is not making sense (e.g., ask questions to clarify) and identify the problem (e.g., there was too much information to write down)
- identify bias in oral texts (e.g., viewpoint, possible motivation for bias or perspective, fact vs. opinion, emotional vs. logical)

### Suggested Questions/Prompts to Scaffold Learning

- What steps did you go through to prepare for the presentation? What was the most helpful to you? What is your goal for next time?
- What kind of practice would help you and others to become better speakers?
- In what ways did you encourage the speaker? How did you go about asking for clarification where you needed it?
- How did discussion help with this topic?
- Who is your audience? How have you taken your audience into account? How would you change your presentation if the audience were ...?
- As you listened, what did you do to keep track of key points? What other ways could you have chosen?
- How do you distinguish between fact and opinion? Provide an example of each from what you just heard.
- What would you consider to be your strengths as a listener?
- What do you think the speaker wanted you to understand about the topic? How did she or he go about persuading you?
- How successful do you feel you were in concluding your presentation? Explain.
**THINKING (ORAL LANGUAGE)**

**General Learning Expectation:** Students use increasingly powerful and specific vocabulary and use oral language to extend thinking by responding critically or creatively to information and ideas through analysing, synthesizing, and speculating. Students reflect on and assess their own speaking and listening, and set and pursue goals for improvement.

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome.</td>
</tr>
<tr>
<td><strong>A7</strong> demonstrate enhanced vocabulary knowledge and usage</td>
<td>By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:</td>
</tr>
<tr>
<td></td>
<td>□ use expanding vocabulary in own speech, including vocabulary related to specific subject areas</td>
</tr>
<tr>
<td></td>
<td>□ use new vocabulary introduced in texts and class discussions</td>
</tr>
<tr>
<td></td>
<td>□ use increasingly descriptive and powerful words</td>
</tr>
<tr>
<td></td>
<td>□ use language to justify and defend positions and viewpoints</td>
</tr>
<tr>
<td></td>
<td>□ select purposeful and precise language</td>
</tr>
<tr>
<td><strong>A8</strong> use speaking and listening to respond, explain, and provide supporting evidence for their connections to texts</td>
<td>□ understand and respond to literary and creative works (e.g., agree with interesting propositions, provide alternative viewpoint, become intrigued by unsolved mystery, suggest solution to conflict)</td>
</tr>
<tr>
<td></td>
<td>□ orally express a personal viewpoint with supporting details and recognize that it may differ from that of others; defend personal viewpoint while maintaining respect for the viewpoints of others</td>
</tr>
<tr>
<td></td>
<td>□ make meaningful connections between new information and ideas and prior knowledge and beliefs about the topic</td>
</tr>
<tr>
<td></td>
<td>□ connect themes, characters, and plot in literature with own experiences or other literature</td>
</tr>
<tr>
<td></td>
<td>□ build on others’ ideas (e.g., expand on and acknowledge the ideas of others during brainstorming)</td>
</tr>
</tbody>
</table>
**Prescribed Learning Outcomes**

<table>
<thead>
<tr>
<th>A9</th>
<th>use speaking and listening to improve and extend thinking, by</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- questioning and speculating</td>
</tr>
<tr>
<td></td>
<td>- acquiring new ideas</td>
</tr>
<tr>
<td></td>
<td>- analysing and evaluating ideas</td>
</tr>
<tr>
<td></td>
<td>- developing explanations</td>
</tr>
<tr>
<td></td>
<td>- considering alternative viewpoints</td>
</tr>
<tr>
<td></td>
<td>- summarizing and synthesizing</td>
</tr>
<tr>
<td></td>
<td>- problem solving</td>
</tr>
</tbody>
</table>

**Suggested Achievement Indicators**

- identify logical connections between new information and ideas and extend own thinking built on that logic
- present a new idea, and defend the validity of the idea with reasons or evidence
- identify and evaluate implicit assumptions supporting a particular argument in oral text
- compare and contrast information from a variety of sources and determine the validity of source; begin to identify contradictions, ambiguities, bias, and a shift of opinion
- with support, develop and apply criteria for assessing the value of ideas and information (e.g., possibility of bias, logical soundness, source of ideas and information, congruence with prior knowledge, shift of opinion, and irrelevancies within ideas and information)
- identify what is not included (e.g., whose perspective is left out; what information, arguments, or positions are not included)
- question and speculate on possibilities regarding the ideas and information presented
- give examples of the importance of oral language in society
- identify a speaker’s use of various words to influence the audience’s feelings and attitudes
- ask and answer critical questions about an advertisement (e.g., “Who is the target audience for this ad? How do you know?”)
- describe the qualities of a good listener/speaker and identify those that they demonstrate
- identify strengths and areas for improvement (e.g., “I speak clearly and the class said they could hear me, but I need to work on not using distracting ‘filler words.’”)
- using class-generated criteria, reflect on progress toward meeting goals; state achievable goals for future speaking and listening experiences (e.g., “I will speak clearly,” “I will put my ideas in logical order.”)
- discuss a presentation’s success in accomplishing its goal (e.g., to report on research, share personal experience, offer and support a viewpoint or opinion about an issue or problem)
- modify presentations through analysis of feedback from the audience
- show engagement and enthusiasm for speaking and listening
- use “think-alouds” to self-assess

Oral language, reading, and writing need to be taught and learned in an integrated way.
Suggested Questions/Prompts to Scaffold Learning

- How would you evaluate your presentation? What were its greatest strengths? What do you want to improve?
- What feedback have you received from others that you will incorporate into your next presentation?
- What was the speaker’s viewpoint? What supporting evidence did they provide for the viewpoint? What motivation might the speaker have for expressing that viewpoint? How did she or he go about informing/persuading/entertaining you? What, if any, opposing viewpoints were presented? In what ways have you changed your viewpoint as a result of listening to the presentation?
- What did the speaker deliberately leave out of the presentation to support his or her own bias?
- How different would this argument have been if told from another viewpoint? Provide an example. What details might you add and/or change?
- As a listener, what strategy is most effective for you to remember ideas and facts presented? What other strategies might you try?
**Features (Oral Language)**

**General Learning Expectation:** Students use the features and conventions of oral language with increasing sophistication to express ideas and information clearly and fluently. Students recognize and use the structures and patterns of oral language to make meaning.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome.</td>
</tr>
<tr>
<td>A11 recognize and apply the features of oral language to convey and derive meaning, including - context (e.g., audience, purpose, situation) - text structure - a variety of sentence lengths, structures, and types - smooth transitions and connecting words - syntax (i.e., grammar and usage) - diction - nonverbal communication - receptive listening posture</td>
<td>- select or identify appropriate register (e.g., formal, informal) - establish and sustain a sense of beginning, middle, and end (e.g., stay on topic and sequence ideas in meaningful ways, conclude purposefully) - express ideas using a variety of sentence types to enhance audience engagement (e.g., use simple, compound, complex, and compound-complex sentences; use effective co-ordination and subordination of ideas to express complete thoughts) - use a variety of connecting words and transitions to link ideas in speech (e.g., similarly, in conclusion, on the other hand) - recognize awkward phrasing in speaking and self-correct by restating - use correct grammar when speaking - use appropriate volume, expression, pace, tone, and emphasis when speaking - maintain an appropriate listening posture, including focussing on the speaker</td>
</tr>
<tr>
<td>A12 recognize the structures and patterns of language in oral texts, including - literary devices - sound devices - structural sequencing cues - idiomatic expressions</td>
<td>- recognize and use literary devices (e.g., metaphor) - reproduce the rhythmic pattern when reciting a poem or chant with a regular metre (e.g., rap) - recognize and create sound devices (e.g., onomatopoeia) - identify language patterns heard in a poem (e.g., rhyme scheme) - demonstrate familiarity with the unique characteristics of different oral language formats (e.g., debate, discussion) - identify and use structural sequencing cues (e.g., “although,” “such as,” flashback cues) - understand idiomatic expressions and use them to enhance speaking and/or writing</td>
</tr>
</tbody>
</table>
Suggested Questions/Prompts to Scaffold Learning

- How do you capture the audience’s attention at the beginning of your presentation? What did you do in your presentation to hold your audience’s attention?
- What techniques did you use to highlight key points?
- How did you summarize this topic in your conclusion?
- What words and images did the presenter use to help you get a better sense of the topic? How did they help you remember the piece/presentation?
- Can you give an example of how the speaker used or might have used hyperbole? …parallelism? …rhetorical questions?
- What words/lines do you remember from the poem/song we listened to? What is it about those words/lines that make them memorable (e.g., devices, images, repetition)?
### Reading and Viewing

**General Learning Expectation:** Students independently and collectively read and view to comprehend, enjoy, and respond to a variety of grade-appropriate literary texts, information texts with specialized language, and visual texts with specialized features.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome. For further information, see the BC Performance Standards for Reading.</td>
</tr>
</tbody>
</table>
| **B1** read fluently and demonstrate comprehension and interpretation of a range of grade-appropriate literary texts, featuring some complexity in theme and writing techniques, including:  
  - stories from Aboriginal and other cultures  
  - literature reflecting a variety of ancient and modern cultures  
  - short stories and novels exposing students to unfamiliar contexts  
  - short plays that are straightforward in form and content  
  - poetry in a variety of forms | □ read grade-appropriate literary texts independently and collectively (e.g., choral reading, readers’ theatre), with accuracy, comprehension, and fluency, including expression and phrasing  
□ describe setting, characters, plot, events, and conflict in their own words, and explain how they influence each other (e.g., elements of setting influence character action, character action contributes to understanding of characterization, plot events can contribute to mood)  
□ make and defend inferences that show some insight into characters’ motivations and feelings; provide support with specific evidence from the text  
□ draw comparisons among texts and among genres  
□ offer meaningful interpretations of the theme or author/poet’s message  
□ make and support direct and indirect connections (text-to-self, text-to-text, and text-to-world)  
□ identify the central theme or idea in a poem, and explain how it is conveyed through images and poetic devices (including figurative language)  
□ use ‘text features’ (e.g., dialogue, punctuation) to support meaning when reading aloud and silently |
### Prescribed Learning Outcomes

<table>
<thead>
<tr>
<th>B2</th>
<th>read <strong>fluently</strong> and demonstrate comprehension of grade-appropriate information texts with some specialized language and some complex ideas, including:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- non-fiction books</td>
</tr>
<tr>
<td></td>
<td>- textbooks and other instructional materials</td>
</tr>
<tr>
<td></td>
<td>- visual or graphic materials</td>

<tr>
<td></td>
<td>- reports and articles</td>
</tr>
<tr>
<td></td>
<td>- reference materials</td>
</tr>
<tr>
<td></td>
<td>- appropriate web sites</td>
</tr>
<tr>
<td></td>
<td>- instructions and procedures</td>
</tr>
<tr>
<td></td>
<td>- advertising and promotional materials</td>
</tr>
</tbody>
</table>

| B3 | read and reread **just-right texts** for at least 30 minutes daily for enjoyment and to increase fluency and comprehension |

| B4 | demonstrate comprehension of visual texts with specialized features and complex ideas (e.g., visual components of media such as magazines, newspapers, web sites, reference books, graphic novels, broadcast media, videos, advertising and promotional materials) |

### Suggested Achievement Indicators

- read grade-appropriate information texts independently and collectively, with accuracy, comprehension, and fluency, including expression and phrasing.
- use a variety of print and electronic reference sources (e.g., dictionaries, thesaurus, web sites).
- locate specific relevant details through the use of ‘text features’ (e.g., glossaries, tables of contents, unit summaries, indices, appendices, visuals, navigation bars, search engines).
- identify main topics addressed in a selection and distinguish between main ideas and related details.
- make accurate, organized notes by creating categories that reflect the main ideas or topics.
- support meaningful inferences or interpretations with specific evidence from the text.
- generate questions and provide answers through further reading on the topic.
- include accurate and important information from text and ‘text features’, including specific details from graphics.
- choose a just-right text on their own.
- read and reread independently for a sustained period daily (e.g., 30 minutes).
- show engagement in reading.
- suggest possible purposes of visual texts and offer reasonable interpretations (e.g., to inform, entertain, persuade).
- determine who is served by these images (i.e., critical literacy).
- make and justify inferences and predictions about a visual text and about events “beyond the pictures” (e.g., about what happened before/after a picture, about feelings of people in photographs, about material that is “unseen” or implicit).
- identify a range of visual techniques (e.g., choice of colour palette, composition and framing, viewpoint selection) and how these techniques and the content affect the audience’s reaction.

---

Oral language, reading, and writing need to be taught and learned in an integrated way.
Suggested Questions/Prompts to Scaffold Learning

- What connections can you make to the character’s feelings? What details/evidence led you to your understanding of the character’s personality?
- Which event would you identify as the critical event? How did that critical event trigger subsequent events?
- In what ways did the weaknesses/strengths of the character affect the chain of events in the story?
- How might the next chapter/segment unfold?
- What is the theme or message of this selection? What do you think the author/poet/director wants you to think about and remember?
- What were the key ideas in the information you read/viewed? Why did you identify them as important?
- What new information did you learn from reading and viewing this selection? Think about what you read. How did it change your thinking about the topic? What evidence from the selection can you cite to support your new thinking?
- What information or ideas do you want further clarification on? What additional information do you think the author should have included? Where might you go for more information on this topic?
**Strategies (Reading and Viewing)**

*General Learning Expectation:* Students selectively use a range of strategies before, during, and after reading and viewing to increase success at making meaning from texts and extending their fluency and understanding.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome. For further information, see the BC Performance Standards for Reading. By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:</td>
</tr>
<tr>
<td>B5 select and use various strategies before reading and viewing to develop understanding of text, including</td>
<td>q write down and/or share what they already know about a topic or idea (e.g., carousel brainstorming)</td>
</tr>
<tr>
<td>- setting a purpose and considering personal reading goals</td>
<td>q make logical predictions about content, based on prior knowledge and understanding of genre and author</td>
</tr>
<tr>
<td>- accessing prior knowledge to make and share connections</td>
<td>q generate a question(s) to guide their reading and viewing</td>
</tr>
<tr>
<td>- making predictions</td>
<td>q describe and use ‘text features’ (e.g., headings, diagrams, table of contents) to anticipate and ask questions before reading</td>
</tr>
<tr>
<td>- asking questions</td>
<td>q use a variety of alternative sources to locate information and build background knowledge about the topic (e.g., encyclopedias, Internet, trade books, newspaper articles)</td>
</tr>
<tr>
<td>- previewing texts</td>
<td></td>
</tr>
</tbody>
</table>

Oral language, reading, and writing need to be taught and learned in an integrated way.
B6 select and use various strategies during reading and viewing to construct, monitor, and confirm meaning, including
- predicting
- making connections
- visualizing
- asking and answering questions
- making inferences and drawing conclusions
- using ‘text features’
- self-monitoring and self-correcting
- figuring out unknown words
- reading selectively
- determining the importance of ideas/events
- summarizing and synthesizing

B7 select and use various strategies after reading and viewing to confirm and extend meaning, including
- self-monitoring and self-correcting
- generating and responding to questions
- making inferences and drawing conclusions
- reflecting and responding
- visualizing
- using ‘text features’ to locate information
- using graphic organizers to record information
- summarizing and synthesizing

- make and confirm logical predictions (e.g., summarize and restate what has been read before and hypothesize about what will come next)
- visualize, sketch, or use graphic organizers to support comprehension (e.g., mind map, quadrants)
- make connections during the reading (text-to-self, text-to-text, text-to-world), comparing and contrasting characters, ideas, and events
- use graphic and visual cues (e.g., bold type, headings, diagrams, sidebars) to clarify understanding
- discuss and summarize what they have read and viewed, at intervals and at the end
- use glossaries, summaries, focus questions in text, outlines, side-bars, navigation bars, and hyperlinks to find information in non-fiction text
- skim and scan to gather information
- figure out unfamiliar words or expressions, including specialized and technical vocabulary, by using context cues, word structures, illustrations, and classroom resources (e.g., glossaries, dictionaries, reference materials, thesaurus)
- self-monitor, select, and adjust strategies to self-correct (e.g., reread, read ahead, go to another source)
- question author’s motive or intent (i.e., critical literacy)

- review the purpose set prior to reading or viewing and use it to guide rereading and “re-viewing”
- use self-monitoring and self-correcting strategies (e.g., reread, skim, and scan for specific information, for details, and to confirm understanding)
- ask and respond to questions related to the material read or viewed
- make inferences and draw conclusions
- use ‘text features’ (e.g., headings, illustrations, diagrams) to locate and organize information
- describe features that might contribute to an inferential understanding of the text, such as obvious symbols and other literary devices (e.g., metaphor, simile, alliteration, personification)
- use graphic organizers to record and organize information, and to identify relationships (e.g., chronological report outline, concept map, cause-and-effect T-chart)
- summarize the “big idea” or author’s message and give supporting details
- reflect on the reading and viewing and make connections (text-to-self, text-to-text, and text-to-world)
Suggested Questions/Prompts to Scaffold Learning

**Before**
- Given this title and the knowledge you have about the author and topic, what predictions can you make about this novel? Listen to the first paragraph. What are your predictions now?
- What do you predict will be the problem or struggle in the story? What makes you think that?
- Preview the information book. How is it organized? What sections do you think will give you the most information? ...the least? In what ways might this help you understand the material?
- What do you want to find out when you read this article? What questions do you have in your mind about this topic before you begin to read?

**During**
- If you come to words you don’t know or understand, what strategies do you use to figure them out?
- Which part of the story so far has been the most challenging for you to understand? What ideas do you have about why that section was confusing for you? What strategies did you use to try and figure out the meaning?
- How do the ‘text features’ (e.g., headings, pull-quotes, diagrams, charts, index, sidebars, glossary) help you to understand what you have read?
- How does rereading/reading ahead/skimming/scanning help you understand the text and key ideas?

**After**
- What types of self-correcting strategies did you use when a passage didn’t make sense?
- What questions do you still have that you would like to go back and reread to clarify?
- Review the questions you had before reading. What did you read that answered the questions?
- In what ways have your predictions been validated? ...not been validated?
- What was the author’s intent in writing this? What was the bias?
- How might you use a graphic organizer to record main ideas (or events) or to compare and contrast ideas presented?
- This story was told from _______’s perspective. How different would the story be if it was told from _______’s perspective?
- Provide the gist (in 15 words or fewer) of this story from _______’s perspective.
**THINKING (READING AND VIEWING)**

*General Learning Expectation:* Students make creative and meaningful connections to texts. They extend their thinking by analysing, comparing, contrasting, and evaluating ideas in texts, and synthesizing new ideas. Students reflect on and assess their reading and viewing, and set and pursue goals for improvement.

<tr>
<td><strong>It is expected that students will:</strong></td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome. For further information, see the BC Performance Standards for Reading.</td>
</tr>
<tr>
<td><strong>B8</strong> respond to selections they read or view, by</td>
<td>By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:</td>
</tr>
<tr>
<td>– expressing opinions and making judgments supported by reasons, explanations, and evidence</td>
<td>- offer responses to selections, characters, issues, and themes</td>
</tr>
<tr>
<td>– explaining connections (text-to-self, text-to-text, and text-to-world)</td>
<td>- make logical connections between the text and own ideas, beliefs, experiences, and feelings</td>
</tr>
<tr>
<td>– identifying personally meaningful selections, passages, and images</td>
<td>- compare key ideas in new information with previous knowledge</td>
</tr>
<tr>
<td><strong>B9</strong> read and view to improve and extend thinking, by</td>
<td>- make and support connections to other reading or viewing selections, and compare themes</td>
</tr>
<tr>
<td>– analysing and evaluating ideas and information</td>
<td>- create a written response to text, making personal connections, connections to other texts, and connections to related events</td>
</tr>
<tr>
<td>– comparing various viewpoints</td>
<td>- identify powerful passages from texts and describe why they are personally meaningful</td>
</tr>
<tr>
<td>– summarizing and synthesizing to create new ideas</td>
<td>- discuss and develop a new idea, and defend the validity of the idea with reasons or evidence from the text</td>
</tr>
<tr>
<td></td>
<td>- describe further potential in a text (e.g., look for alternative, innovative outcomes; consider developments extending beyond the text)</td>
</tr>
<tr>
<td></td>
<td>- develop and apply criteria for assessing the value of ideas and information (e.g., for making comparisons, rejecting/accepting ideas, rationalizing personal preferences)</td>
</tr>
<tr>
<td></td>
<td>- begin to identify contradictions, ambiguities, and irrelevancies within ideas and information (i.e., critical literacy)</td>
</tr>
<tr>
<td></td>
<td>- identify bias and evaluate assumptions implicit within ideas and information</td>
</tr>
<tr>
<td></td>
<td>- question the author’s purpose or viewpoint (i.e., critical literacy)</td>

</thead>
<tbody>
<tr>
<td>– referring to class-generated criteria</td>
</tr>
<tr>
<td>– setting goals and creating a plan for improvement</td>
</tr>
<tr>
<td>– taking steps toward achieving goals</td>
</tr>
</tbody>
</table>

### Suggested Achievement Indicators

- Identify the strategies that good readers/viewers use before, during, and after reading and viewing.
- Discuss their reading and viewing using vocabulary pertaining to **texts** and to assessment.
- Describe and assess their reading and viewing through the meaningful application of reading criteria (e.g., made mental pictures, made inferences, used context cues, drew conclusions, determined most important information).
- Engage in reflection about what they must do to be good readers and viewers at different stages of the reading or viewing process (i.e., before, during, after).
- Identify areas to improve their reading, set goals, and take steps to achieve those goals.
- Identify preferences in books and make appropriate choices for further reading.
- Describe the self-correcting strategies they have chosen when a passage is not making sense (e.g., paraphrase, reread, read ahead, “re-view”) and assess the success of those strategies.

### Suggested Questions/Prompts to Scaffold Learning

- Tell me about your favourite genre. What is it about the genre that engages you?
- Describe how the protagonist/antagonist exhibited ________ (e.g., goodness/evil, kindness/cruelty, fairness/unfairness, emotional/non-emotional responses).
- What patterns did you recognize in the story? Explain. How did recognizing patterns help you to predict events?
- What events led up to the climax of the story? What was the anti-climax?
- At what point in the story did you wonder about the resolution of the problem?
- What themes are addressed in the story? Whose viewpoint is presented? What, if any, opposing viewpoints are presented? Whose viewpoint is missing? Describe the bias and assumptions presented in this selection. Whose interests are served by having an audience see the ad?
- Do you think the information in this selection is from a reliable source? What are the clues that tell you information is accurate and from a reliable source? How could you check?
- What questions would you like answered? Where could you get more information on this topic? How has your opinion changed since reading this material?
- What characteristics or elements does the director/designer/developer want you to notice? How does he or she make them stand out?
Features (Reading and Viewing)

**General Learning Expectation:** Students explain how form and genre, functions of text, ‘text features’, literary elements, non-fiction elements, literary devices, and idiomatic expressions contribute to the meaning and interpretation of text.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome. For further information, see the BC Performance Standards for Reading.</td>
</tr>
<tr>
<td>B11 explain how structures and features of text work to develop meaning, including - form, function, and genre of text (e.g., brochure about smoking to inform students; genre is persuasive) - ‘text features’ (e.g., copyright, table of contents, headings, index, glossary, diagrams, sidebars, hyperlink, pull-quotes) - literary elements (e.g., characterization, mood, viewpoint, foreshadowing, conflict, protagonist, antagonist, theme) - non-fiction elements (e.g., topic sentence, development of ideas with supporting details, central idea) - literary devices (e.g., imagery, onomatopoeia, simile, metaphor, symbolism, personification) - idiomatic expressions</td>
<td>- recognize and compare the various forms and genres of a variety of texts (e.g., narrative short story, persuasive poem, information article) - explain the purpose of ‘text features’ (e.g., copyright, diagram, date of publication, index, hyperlink, sidebar) - identify some poetic devices, including rhyme, rhythm, alliteration, imagery, onomatopoeia, simile, metaphor, symbolism, and personification - use vocabulary such as copyright, plagiarism, table of contents, headings, index, glossary, diagrams, sidebar, pull-quotes to talk about their function in relation to reading and viewing - discuss author’s techniques (e.g., how character is revealed in text, explain the techniques by which the text conveys mood and setting) - identify and understand some idiomatic expressions and understand their value</td>
</tr>
</tbody>
</table>
Suggested Questions/Prompts to Scaffold Learning

- Explain and give an example of how the author/poet used metaphor/simile/irony/personification/onomatopoeia.
- What do you think might have been the author’s reason for choosing this form?
- How does the use of literary elements in this selection compare with something you have read before?
- What techniques did the author use to develop the character(s)/mood?
- What was the viewpoint presented in this selection? What techniques did the author use to present the viewpoint?
- What features make you think the author created this selection with a particular audience in mind? What techniques might the author have used to appeal to a different audience? Rework this piece with _______ as the audience.
- “What goes around comes around” is found on page ___. What does this mean? How else could this have been said? Is there value to using this idiom?
Writing and Representing

General Learning Expectation: Students create a variety of well-developed texts, including meaningful personal texts, clear information texts, and engaging imaginative texts which increasingly reveal an honest and engaging voice, and deliberate and effective word choice.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>

Oral language, reading, and writing need to be taught and learned in an integrated way.
Prescribed Learning Outcomes | Suggested Achievement Indicators
--- | ---
C2 write a variety of effective informational writing for a range of purposes and audiences that communicates ideas to inform or persuade, featuring  
- clearly developed ideas by using focussed and useful supporting details, analysis, and explanations  
- sentence fluency through strong, well-constructed sentences that demonstrate a variety of lengths and patterns, with an increasingly fluid style  
- effective word choice by using content words, precise nouns, and powerful verbs and modifiers  
- a voice demonstrating an appreciation and interest in the topic  
- an organization that includes an inviting lead that clearly indicates the purpose, followed by a well-developed and clear sequence of paragraphs or sections that lead to a strong conclusion | create a variety of informational writing (e.g., expository writing such as reports, articles, instructions, procedures, explanations, business letters; persuasive writing, such as editorials, letters, opinions, and may include impromptu writing) that demonstrates the following criteria  
meaning in “Performance Standards”/Ideas in “Traits of Writing.” The writing/representation:  
- includes a clear purpose that is accomplished (e.g., instructions can be followed)  
- makes sense and emphasizes important ideas  
- includes a narrowed, focussed, clear, and coherent topic  
- includes information that is accurate and integrates information from several sources  
- shows understanding of the topic through personal experience and/or research  
- may express and justify a viewpoint  
- anticipates and answers some of the reader’s questions  
- includes visuals and text working jointly to represent and enhance the topic  
- shows a clear sense of audience; shows consideration for and interest in the reader  
style in “Performance Standards”/Sentence Fluency, Word Choice and Voice in “Traits of Writing.” The writing/representation:  
- features experimentation with word order for effect  
- reads smoothly and demonstrates strategic paragraphing  
- exhibits tone and level of formality appropriate for purpose and audience  
- contains clear language and effectively used content words  
- shows a clear sense of audience and shows consideration for and interest in the reader  
- exhibits interest or care in the topic; engages, and, if applicable, persuades the reader  
- contains a variety of sentence types, lengths, and structures (e.g., simple, compound, and complex)  
form in “Performance Standards”/Organization in “Traits of Writing.” The writing/representation:  
- uses genre or form appropriate to purpose and audience  
- uses text structures appropriate to form or genre  
- uses an extended range of connecting words to combine ideas, indicate comparisons, sequence, and describe cause and effect relationships  
- includes logical and effective sequencing  
- utilizes ‘text features’ (e.g., titles, headings, diagrams, illustrations) that are clear, relevant, and helpful to the reader  
- reads smoothly with controlled pacing  
- includes an original and informative title  
- features strong leads and satisfying endings

See “Features” section for additional criteria relating to features and conventions.

Oral language, reading, and writing need to be taught and learned in an integrated way.
### Prescribed Learning Outcomes

| C3 | write a variety of imaginative writing for a range of purposes and audiences, including short stories, passages, and poems modelled from literature, featuring |
|    | - strategically developed ideas by using interesting sensory detail |
|    | - sentence fluency by using a variety of sentence lengths and patterns, with increasing fluidity |
|    | - effective word choice by using purposeful figurative and sensory language with some sophistication and risk-taking |
|    | - an engaging and authentic voice |
|    | - an organization that includes an enticing opening, followed by a purposeful sequence of well-developed ideas that lead to an imaginative or interesting conclusion |

### Suggested Achievement Indicators

- create a variety of imaginative writing (e.g., expressive writing such as scripts, poems, short stories, passages, descriptive narratives, and may include impromptu writing) that demonstrates the following criteria

**Meaning in “Performance Standards”/Ideas in “Traits of Writing.”** The writing/representation:
- makes sense and develops, clear, focussed ideas which may be imaginative and original |
- narrows and focusses a topic |
- includes well developed paragraphs; poetry uses sensory detail and follows the pattern provided |

**Style in “Performance Standards”/Sentence Fluency, Word Choice and Voice in “Traits of Writing.”** The writing/representation:
- features strategic word order in a sentence or line of poetry for dramatic effect |
- effectively emulates elements of style from literature or from a poetic form (e.g., compelling lead) |
- uses literary devices (e.g., simile, metaphor, alliteration, onomatopoeia, symbolism) |
- features fluid language with some sophistication |
- shows a clear awareness of audience; ideas and images create impact |
- reveals an honest, personal, engaging voice, appropriate to purpose and audience |
- uses dialogue to develop character |

**Form in “Performance Standards”/Organization in “Traits of Writing.”** The writing/representation:
- uses genre or form appropriate to purpose and audience |
- uses text structures appropriate to form or genre |
- strategically uses an extended range of connecting words to combine ideas, indicate comparisons, sequence, and describe cause and effect relationships |
- reads smoothly and pacing is controlled |
- contains clear, interesting dialogue that contributes to the understanding of character |
- includes a thoughtful and expressive title

*See “Features” section for additional criteria relating to features and conventions.*
### Prescribed Learning Outcomes

<table>
<thead>
<tr>
<th>C4</th>
<th>create meaningful visual representations for a variety of purposes and audiences that communicate a personal response, information, and ideas relevant to the topic, featuring</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- development of ideas by making connections to personal feelings, experiences, opinions, and information</td>
</tr>
<tr>
<td></td>
<td>- an expressive and individualistic voice</td>
</tr>
<tr>
<td></td>
<td>- an organization in which key ideas are evident</td>
</tr>
</tbody>
</table>

### Suggested Achievement Indicators

- create a variety of multimedia forms (e.g., posters, graphs, diagrams, charts, film, web pages, plays, skits, tableaux, dramatizations) that demonstrate the following criteria:

  **Meaning in “Performance Standards”/Ideas in “Traits of Writing.”** The writing/representation:
  - conveys information and ideas for specific purposes and audiences
  - develops key ideas through details, images, and emotions
  - demonstrates imaginative connections to personal feelings, experiences, and opinions, when appropriate

  **Style in “Performance Standards”/Sentence Fluency, Word Choice and Voice in “Traits of Writing.”** The writing/representation:
  - features an individual perspective that is evident and expressive
  - moves or engages the reader

  **Form in “Performance Standards”/Organization in “Traits of Writing.”** The writing/representation:
  - uses elements of form to enhance meaning
  - uses ‘text features’/design elements (e.g., titles, labels, headings, captions, symbols, icons, colour, space) clearly and effectively to enhance understanding

See “Features” section for additional criteria relating to features and conventions.

### Suggested Questions/Prompts to Scaffold Learning

- Who is your audience? How did you craft this piece of writing specifically for your audience? How did knowing the audience influence the form you chose to use? …the word choices you’ve made?
- What do you know about this form and genre that can help you to organize your writing for this purpose?
- What techniques did you use in your writing or representing to keep your audience’s interest? What part of this piece of writing do you feel is particularly strong? Show me where you have attempted to create mood. What word choices or aspect of sentence fluency let you do that?
- How has the organization of this piece of research helped the readers understand your message and information? What evidence is there in your conclusion to support your viewpoint? Summarize your essay for me.
- How will your readers know about your personal interest in this topic? In what sections could you include your personal opinions on this topic?
- How do the visuals support your work?
STRATEGIES (WRITING AND REPRESENTING)

**General Learning Expectation:** Students selectively use a variety of strategies to increase success at writing and representing, including prewriting, clarifying purpose, selecting a genre and form, incorporating existing knowledge, researching, experimenting with language, using criteria for revision, and experimenting with improvements.

**Teaching Consideration:** Writing is a recursive, non-linear process. Although the strategies listed below are organized into the seemingly discrete stages of before, during, and after, in reality, these strategies may be used continuously throughout the writing process.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome. For further information, see the BC Performance Standards for Writing.</td>
</tr>
<tr>
<td>C5 select and use various strategies before writing and representing, including setting a purpose, identifying an audience, genre, and form, analysing examples of successful writing and representing in different forms and genres to identify key criteria, developing class-generated criteria, generating, selecting, developing, and organizing ideas from personal interest, prompts, texts, and/or research</td>
<td>By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:</td>
</tr>
</tbody>
</table>

- set a purpose and identify an audience for their own writing or representing (e.g., to persuade others, entertain, inform, tell a story)
- examine appropriate examples of the genre and form, and analyse and identify their characteristics
- contribute to generating class criteria for writing and representing based on analysis of genre and form by examining anonymous writing samples or examples of literary or information text (e.g., use of realistic dialogue, interesting story sequence, using a variety of sentence types and lengths)
- generate and develop ideas in a variety of ways (e.g., brainstorm, share ideas, recall, interview and take notes, use graphic organizers such as fishbone, sketch or cartoon, take photos, observe)
### Prescribed Learning Outcomes

<table>
<thead>
<tr>
<th>C6</th>
<th>select and use various strategies during writing and representing to express and refine thoughts, including</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- referring to class-generated criteria</td>
</tr>
<tr>
<td></td>
<td>- analysing models of literature</td>
</tr>
<tr>
<td></td>
<td>- accessing multiple sources of information</td>
</tr>
<tr>
<td></td>
<td>- consulting reference materials</td>
</tr>
<tr>
<td></td>
<td>- considering and applying feedback from conferences to revise ideas, organization, voice, word choice, and sentence fluency</td>
</tr>
<tr>
<td></td>
<td>- ongoing revising and editing</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>- continue to expand ideas from prewriting when writing (e.g., add detail to webs, generate quick writes, list additional ideas, ask for and incorporate feedback from others)</td>
</tr>
<tr>
<td>- use electronic and print resources for research</td>
</tr>
<tr>
<td>- write for an extended sustained period in the style of the genre</td>
</tr>
<tr>
<td>- use models of different forms of writing to assist in organization of writing (e.g., leads, headlines from simple news article)</td>
</tr>
<tr>
<td>- refer to and use class-generated criteria (e.g., main ideas are supported with relevant details, dialogue sounds natural)</td>
</tr>
<tr>
<td>- enhance word choice by making lists of sensory words relating to the topic; selecting precise vocabulary from dictionaries or a thesaurus; referring to and selecting from lists of connecting words</td>
</tr>
<tr>
<td>- use electronic and print resources for research</td>
</tr>
<tr>
<td>- create variety in sentence structures and patterns to develop sentence fluency (e.g., sentences of different lengths and types, sentences that display patterns and phrasing; sentences that begin in different ways)</td>
</tr>
<tr>
<td>- enhance voice while writing by ensuring that the audience and form of writing match (i.e., appropriate formality and tone)</td>
</tr>
<tr>
<td>- use dictionaries or word processing tools while drafting (e.g., cut and paste, spelling and grammar check)</td>
</tr>
<tr>
<td>- begin to revise and edit as the writing is created</td>
</tr>
</tbody>
</table>
**Prescribed Learning Outcomes**

| C7 | select and use various strategies after writing and representing to improve their work, including  
|    | – checking their work against established criteria  
|    | – reading aloud and listening for **fluency**  
|    | – **revising** to enhance writing traits (e.g., ideas, sentence fluency, word choice, voice, organization)  
|    | – **editing** for conventions (e.g., grammar and usage, capitalization, punctuation, spelling) |

| Suggested Achievement Indicators  
| check writing and representing against class criteria (e.g., consistency with form of writing selected, **sensory detail**, variety of sentence types and lengths, precise language, legibility)  
| after checking work against criteria, select areas for **revision**, and **revise** to enhance work  
| accept and incorporate some **revision** suggestions from peers and teacher (e.g., add some descriptive vocabulary, detail on poster)  
| experiment with changes in words, sentences and organization and incorporate successful changes  
| engage in **editing** independently or with a peer (e.g., by using a proofreading guide; by use a thesaurus to enhance several nouns and verbs; by checking punctuation; by ensuring legibility if handwritten, and formatting consistency if word processed; by checking that the text has appropriate visual **features** such as examples, illustrations, table of contents, labels on diagrams)  
| **publish** and share with the intended audience |

**Suggested Questions/Prompts to Scaffold Learning**

- How did you organize your work? What sources did you use? What do you know about this genre and form that could help you organize your work?
- Which author or writing had the greatest influence on your piece of writing?
- Highlight the first three words in all of your sentences. How can you create more variety in your sentence beginnings/types?
- How might you begin your writing in a way that starts in the middle of the action? …that begins with dialogue?
- In what ways did you develop your characters? …in dialogue? …in description? …in their actions in the plot?
- Find two ideas/sentences that might be combined. How could you put those ideas/sentences together to create a more interesting, detailed sentence?
- Show me the part of your work which best reflects your personal voice.
- What part of your writing most strongly reflects the criteria? Is there a part of your writing you would like to revise? What would you focus upon in the revision?
- As we look at your final draft, what would be the best presentation style and format for your published work?
**THINKING (WRITING AND REPRESENTING)**

*General Learning Expectation:* Students use writing and representing to express themselves and extend their thinking by comparing, analysing, generalizing, and speculating. They purposefully use criteria to reflect on and assess their own writing and representing, and set and pursue goals for improvement.

<table>
<thead>
<tr>
<th>Prescribed Learning Outcomes</th>
<th>Suggested Achievement Indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>It is expected that students will:</td>
<td>The following suggested indicators may be used to assess student achievement for each corresponding Prescribed Learning Outcome. For further information, see the BC Performance Standards for Writing. By the end of Grade 7, students who have fully met the Prescribed Learning Outcome are able to:</td>
</tr>
<tr>
<td>C8 use writing and representing to critique, express personal responses and relevant opinions, and respond to experiences and texts</td>
<td>respond in writing or representing by expressing feelings or thoughts about an experience or a text they have read, seen, or heard (e.g., a schoolyard incident, a play, a film, a story) incorporate new vocabulary into their own writing (e.g., “writing like a scientist,” adopting a character) use various forms of response (e.g., written, visual, kinesthetic, electronic)</td>
</tr>
<tr>
<td>C9 use writing and representing to extend thinking, by – developing explanations – analysing the relationships in ideas and information – exploring new ideas (e.g., making generalizations, speculating about alternative viewpoints)</td>
<td>explain the logic of the sequence and conclusions in their own writing and representations clarify assumptions in their own writing and representations (e.g., identify things a reader or viewer needs to know in order to understand the point) develop and apply criteria for assessing the value of ideas and information (e.g., congruence with prior knowledge, source of ideas and information, rationalizing personal preference) apply generalizations in a new context (e.g., write a limerick after reading several examples, create an example of a personification after studying several examples) recognize the presence of bias (i.e., critical literacy) after participating in structured activities, explain and give evidence of how their understanding has been extended</td>
</tr>
</tbody>
</table>
### Prescribed Learning Outcomes

C10 reflect on and assess their writing and representing, by:
- relating their work to criteria
- setting goals and creating a plan for improvement
- taking steps toward achieving goals

### Suggested Achievement Indicators

- describe the **strategies** they used (e.g., prewriting, drafting, building criteria, revising, editing using conventions, publishing, and presenting)
- use criteria to identify strengths and make suggestions about their own or others’ work (e.g., tell what is appealing about a piece of work, use a T-chart to relate specific evidence from their work to the pre-established criteria, use constructive language to give feedback)
- set and adjust personal goals for writing or representing (e.g., identify an important aspect to work on next, with reference to one of the criteria)
- develop a plan to achieve two or more goals for improvement in future writing and representing
- demonstrate pride and satisfaction in writing and representing by discussing areas of personal accomplishment (e.g., taking part in a writing conference)

### Suggested Questions/Prompts to Scaffold Learning

- How and where in your writing did peer editing influence the revision of your work?
- How did using criteria help you when editing someone else’s work?
- How can you provide feedback that can be accepted positively?
- What are your goals for your next piece of writing/representation? What steps will you need to take to achieve them? Where will you go for help if you need it?
- Show me your statement of opinion and point out the support you have provided for that statement.
- How did studying ______ influence your opinion? Can you create a piece of writing (or a representation) that captures that emotion? Where in your piece do you believe that the emotion is most clearly expressed? What word(s) contribute the most to expressing that emotion?
- Show me in your writing how you have used the ideas presented to create your own unique understanding.
- Read your piece to me. What trait is the strongest? Why do you feel this way?
- What would you like your readers to notice and remember about your writing? How can you strengthen that in your writing?

---

Oral language, reading, and writing need to be taught and learned in an integrated way.
**FEATURES (WRITING AND REPRESENTING)**

**General Learning Expectation:** Students consistently use features and conventions of language (e.g., correct use of subordination and modification; correct source citation) in their writing and representing to enhance meaning and artistry.

**Teaching Consideration:** To increase students’ success at writing, grammar and usage need to be taught and experienced in the context of student writing and not as isolated grammatical exercises.

| C11 use the features and conventions of language to express meaning in their writing and representing, including – complete simple, compound, and complex sentences – subordinate and independent clauses – correct subject-verb and pronoun agreement in sentences with compound subjects – correct and effective use of punctuation – conventional Canadian spelling for familiar and frequently used words – spelling unfamiliar words by applying strategies (e.g., phonic knowledge, use of common spelling patterns, dictionaries, thesaurus) – information taken from secondary sources with source citation – legible writing appropriate to context and purpose | Grammar and Usage
- use simple, compound, and complex sentences
- create complete sentences with few run-ons and fragments
- use pronouns correctly (i.e., refers to the correct antecedent)
- use subordinate clauses correctly to clarify meaning
- use prepositions effectively (e.g., of, in, concerning, at, by)

Punctuation and Capitalization
- use capitalization, periods, question marks, exclamation marks, commas, quotation marks, apostrophes, and colons correctly

Vocabulary and Spelling
- explain the importance of correct spelling for effective communication
- use conventional Canadian spelling for familiar and frequently used words and apply spelling strategies to spell unknown words (e.g., phonic knowledge, Canadian dictionary)
- use a dictionary to find the correct Canadian spelling of words when editing
- use newly acquired vocabulary to enhance meaning and emphasis
- use a thesaurus to select and revise work for more precise words

Presentation
- write legibly and appropriately to context and purpose
- ensure headings, titles, and illustrations enhance clarity
- acknowledge secondary sources of information in writing
- describe plagiarism and list reasons for respect for the copyright of others
- ensure formatting consistency if word processing
Suggested Questions/Prompts to Scaffold Learning

- Can you show me how the clauses in this sentence could have been arranged differently for dramatic effect?
- When you cite the work of other authors, how do you acknowledge that source for your readers? Why must you acknowledge the source?
- Some words in your piece are overused. What sources can you examine for more variety in word choice?
- How can you indicate to the reader that this part of your piece is dialogue, and help them identify which character is speaking?
- How many sources have you cited for your work? Show me your references.
- How reliable/reputable are the sources? How do you know?
- How did using a word processing program help you with your revision and editing?
- Read your piece aloud to me. Is your voice coming through? Explain.
Understanding the Classroom Assessment Model

The Classroom Assessment Model provides assessment examples for each curriculum organizer at each grade level in English Language Arts K to 7. This document contains the assessment examples for Grade 7. These examples, contributed by BC classroom teachers, show how assessment for learning and assessment as learning strategies can be integrated with instructional planning, and how teachers use classroom assessment data to monitor student learning and make adjustments in their teaching. The main purposes of these kinds of assessments are to help teachers select appropriate instruction and intervention strategies for the Gradual Release of Responsibility, and to engage students in metacognitive self-assessment and goal-setting that can increase their success as learners.

This organization is not intended to prescribe a particular means of course delivery or to emphasize the importance of some outcomes over others. Teachers are encouraged to address the learning outcomes in any order, and to combine, organize, and modify the examples to meet the needs of their students and to respond to local requirements. Some students with special needs may have learning outcomes set for them that are modified and documented in their Individual Education Plan (IEP). For more information, see the section “Considerations for Program Delivery: Inclusion, Equity, and Accessibility for All Learners” in this IRP.

For examples of assessment for learning, assessment of learning, and assessment as learning, see the section “Student Achievement: Classroom Assessment and Evaluation.”

In each example, the teacher has selected some Prescribed Learning Outcomes to emphasize in the lessons being taught. This is intended to show how teachers make assessment and instructional decisions for a particular lesson sequence, and does not imply that these outcomes are more important than others for the same grade level. At other times, the same teacher will plan learning experiences for students that focus on different learning outcomes. Teachers are encouraged to address the learning outcomes in any order, and to combine and organize them to meet the needs of their students and to respond to local requirements.

In these examples, the teacher’s and students’ assessments are also guided by more specific criteria appropriate to the instructional focus. Criteria matching the Prescribed Learning Outcomes in each example have been selected from a variety of sources such as the BC Performance Standards, and have also been developed with students. The criteria help both teacher and students focus on what to look for in students’ learning and performance, and they are used by both teacher and students to evaluate progress toward the learning outcomes. In most examples, the teacher has used more than one form of assessment, usually including both teacher observation and data collection, and student self-assessment. This illustrates how information from a variety of assessments informs a teacher’s understanding of students’ progress and learning needs in the context of everyday instruction.

Each example also provides a brief look into the teacher’s thinking about student learning, shown in “thinking bubbles” next to the assessment data. Sometimes the teacher focusses on an individual student’s learning; at other times on the progress of the class as a whole. The cycle of assessment and instruction is ongoing, and formative assessment based on explicit criteria shapes classroom teaching and learning from day to day.
Assessment and Evaluation
Tools and Techniques
Teachers should consider using a variety of techniques to assess students’ abilities to meet the Prescribed Learning Outcomes. Tools and techniques for assessment in English Language Arts K to 7 can include

- teacher assessment tools such as observation checklists, rating scales, scoring guides, and rubrics
- self-assessment tools such as checklists, rating scales, scoring guides, and response sheets
- peer assessment tools such as checklists, rating scales, scoring guides, and response sheets
- journals or learning logs
- video (to record and critique student demonstration)
- written tests, oral tests (true/false, multiple choice, short answer)
- worksheets
- portfolios
- student-teacher conferences

Assessment in English Language Arts K to 7 can also occur while students are engaged in, and based on the product of, activities such as

- case studies and simulations
- group and class discussions
- brainstorms, clusters, webs
- research projects
- role plays
- charts and graphs
- posters, collages, models, web sites
- oral and multimedia presentations
- peer teaching
- personal pledges or contracts

For more information about student assessment, including Suggested Achievement Indicators of student performance, refer to the section entitled “Student Achievement.” The Suggested Achievement Indicators provide a useful resource for developing criteria for specific teaching and learning experiences.

Considerations for Instruction and Assessment in English Language Arts K to 7
It is highly recommended that parents and guardians be kept informed about all aspects of English Language Arts K to 7. For suggestions about involving parents and guardians, refer to the “Considerations for Program Delivery” section of this IRP.

Teachers are responsible for setting a positive classroom climate in which students feel comfortable learning about and discussing topics in English Language Arts K to 7.

Teachers may wish to consider the following:

- Involve students in establishing guidelines for group discussion and presentations. Guidelines might include using appropriate listening and speaking skills, respecting students who are reluctant to share personal information in group settings, and agreeing to maintain confidentiality if sharing of personal information occurs.
- Promote critical thinking and open-mindedness, and refrain from taking sides on one point of view.
- Develop and discuss procedures associated with recording and using personal information that may be collected as part of students’ work for the purposes of instruction and/or assessment (e.g., why the information is being collected, what the information will be used for, where the information will be kept; who can access it – students, administrators, parents – how safely it will be kept).
- Ensure students are aware that if they disclose personal information indicating they are at risk for harm, then that information cannot be kept confidential.

For more information, see the “Considerations for Program Delivery: Confidentiality” section in this IRP.
**Contents of the Classroom Assessment Model**

**Assessment Overview Tables**
Assessment Overview Tables are located at the beginning of the Classroom Assessment Model for each grade from 1 to 7. These tables identify the cognitive level (Knowledge, Understanding and Application, and Higher Mental Processes) of each outcome. Also included in the table is a suggested weight for grading for each curriculum organizer.

**Overview**
Each sample in the Classroom Assessment Model begins with a description of previous learning experiences, the context, and the assessment activity.

**Criteria for Assessment**
Each sample contains a list of the specific Prescribed Learning Outcomes assessed through the activity. The selected criteria describe the sources for the criteria the teacher included, and sample criteria used by the teacher for assessment. Finally, a student self-assessment is included.

**Assessment Samples**
A variety of samples are included in this section, depending on the task and context. In many cases, sample student work (with teacher comments) is included to show how teachers used the assessment data as, and for, learning.
Overview

The overview includes

- a description of prior learning in the classroom
- the classroom context
- a description of the activity, including what occurred before, during, and after the activity to support student learning

Assessment Overview Table (for Grades 1 to 7)

The assessment overview table includes

- suggested weighting of each curricular organizer
- cognitive levels of each outcome
**Classroom Assessment Model • Grade 3 • Writing and Representing**

**Criteria for Assessment**
- Prescribed Learning Outcomes assessed
- selected criteria used by the teacher
- student self-assessment – prompts used to help students engage metacognitively in their learning

**Selected Criteria**
The teacher developed assessment criteria from a variety of sources, including:
- Quick Scale: Grade 3 Writing Stories and Poems (see following example)
- Student self-assessment – prompts
- Assessment Tools

**Assessment Tools**
Rubrics used by the teacher to assess student progress

**Assessment Samples for Grade 3 Writing and Representing**

*The following abbreviations are used to represent the three cognitive levels within the cognitive domain: K = Knowledge; U&A = Understanding and Application; HMP = Higher Mental Processes.*
GRADE 7: ORAL LANGUAGE
CLASSROOM DEBATE FOLLOWING PERSUASIVE WRITING

PREVIOUS LEARNING EXPERIENCES
Students have had practice in identifying implications of actions and choices, structuring an argument or debate, interviewing skills (e.g., developing focussed questions), and with consensus building.

CONTEXT
The class had been working on persuasive essay writing skills. As part of the presentation of their essays, the students presented and defended their positions in the form of a debate.

DESCRIPTION
The teacher began by discussing the purpose of a persuasive essay. Three sample essays were provided for the students to work with in small group format. The student groups then took their sample essays and created criteria to help guide them through the process. Once the class was able to agree on all the criteria for the essay, the teacher modelled how to take a topic and create a persuasive essay. Students were then given the choice of two different topics to write about.

Once each student had completed a final draft of the essay, the teacher explained that not everyone would have the same opinion about their selected topic. To share their opinions, students would need to debate the main points expressed in their essays.

Using sample debate prompts, the teacher guided the students through preparing their debate:
1. students first had to identify their own opinions as “for” or “against”
2. based on their opinions on each of the two topics, students met in groups with others sharing the same opinion
3. each group prepared a summary of its position, stating the facts that would persuade the audience to agree
4. the group then prepared a response that considered the alternative group’s position
5. each group elected a speaker
6. each speaker then rehearsed the debate, and using questions from the group was able to expand on any responses that needed development

While students worked on preparing their debate positions, the teacher conducted interviews with each group to discuss their proposals and the oral language strategies they were using while interacting with others.

Before each group presented its position, the teacher reviewed the criteria for oral language using the checklist, and explained that students in the audience would also assess their peers as presenters using a peer assessment checklist.

At the end of the debate, a student panel was invited to ask questions or provide comments. The panel then voted on the most persuasive argument.

Following the debates, all students completed individual self-assessment and reflection activities.
## Criteria for Assessment

### Prescribed Learning Outcomes

| A1 | use speaking and listening to interact with others for the purposes of  
|    | contributing to group success  
|    | discussing and analysing ideas and opinions (e.g., debating)  
|    | improving and deepening comprehension  
|    | discussing concerns and resolving problems  
|    | negotiating consensus or agreeing to differ  
|    | completing a variety of tasks  
| A3 | listen critically to understand and analyse ideas and information, by  
|    | summarizing and synthesizing  
|    | generating questions  
|    | visualizing and sharing  
|    | making inferences and drawing conclusions  
|    | interpreting the speaker’s verbal and nonverbal messages, purposes, and perspectives  
|    | analysing and evaluating  
|    | ignoring distractions  
| A4 | select and use various strategies when interacting with others, including  
|    | accessing prior knowledge  
|    | making and sharing connections  
|    | asking questions for clarification and understanding  
|    | taking turns as speaker and listener  
|    | paraphrasing to clarify meaning  
| A5 | select and use various strategies when expressing and presenting ideas, information, and feelings, including  
|    | setting a purpose  
|    | accessing prior knowledge  
|    | generating ideas  
|    | making and sharing connections  
|    | asking questions to clarify and confirm meaning  
|    | organizing information  
|    | practising delivery  
|    | self-monitoring and self-correcting in response to feedback  
| A6 | select and use various strategies when listening to make and clarify meaning, including  
|    | accessing prior knowledge  
|    | making predictions about content before listening  
|    | focussing on the speaker  
|    | listening for specifics  
|    | generating questions  
|    | recalling, summarizing, and synthesizing  
|    | drawing inferences and conclusions  
|    | distinguishing between fact and opinion  
|    | visualizing  
|    | monitoring comprehension  
| A7 | demonstrate enhanced vocabulary knowledge and usage  

*continued on next page*
Criteria for Assessment

**Selected Criteria**
The teacher developed assessment criteria from a variety of sources, including
- Grade 7 Rubric for Oral Language (see following example)
- Grade 7 Suggested Achievement Indicators (see Student Achievement section)
- Classroom discussion about appropriate criteria for an oral presentation

**Assessment Criteria for this Activity**
The student can
- make logical connections to prior knowledge and beliefs
- express views appropriately with relevant supporting reasons
- ask relevant questions to sustain and extend interactions
- speculate on what different opinions might be
- paraphrase opinions and views
- contribute to and use criteria to self-assess and set goals
- speak clearly and at a good pace
- listen attentively to the thoughts and opinions of the other speaker
- show awareness of audience and audience attention to the topic
- organize ideas and information around key questions, logical categories, or in sequence

**Student Self-Assessment** (could be adapted for peer assessment)
- My presentation was well paced.
- My information was clear.
- My opinion was easy to understand.
- I used good voice and expression.
- I was aware of audience and audience attention.
- I did not interrupt.
- I focussed on the person speaking.
- I responded to opinion with reason and respect.
- I asked questions to clarify.
- I included and supported others.
- I asked questions that sustained and extended discussion.
- I was respectful of others’ perspectives and opinions.
- I was able to restate or paraphrase ideas to clarify.
- I was able to set goals to improve my oral language skills.
Assessment Samples for Grade 7 Oral Language:
Debate Following Persuasive Writing

1. Written summary of a debate, showing group presentations “for” and “against,” and audience questions

If the child does the crime, should the parents do the time?

Agree: A lot of crime is done on the weekends and on school holidays. This leads us to believe that school-aged youth are committing the crimes. We question where the parents or guardians of the children are. Why do the youth committing the crimes think that it is alright to vandalize property, steal, become involved in fights or deal drugs? In answer to that, we feel that the parents and guardians are not providing an adequate environment for the children. Somehow it seems parents are no longer responsible for the actions of the children simply because they are busy working or in some case too involved in their own lives to worry about the children. This is wrong. If parents are not teaching their kids that crime is wrong then the parents are also wrong. Parents need to be involved in their children’s lives and set examples for how they should behave. If the child does the crime, the parents are equally responsible and therefore they should do the time.

Disagree: If society expects that youth are responsible enough at 13 to be considered a teenager, 16 to drive, 18 to vote and 19 to drink, then wouldn’t it make sense they are making the decisions associated with each of these actions responsibly? If the child is making the choice between right and wrong then they are making a choice to be responsible for that decision, whether it be a good one or having to do the time for a crime. Children as young as 5 are aware of what is right and wrong. A youth who is making the choice to steal from somebody or to vandalize property is capable of knowing that what they are doing is wrong. If the child does the crime, the child should do the time.

Panel: What if the child is under the age of 13?

Agree: The parents should be involved and be responsible for somebody that young and their actions. Nobody under the age of 13 should be allowed out like that without parent supervision.

Disagree: Is this not why we have the law that some children can be charged as adults? There is always an exception to every rule. However, if the child is capable of knowing right from wrong, they need to be responsible.

Panel: Not everybody has parents to teach them the good things. What about them?

Agree: Everybody learns a sense of right and wrong either from school, TV, books, and things. Just because the parents may not be the best role model the kid still knows the difference.

Disagree: Especially these kids need to be taught the lesson. Maybe not by jail but maybe by taking counselling and helping other kids stay out of trouble.
2. Sample teacher observation checklist

Selected Criteria for Teacher Observation

Student:

- makes logical connections to prior knowledge and beliefs
- expresses views appropriately with relevant supporting reasons
- asks relevant questions to sustain and extend interactions
- speculates on what different opinions might be
- paraphrases opinions and views
- contributes to and uses criteria to self-assess and set goals
- speaks clearly and at a good pace
- is attentive to the thoughts and opinions of the other speaker
- is aware of audience and audience attention to the topic
- organizes ideas and information around key questions, logical categories or in sequence

Comments

Read notes. Didn’t ask questions of the “Disagree” group. Needs to ask clarifying questions – practice.

Teacher: These students are really prepared. They are clearly communicating their thinking in an organized way. I can see that we need to do more practice on questioning for clarification. I must remember to model how to develop questions and responses as a way of extending thinking during a debate.
3. Sample peer assessment

Selected Criteria for Peer Assessment

Presenter: ___________________

☑ language is clear and understandable
☑ presentation is a good pace
☑ ideas are clear and easy to follow
☑ aware of the audience
☑ able to effectively present the ideas that represent his/her opinion
☑ demonstrates good listening skills when others are speaking
☑ able to respond to questions logically

Teacher: How can I help students use peer feedback to improve their debating skills? Perhaps I could ask them to compare their own self-assessment checklists with the opinions of other students.
4. Sample student self-assessment

Selected Criteria for Self Assessment and Reflection

Name: ______________

What behaviours do I exhibit that tell others I am a good speaker? (Check all boxes that apply to you.)

- presentation was well paced
- information was clear
- opinion was easy to understand
- used good voice and expression
- aware of audience and audience attention

What behaviours do I exhibit that tell others I am a good listener? (Check all boxes that apply to you.)

- did not interrupt
- focused on the person speaking
- responded to opinion with reason and respect
- asked questions to clarify

What behaviours do I exhibit that tell others I am a good group member? (Check all boxes that apply to you.)

- included and supported others
- asked questions that sustain and extended discussions
- was respectful of other’s perspectives and opinions
- was able to restate or paraphrase ideas to clarify

What goals do I need to set for myself to improve my oral language skills?

Remember to look at people
Remember to ask questions

</table>

**Teacher:** This student is able to make an effective position statement and defend a point of view. He still needs support when responding to others’ views.
GRADE 7: READING AND VIEWING
NOTE-TAKING AND PICTURE SORT

PREVIOUS LEARNING EXPERIENCES
Students have experience in note-taking, putting notes into an outline, co-operative learning skills, discussing ‘text features’, restating in own words, and rephrasing ideas in own words.

CONTEXT
Students used a variety of sources in their study of early humans, including the Internet, videos, reference books, and their social studies textbook. The teacher modelled how to use text features such as headings, sidebars, illustrations, and captions to clarify ideas and locate information. The teacher used a variety of resources to guide students’ practice of reading and viewing strategies, including skimming, scanning, rereading, using information from pictures and captions, looking for key sentences or phrases, and reading headings to make logical predictions. The teacher introduced students to several note-taking formats to record information.

DESCRIPTION
Before reading
Students met in small groups to brainstorm what they already knew about early humans. Then, they previewed the text to determine its structure and organization and to decide on a note-taking format to use (e.g., webs, charts).

During reading
The teacher provided students with an article composed of several sections on early humans, and reminded students how to use conventions such as context clues, word structure, illustrations, and dictionaries to help them identify unknown words. After reading each section, the groups identified unfamiliar words and used the text features and resources to help them unlock their meanings. Then, again in their small groups, students identified the main ideas of each section and recorded what they determined was the important information into the graphic organizer they had chosen.

After reading
Students created categories to use in gathering information that showed the progression of early humans. They independently reread and “re-viewed” the text, using text features to locate the needed information. In order to demonstrate comprehension gained during their note-taking, students related 12 pictures to their notes. The picture sort and notes combined were then used to assess student understanding based on selected criteria.
Prescribed Learning Outcomes

B2 read fluently and demonstrate comprehension of grade-appropriate information texts with some specialized language and some complex ideas, including
- non-fiction books
- textbooks and other instructional materials
- visual or graphic materials
- reports and articles
- reference materials
- appropriate web sites
- instructions and procedures
- advertising and promotional materials

B4 demonstrate comprehension of visual texts with specialized features and complex ideas (e.g., visual components of media such as magazines, newspapers, web sites, reference books, graphic novels, broadcast media, videos, advertising and promotional materials)

B6 select and use various strategies during reading and viewing to construct, monitor, and confirm meaning, including
- predicting
- making connections
- visualizing
- asking and answering questions
- making inferences and drawing conclusions
- using ‘text features’
- self-monitoring and self-correcting
- figuring out unknown words
- reading selectively
- determining the importance of ideas/events
- summarizing and synthesizing

B7 select and use various strategies after reading and viewing to confirm and extend meaning, including
- self-monitoring and self-correcting
- generating and responding to questions
- making inferences and drawing conclusions
- reflecting and responding
- visualizing
- using ‘text features’ to locate information
- using graphic organizers to record information
- summarizing and synthesizing

B11 explain how structures and features of text work to develop meaning, including
- form, function, and genre of text (e.g., brochure about smoking to inform students; genre is persuasive)
- ‘text features’ (e.g., copyright, table of contents, headings, index, glossary, diagrams, sidebars, hyperlink, pull-quotes)
- literary elements (e.g., characterization, mood, viewpoint, foreshadowing, conflict, protagonist, antagonist, theme)
- non-fiction elements (e.g., topic sentence, development of ideas with supporting details, central idea)
- literary devices (e.g., imagery, onomatopoeia, simile, metaphor, symbolism, personification)
- idiomatic expressions

continued on next page
### Criteria for Assessment

**Selected Criteria**
The teacher developed assessment criteria from a variety of sources, including
- Quick Scale: Grade 7 Reading Information (see following example)
- Grade 7: Suggested Achievement Indicators (see Student Achievement section)
- Criteria developed in discussion with the class

**Assessment Criteria for this Activity**
The student can
- create notes that are organized, accurate, and complete
- accurately restate main ideas in own words
- locate specific, relevant details to respond to tasks
- use appropriate graphic organizer to record information and show comparisons
- use text features (e.g., headings, diagrams) to locate information
- make accurate and complete responses
- use graphic and visual clues to clarify understanding

**Student Self-Assessment**
- I contributed ideas about the information and shared the strategies that I found helpful in reading the text.
- I used the text features to help me understand the information.
- I reread the text and adjusted my speed when a passage seemed difficult.
- I chose an appropriate graphic organizer to record the information.
- I was able to compare written notes to visual clues with little difficulty.
- I fully completed the task.
Assessment Samples for Grade 7 Reading and Viewing: Note-Taking

1. Student sample notes and picture sort 1

Teacher: This student was able to use the notes accurately to sort information and match the visual cues.

The student used an appropriate graphic organizer based on the task.

The student met the criteria for note-taking and representing the main ideas for each category. The notes were organized, specific, and were written in the student’s own words. The notes and information used visual clues and text features to complete the picture sort accurately. This student understands the information and is now ready to develop the notes into paragraphs.
2. Student sample notes 2

*Teacher*: This student chose to use a different organizer for note-taking. The web demonstrates the same categories as the chart organizer. The information in each category is clear and covers the main ideas. Based on these notes, I can see that the student has a good understanding of the information. However, it may be more difficult to complete the picture sort in this format. I will conference with the student about how he plans to show the connections between the pictures and the web.
3. Individual student profile (incomplete) based on note-taking activities

**QUICK SCALE: GRADE 7 READING INFORMATION**

*Teacher: I will complete this profile following a focused reading conference, as I do not know what strategies the student is using.*
Grade 7: Writing and Representing

Writing Myths

Previous Learning Experiences
Students have had exposure to the genre of myths. They have a clear understanding of the elements of a myth, and they have studied models of good writing. They know the stages of the writing process, understand paragraphing techniques, and are familiar with tools used during the writing process, such as references for word choice and spelling.

Context
Students were studying a unit on mythology. They read and analysed a variety of myths from different cultures. They identified the elements of a myth, such as the physical or natural phenomenon it explained, the magic or mysterious people and events it included, how a character underwent a metamorphosis or change in form, and the lesson or message the ending provided. Students reviewed basic story elements such as setting, character, plot, conflict, and resolution.

Description

Before writing
Students recorded what they had observed about the myths they were reading, including similarities, differences, and key elements. They met in small groups and discussed their favourite myths, identifying features they thought made a good piece of writing. Then the class summarized the important qualities and features, and established criteria for their own writing.

Students worked in small groups to brainstorm and make a web of questions about the natural world that could become the basis of a myth. They used a story map to describe the setting, characters, and story problem for their myths. Each student then met with a partner to discuss their choices and plans for their myths. Partners asked one another clarifying questions and provided feedback.

During writing
Students drafted their own myths, considering the features and criteria they had identified, and their audience and purpose. They experimented with language and made deliberate choices to incorporate descriptive language, creative ideas, and imaginative images. The teacher reminded them to use paragraphing to help make the writing clear.

After writing
Students reread their original myths, again considering the features and criteria for powerful myths and good writing. They combined and rearranged sentences to create specific effects. Students read each other’s myths and provided further suggestions, such as where to include description and add imaginative images. They consulted the thesaurus for more precise language. They then revised and proofread their stories, including checking their spelling for accuracy.

Criteria for Assessment

Selected Criteria

The teacher developed assessment criteria from a variety of sources, including
- Quick Scale: Grade 7 Literary Writing (see following example)
- Grade 7 Suggested Achievement Indicators (see Student Achievement section)
- Classroom discussion of criteria for writing an effective myth

Assessment Criteria for this Activity

The student can
- use charts, webs, and story mapping to plan a myth
- incorporate specific features of a myth
- engage the reader in the story
- show some individuality and originality
- include a strong introduction that introduces the setting, character, and problem
- use supporting details and description to develop events
- use language that is varied
- develop events logically in smoothly flowing sentences
- show deliberate use of sentences that vary in length
- correctly construct most sentences
- revise work based on feedback
- actively proofread work

Student Self-Assessment

- Did I consider the audience and purpose for the writing?
- Have I considered the elements of a myth and incorporated them?
- Have I incorporated descriptive language?
- Are my ideas imaginative?
- Did I consult the criteria to improve my work?
- Did I incorporate suggestions and feedback?
- What is my goal for my next piece of writing?
Assessment Samples for Grade 7 Writing and Representing: Myths

1. Transcript of a student’s written work

THE SWAMP CREATURE

Deep within the marshy parts of a forest had a swamp where nobody ever dares to go to. It is said that a creature dwells within this swamp always searching for food, food such as humans. One day, a musical wizard named Milo was in the forest travelling to get to the other town. When he reached the swamp, he had to cross a fallen tree to cross over. Just as he was to cross over, he slipped on the wet moss. Suddenly hand from beneath grabbed his foot. Trying his best to escape, Milo saw the creature’s face. He took out his guitar and drew it across the creatures face knocking it back into the swamp. Quickly, Milo ran back to his town with a story to tell everyone. After he had described the creature to the town’s army leader, a town’s historian over-heard and said that the creature that Milo had encountered was Arbaysus. It is said that this creature use to be an ordinary human, but after he recovered from a terrible fire, he couldn’t bear his looks any longer so he ran far away into the woods. After a few days had passed, a messenger was sent to the other town to deliver a message for the King. As the messenger reached the fallen tree above the swamp, he cautiously climbed it. Suddenly, the creature Arbaysus came out snatching the ankle of the poor messenger and dragged him into the swamp where the creature feasted. When the town was notified that the messenger had not made it to the other side, they all knew that it was the doing of Arbasus.

The army gathered all of the men in the town to destroy the creature once and for all. In the army was Milo. Milo was chosen for the army because of his strength. It was unbearable compared to the others. When the time had come, the army slowly proceeded to the swamp in the forest carrying many different weapons with them such as burning torches, axes, spears and whatever they could find to defend themselves. The reason why an army was needed to defeat Arbaysus is because this creature was no ordinary creature. It knows tele-kinetic powers meaning that it can control anything using its mind. When the army had reached the swamp, they surrounded the area. All of the men gasped in horror as they peered into the middle of the swamp. It was the remains of the messenger. All what was left was the hands, a leg, and the rib cage. Just then, they heard something in the bush. So the men got ready, one of them screamed. A spear had been driven through the throat of a soldier. Then from the bushes came Arbaysus. In one hand was a spoon representing tele-kinetic and in the other hand were sharp claws.

continued on next page
In the center of his palm, there was a large nail through it. Then, the attack had begun. All of the men started attacking, but they did not realize the muscle cannot over-power the mind. At the end, everybody on the army had been killed, the only survivor was Milo. Both Milo and Arbaysus glared into each others eyes. Just when Arbaysus’ attention was drawn away, Milo quickly grabbed a burning spear and shoved it into the creatures heart. Screaming for its life, the creature perished. Milo then cut off the head of Arbaysus to show the town that Arbaysus is no longer living. A monument was then placed that day by the swamp in memory of those who fought for their lives. All of the bodies of the soldiers had been re-claimed. The only one that nobody could find was the leader’s body. A week later, Milo decided to set off to his destination which is of course, the other town. While Milo was walking slowly on the dirt road, he approached the swamp. As he passed by the stone monument, something snatched his ankle. Looking down to see what it was, he saw the leader of the soldier. He had become a creature just like Arbaysus. This time, Milo didn’t know what to do, he didn’t bring his guitar along with him so he thought of something quick. He grabbed the stone monument and smashed it on the head of the creature. Then something funny happened. Milo was blinded by green fog. Coming out of the mist was the army leader. He had returned to himself again. Seemed like the spirit of Arbaysus had gotten into him but when the stone monument had hit his head, it chased away the demon. And so, Milo and the army leader headed to the town. When Milo had arrived, he was knighted by the Queen as well as the army leader for courage. Milo was also offered a brand new guitar, afterwards he became a star and played everywhere across the land. Everything was fine, but nobody ever again mentioned the name of the creature which they called, Arbaysus.

Teacher: This student has demonstrated good use of descriptive language. The pacing of the story could be improved with better paragraphing. I will ask this student if I can use the story to model paragraphing in a future lesson.

</table>

Teacher: I was engaged reading this story. It has a great introduction. Using the Quick Scale criteria, this writing piece shows that the student is moving toward fully meeting expectations in most areas.
This section contains general information on learning resources, and provides a link to the titles, descriptions, and ordering information for the recommended learning resources in the English Language Arts K to 7 Grade Collections.

**What Are Recommended Learning Resources?**
Recommended learning resources are resources that have undergone a provincial evaluation process using teacher evaluators and have Minister’s Order granting them provincial recommended status. These resources may include print, video, software and CD-ROMs, games and manipulatives, and other multimedia formats. They are generally materials suitable for student use, but may also include information aimed primarily at teachers.

Information about the recommended resources is organized in the format of a Grade Collection. A Grade Collection can be regarded as a “starter set” of basic resources to deliver the curriculum. In many cases, the Grade Collection provides a choice of more than one resource to support curriculum organizers, enabling teachers to select resources that best suit different teaching and learning styles. Teachers may also wish to supplement Grade Collection resources with locally approved materials.

**How Can Teachers Choose Learning Resources to Meet Their Classroom Needs?**
Teachers must use either
- provincially recommended resources OR
- resources that have been evaluated through a local, board-approved process

Prior to selecting and purchasing new learning resources, an inventory of resources that are already available should be established through consultation with the school and district resource centres. The ministry also works with school districts to negotiate cost-effective access to various learning resources.

**What Are the Criteria Used to Evaluate Learning Resources?**
The Ministry of Education facilitates the evaluation of learning resources that support BC curricula, and that will be used by teachers and/or students for instructional and assessment purposes. Evaluation criteria focus on content, instructional design, technical considerations, and social considerations.

**What Funding is Available for Purchasing Learning Resources?**
As part of the selection process, teachers should be aware of school and district funding policies and procedures to determine how much money is available for their needs. Funding for various purposes, including the purchase of learning resources, is provided to school districts. Learning resource selection should be viewed as an ongoing process that requires a determination of needs, as well as long-term planning to co-ordinate individual goals and local priorities.

**What Kinds of Resources Are Found in a Grade Collection?**
The Grade Collection charts list the recommended learning resources by media format, showing links to the curriculum organizers and suborganizers. Each chart is followed by an annotated bibliography. Teachers should check with suppliers for complete and up-to-date ordering information. Most suppliers maintain web sites that are easy to access.

**English Language Arts K to 7 Grade Collections**
The Grade Collections for English Language Arts K to 7 list the recommended learning resources for these courses. Resources previously recommended for the 1996 version of the curriculum, where still valid, continue to support this updated IRP. The ministry updates the Grade Collections on a regular basis as new resources are developed and evaluated.

Please check the following ministry web site for the most current list of recommended learning resources in the English Language Arts K to 7 Grade Collections: [www.bced.gov.bc.ca/irp_resources/1r/resource/gradcoll.htm](http://www.bced.gov.bc.ca/irp_resources/1r/resource/gradcoll.htm)
This glossary defines bolded terms as used in the Prescribed Learning Outcomes and Student Achievement sections of the English Language Arts K to 7 Integrated Resource Package. In addition, the terms “instructional strategies,” “no-excuses spelling,” and “recursive,” although not specifically used in the learning outcomes or achievement indicators, are defined. The glossary is provided for clarity only, and is not intended to be an exhaustive list of terminology related to the topics in this curriculum.

**alliteration**
Alliteration is the close repetition of initial consonant sounds, written for a sound effect within a phrase or line of text (e.g., “some smug slug,” “where the cotton blooms and blows”). See sound devices.

**alphabetic principle**
The alphabetic principle is the ability to associate sounds with letters and to use these sounds to form words.

**antagonist**
The antagonist is the main force acting against the protagonist in a literary work. The antagonist is usually a character, but could also be nature, society, or another such concept. See protagonist.

**anonymous writing samples**
In this document, anonymous writing samples refer to examples of student writing that are considered to be grade-level appropriate overall, although they may contain weaknesses. The writer is never identified. These may be samples collected throughout prior teaching years (consent forms may be appropriate), collected in co-operation with colleagues, found on web sites such as www.nwrel.org, or in professional books on the 6 +1 Traits of Writing, such as 6+1 Traits of Writing: The Complete Guide for the Primary Grades or 6 + 1 Traits of Writing: A Complete Guide, both by Ruth Culham, Scholastic Professional Books.

**characterization**
Characterization is the process of revealing personality traits through how the character is developed in the text (e.g., what the character says and does, what other characters say about the character, what the narrator says, how the character is dressed). Direct characterization tells the audience about the personality of the character. In contrast, indirect characterization shows things that reveal the personality of a character. It can be helpful to consider these five different methods of indirect characterization:

- **S Speech** – What does the character say? How does the character speak?
- **T Thoughts** – What is revealed through the character’s private thoughts and feelings?
- **E Effect on others** – What is revealed through the character’s effect on other people?
  - How do other characters feel or behave in reaction to the character?
- **A Actions** – What does the character do? How does the character behave?
- **L Looks** – What does the character look like? How does the character dress?
choral reading
Choral reading or choral speaking is a strategy whereby a group reads aloud together or repeats a memorized phrase when prompted. It works best when a teacher selects a segment as a focus for improving fluency. Passages with dialogue or where changes in volume, tone, or voice support the meaning are often the most enjoyable for students. See fluency.

cloze
Cloze procedure is a technique in which selected words are deleted from a passage of text according to a word-count formula or various other criteria, leaving spaces to be completed with possible words that would make sense. The student then uses context clues to “fill in the blanks.” Cloze activities can be used to test reading comprehension and language mastery levels.

complex sentence
A complex sentence expresses a complete thought using one independent clause and at least one subordinate clause. (e.g., While my grandmother eats salad for lunch, I eat spaghetti.)

compound sentence
A compound sentence expresses a complete thought using at least two independent clauses joined by a comma plus a co-ordinating conjunction, semi-colon (often with a conjunctive adverb), or colon. Each clause must have its own subject and predicate (e.g., My grandmother eats salad for lunch, but I eat spaghetti. My grandmother eats salad for lunch; however, I prefer spaghetti. My grandmother eats salad for lunch: she is a vegetarian.). See co-ordinating conjunction.

concepts about books
Concepts about books relate to a student’s understanding about books and how they function, including concepts about meaning, purpose, directionality, title, author, illustrator, and story or information.

concepts about print
Concepts about print involve understanding the conventional features of written English:
- the symbolic nature of writing
- the correspondence of oral words to printed words (one-to-one matching)
- the association of letters and sounds
- the distinct features of letters and words
- the correspondence between uppercase and lowercase letters
- left-to-right (with “return sweep”) and top-to-bottom flow
- the use of space to mark word boundaries
- the use of specific signs and symbols for punctuation (e.g., period, exclamation point, question mark)

conflict
A conflict is a literary element that refers to the struggle of opposing internal or external forces. Internal conflict refers to a struggle within a character (e.g., making a decision) and external conflict refers to a character’s struggle with an outside force (e.g., another character, society, nature). See literary elements.
conventions
Conventions are generally accepted or agreed-upon rules or practices to facilitate meaning-making. Appropriate use of conventions is one of the traits of writing, along with ideas, organization, voice, word choice, sentence fluency, and presentation (a subset of conventions). In written English, conventions pertaining to aspects of text include
• the order in which one reads or writes (e.g., movement from left to right and top to bottom)
• how letters and words should be formed to facilitate legibility
• sentence construction (e.g., grammar and syntax)
• punctuation
• spelling
• structure and format (e.g., paragraphing, formatting of a business letter or web page)

Oral text also has conventions for language and procedures used (e.g., in formal debates or welcome speeches). Visual text likewise has conventions (e.g., for documentary films, theatrical performance, television news reports, magazine covers). See text structure, syntax, ideas, organization, voice, word choice, sentence fluency, and presentation.

co-ordinate/co-ordinating conjunction
Co-ordinating conjunctions join two or more words, phrases, or clauses of equal rank: and, but, yet, so, or, for, nor.

critical literacy
Critical literacy is the discussion of how power is used in texts by individuals and groups to privilege one group over another.

cueing systems
See graphophonic, semantic, and syntactic cues.

declarative sentence
A declarative sentence makes a statement and is followed by a period (e.g., My friend’s dog is named Milton.).

decode/decoding
Decoding is the process used to recognize words in print. Decoding strategies include using word patterns, and graphophonic, semantic, and syntactic cues. See graphophonic, semantic, and syntactic cues.

diction
Diction, also known as word choice, refers to choice and arrangement of words within a text. Because words have connotations as well as specified denotations, decisions with respect to diction can affect a writer’s or speaker’s meaning and affect a reader or listener. Diction is an important aspect of style and includes an awareness of purpose, register, and audience. See word choice, style, and register.
**editing**
Editing refers to the process of reviewing one’s own or another’s work, specifically addressing the conventions of language, such as capitalization, spelling, punctuation, paragraphing, and grammar. The final stage of editing is also called proofreading. See conventions and revision.

**emergent**
In English Language Arts, an emergent skill or capacity is one that is not fully assimilated into the student’s repertoire. It may be in evidence only occasionally, and may require further learning before it is consistently evident. This curriculum document is not using this word to make a distinction between emergent and early stages of development as commonly found in developmental continuums for the early grades.

**environmental print**
In English Language Arts, environmental print refers to words or symbols found in everyday life (e.g., signposts, notices, labels). In schools, environmental print consists of signs, labels, charts, logos, and other print posted in and around the classroom and school. Posting meaningful environmental print around the classroom reinforces the concept that print carries meaning and helps students understand the relationship between objects and their symbolic representation.

**exclamatory sentence**
An exclamatory sentence expresses surprise or strong emotion and is followed by an exclamation mark.

**features**
In the English Language Arts curriculum, features refer to the individual characteristics of a specific piece of text. Features are the most significant aspects of a text or of a writer’s style, and what makes it different from other texts. Features can also refer to specific aspects of different genres. See text, genres, text features, and style.

**flashback**
A flashback is a scene inserted into the text that flashes back to an earlier time, and provides information from that earlier time. Flashbacks enable the writer and reader to fill in background information outside of a chronological ordering.

**fluency/fluently**
Fluency in reading, writing, and speaking is characterized by smoothness, flow, phrasing, and ease of expression. Fluency should include comprehension.

**foreshadowing**
Foreshadowing is a literary device by which the writer drops subtle hints to the reader about what will happen later as the plot unfolds. See literary devices.
form
For purposes of the English Language Arts curriculum, form refers to the structure or organization of a text. However, form and content are complementary. Form could be discussed when teaching, for example, a sonnet, business letter, advertisement, or debate. See text structure.

genre
Genre refers to types or categories of text recognized by form and/or style. Particular genres have recognizable characteristics and features that distinguish them from other genres. Examples of genres include essay, article, documentary, web page, short story, novel, and poem. Each of these broad categories contains more specific categories (e.g., haiku as a subcategory of poetry). Many works cross into multiple genres by borrowing or recombining these conventions. See form, style, and features.

grade-appropriate
Students who fully meet expectations are able to read and comprehend texts appropriate for their grade level. In the province of British Columbia, the determination of grade-appropriate levels for texts will be made at the school district level, or in the case of schools operating under the Independent Schools Act, by schools or an appropriate regulatory authority having jurisdiction, but not the Ministry of Education. See the “Considerations for Delivery” section of this curriculum for further information about grade-appropriate texts. There is expected to be a range of grade-appropriate texts at each grade level.

graphic novel
A graphic novel presents a narrative through a combination of text and art, often in comic-strip form.

graphic organizer
A graphic organizer is a visual by which the relationships between and among ideas are portrayed. A graphic organizer (e.g., Venn diagram, T-chart) can serve many purposes, including identifying prior knowledge, connecting main ideas with details, describing stages or steps in a procedure, and comparing and contrasting.

graphophonics/graphophonic cues
According to Harris and Hodges (The Literacy Dictionary, 1995, International Reading Association), graphophonics is defined as the sound relationship between the orthography (symbols) and phonology (sounds) of a language. Students who have an understanding of sound-symbol relationships can use this knowledge to help them decode words. See decode.

high-frequency words
High-frequency words are those that recur often in materials that students are reading or are likely to read (e.g., and, the).
hyperbole
Hyperbole is a literary device, and is the deliberate use of exaggeration for effect (e.g., “I have been waiting here for ages,” “I have a ton of homework.”). See literary devices.

ideas
Ideas are one of the traits of writing referred to in the English Language Arts curriculum. In the assessment of writing, ideas are the heart of a writer’s message, and include the detail, development, and focus of a piece of writing. See organization, voice, word choice, sentence fluency, conventions, and presentation.

idiomatic expressions
An idiomatic expression is one whose meaning cannot be deduced from the literal definition and the arrangement of its parts, but refers instead to a figurative meaning that is known only through conventional use. For example, in the expression “that was a piece of cake,” a listener knowing only the literal meaning might not necessarily be able to deduce the expression’s actual meaning.

imagery
Imagery in text is the use of sensory detail to evoke a mental picture. See literary devices.

imaginative writing (also known as literary writing or expressive writing)
Imaginative writing is crafted to create particular effects through the use of powerful language (e.g., sensory detail, imagery, metaphor, simile, etc.). Students create imaginative writing through stories, poems, plays, legends, and passages, for example. As in informational and personal writing, imaginative writing may be impromptu or carefully revised and edited. See sensory detail, edit, revise, informational writing, personal writing, imagery, metaphor, simile, and literary devices.

imperative sentence
An imperative sentence expresses a command or request and is followed by a period or an exclamation mark. The subject of the sentence is not stated (e.g., “Come here!”).

improptu writing
Impromptu writing is writing done “on the spot” and is not revised, edited, or carefully proofread, although it is usually checked for obvious errors. Impromptu writing may be as informal as a quick write where students can begin to record their thoughts, feelings, and experiences, or as formal as an in-class essay with a specific topic, form, and time limit. In the English Language Arts curriculum, students can create impromptu personal, informational, and imaginative writing that can be used both to generate ideas and to solidify thinking. Impromptu writing may be a beginning step in the writing process or it may be an end result that could be assessed. If assessed, the criteria may include generation of relevant ideas, connections to the topic, prior knowledge, and sustained engagement for an appropriate amount of time. The BC Performance Standards for Writing contain additional assessment rubrics for impromptu writing. See personal writing, informational writing, imaginative writing, revise, and edit.
informational writing (also known as expository writing)
Informational writing is intended to communicate information (e.g., articles, reports), outline procedures (e.g., instructions), and/or persuade others (e.g., editorials, persuasive letters). As with personal and imaginative writing, informational writing may be impromptu or carefully revised and edited. In the BC Performance Standards for Writing, informational writing is referred to as “Writing to Communicate Ideas and Information.” See impromptu writing, personal writing, imaginative writing, revise, and edit.

instructional strategies
Instructional strategies are used by teachers to help students develop their literacy abilities, skills, and learning strategies. Instructional strategies are sometimes called instructional activities (e.g., K-W-L, sort, predict). There are a wide range of useful instructional strategies for teaching each aspect of English Language Arts: oral language, reading and viewing, and writing and representing.

interactive writing
Interactive writing is often described as a method of “sharing the pen,” and is used by the teacher to provide instruction and assistance to students as they are actually writing. It is much like shared writing except that the students do much of the writing themselves. At the upper grades, the teacher can use interactive writing to model for students, or as a way of getting students to share their writing and talk about the writing process with their peers. See shared writing.

interrogative sentence
An interrogative sentence asks a question and is followed by a question mark.

just-right texts
Just-right texts are texts that students are motivated to read that are not so challenging that they are solely occupied with figuring out how to decode the words and not so easy that readers are unlikely to learn anything new. “A ‘just-right’ book seems custom-made for the child – that is, the student can confidently read and understand a text he or she finds interesting, with minimal assistance. These are books that make students stretch – but just a little bit…” (Routman, 2003, p. 93). See decode.

lead
A lead (also called a beginning or introduction) refers to the first sentence or first several sentences in a text. The lead establishes the direction the writing will take. A good lead hooks the reader’s attention right from the start. Of the many types of leads used by writers, some examples include questions that relate to the topic (e.g., Have you ever wondered how you would survive if you found yourself alone in the forest? How would you defend yourself against predators? What would you eat? Where would you find water?) or the give-away lead (e.g., One day last summer, Wilfrid, an accountant, turned into a cat. Long whiskers. Smooth tail. Attitude. A Siamese cat).
literary devices
Literary devices are the deliberate use of language to create a particular effect. They are focussed and precise devices used to extend, enrich, or qualify the literal meaning of a text. Literary devices include allusion, flashback, foreshadowing, imagery, symbolism, metaphor, and simile as well as sound devices. See flashback, foreshadowing, imagery, symbolism, metaphor, simile, and sound devices.

For the purpose of clarity in the English Language Arts curriculum, only the terms literary devices and literary elements are used to discuss facets of text. Although distinctions may be made among literary devices, poetic devices, literary techniques, figures of speech, figurative language, and other terms, many of these have overlapping applications and there is no generally accepted distinction among these terms. See literary elements.

literary elements
Literary elements are integral components of a piece of literature, and include such things as character, plot, setting, point of view, style, conflict, voice, and theme. Literary elements can be identified, interpreted, and analysed as a way of examining and comparing the foundational structure of works of literature. Some combination of literary elements exists in all fiction, poetry, and drama. See style, conflict, voice, and theme.

literature circles (also known as book clubs)
Literature circles are small-group discussions about text. Typically, groups of students who are reading the same text meet together over a period of time for discussion. Literature circles offer students motivation through the opportunity to choose from a selection of books and to engage in detailed discussions with their peers.

metacognition/metacognitive strategies
Metacognition is “thinking about thinking,” which results in students’ individual understanding of their own learning processes. In addition, metacognition involves the awareness and understanding of how one thinks and uses strategies as an effective listener, speaker, reader, viewer, writer, and representer. In the English Language Arts curriculum, the successful use of metacognitive strategies involves reflection, self-assessment, setting goals, and creating a plan for achieving those goals. See strategies.

metaphor
A metaphor is a direct comparison of one thing to another, which is generally thought of as unrelated. The first thing is not merely “like” or similar to the second, but is wholly identified with it (e.g., the fog crept in on little cat feet). A metaphor may be specific to a single phrase or sentence, or developed over the course of an entire text, becoming an “extended metaphor.” See literary devices.
mood (sometimes known as atmosphere or tone)
For the purposes of the English Language Arts curriculum, mood refers to the emotional
flavour that runs through an entire text. This may include the writer’s attitude toward the
subject and/or the audience. Mood may be any of the following: angry, serious, lighthearted,
dark, etc.

no-excuses spelling
During the primary years, beginning in Grade 1, there should be clearly articulated
expectations to spell certain commonly used words (no-excuses spelling words) across all
subject areas without any misspelling at any time. At the end of Grade 1, for example, the
following 25 commonly used “no-excuses spelling words” are suggested: a, and, are, as, at, be,
for, from, had, he/she, his/her, I, in, is, it, of, on, or, that, the, they, to, was, with, you. At the
end of Grade 2, the number of “no-excuses spelling words” realistically jumps to 100+. Many
educational resource books written by literacy specialists (e.g., Cunningham, Fry, Dolch, Johns,
Fountas, Pinnell) have suggested lists of these words.

onomatopoeia
Onomatopoeia is a “sound” effect achieved when a word reflects its literal meaning (e.g., hiss,
mumble, buzz, crash). See sound devices.

onset
The onset is the first part of a (generally monosyllabic) word that begins with a consonant. It
consists of the entire part of the word before the vowel and may be composed of a single letter
or a blend (e.g., ‘s’ in sat; ‘bl’ in black); words that begin with a vowel do not have an onset.
See rime.

organization
Organization is one of the traits of writing referred to in the English Language Arts curriculum.
In assessing the organization of a text, the focus is on the internal structure of the piece. Some
common organizational structures include comparison and contrast, deduction, development
of a theme, or the chronology of an event. See ideas, voice, word choice, sentence fluency,
conventions, and presentation.

personal writing
Personal writing is rooted, both substantively and in terms of voice and tone, in students’
personal experiences, feelings, and responses. The goal of personal writing is to give students
the opportunity to sustain writing as a way of discovering what they think, and may be written
for an audience of self, peers, parents, or teachers. Personal writing may be revised, edited, and
proofread, depending on the grade level, but can also include impromptu writing. See voice,
tone, revision, editing, and impromptu writing.

personification
Personification is an example of a literary device, and refers to the act of giving human qualities
to something that is not human (e.g., the weeping willow). See literary devices.
phoneme
A phoneme is the smallest unit of sound within a word. It may be represented by one or more letters (e.g., t, e, oa, ch).

phonemic awareness
Phonemic awareness is a specific aspect of a learner’s phonological awareness. A child’s ability to segment spoken words into phonemes (e.g., c / a / t) and to blend phonemes into words are indicators of a developing phonemic awareness. See phonological and phoneme.

phonics/phonic knowledge
Phonics relates to an understanding of the sound-letter relationships in language, involving matching sounds and symbols. Simply put, phonics is what readers do when they use their understanding of sound-letter relationships to decode words. Phonics is a strategy that can be used by all readers when they come across a word they do not know how to read. See decode.

phonological/phonological awareness
Phonological refers to the sound, as opposed to the meanings, of oral language. Phonological awareness includes phonemic awareness, plus abilities to hear and create rhyming words and alliteration, segment the flow of speech into separate words, hear syllables as “chunks” in spoken words, and separate spoken words into onsets and rimes. See alliteration, onset, rime, and phonemic awareness.

presentation
Presentation, a subset of the trait of conventions, is one of the traits of writing described in the English Language Arts curriculum. The trait of presentation deals with how the writing looks to the reader, and includes the appealing use of white space on a page and other ways to help readers access content. Presentation may include graphics such as maps, graphs, and illustrations. More specifically, presentation includes legibility if hand-written, the appropriate use of font and font size if word-processed, appropriate spacing and margins, and consistent use of headings, bullets, and formatting. See ideas, organization, voice, word choice, sentence fluency, and conventions.

protagonist
The protagonist is the main character in a story. See antagonist.

publish
When students publish their work, they make it public by sharing it. Therefore, publishing can be a useful way to motivate students to put the final touches on a piece of writing or a representation. Examples of publishing include handing it in to the teacher, sharing with the intended audience (e.g., sending their letter to the editor of a newspaper), posting on a bulletin board, or including it in a class compilation or newsletter.

pull-quote
A pull-quote is a short extract from a text that is repeated in a separate space to attract and capture the reader’s attention, or to give a quick snapshot of what might be contained in the text.
readers’ theatre
Readers’ theatre refers to the presentation of a text, or part of a text, as an alternative way of reading and/or studying literature. It can be as formal or informal as time or context dictates. Readers’ theatre does not require the formality of learning lines, or elaborate sets or costumes. Teachers and/or students may adapt stories for readers’ theatre through collaborative script writing activities. Readers’ theatre, like choral reading, is an effective means to practise fluency, especially when several students read each part together. See choral reading.

recursive/recursively
In the English Language Arts curriculum, the term recursive is used to mean the revisiting of steps or strategies a number of times during a chronological process. For example, the Strategies suborganizers in the Prescribed Learning Outcomes are divided into “before,” “during,” and “after,” but predicting is a reading strategy that can be used at several different points before, during, and after reading. That is, students may make predictions about a text before reading, and revisit those predictions recursively during and after reading to confirm or revise as they acquire additional information. A similar recursive approach can be used in writing; writers may revise at any stage of the process.

register
Register is the choice of language deemed appropriate for a specific context or for a particular audience. In both writing and speaking, register refers both to diction and tone. See diction.

revising/revision
Revision during writing involves improving the meaning of the piece through considerations such as
- enhancing ideas by adding or deleting details
- improving organization by writing a better lead or ending
- clarifying the organization by reordering the piece
- improving word choice by choosing more precise nouns
- developing sentence fluency by varying sentence lengths/beginnings
- checking for coherence and unity of ideas
See ideas, organization, word choice, and sentence fluency.

rime
The rime is the portion of a word that follows an onset. It includes the vowel and any ensuing letters/sounds. Generally used with reference to monosyllabic words, the rime often reflects the characteristic pattern of the word’s “family” (e.g., the _ink portion of words such as think, drink, link). See onset.

scan/scanning
Scanning is a strategy used to search for a specific item or fact in a text.

semantic cues
Readers use semantic cues as a strategy when they focus on using what is already meaningful to them to help them understand specific words, phrases, or sections of text. Semantic cues include accessing prior knowledge, using context cues, and self-talk (“Does this make sense?”).
sensory detail
Sensory detail refers to those descriptive details that speak directly from the five senses: sight, sound, smell, touch, taste.

sentence fluency
Sentence fluency is one of the traits of writing referred to in the English Language Arts curriculum. In assessing sentence fluency, the focus is on the rhythm and flow of the language. Writing with sentence fluency is free of awkward patterns that slow the reader’s progress. See ideas, voice, word choice, organization, conventions, and presentation.

shared reading
Shared reading is a collaborative language activity. Together, the teacher and the whole class or a small group of students read and reread many types of texts, usually in enlarged print.

shared writing
During shared writing, teachers and students share the development of text by composing together. The teacher is the scribe, and models writing skills while recording students’ ideas and guiding the students in forming a finished piece of writing.

simile
A simile is a figurative comparison of two unrelated things in which the words “like” or “as” are used (e.g., She ran like the wind). See literary devices.

simple sentence
A simple sentence expresses a complete thought, using one independent clause (e.g., My grandmother eats salad for lunch.).

skim/skimming
Skimming is reading quickly to acquire the general idea of the text.

sound devices
Sound devices (which for purposes of the English Language Arts curriculum are thought of as a subset of literary devices) refer to words or word combinations that are used primarily for their sound effects or as a way to manipulate sound. Rhyme, rhythm, alliteration, assonance, repetition, and onomatopoeia are all examples of sound devices. See alliteration, onomatopoeia, and literary devices.

strategies/strategy
Strategies are the ways that learners engage in thinking about reading, writing, and oral language in order to enhance learning and comprehension. Strategies are often referred to as reading strategies or strategic reading (e.g., prediction, making connections, visualizing, etc.). However, learners use strategies in writing and in oral language (e.g., brainstorming) to prepare and refine their ideas. Since these strategies are used to make meaning they are sometimes called ‘cognitive learning strategies’ to distinguish them from ‘instructional strategies’.

structure
See text structure.
**style**
Style is the sum of those features of a work that reflect the author’s distinctive way of communicating. Style refers to the manner in which something is expressed, in contrast to its message. Some aspects of style include the creative use of literary devices, voice, word choice, and sentence fluency. See [literary devices](#), [voice](#), [word choice](#), and [sentence fluency](#).

**subordinate/subordinating conjunction**
A subordinating conjunction joins words, phrases, or clauses of unequal rank, subordinating one of them (e.g., while, because, unless, although, if, since, as, when, until).

**symbol/symbolism**
Different from a sign that holds only one meaning, a symbol is more complex and can mean more than one thing. Symbols stand for something other than their literal selves, but can mean different things depending on the context. Symbols can carry a universal or cultural meaning (e.g., a flag, a trickster), but symbols can also be created in a text by a writer who wants a certain object, or symbol, to mean something more than it is. See [literary devices](#).

**syntax**
Syntax refers to word order within a sentence; more specifically, syntax refers to the rules or “patterned relations” that govern the way the words in a sentence come together.

**syntactic cues**
Students use syntactic cues as a strategy when they refer to what they know about the rules and symbols of spoken and written language to help them make sense of the text. For example, students may use syntactic cues such as grammar, word order, and sentence structure to guide and inform their reading.

**teacher support**
Teacher support refers to any kind of teaching or assistance that is provided to facilitate a student’s acquisition or demonstration of a skill, and may also include the direct teaching of a lesson focussed on acquiring a specific knowledge or skill. This assistance may include direction, modelling, prompting, or furnishing of “clues.” Teacher support is also provided indirectly through the way the learning environment is organized and managed.

**text/texts**
For purposes of English Language Arts, the term “text” denotes any piece of spoken, written, or visual communication (e.g., a particular speech, essay, poem, story, poster, play, film). A text may combine oral, written, and/or visual components. For the purposes of the English Language Arts curriculum, literary texts are both fiction and non-fiction, and may be prose, drama, or poetry. Literary texts can be oral as well, and include such genres as epic, legend, myth, ballad, other forms of oral poetry, and the folk tale.

**text features**
Text features include diagrams, headings, bold and italicized words, diagrams, drawings, graphics, labels, tables of contents, indices, and glossaries. Studying text features can be helpful in locating information and supporting comprehension. In this curriculum, ‘text features’ refer to physical attributes whereas features of text refer to characteristic qualities.
text structure
Text structure is a term that applies to the larger organizing pattern of a verbal or written text, passage, or paragraph/stanza. Chronological order, order of importance, and comparison and contrast are examples of text structures. Text structure is an aid to comprehension, since knowing the structure of a sonnet, for example, gives the reader clues about its content.

theme
A theme is the overall meaning of a text or a “truth about life” that emerges indirectly through the writer’s use of literary elements and literary devices. Theme is distinct from topic. For example, whereas the topic of a piece might be “friendship,” the theme of a piece could be “friendship should never be taken for granted.” See literary elements and literary devices.

topic sentence
A topic sentence states the main idea of a paragraph, and is usually situated near or at the beginning of the paragraph. In an essay, each topic sentence should relate directly to the thesis of the essay.

traits of writing
See pages 20-23 of “Considerations for Program Delivery.” See also ideas, organization, word choice, sentence fluency, conventions, and presentation.

voice
Voice is an aspect of style, and refers to the individuality of the writer as perceived by the reader. The student who writes with an individual voice offers an honest and unique style that the reader finds compelling and engaging. It is one of the traits of writing referred to in the English Language Arts curriculum. See also style, ideas, organization, word choice, sentence fluency, conventions, and presentation.

word choice
Word choice, also known as diction, is one of the traits of writing referred to in the English Language Arts curriculum. Effective word choice is the use of rich and precise language in a way that both communicates and enlightens. See diction, ideas, organization, voice, sentence fluency, conventions, and presentation.

word-decoding strategies
See decode.

word wall
A word wall is a systematically organized grouping of words, generally displayed on a wall in the classroom that is used as a reference by a teacher and students and may become a focus for developing vocabulary, spelling, word choice, and other aspects of language in writing.
