WE SEE THREATS MORE CLEARLY.
By integrating the best security technologies available into our proprietary platform, our engineers can focus on purpose-driven technology advances that solve real security problems. Like how to deliver data in a way that drives understanding and creates actionable intelligence.

VISIBILITY IS SECURITY.
In Internet security, seeing is knowing. If you can see it, you can deal with it, so visibility is protection. That’s WatchGuard Dimension™. Dimension is WatchGuard’s award-winning visibility tool that’s standard with every WatchGuard Next Generation Firewall (NGFW) or Unified Threat Management (UTM) appliance. Dimension enables busy IT security managers to instantly visualize and isolate threats to network security. A subscription to Dimension Command adds a suite of management tools that allow you to make policy changes directly from the visibility dashboards.

“WatchGuard Dimension is a tool designed to make life easier for security professionals, so they can more quickly distill key information and security data into actionable policy creation.” — [Frost & Sullivan]

RED IS BUILT FOR SPEED.
Other manufacturers might offer faster throughput for one single security technology but we engineered WatchGuard’s platform to deliver the fastest throughput when all of its powerful scanning engines are turned on, even when de-encrypting HTTPS traffic. So turn them all on. You can’t afford not to.

BE THE HUNTER. NOT THE PREY.
Whether you want an NGFW or are ready for a full UTM solution, whatever the threat environment, WatchGuard has you covered. With access to enterprise-class security technologies, industry-leading visibility and the best performance at any price point, WatchGuard puts you at the top of the network security food chain.

SOME FIND HACKERS THREATENING. WE FIND THEM DELICIOUS.
Network threats can come from anywhere, at any time, and they can take you down before you even know they’re there. To seize them, you need a network security solution that’s at the top of its game. That’s WatchGuard. Uniquely architected to be the industry’s smartest, fastest and most potent network security solution.

SURVIVAL OF THE FITTEST
Security technologies for antivirus/antispam, intrusion prevention and APT protection are not created equal, so only the world’s most trusted solutions make it onto our network security appliances. These best-of-the-best security scanning technologies sit on top of a platform WatchGuard built to be the fastest and most agile in the industry.

Why do we do it this way? Because proprietary approaches create hardware and software dependencies. We don’t like them and neither do our customers. So we spent three years perfecting our Fireware® operating system to run full versions of the industry’s leading scanning engines on an industry-standard platform for maximum flexibility. And maximum cost effectiveness: our customers get the industry’s best performance at every price point.

Welcome to the Top of the Network Security Food Chain

### Security Capabilities

- Stateful packet filter, deep application inspection, application aware, HTTPS, HTTP, FTP, Telnet, RDP, DNS
- Blocks spyware, DoS attacks, fragmented packets, malformed packets, blocked content and more
- Protocol anomaly detection, behavior analysis, pattern matching
- Static and dynamic blocked sources list
- WebP, H.264 and UP, call setup and session security

### Logging & Reporting with WatchGuard Dimension™

- Real-time multi-application log aggregation and reporting
- Public & private cloud-ready
- Visibility at a glance with intuitive and interactive visualizations
- Spot trends, outliers and insights about network traffic and usage
- Over 100 reports including reports for PCI and HIPAA compliance
- Option to deliver reports (PDF, CSV) via email

### Management Software

- WatchGuard appliances can be managed with any of the following:
  - Dimension Command for interactive real-time management of multiple appliances via web browser
  - WatchGuard System Manager for intuitive management of appliances via Windows client
  - Command line interface (CLI) for direct access via scripting
  - Simplified configuration and deployment with RapidDeploy

### User Authentication

- Transparent Active Directory Authentication (single sign-on)
- RADIUS, LDAP Secure Login, Windows Active Directory
- RSA SecurID® and VASCO

### Support and Maintenance

- 24x7 Support and Gold Support are available as purchase options for Firebox models M200 and higher
- 24x7 Support is included in all NGFW Suites, and in UTM Suites for models M200 and higher
- Remote Deployment Services for comprehensive assistance with initial setup, configuration, and deployment
- Premium 4-Hour Hardware Replacement to ensure maximum uptime (not available in all regions)

### Wireless Access Points (APs)

- All models include a Wi-Fi controller to centrally manage WatchGuard Access Points and extend UTM and NGFW security capabilities to the WLAN

### Max APs advised per model

### Firewall

- Application proxies: HTTP, HTTPS, SMTP, TCP-UDP, FTP, DNS
- Stateful packet firewall, deep application inspection, blended threats and more
- Dynamic routing (BGP, OSPF, RIP, BGP, RIPV2), Policy-based routing, NAT (static, dynamic, 1:1, IPsec traversal, policy-based NAT), Traffic shaping & DoS: 8 priority queues, Django, modified strict queuing, Virtual IP for server load balancing

### Management Software

- WatchGuard appliances can be managed with any of the following:
  - Dimension Command for interactive real-time management of multiple appliances via web browser
  - WatchGuard System Manager for intuitive management of appliances via Windows client
  - Command line interface (CLI) for direct access via scripting
  - Simplified configuration and deployment with RapidDeploy

### User Authentication

- Transparent Active Directory Authentication (single sign-on)
- RADIUS, LDAP Secure Login, Windows Active Directory
- RSA SecurID® and VASCO

### Support and Maintenance

- 24x7 Support and Gold Support are available as purchase options for Firebox models M200 and higher
- 24x7 Support is included in all NGFW Suites, and in UTM Suites for models M200 and higher
- Remote Deployment Services for comprehensive assistance with initial setup, configuration, and deployment
- Premium 4-Hour Hardware Replacement to ensure maximum uptime (not available in all regions)

### Wireless

- All models support AP100, AP102, and AP200 wireless access points to extend UTM and NGFW security capabilities to the WLAN

### Operating System Features

- Integration of 802.11a/b/g/n available for Firebox T10-W. Integration of 802.11a/b/g/n/ac is available for Firebox T30-W and T50-W.

### Firewall

- Filtering: 120 Mbps
- Application proxies: HTTP, HTTPS, SMTP, TCP-UDP, FTP, DNS
- Stateful packet firewall, deep application inspection, blended threats and more
- Dynamic routing (BGP, OSPF, RIPV1,2) / Policy-based routing / NAT: static, dynamic, 1:1, IPsec traversal, policy-based NAT / Traffic shaping & DoS: 8 priority queues, Django, modified strict queuing / Virtual IP for server load balancing

### Management Software

- WatchGuard appliances can be managed with any of the following:
  - Dimension Command for interactive real-time management of multiple appliances via web browser
  - WatchGuard System Manager for intuitive management of appliances via Windows client
  - Command line interface (CLI) for direct access via scripting
  - Simplified configuration and deployment with RapidDeploy

### User Authentication

- Transparent Active Directory Authentication (single sign-on)
