Glossary – New Jersey

Electric

**Basic Services:**
Services necessary for the physical delivery of service, including generation, transmission and distribution. The monthly customer charge and the temporary transition charge are also basic service charges.

**Customer Charge:**
Part of the monthly basic distribution charge to partially cover costs for billing, meter reading, equipment, service line maintenance and equipment. This charge is the same no matter how much electricity you use.

**Consumer’s Dictionary for Electrical Competition:**
Please "Click Here" for the official Dictionary of terms used in the competitive electricity market.
http://www.nj.gov/bpu/residential/glossary

**Terms and Conditions:**
A contract between an Electric Generation Supplier and a customer that outlines the terms and conditions of service (i.e. length of term, fees, etc.) and other important information. Electric Generation Suppliers must provide this agreement to all customers at time of enrollment.

**Deregulation**
Removal or relaxation of regulations or controls governing a business or service operation such as utilities.

**Distribution:**
The local wires, transformers, substations and other equipment used to deliver electricity to end-use consumers from the high-voltage transmission lines.

**Distribution Charges:**
Part of the basic service charges on every customer’s bill for delivering electricity from the electric distribution company to your home or business. The distribution charge is regulated by the Board of Public Utilities. This charge will vary according to how much electricity you use.

**Early Cancellation Fee (ECF):**
The fee Stream charges when a customer on a Fixed Plan terminates service prior to the end of their contract. This ECF is stated in the Terms and Conditions. When Stream offers a Fixed Plan, a “strip” of electricity is purchased at a wholesale rate to support the retail price charged to the Customer. When a customer terminates their Fixed Plan Agreement with Stream early, Stream is still liable to purchase their electricity at that rate; therefore, Stream charges an ECF to offset this liability.

**Energy Choice:**
This is the approved program which supports the customer’s choice of Electric Generation Suppliers (EGS) in both the residential and commercial/industrial sectors. Presently Stream will only be allowing IAs to market in the Residential portion of the Energy Choice program.

**Electric Distribution Company (EDC):**
This is the company that owns the power lines and equipment necessary to deliver purchased electricity to the customer. We will be initially marketing in the PSE&G and Atlantic City Electric service territory. All of the New Jersey Utilities are listed below:
- Atlantic City Electric
- Jersey Central Power & Light
- PSE&G
- Rockland Electric Company
Electric Generation Supplier (EGS):
The licensed competing retail electric provider (ex: Stream Energy) in the NJ Electric Choice.

Stream's Local Office in MD:
Stream Energy
P.O. Box 32070
Newark, NJ 07102-0470

Fixed Price:
A price which remains the same, usually for a set time period. (In Stream Energy’s Fixed Plan Contract the price is a fixed price for a set period of time.)

Generation:
The production of electricity. In New Jersey, electricity is produced by a number of methods including natural gas, coal, nuclear power, wind, water and solar energy. The generation of electricity is deregulated.

Generation Charge:
Part of the basic service charges on every customer’s bill for producing electricity. Generation service is competitively priced and is not regulated by the Board of Public Utilities. This charge depends on the contract between the customer and the supplier.

Grid:
A network for the transmission of electricity throughout the state, region or nation. The term is also used to refer the layout of an electric distribution system. (See PJM)

Intangible Transition Charge:
Charges to utility customers to pay for special bonds that are used to refinance utility debt, thereby lowering overall costs for the utility and its customers.

Kilowatt-hour (kWh):
The basic unit of electric energy for which most customers are charged in cents per kilowatt-hour. A unit of energy equal to one kilowatt (kW) of power expended for one hour of time. The amount of electricity used each billing period is expressed in terms of a kilowatt-hour and is noted on your bill.

New Jersey Electric Service Area Map:
**Price to Compare (PTC):**
Kilowatt-hour amount a consumer uses to compare prices and potential savings among generation suppliers.

**Provider of Last Resort (POLR):**
The company providing generation services to those who do not choose another supplier, are unable to find a supplier willing to serve them or for some reason no longer receive generation services from another supplier.

**New Jersey Board of Public Utilities (NJ BPU):**
New Jersey State agency that regulates electric, natural gas, telephone, privately-owned water/sewage companies and some transportation services. The New Jersey Board of Public Utilities regulates both residential and commercial services.

**PJM:**
*Pennsylvania – New Jersey – Maryland (PJM) Interconnection Independent Service Operator (ISO)* – Maryland is part of the PJM electric “Grid”. It is a Regional Transmission Organization (RTO) that coordinates the movement of wholesale electricity in all or parts of 13 states and the District of Columbia. Acting as a neutral, independent party, PJM operates a competitive wholesale electricity market and manages the high-voltage electricity grid to ensure reliability for more than 51 million people. PJM is interconnected to other ISOs and is bordered on 3 sides by NY ISO [to the North], Midwest ISO [to the West], and SE Reliability Council (SERC) [to the South]. PJM is like ERCOT (in Texas); however, ERCOT is not interconnected to other ISOs.

**Renewables (Green Power):**
Resources used to generate electricity that are capable of being replaced naturally. This includes fuels and technologies such as solar photovoltaic energy, solar thermal energy, wind power, low head hydro power, geothermal energy, landfill and mine based methane gas, energy from waste and sustainable biomass energy.

**Slamming:**
Switching electric service without a customer's approval. This practice is illegal and penalties are enforced by the NJ BPU. Ignite has a zero tolerance Policy towards slamming and is a terminable offense (see your Policies and Procedures Manual in your Power Center).

**Transmission Charges:**
Part of the basic service charges on every customer’s bill for transporting electricity from the source of supply to the electric distribution company. The Federal Energy Regulatory Commission regulates retail transmission prices and services. This charge will vary with your source of supply.

**Variable Price:**
A price which can change, by the hour, day, month etc. Stream’s Variable Plan(s) usually readjusts on a monthly basis in response to the energy market.

**Weatherization:**
Modifying a home or building to conserve energy. Methods include: sealing window and doorframes with caulking or gaskets, installing storm doors and windows, and adding or increasing the insulation.
Gas

**Balancing Charge:**
The charge for using PSE&G’s storage system to adjust for the differences between the amount of gas delivered for a customer on a daily basis versus the amount of gas used by a customer on a daily basis. This charge is applied from November through March only.

**Commodity Charge:**
The charge for the natural gas supply that was delivered to a customer’s home.

**Consumer’s Dictionary for Electrical Competition:**
Please "Click Here" for the official Dictionary of terms used in the competitive electricity market.
http://www.nj.gov/bpu/residential/glossary

**Customer Choice:**
The ability of electricity and natural gas customers to shop, compare prices, and choose the company that generates or supplies their electricity and natural gas. Their utility continues to provide delivery service under regulated rates and conditions.

**Delivery Charge:**
The sum of the Service Charge, Distribution Charge and Balancing Charge.

**Deregulation:**
The removal of government regulations. Consumers can choose their energy supplier. Only the supply of electricity and natural gas is deregulated; transmission and distribution services remain regulated. This type of limited deregulation is also referred to as unbundling or restructuring.

**Distribution:**
Distribution is the final step in delivering natural gas to customers. While some large industrial, commercial, and electric generation customers receive natural gas directly from high capacity interstate and intrastate pipelines (usually contracted through natural gas marketing companies), most other users receive natural gas from their local gas utility.

**Distribution Charges:**
The charge for using PSE&G’s gas distribution system for delivery of natural gas to a customer’s home. The cost of government-mandated programs and certain net revenue credits are included.

**Early Cancellation Fee (ECF):**
The fee Stream charges when a customer on a Fixed Plan terminates service prior to the end of their contract. This ECF is stated in the Terms and Conditions.

**Fixed Price:**
A price which remains the same, usually for a set time period. (In Stream Energy’s Fixed Plan Contract the price is a fixed price for a set period of time.)

**Local Distribution Company (LDC):**
LDCs are regulated utilities involved in the delivery of natural gas to consumers within a specific geographic area. There are two basic types of natural gas utilities: those owned by investors, and public gas systems owned by local governments.
New Jersey Gas Service Area Map:

New Jersey Board of Public Utilities (NJ BPU):
New Jersey State agency that regulates electric, natural gas, telephone, privately-owned water/sewage companies and some transportation services. The New Jersey Board of Public Utilities regulates both residential and commercial services.

Price to Compare (PTC):
Calculated using a customer’s natural gas usage and the cost per therm for that gas. This number is useful in helping a customer compare offers from third party suppliers of gas.

Service Charge:
A fixed monthly charge that includes the cost to maintain an account for a customer, including metering and billing.

Slamming:
Switching energy supply service without a customer’s approval. This practice is illegal and penalties are enforced by the NJ BPU. Ignite has a zero tolerance Policy towards slamming and is a terminable offense (see your Policies and Procedures Manual in your Power Center).

Supply Charges:
Charges associated with the cost of natural gas.
**Terms and Conditions:**
A contract between a Third Party Supplier and a customer that outlines the terms and conditions of service (i.e. length of term, fees, etc.) and other important information. The Third Party Suppliers must provide this agreement to all customers at time of enrollment.

**Therm:**
A therm is the measurement natural gas companies use to determine your natural gas usage. A therm is equal to 100,000 BTUs (British Thermal Units). The amount of natural gas used each billing period is expressed in terms of a therm and is noted on your bill.

**Third Party Supplier (TPS):**
The licensed competing retail energy provider (ex: Stream Energy) in the NJ Customer Choice Program.

**Stream's Local Office in NJ:**
Stream Energy
P.O. Box 32070
Newark, NJ 07102-0470

**Variable Price:**
A price which can change, by the hour, day, month etc. Stream’s Variable Plan(s) usually readjusts on a monthly basis in response to the energy market.

**Weatherization:**
Modifying a home or building to conserve energy. Methods include: sealing window and doorframes with caulking or gaskets, installing storm doors and windows, and adding or increasing the insulation.
