*75 Dry Flowable*

**Specialty Herbicide**

*T*rademark of Dow AgroSciences LLC

A selective preemergence herbicide for control of certain broadleaf weeds in:

- Established turf
- Landscape ornamentals
- Container grown ornamentals
- Nursery stock
- Ground covers
- Ornamental bulbs
- Non-bearing fruit and nut trees
- Christmas tree plantations and non-bearing vineyards
- Non-cropland

Active Ingredient:

- isoxaben: N-[3-(1-ethyl-1-methylpropyl)-5-isoxazolyl]-2,6-dimethoxybenzamide and isomers 75%

Inert Ingredients . ......................................................................... . 25%

Total ........................................................................................... . 100%

Contains 0.75 pounds active ingredient per pound.

EPA Reg. No. 62719-145

**Precautionary Statements**

**Hazards to Humans and Domestic Animals**

Keep Out of Reach of Children

CAUTION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Causes Eye Irritation • Harmful If Inhaled

Avoid ingestion, breathing dust or spray mist, and contact with skin, eyes, or clothing.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks
- Protective eyewear

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

**User Safety Recommendations**

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

**First Aid**

If in eyes  Flush eyes with plenty of water. Call a physician if irritation develops.

If swallowed  Call a physician or Poison Control Center.

If on skin  Wash with plenty of soap and water. Get medical attention if irritation develops.

If inhaled: Remove individual to fresh air. If not breathing, provide cardiopulmonary resuscitation assistance and get medical attention.

**Environmental Hazards**

Do not contaminate water when disposing of equipment washwaters. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift may result in reduced germination or emergence of non-target plants adjacent to treated area.

Notice: Read the entire label. Use only according to label directions. Before buying or using this product, read “Warranty Disclaimer” and “Limitation of Remedies” elsewhere on this label.

In case of emergency endangering health or the environment involving this product, call 1-800-992-5994. If you wish to obtain additional product information, visit our web site at www.dowagro.com.

Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.

**Directions for Use**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read all Directions for Use carefully before applying.

NOTICE: The container cap for Gallery* 75 Dry Flowable herbicide may be used to measure the amount of product required to treat small areas. When filled to the level of the inner lip, the cap contains approximately 1/2 ounce which is the amount of Gallery 75 Dry Flowable needed to treat an area of 1,000 square feet. Please refer to label booklet for complete use directions and precautions.

When filled to this level, container cap contains 1/2 oz (14 grams) of Gallery 75 Dry Flowable.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.
Agricultural Use Requirements†
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exemptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

• Coveralls
• Waterproof gloves
• Shoes plus socks
• Protective eyewear

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original container. Do not store in direct sunlight. Do not store at temperatures above 120°F. In case of leak or spill, contain material and dispose as waste.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of in a sanitary landfill, or incineration, or by burning if allowed by state and local authorities. If burned, stay out of smoke.

General Information
Gallery 75 Dry Flowable is a preemergence herbicide for control of certain broadleaf weeds in established turf, landscape ornamentals, container grown ornamentals, nursery stock, ground covers, ornamental bulbs, non-bearing fruit and nut trees and non-bearing vineyards. Add Gallery 75 Dry Flowable to the spray tank as described above and fill. Fill the spray tank to 3/4 of the final volume required. Add other formulations in this order: (1) other dry flowables, (2) wettable powders, (3) aqueous suspensions, (4) flowables, (5) liquids, (6) solutions and emulsifiable or liquid concentrates. Allow two to three minutes between the addition of each product, and agitate continuously until the product(s) are completely dispersed in water. Maintain agitation during filling and through application. If a build-up of materials is observed on the walls of the spray tank, wash the tank with soapy water between fillings, rinse and then continue the spraying operation. Follow label directions for each material added to the tank.

Application
Apply Gallery 75 Dry Flowable at 0.66 to 1.33 lb/acre with a properly calibrated low pressure herbicide sprayer that provides uniform distribution. Nozzle screens should be no finer than 50 mesh (50 mesh is finer than 16 mesh). Apply Gallery 75 Dry Flowable in 10 to 200 gallons of water carrier per acre. As the spray volume decreases, the importance of accurate calibration and uniform application increases. Take precautions to avoid spray drift when applying Gallery 75 Dry Flowable. Drift may result in reduced germination or emergence of non-target plants adjacent to the treated area. Maintain agitation from mixing through application. Avoid boom overlaps that will increase rates above those recommended. Calibrate application equipment prior to use, according to manufacturer’s directions. Check calibration frequently to be sure equipment is working properly and distributing spray uniformly.

NOTICE: The container cap for Gallery 75 Dry Flowable herbicide may be used to measure the amount of product required to treat small areas. When filled to the level of the inner lip, the cap contains approximately 1/2 ounce which is the amount of Gallery 75 Dry Flowable needed to treat an area of 1,000 square feet. (See illustration at front of booklet.)

**Established Turfgrasses**

Gallery 75 Dry Flowable is recommended as a preemergence treatment for control of certain broadleaf weeds in established cool season and warm season turfgrasses.

Apply Gallery 75 Dry Flowable in late summer to early fall, in early spring, or anytime prior to germination of target weeds.

Refer to “General Information” section of this label prior to using this product on turf.

**Special Use Precautions**

Apply Gallery 75 Dry Flowable only on established turf. Apply to newly seeded turf (including overseeded turf) only after seedlings are established (three leaf stage and tillering) and well rooted. Do not overseed established turf sooner than 60 days following an application of Gallery 75 Dry Flowable.

Do not use Gallery 75 Dry Flowable on golf course putting greens or tees.

Do not use Gallery 75 Dry Flowable on dichondra.

Do not use Gallery 75 Dry Flowable on grass grown for seed.
Treatment of Turf Species Not Listed on the Label for Gallery 75 Dry Flowable

Users who wish to use Gallery 75 Dry Flowable on turf species not recommended on this label may determine the suitability for such uses by treating a small area at a recommended rate. Prior to treatment of larger areas, the treated area should be observed for any sign of herbicidal injury during 30 to 60 days of normal growing conditions to determine if the treatment is non-injurious to the target turf species. **The user assumes the responsibility for any turf damage or other liability resulting from use of Gallery 75 Dry Flowable on turf species not recommended on this label.**

**Tank Mixing**

Gallery 75 Dry Flowable may be tank mixed with Surflan* A.S. and applied to **warm season turfgrass** only as a preemergence treatment to provide broad spectrum annual grass and broadleaf weed control. Gallery 75 Dry Flowable may also be applied as a separate treatment to supplement Balan 2.5G or Team 2G applications in cool and warm season turf. Gallery 75 Dry Flowable may be tank mixed with postemergence broadleaf herbicides registered for use on established turf to control existing broadleaf weeds and provide residual preemergence broadleaf weed control. Applied as directed, Gallery 75 Dry Flowable tank mixes will provide control of susceptible weed species listed on the respective labels. When using Gallery 75 Dry Flowable in tank mix combinations with other products, read and follow all applicable use directions, precautions, and limitations on the respective product labels.

**Gallery 75 Dry Flowable is recommended for use on the following turf species:**

**Landscape Ornamentals, Container Grown Ornamentals, Nursery Stock, Ground Covers, Ornamental Bulbs, Non-bearing† Fruit and Nut Trees and Non-bearing† Vineyards, and Christmas Tree Plantations**

**†**Non-bearing fruit and nut trees and non-bearing vineyards are defined as plants which will not bear fruit for at least one year after treatment.

**Gallery 75 Dry Flowable is recommended as a preemergence treatment for control of certain broadleaf weeds in landscape ornamentals, container grown ornamentals, nursery stock, ground covers, ornamental bulbs, non-bearing fruit and nut trees and non-bearing vineyards, and Christmas tree plantations.**

Apply Gallery 75 Dry Flowable anytime prior to germination of target weeds, or immediately after cultivation.

**Note:** Refer to the “General Information” section of this label for use precautions and information on mixing and application, application rates, and weeds controlled prior to using this product.

**Special Use Precautions**

To avoid possible injury, do not apply Gallery 75 Dry Flowable to:

- Nursery seedbeds or forest or Christmas tree seedling transplant beds.
- Unrooted liners or cuttings that have been planted in pots for the first time.
- Pots less than four inches wide.
- Bedding plants or areas where bedding plants will be planted or transplanted within one year following application.
- Ground covers until they are established and well rooted.

**Do not apply** Gallery 75 Dry Flowable to newly transplanted ornamentals, nursery stock, ground covers, ornamental bulbs, non-bearing fruit and nut trees and non-bearing vineyards or Christmas trees until soil or potting media has been settled by packing and irrigation or rainfall and no cracks are present or plant injury may occur.

When planting into a site treated with Gallery 75 Dry Flowable in the past 8 months, use untreated soil as fill around roots when replacing plants or injury may occur.

Repeat applications at 1.0 pound per acre or more of Gallery 75 Dry Flowable should not be made sooner than 60 days after a previous application of Gallery 75 Dry Flowable. Do not apply more than a total of 4.0 pounds per acre of Gallery 75 Dry Flowable within a 12 month period.

**Treatment of Plant Species Not Listed on the Gallery 75 Dry Flowable Label**

Users who wish to use Gallery 75 Dry Flowable on plant species not recommended on this label may determine the suitability for such uses by making a trial application of Gallery 75 Dry Flowable at a recommended rate to a small number of plants. Prior to using Gallery 75 Dry Flowable on a larger number of plants, the treated plants should be observed for any sign of herbicidal injury during 30 to 60 days of normal growing conditions to determine if the treatment is non-injurious to the target plant species. **The user assumes the responsibility for any plant damage or other liability resulting from use of Gallery 75 Dry Flowable on plant species not recommended on this label.**

**Note:** Do not apply Gallery 75 Dry Flowable to the following plant species or injury may occur:

- Ajuga spp. (bugle)
- Brassica spp. (mustard)
- Euonymus alatus ‘compacta’ (dwarf burning bush)
- Euphorbia spp. (spurge)
- Hydrangea spp. (hydrangea)
- Iberi spp. (candytuft)
- Juniperus horizontalis ‘Prince of Wales’ (Prince of Wales Juniper)
- Melaleuca quinquenervia (cajeput tree)
- Rhododendron carolinianum (Carolina rhododendron)
- Rhododendron catawbiense ‘Roseum elegans’ (Roseum elegans rhododendron)
- Sedum spp. (stonecrop)
- Yucca recurvifolia (green yucca)

**Tank Mixing**

Gallery 75 Dry Flowable may be tank mixed with Roundup herbicide or other registered postemergence herbicides to control existing unwanted weeds.
vegetation and provide residual preemergence broadleaf weed control in ornamental areas. Gallery 75 Dry Flowable may also be tank mixed with Surfian A.S. herbicide and applied preemergence to provide broad spectrum control of annual grasses and broadleaf weeds in ornamental areas. Applied as directed, Gallery 75 Dry Flowable tank mixes will provide control of susceptible weed species listed on the respective labels. When using Gallery 75 Dry Flowable in tank mix combination with other products, read and follow all applicable use directions, precautions, and limitations on the respective product labels.

Note: Do not apply sprays containing Roundup over the top of ornamental plants. Extreme care must be exercised to prevent contact of sprays containing Roundup with foliage or stems of turfgrasses, trees, shrubs, or other desirable vegetation since severe damage or death may result. If spraying Roundup in areas adjacent to desirable plants, use a shield to prevent spray from contacting foliage or stems of desirable plants.

Gallery 75 Dry Flowable may be used on the following established plant species:
(Note: Limitations on recommended treatment methods)

Ornamental Bulbs

Gallery 75 Dry Flowable alone may be applied for control of susceptible annual weeds in ornamental bulbs, e.g., bulbous iris, daffodil (narcissus), hyacinth and tulip. Apply Gallery 75 Dry Flowable to the soil surface 2 to 4 weeks after planting, but prior to the emergence of annual weeds. Gallery 75 Dry Flowable may also be applied following bulb emergence but prior to flowering and after flowering. For fall planted bulbs, apply Gallery 75 Dry Flowable again in late winter or early spring to weed-free soil surfaces.

Special Use Precautions:
Do not apply to tulip plants that have emerged to a height greater than 3/4 inch.
Do not apply to gladiolus prior to emergence or if corms are less than one inch in diameter.
Do not apply to bulbs while they are flowering.

Non-bearing† Fruit and Nut Trees and Non-bearing† Vineyards

†Non-bearing fruit and nut trees and non-bearing vineyards are defined as plants which will not bear fruit for at least one year after treatment.

Christmas Tree Plantations

Gallery 75 Dry Flowable alone
Apply Gallery 75 Dry Flowable as a directed spray to the soil surface or as an overtop spray to established plantings of field grown Christmas tree species listed in this label. Do not apply to seedbeds or seedling transplant beds. Apply only to established plantings. Established plants are defined as those that have been transplanted into their final growing location for a sufficient period of time to allow the soil to be firmly settled around the roots from packing and rainfall or irrigation. Follow all instructions provided in the “General Information” section of this label.

Tank Mix Combinations
Tank mix combinations of Gallery 75 Dry Flowable plus other labeled herbicides may be used as directed or overtop sprays in established Christmas tree plantings. When applied according to use directions, these tank mixes will provide control of susceptible weed species listed on the respective product labels. Refer to tank mix product labels for specific use directions, precautions and limitations before use.

Gallery 75 Dry Flowable plus Roundup: Apply tank mix combinations of Gallery 75 Dry Flowable plus Roundup only as directed sprays in Christmas tree plantings. When applied according to use directions, Gallery 75 Dry Flowable plus Roundup herbicide will provide postemergence control of susceptible weed species listed on the label for Roundup and residual preemergence control of susceptible weed species listed on the label for Gallery 75 Dry Flowable. Refer to the label for Roundup for specific use directions, precautions and limitations before use.
Precautions:
Do not apply sprays containing Roundup over the top of Christmas tree plantings.

Extreme care must be exercised to prevent contact of sprays containing Roundup with foliage or stems of Christmas trees or other desirable plants or severe damage or death may result.

Non-cropland Areas

Gallery 75 Dry Flowable is recommended as a preemergence herbicide for control of certain broadleaf weeds in non-cropland areas, including industrial sites, utility substations, highway guard rails, sign posts and delineators.

Apply Gallery 75 Dry Flowable anytime prior to germination of target weeds. Areas to be treated should be free of established weeds or existing weeds should be controlled with postemergence herbicides.

Refer to the “General Information” section prior to using this product on non-cropland.

Gallery 75 Dry Flowable is compatible and can be tank mixed with other herbicides registered for use on non-cropland. Applied as directed, tank mixes containing Gallery 75 Dry Flowable will provide control of susceptible weed species listed on the respective labels. All directions, precautions and limitations on the respective product labels apply to the tank mix use.

Warranty Disclaimer

Dow AgroSciences warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. Dow AgroSciences MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperature, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Dow AgroSciences or the seller. All such risks shall be assumed by buyer.

Limitation of Remedies

The exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Dow AgroSciences' election, one of the following:

1. Refund of purchase price paid by buyer or user for product bought, or
2. Replacement of amount of product used

Dow AgroSciences shall not be liable for losses or damages resulting from handling or use of this product unless Dow AgroSciences is promptly notified of such loss or damage in writing. In no case shall Dow AgroSciences be liable for consequential or incidental damages or losses.

The terms of the "Warranty Disclaimer" above and this “Limitation of Remedies” cannot be varied by any written or verbal statements or agreements. No employee or sales agent of Dow AgroSciences or the seller is authorized to vary or exceed the terms of the "Warranty Disclaimer" or this "Limitation of Remedies" in any manner.

*Dow AgroSciences LLC
Dow AgroSciences LLC - Indianapolis, IN  46268  U.S.A.

Label Code:  D02-081-008
Replaces Label:  113-78-007
EPA-accepted 10/01/93

Revisions:

DowElanco notified the EPA that its legal name will change to Dow AgroSciences LLC effective January 1, 1998. The following label changes are being made via non-notification as a result of this company name change:

• Company name changed from DowElanco to Dow AgroSciences LLC (logo, trademark reference, address line, warranty statement)
• Emergency telephone number updated to include a web site address (PR Notice 97-4)

The name of this product and its EPA registration number remain the same. No other changes are being made to the label at this time.
