LAKE COUNTY PROPERTY APPRAISER OFFICE
GUIDELINES FOR AGRICULTURAL CLASSIFICATION OF LANDS

These guidelines are intended to provide assistance to those planning to make application for The Agricultural Classification. Any questions about these guidelines should be directed to the Lake County Property Appraiser’s Office at 352-253-2162 or 352-253-2150.

Pursuant to Florida Statute 193.461, “No lands shall be classified as agricultural lands unless an application is filed on or before March 1st of each year.” “Only lands which are used primarily for bona fide agricultural purposes shall be classified agricultural.” “Bona fide agricultural purposes” means good faith commercial agricultural use of the land.” JANUARY 1st is the statutory assessment date; therefore the property must be in use as bona fide commercial agriculture on this date and it is the responsibility of the applicant to provide the proof.

IMPORTANT NOTICE: Grove properties that have or will be converted to a non citrus use may not qualify for another agricultural use while live citrus trees are present these properties are defined as abandoned groves. Please go to www.lcpafl.org and look under FAQ section for what is (CHRP) and please contact us.

Minimum Standards for Agricultural Classification (Commercial Farming)

COMMERCIAL COW/CALF OPERATION

1. Pasture land is recommended to be at least 5 acres or part of a larger agricultural operation.

2. Pasture must be properly fenced to contain livestock, and free of harmful debris.

3. An indicated effort must have been made to maintain and care sufficiently for this type of land, i.e. fertilizing, liming, tilling, mowing, controlled burning, herbicide application for the removal of unwanted and toxic vegetation, etc.

4. Receipts from the purchase or sale of livestock, and expenses incurred from the Ag operation will be required.

5. If herd is tagged, please provide tag identification numbers and/or branding information.

6. An Agricultural Business Plan should be furnished with the application. (Farm statement)

7. In reference to livestock in relation to parcel size (and by way of example only), one cow on a one-acre parcel likely would not be construed as a commercial agricultural operation, while 50 cows on 100 acres could be.

The capability of the soil and grass is considered as to the carrying capacity for the livestock for each parcel.

Consideration will be given to the equipment and facilities used for livestock maintenance, such as cow pens, feeders, cross fencing, etc.

Best Management Practices should be the guide for stocking and management of operations.

8. Specialty livestock will be considered on a case by case basis.

9. If property is leased, it must be in effect as of January 1st and contain full contact information on lessee and a copy of the current lease must be furnished with the application.

10. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.

11. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.
COMMERCIAL HORSE BREEDING OPERATION

1. Horse breeding operations are recommended to be on at least 5 acres.

2. One horse per acre is a rule of thumb, but each operation will be evaluated on a case by case basis.

3. An indicated effort has been made to maintain and care sufficiently for this type of land, i.e. fertilizing, mowing, and other accepted practices for horse care. **Best Management Practices should be used.**

4. There should be at least three registered brood mares in production, a stallion, or evidence of stud service. Registrations for all horses and breeders certificates must be included with the application.

5. Production of livestock for one’s own use and pleasure will not qualify for agricultural classification.

6. If property is used for horse boarding, there should be a written agreement between the parties involved. This agreement must include the terms for the lease of pastureland. An agricultural classification is not normally granted for horses only boarded in a stable. There must be some agricultural use of the land involved. An occupational license is required for horse boarding.

7. An Agricultural Business Plan should be furnished with the application. (Farm statement)

8. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.

9. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.

10. If the land is used for horse training or riding centers, and the income to the property is generated only through this type of operation, the property will not qualify for an agricultural classification.

COMMERCIAL HAY PRODUCTION OPERATION

1. Hay fields are recommended to be at least 10 acres or part of a larger agricultural operation.

2. An indicated effort has been made to maintain and care sufficiently for this type of land, i.e. fertilizing, mowing, weeding, herbicide application for the removal of unwanted and toxic vegetation etc. **Best Management Practices should be used.**

3. Sales receipts of hay bales will be required.

4. An Agricultural Business Plan should be furnished with the application. (Farm statement)

5. If property is leased, it must be in effect as of January 1\(^{st}\) and contain full contact information on lessee and a copy of the current lease must be furnished with the application.

6. If property is not leased, owner must submit cutting agreement or show tangible personal property return is filed for bailing equipment.

7. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.

8. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.
COMMERCIAL GOAT/SHEEP OPERATION

1. Goat/Sheep Pasture land is recommended to be at least 5 acres or part of a larger agricultural operation.

2. Pasture must be properly fenced to contain livestock, and free of harmful debris.  
   **Best Management Practices for livestock should be the guide for maintenance of the operation.**

3. An indicated effort has been made to maintain and care sufficiently for this type of land, i.e. fertilizing, 
mowing, weeding, herbicide application for the removal of unwanted and toxic vegetation etc.

4. Receipts from the purchase or sale of goats/sheep, and any expenses incurred from the agricultural 
   operation must be provided.

5. An Agricultural Business Plan should be furnished with the application.

6. In reference to goats/sheep in relation to parcel size, 25 goats/sheep on a five-acre pasture area of the 
   parcel is the recommended minimum and could likely be construed as a commercial agricultural operation. 
The capability of the soil and type of grass is considered as to the carrying capacity for the animals on each 
   parcel. Consideration will be given to the equipment and facilities used for the animal maintenance, such as 
pens, shelters, feeders, cross fencing, etc.

7. Provide a copy of all goat/sheep identification numbers. All goats/sheep moved intrastate, interstate, or by 
   change of ownership for any purpose must be officially identified to the flock/herd of birth, as required by 
   the USDA C.F.R. 79.2(2008). Ear tags must be permanent and tamper proof, and may be obtained from the 
   Florida Department of Agriculture. Contact: Division of Animal Industry @ 850-410-0900 or 
   [www.doacs.state.fl.us/ai](http://www.doacs.state.fl.us/ai)

8. If property is leased, it must be in effect as of January 1st and contain full contact information on lessee 
   and a copy of the current lease must be furnished with the application.

9. A copy of any licenses, permits, or agricultural certificates required by federal, state or local governments 
   must be submitted.

10. To make a determination of a bona fide agricultural use, these factors will be considered on a case by 
    case basis. All documentation to be considered should be submitted with application.

COMMERCIAL CITRUS OPERATION

1. Groves are recommended to be at least 5 acres or part of a larger operation.

2. Trees must be planted prior to January 1st or land must be prepared for citrus planting and trees purchased 
   by January 1st (must include supporting documents) and planted by the end of February.

3. Standard plantings are from 90 to 120 trees per acre. Anything less could be considered a hobby and not a 
   true COMMERCIAL venture. The parcel should be of sufficient size to produce the income needed to 
   sustain the entire operation.

4. The number of trees per acre, the variety of the citrus, and the effective age of the trees, is to be submitted 
   with the application.

5. Proper care and management of the grove must be evident and records provided upon request.  
   **Best Management Practices should be used.**

6. An Agricultural Business Plan should be furnished with the application. (Farm statement)

7. If property is leased, it must be in effect as of January 1st and contain full contact information on lessee 
   and a copy of the current lease must be furnished with the application.
8. All citrus lands should be registered with the Department of Agriculture Citrus Health Response Program (CHRP) and a certificate needs to be submitted with application. Please go to www.lcpaf1.org and look under FAQ section for what is (CHRP). Please contact us if you have any questions.

9. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.

10. Specialty groves and organic operations will be evaluated on a case by case basis.

11. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.

**COMMERCIAL TIMBER OPERATION**

In order for a property to be considered for an agricultural classification the property must be in use as bona fide commercial agriculture as of January 1st of the year the application is applied. Timber is one of the few uses where the planting season runs between October and April which means trees may not be planted before January 1st, so to qualify for timber the following requirements must be completed before January 1st. **Pine trees should not be planted on land with abandon live citrus trees present.**

- A Forest Management Plan or Forest Stewardship.
- A contract for the purchase of the trees.
- A contract with a planter, this can include the purchase of the trees.
- The property cleared of competing vegetation and prepped for planting.
- Any other activity recommended by the Management Plan should be readily apparent to the agricultural appraiser.

1. Planted timber land is recommended to be at least 10 acres or part of a larger agricultural operation with a minimum survival rate of 400 trees per acre.

2. Approved forestry-management or stewardship plan prepared by a professional forester dated prior to January 1st is required; a copy must be submitted with the application, and must be updated every 5 years.

3. The land must have been planted or prepared for planting and there must be evidence that the trees have been ordered, and or contracted as of January 1.

4. The stand must be commercially planted pines or a predominantly natural stand of pines. Hardwood and/or cypress are approved on a case by case basis.

5. Whether the use will be considered a “bona fide commercial agricultural use” will be based in part on the merchantability of the timber on the tract of land.

6. Ongoing activities and maintenance of the lands should include, but not be limited to, fire lanes, underbrushing, controlled burning, pine-needle harvesting, and any other activity recommended by the Management Plan should be readily apparent to the agricultural appraiser. **Best Management Practices should be used.**

7. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.

8. If property is leased, it must be in effect as of January 1st and contain full contact information on lessee and a copy of the current lease must be furnished with the application.

9. Christmas tree production will be considered as nursery land and evaluated on a case by case basis.

10. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.
COMMERCIAL PLANT NURSERY OPERATION
1. Plant nurseries are recommended to be at least 1 acre. **Best Management Practices should be used.**
2. A State Nursery Registration Certificate and Occupational license are required and copies must be submitted with the application.
3. Only acres actually used for the nursery and service area will be considered a “bona fide” agricultural use.
4. List of the type of plants grown in the nurseries must be submitted with the application.
5. Receipts from the sale of stock and expenses incurred from the Ag operation will be required upon request.
6. Tree nursery also includes Christmas tree production.
7. An Agricultural Business Plan should be furnished with the application.
8. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.
9. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.

COMMERCIAL ROW CROP OPERATION
1. Row crops (vegetables, beans, peanuts, etc.) are recommended to be on at least 1 acre.
2. Sales receipts and a description of the type of crops are required to be submitted.
3. Production of crops for your own use does not qualify, i.e. garden.
4. An Agricultural Business Plan should be furnished with the application.
5. An indicated effort has been made to maintain and care sufficiently and adequately for the land. **Best Management Practices should be used.**
6. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.
7. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.

COMMERCIAL SPECIALTY CROP OPERATION
1. Specialty crops are recommended to be on at least 1 acre.
2. Crops include, but are not limited to, blueberries, strawberries, grapes, etc.
3. Sales receipts and a description of the type of crops are required to be submitted.
4. An Agricultural Business Plan should be furnished with the application.
5. An indicated effort has been made to maintain and care sufficiently and adequately for the land. **Best Management Practices should be used.**
6. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.
7. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.
MISCELLANEOUS COMMERCIAL AGRICULTURE

1. Poultry, swine, apiaries, fish hatcheries, emus, etc. will be considered on a case by case basis.

2. An indicated effort has been made to maintain and care sufficiently and adequately for the land. **Best Management Practices should be used.**

3. Sales receipts and a description of the type of crops or livestock are required to be submitted.

4. An Agricultural Business Plan should be furnished with the application.

5. A copy of any licenses, permits, or agricultural certificates required by federal, state, or local governments should be submitted.

6. If property is leased, it must be in effect as of January 1st and contain full contact information on lessee and a copy of the current lease must be furnished with the application.

7. To make a determination of bona fide agricultural use, these factors will be considered on a case by case basis. All documentation to be considered should be submitted with application.
GENERAL

All applications are field checked systematically to verify use and to ensure correct assessments. Additional information will be requested from the property owner to determine continuance of eligibility. This information will probably be in the form of IRS returns, income and expense documents, purchase or sales receipts and will be requested on a regular basis.

Any residence on the property causes a minimum of one acre to be removed from the agricultural classification. This acre is assessed at the current market value and is referred to as a homesite and may be eligible for homestead if the owner qualifies under Chapter 196, F.S.

Only the acreage that is actually used for the agricultural operation can be classified agricultural. Intent to use it cannot be considered.

Sale of land for a purchase price which is three or more times the agricultural assessment placed on the land shall create a presumption that such land is not used primarily for bona fide agricultural purposes. Upon a showing of special circumstances by the landowner demonstrating that the land is to be continued in bona fide agriculture, this presumption may be rebutted.

Application for agricultural classification must be made every year between January 1st and March 1st. The initial application is made on the long form (DR-482) and is available in the Property Appraiser’s Office or on our web site, www.lcpafl.org. If the application is approved, you will receive notification by July 1st. If the application is denied, you will receive your copy of the denial no later than July 1st. Once an Ag application is approved, you will receive a renewal card at the beginning of each year. Please read this card carefully, note any changes, sign and date it, and return it to the Property Appraiser’s Office prior to March 1st. Even if the classification has been renewed, the application can still be denied if the operation does not meet the proper criteria from year to year.

The appraiser’s office MUST be notified of ANY change in the agricultural use or status of the property.

When the property is sold, or when the name of the owner is changed in any way, the agricultural classification is automatically removed and a new application must be made on the long form (DR-482).

The information on this document is meant to be general. It does not cover every instance. If you have any questions, please contact:

Glenn Hubbard, Agricultural Specialist
Lake County Property Appraiser's Office
320 W. Main St. Suite A
Tavares, FL 32778-3814

Telephone: (352) 253-2162
E-mail: AG@lcpafl.org
193.461 Agricultural lands; classification and assessment; mandated eradication or quarantine program.—

(1) The property appraiser shall, on an annual basis, classify for assessment purposes all lands within the county as either agricultural or nonagricultural.

(2) Any landowner whose land is denied agricultural classification by the property appraiser may appeal to the value adjustment board. The property appraiser shall notify the landowner in writing of the denial of agricultural classification on or before July 1 of the year for which the application was filed. The notification shall advise the landowner of his or her right to appeal to the value adjustment board and of the filing deadline. The board may also review all lands classified by the property appraiser upon its own motion. The property appraiser shall have available at his or her office a list by ownership of all applications received showing the acreage, the full valuation under s. 193.011, the valuation of the land under the provisions of this section, and whether or not the classification requested was granted.

(3)(a) No lands shall be classified as agricultural lands unless a return is filed on or before March 1 of each year. The property appraiser, before so classifying such lands, may require the taxpayer or the taxpayer's representative to furnish the property appraiser such information as may reasonably be required to establish that such lands were actually used for a bona fide agricultural purpose. Failure to make timely application by March 1 shall constitute a waiver for 1 year of the privilege herein granted for agricultural assessment. However, an applicant who is qualified to receive an agricultural classification who fails to file an application by March 1 may file an application for the classification and may file, pursuant to s. 194.011(3), a petition with the value adjustment board requesting that the classification be granted. The petition may be filed at any time during the taxable year on or before the 25th day following the mailing of the notice by the property appraiser as provided in s. 194.011(1). Notwithstanding the provisions of s. 194.013, the applicant must pay a nonrefundable fee of $15 upon filing the petition. Upon reviewing the petition, if the person is qualified to receive the classification and demonstrates particular extenuating circumstances judged by the property appraiser or the value adjustment board to warrant granting the classification, the property appraiser or the value adjustment board may grant the classification. The owner of land that was classified agricultural in the previous year and whose ownership or use has not changed may reapply on a short form as provided by the department. The lessee of property may make original application or reapply using the short form if the lease, or an affidavit executed by the lessee is empowered to make application for the agricultural classification on behalf of the owner and a copy of the lease or affidavit accompanies the application. A county may, at the request of the property appraiser and by a majority vote of its governing body, waive the requirement that an annual application or statement be made for classification of property within the county after an initial application is made and the classification granted by the property appraiser. Such waiver may be revoked by a majority vote of the governing body of the county.

(b) Subject to the restrictions set out in this section, only lands which are used primarily for bona fide agricultural purposes shall be classified agricultural. "Bona fide agricultural purposes" means good faith commercial agricultural use of the land. In determining whether the use of the land for agricultural purposes is bona fide, the following factors may be taken into consideration:

1. The length of time the land has been so used.
2. Whether the use has been continuous.
3. The purchase price paid.
4. Size, as it relates to specific agricultural use, but in no event shall a minimum acreage be required for agricultural assessment.
5. Whether an indicated effort has been made to care sufficiently and adequately for the land in accordance with accepted commercial agricultural practices, including, without limitation, fertilizing, liming, tilling, mowing, reforesting, and other accepted agricultural practices.
6. Whether such land is under lease and, if so, the effective length, terms, and conditions of the lease.
7. Such other factors as may from time to time become applicable.

(c) The maintenance of a dwelling on part of the lands used for agricultural purposes shall not in itself preclude an agricultural classification.

(d) When property receiving an agricultural classification contains a residence under the same ownership, the portion of the property consisting of the residence and curtilage must be assessed separately, pursuant to s. 193.011, to qualify for the assessment limitation set forth in s. 193.155. The remaining property may be classified under the provisions of paragraphs (a) and (b).

(e) Notwithstanding the provisions of paragraph (a), land that has received an agricultural classification from the value adjustment board or a court of competent jurisdiction pursuant to this section is entitled to receive such classification in any subsequent year until such agricultural use of the land is abandoned or discontinued, the land is diverted to a nonagricultural use, or the land is reclassified as nonagricultural pursuant to subsection (4). The property appraiser must, no later than January 31 of each year, provide notice to the owner of land that was classified agricultural in the previous year informing the owner of the requirements of this paragraph and requiring the owner to certify that neither the ownership nor the use of the land has changed. The department shall, by administrative rule, prescribe the form of
the notice to be used by the property appraiser under this paragraph. If a county has waived the requirement that an
annual application or statement be made for classification of property pursuant to paragraph (a), the county may, by a
majority vote of its governing body, waive the notice and certification requirements of this paragraph and shall provide
the property owner with the same notification provided to owners of land granted an agricultural classification by the
property appraiser. Such waiver may be revoked by a majority vote of the county’s governing body. This paragraph does
not apply to any property if the agricultural classification of that property is the subject of current litigation.

(4)(a) The property appraiser shall reclassify the following lands as nonagricultural:
1. Land diverted from an agricultural to a nonagricultural use.
2. Land no longer being utilized for agricultural purposes.
3. Land that has been zoned to a nonagricultural use at the request of the owner subsequent to the enactment of this law.
(b) The board of county commissioners may also reclassify lands classified as agricultural to nonagricultural when
there is contiguous urban or metropolitan development and the board of county commissioners finds that the continued
use of such lands for agricultural purposes will act as a deterrent to the timely and orderly expansion of the community.
(c) Sale of land for a purchase price which is three or more times the agricultural assessment placed on the land shall
create a presumption that such land is not used primarily for bona fide agricultural purposes. Upon a showing of special
circumstances by the landowner demonstrating that the land is to be continued in bona fide agriculture, this presumption
may be rebutted.

(5) For the purpose of this section, "agricultural purposes" includes, but is not limited to, horticulture; floriculture;
viticulture; forestry; dairy; livestock; poultry; bee; pisciculture, when the land is used principally for the production of
tropical fish; aquaculture; sod farming; and all forms of farm products and farm production.

(6)(a) In years in which proper application for agricultural assessment has been made and granted pursuant to this
section, the assessment of land shall be based solely on its agricultural use. The property appraiser shall consider the
following use factors only:
1. The quantity and size of the property;
2. The condition of the property;
3. The present market value of the property as agricultural land;
4. The income produced by the property;
5. The productivity of land in its present use;
6. The economic merchantability of the agricultural product; and
7. Such other agricultural factors as may from time to time become applicable, which are reflective of the standard
present practices of agricultural use and production.

(b) Notwithstanding any provision relating to annual assessment found in s. 192.042, the property appraiser shall rely
on 5-year moving average data when utilizing the income methodology approach in an assessment of property used for
agricultural purposes.

(c) 1. For purposes of the income methodology approach to assessment of property used for agricultural purposes,
irrigation systems, including pumps and motors, physically attached to the land shall be considered a part of the average
yields per acre and shall have no separately assessable contributory value.
2. Litter containment structures located on producing poultry farms and animal waste nutrient containment structures
located on producing dairy farms shall be assessed by the methodology described in subparagraph 1.
(d) In years in which proper application for agricultural assessment has not been made, the land shall be assessed under
the provisions of s. 193.011.

(7) Lands classified for assessment purposes as agricultural lands which are taken out of production by any state or
federal eradication or quarantine program shall continue to be classified as agricultural lands for the duration of such
program or successor programs. Lands under these programs which are converted to fallow, or otherwise nonincome-
producing uses shall continue to be classified as agricultural lands and shall be assessed at a de minimis value of no
more than $50 per acre, on a single year assessment methodology; however, lands converted to other income-producing
agricultural uses permissible under such programs shall be assessed pursuant to this section. Land under a mandated
eradication or quarantine program which is diverted from an agricultural to a nonagricultural use shall be assessed under
s. 193.011.
RULES OF THE
STATE OF FLORIDA
DEPARTMENT OF REVENUE
PROPERTY TAX ADMINISTRATION
PROGRAM
CHAPTER 12D-5
AGRICULTURAL AND OUTDOOR
RECREATIONAL OR PARK LANDS

12D-5.001 Agricultural Classification, Definitions.
12D-5.002 Purchase Price Paid as a Factor in Determining Agricultural Classification.
12D-5.003 Dwellings on Agriculturally Classified Land.
12D-5.004 Other Factors that May Become Applicable to Classification of Agricultural Land.

12D-5.001 Agricultural Classification, Definitions.
(1) For the purposes of Section 193.461, Florida Statutes, agricultural purposes does not include the wholesaling, retailing or processing of farm products, such as by a canning factory.

(2) Good faith commercial agricultural use of property is defined as the pursuit of an agricultural activity for a reasonable profit or at least upon a reasonable expectation of meeting investment cost and realizing a reasonable profit. The profit or reasonable expectation thereof must be viewed from the standpoint of the fee owner and measured in light of his investment.

Specific Authority 195.027(1), 213.06(1) FS. Law Implemented 193.461, 213.05 FS. History-New 10-12-76, Amended 11-10-77, Formerly 12D-5.01.

12D-5.002 Purchase Price Paid as a Factor in Determining Agricultural Classification.
(1) The property appraiser may determine that the "purchase price paid" for land is inconsistent with agricultural use. A purchase price in excess of the agricultural assessment can be indicative of lack of a "good faith commercial agricultural use" since the agricultural assessment is basically derived by a capitalization of the income to be produced by land in such a use and thus approximates the amount that could be invested consistent with a reasonable return.

(2) Additionally, should the purchase price paid exceed the agricultural assessment by three or more times, a presumption that the land is not used primarily for agricultural purposes is created by Section 193.461(4)(c), Florida Statutes. The mere filing of a return is not sufficient to overcome this presumption created by the purchase price. Instead, the landowner must make a showing of special circumstances such as, but not limited to: 1) need of the acquired property to expand a previously owned agricultural operation; 2) need of the acquired property to facilitate proper drainage of a previously owned agricultural operation; 3) need of the acquired property for ingress or egress related to a previously owned agricultural operation; 4) the need of the acquired property to reestablish an agricultural operation after the owner's previous agricultural operation was terminated due to eminent domain proceedings or other similar circumstances; and 5) when the purchase price includes payment for other than real property, such as improvements on or to the land or deferred income, e.g., forestry.

(3) Furthermore, the presumption created by Section 193.461(4)(c), Florida Statutes, may be defeated by overcoming the appraiser's presumption of correctness as to the agriculturally classified value and demonstrating that the purchase price paid was not three or more times what the agriculturally classified value should be. However, such a showing, while defeating the presumption, would not prevent a denial of the classification if the purchase price paid was, nonetheless, indicative of a lack of good faith commercial agricultural use. Specific Authority 195.027(1), 213.06(1) FS. Law Implemented 193.461, 195.032, 213.05 FS. History-New 10-12-76, Amended 11-10-77, Formerly 12D-5.02.

12D-5.003 Dwellings on Agriculturally Classified Land. The property appraiser shall not deny agricultural classification solely because of the maintenance of a dwelling on a part of the lands used for agricultural purposes, nor shall the agricultural classification disqualify the land for homestead exemption. So long as the dwelling is an integral part of the entire agricultural operation, the land it occupies shall be considered agricultural in nature. However, such dwellings and other improvements on the land shall be assessed under Section 193.011, Florida Statutes, at their just value and added to the agriculturally assessed value of the land.

12D-5.004 Other Factors that May Become Applicable to Classification of Agricultural Land.
(1) Other factors enumerated by the court in Greenwood v. Oates, 251 So.2d 665 (Fla. 1971), which the property appraiser may consider, but to which he is not limited, are:

(a) Opinions of appropriate experts in the fields;
(b) Business or occupation of owner; (Note that this cannot be considered over and above or the exclusion of the actual use of the property.) (See AGO 70-123);
(c) The nature of the terrain of the property;
(d) Economic merchantability of the agricultural product; and
(e) The reasonably attainable economic salability of the product within a reasonable future time for the particular agricultural product.

(2) Other factors that are recommended to be considered are:

(a) Zoning (other then Section 193.461, Florida Statutes), applicable to the land;
(b) General character of the neighborhood;
(c) Use of adjacent properties;
(d) Proximity of subject properties to a metropolitan area and services;
(e) Principal domicile of the owner and family;
(f) Date of acquisition;
(g) Agricultural experience of the person conducting agricultural operations;
(h) Participation in governmental or private agricultural programs or activities;
(i) Amount of harvest for each crop;
(j) Gross sales from the agricultural operation;
(k) Months of hired labor; and
(l) Inventory of buildings and machinery and the condition of the same.

Chapter 12D-5 Rev. 12-31-07
