REALISING POTENTIAL in OILFIELD MACHINE SHOPS & OCTG SERVICES
We are wholly committed to achieving the highest level of quality through technological innovation of our products and services to ensure customer satisfaction.
**Scomi OMS – Realising Potential in Energy Engineering**

Scomi OMS Oilfield Services (“Scomi OMS”) is part of the Malaysian public-listed company Scomi Engineering Bhd, which specialises in the provision of services to the oil and gas, and transportation industries. Scomi OMS’ machine shops are the leaders in providing Oil Country Tubular Goods (OCTG) repair, manufacture and recertification services to the oil and gas industry.

At Scomi OMS, we firmly believe that the key to success lies in our attention to quality. Be it for our clients or for ourselves, it is this very trait that provides the solid foundation required for uninterrupted development and performance; ultimately leading to the realisation of potential and growth.

Our whole-hearted commitment to quality has made Scomi OMS one of the region’s foremost leaders in OCTG repair, manufacture and recertification services. It has also earned the recognition of many proprietary thread licensors, who now regard us as their preferred licensee.

Scomi OMS has grown from strength to strength since the establishment of our very first machine shop facility on Labuan Island, Malaysia, in 1981. Certified with the prestigious API Q1 and ISO 9001:2000, Scomi OMS currently has 10 machine shops strategically spread over 7 countries throughout Asia Pacific. At these facilities, we utilise industry-leading, computer numerical controlled (CNC) lathes and mills to provide a high quality range of oilfield accessories and services to the oil and gas industry worldwide.

**Our QHSE Commitment**

Scomi OMS’ policy on Quality, Health, Safety & Environment (QHSE) defines our commitment in ensuring the safety of all employees.

Our Safety Policy is committed to providing a safe workplace for our employees and contractors, through the implementation of standards and controls that continuously improve the application and performance of the safety management system.

Scomi OMS’ Environment Policy is to provide the oil and gas industry with equipment, technology and systems, which will help protect and preserve the environment. Our activities are planned and performed to minimise environmental discharges, in addition to complying with legislative and contractual requirements.

**Our Products and Services:**

- Large Diameter Casing Connectors
- Premium and API Tubular Repair
- Casing and Tubular Accessories
- Downhole Tools and Accessories
- Welding and Repair Services
- Manufacturing Services
- Drill Pipe Hard Banding
- Tubular Inspection Services
Our Premium Thread Licenses

Our Quality Assurance

All repair and manufacturing services are in line with the strict tolerances of the Original Equipment Manufacturer (OEM) design. Sconi OMS maintains a close working relationship with these OEMs and is proud to have been awarded premium thread licenses from API, Grant Prideco, Vallourec, JFE, NSCT, TenarisHydril and Hunting.

Quality assurance is an essential ingredient to Sconi OMS’ success. We maintain a stringent QHSE programme within each facility in accordance to ISO 9001:2000 and/or API Q1, with the majority of the facilities achieving certification and the remaining facilities progressing to these standards.

Scomi OMS takes pride in our independent status, which allows you to have multiple licensed repairs and manufacturing done under one roof.

In remote field locations, Scomi OMS provides a vital line to drilling contractors, oil companies and other service organisations through our ability to manufacture a variety of equipment or downhole accessories and the repair of blow-out preventors.
Casing and Tubular Accessories

Scomi OMS manufactures and supplies a wide range of tubular accessories to the oil and gas industry including, but not limited to, the following:

- Variety of Crossover Subs
- Casing / Tubing / Drill Pipe Pup Joints
- Blast Joints / Flow Couplings
- Lift Plugs / Lift Caps
- Cementing Swages
- Stabbing Guides
- Casing / Tubing Drifts

All products manufactured by Scomi OMS are genuine threads and traceable to the original material mill test report, which ensures product integrity.

At Scomi OMS, we are geared to meet your deadlines and provide the right item from all kinds of crossover differences in diameter, connection type, material grade and length. We are able to meet ‘single piece’ urgent requirements by transforming our stock material and having them ready for shipment within 24 hours.

Welding and Repair Services

Whatever the task, Scomi OMS has the capabilities to meet the requirements. Our specialised welding services include:

- Submerged Arc Welding (SAW)
- Shielded Metal Arc Welding (SMAW)
- Tungsten Inert Gas Welding (TUG)
- Dressing of Tungsten Carbide Hard Facing
- Large Diameter Connector and Wellhead Welding
- Drill Pipe Hard Banding
- Modifications of Rock Bits
- Repair and Redress of Stabilisers
- Other Complex Welding Processes

We also fabricate custom designed downhole equipment and tooling.

At Scomi OMS, welding is performed to industry approved welding specifications. Quality is assured by 100% NDT; i.e., radiographic testing, MPI, dye penetration, etc.

Downhole Tools and Accessories

Scomi OMS manufactures a variety of drilling tools and accessories to serve the needs of downhole fishing jobs that include:

- Rotary Drill Stem Subs
- Junk Mills
- Pilot Mills
- Taper Mills
- Boot Baskets
- Rotary Mill Shoes

With just a call, we are able to customise these tools to your exact specifications and have them ready in the shortest delivery time possible.
Large Diameter Casing Connectors

In September 1997, Scomi OMS acquired all rights of the Cameron ‘JV’ and ‘CC’ Casing Connector product line.

For many years, Scomi OMS has been manufacturing both the ‘JV’ connector and the ‘CC’ connector under licence from Cameron in sizes ranging from 16” to 36”. In just the last 10 years, Scomi OMS has produced more than 50,000 sets of various sizes connectors at our ISO 9001:2000 certified machine shop in Singapore. We have supplied them to more than 50 oil companies worldwide.

These 2 basic types of connectors cover a complete range of needs. Those designated ‘JV’ are of the ‘threaded type’, requiring the application of torque to the pipe, to effect make up and sealing.

While those designated ‘CC’ are of the ‘stab-in’ automatic lock with mechanical release type. Both types have been designed specifically for offshore operations but have also been used extensively for land drilling programmes.

These connectors have been used for many years in all areas of oil exploration, production and development. They are sold either separately, welded to our pipe or welded to customer-supplied pipe. On-site welding can be performed on request. Through the Scomi OMS satellite network, we are also able to serve various locations throughout the world.

Our connector product line offers 2 types of basic configurations; i.e., reduced bore or full bore. They are available in standard sizes from 16” to 36”. However, special sizes or configuration will be manufactured to meet specific requirements.
