1. PRODUCT AND COMPANY INFORMATION

Company : BASF Building Systems  
889 Valley Park Drive  
Shakopee, MN 55379

Telephone : 952-496-6000  
Emergency telephone number : (800) 424-9300  
(703) 527-3887 (Outside Continental US)

Product name : PRIMER 733

MSDS ID No. : 10602

TSCA Inventory : All components of this product are included, or are exempt from inclusion, in the EPA Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

Canadian DSL : All components of this product are included, or are exempt from inclusion, in the Canadian Domestic Substance List (DSL).

Product Use Description : Coating

WHMIS Class : B2

Primary Routes of Entry :  
Ingestion  
Inhalation  
Eye contact  
Skin contact  
Skin absorption

Effects of Overexposure  
Inhalation : Harmful by inhalation. Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting. Inhalation of high vapor...
concentrations can cause CNS-depression and narcosis. Prolonged inhalation can be harmful. Isocyanates may cause acute irritation and/or sensitisation of the respiratory system leading to tightness of the chest, wheeziness and an asthmatic condition.

Skin : Prolonged skin contact may defat the skin and produce dermatitis. Prolonged or repeated exposure can cause skin irritation and redness. Skin sensitization or allergic reaction can occur in some individuals. Components of the product may be absorbed into the body through the skin.

Eyes : Can cause slight irritation, redness, tearing and blurred vision.

Ingestion : Intake can cause gastrointestinal irritation, nausea, and vomiting. Moderate toxicity.

Chronic exposure : Chronic overexposure to xylene can cause damage to the formed elements of blood [e.g., red cells, which carry oxygen]. Chronic inhalation of toluene vapors can produce depression of the central nervous system, leading to fainting, difficulty in breathing, nausea, vomiting, and memory loss. This product contains solvents. Reports associate repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Reports also indicate that solvents cause liver damage, kidney damage, and mucous membrane irritation. Be warned that intentional misuse by deliberately inhaling the vapors and/or the product contents (a process often called "sniffing") can be harmful or fatal. This product may contain a small amount (<0.1%) of toluene diisocyanate. NIOSH, NTP and IARC list toluene diisocyanate as a suspected carcinogen. Note also that prolonged repeated exposure to isocyanates can lead to skin sensitization. For persons so sensitized even brief exposures to an isocyanate can produce reddening, swelling, rash, or blisters. Similarly, prolonged and repeated exposure to isocyanates at levels well below established exposure limits can produce chemical asthma and nonspecific asthmatic conditions. This product contains ethylbenzene. The International Agency for Research on Cancer has evaluated ethylbenzene and has classified it as a possible human carcinogen (Group 2B) based on sufficient evidence for carcinogenicity in experimental animals, but inadequate evidence for cancer in exposed humans.

### 4. FIRST AID MEASURES

**Eye contact** : Flush eyes with water, lifting upper and lower lids occasionally for 15 minutes. Seek medical attention.

**Skin contact** : Remove contaminated clothing. Wash thoroughly with soap and water. If irritation
Ingestion: Do not induce vomiting without medical advice. If conscious, drink plenty of water. If a person feels unwell or symptoms of skin irritation appear, consult a physician. If a person vomits, place him/her in the recovery position. Never give anything by mouth to an unconscious person.

Inhalation: Remove victim from exposure. If difficulty with breathing, administer oxygen. If breathing has stopped administer artificial respiration, preferably mouth-to-mouth. Seek immediate medical attention.

5. FIRE-FIGHTING MEASURES

Flash point: 64.99 °F (18.33 °C) Method: Taglibue C. C.

Autoignition temperature: no data available

Lower explosion limit: 1.0 %(V)

Upper explosion limit: 7.1 %(V)

Suitable extinguishing media: alcohol-resistant foam water fog carbon dioxide (CO2) dry chemical

Fire and Explosion Hazards: Flammable Liquid. Can release vapors that form explosive mixtures at temperatures at or above the flashpoint. Vapors can travel to a source of ignition and flash back. Empty containers retain product residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; CONTAINERS MAY EXPLODE AND CAUSE INJURY OR DEATH. Heating can release vapours which can be ignited. Solid stream of water or foam can cause frothing.

Special Fire-fighting Procedures: Can be ignited by heat, sparks or flame. At higher temperature pressure build up in sealed containers. Use water to cool containers exposed to fire. As in any fire, wear pressure demand self-contained breathing apparatus (NIOSH approved or equivalent) and full protective gear. Water runoff can cause environmental damage. Dike and collect water used to fight fire.

6. ACCIDENTAL RELEASE MEASURES

Methods for cleaning up: Ventilate the area and remove all sources of ignition. Evacuate unnecessary personnel. Take action to eliminate source of leak. Large spills should be handled carefully. Put on respiratory protection and necessary personal protective equipment. Dike or impound spilled Liquid. Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

7. HANDLING AND STORAGE
Handling: Keep out of reach of children. Use only in area provided with appropriate ventilation. Take precautionary measures against static discharges. Ground and bound containers when transferring material. For personal protection see section 8.

Storage: Store in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Keep container tightly closed.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

- **Eye protection**: Wear as appropriate: safety glasses with side-shields, goggles, face-shield.
- **Hand protection**: Wear Chemically resistant gloves.
- **Body Protection**: Wear Chemically resistant clothes, preventive skin protection.
- **Respiratory protection**: In case of insufficient ventilation wear suitable respiratory equipment. When workers are facing concentrations above the exposure limit they must use NIOSH approved respirators.
- **Hygienic Practices**: Avoid contact with skin, eyes and clothing. Ensure adequate ventilation, especially in confined areas. Wash hands before breaks and at the end of workday. When using, do not eat, drink or smoke. Handle in accordance with good industrial hygiene and safety practice.
- **Engineering Controls**: Local exhaust ventilation can be necessary to control any air contaminants to within their TLVs during the use of this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

- **Color**: amber
- **Physical State**: liquid
- **Odor**: strong solvent
- **pH**: no data available
- **Odor Threshold**: no data available
- **Vapor Pressure**: no data available
- **Vapor Density**: Heavier than air
- **Boiling point/range**: 232.00 - 484.00 °F (111.11 - 251.11 °C)
- **Freeze Point**: no data available
- **Water solubility**: slightly soluble
Specific Gravity : 1.07
Viscosity : 90 cps
Evaporation rate : Faster than Butyl acetate
Partition coefficient (n-octanol/water) : no data available
VOC Concentration as applied (less water and exempt solvents) : 584 g/l

10. STABILITY AND REACTIVITY

Stability : Stable under recommended storage conditions.

Conditions to avoid : Heat, flames and sparks.
Direct sources of heat.
Strong sunlight for prolonged periods.
Prolonged exposure to high temperatures

Materials to avoid : oxidizing agents

Hazardous decomposition products : Oxides of carbon
traces of HCN
nitrogen oxides (NOx)

Hazardous polymerization : Will not occur under normal conditions.

12. ECOLOGICAL INFORMATION

Ecotoxicological Information: There is no data available for this product.

13. DISPOSAL CONSIDERATIONS

Recommendations: Use excess product in an alternate beneficial application. Handle disposal of waste material in manner which complies with local, state, province and federal regulation.

14. TRANSPORT INFORMATION

DOT: Proper shipping name PAINT
UN-No 1263
Class 3
Packaging group II
Primary Label Flammable liquid

IATA: Proper shipping name PAINT

15. REGULATORY INFORMATION

SARA 311/312 (RTK)
This product has been reviewed according to the EPA 'Hazard Categories' promulgated under Sections 311 and 312 of the Superfund Amendments and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

FIRE HAZARD  IMMEDIATE (ACUTE) HEALTH HAZARD  DELAYED (CHRONIC) HEALTH HAZARD

SARA 313
This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372:

<table>
<thead>
<tr>
<th>Weight %</th>
