**Team Spotlight - TED Birmingham**

The busy Birmingham branch has excellent connections, just off J1 of the M5 one away from the M6. Locals will know TED is about 200m along from the Hawthorns, the West Bromwich Albion football stadium.

Inside the Hughes Electrical store, with a large car park, customers can pull in to see the guys and load up without hassle. In fact Birmingham branch is on the same site as our large regional warehouse so there’s the added benefit of enormous stocks. TED can supply on demand and can often even install on the same day with no drama.

The branch is also base for our bulk site delivery crew, providing supply and installation services for new builds in the area. All of our installers are fully qualified, equipped, insured and motivated to ensure your final fix electrical appliance requirements are satisfied. Current projects include three separate sites each with a thousand appliances fully installed for leading national builders.

Matt and Adam are your TED advisors, both very experienced and ready to help with your enquiry big or small. Contact the Birmingham team on 0121 507 9010 or email birmingham@get-ted.co.uk.

---

**Dear Customer,**

It’s the time of the year when we await the new model releases from the big manufacturers. Our buyers have seen the ranges and have given them a thumbs up. As we approach our year-end now is the time to get a deal on some of the (still very nice) 2015 models making way for the new kit.

By the time you read this our system will have been updated to allow month end statements to be sent electronically as pdf files to a nominated email address. A good proportion of our customers already receive invoices in this way; it’s great to be almost completely paper free. If you want invoices and statements by email please ask your branch.

Did you know you can order and reserve products on our web site? Electronic ordering, order history and copy invoices are all available once you login. Contact your TED advisor to get your login today.

During February the Colchester team completed another in a series of Philips care home TV installations into a prestigious new build project. All screens are HD and Smart as you would expect, the interesting bit is a new server/controller that can check remotely that individual screens are operating correctly and can even retune one at the click of a mouse. A sign of the future!

Our latest branch in Medway is getting busier every week and it has been a pleasure to meet some of the new customers in the lovely counties of Kent and East Sussex. We have some new members of the team in the Kent branch that we look forward to bringing news of very soon.

Yours faithfully

TED

---

**www.get-ted.co.uk**

The TED website has been updated to give you login account functionality. Once you have applied and been set up for online access, you can view prices, see account details, check stock levels and of course, place orders.

Different security access levels can be set - useful if you have colleagues you want to be able to browse products but not have account detail access - and you can even hide prices if you want to show products to your customers. All this is accessed via the new login link at the top right hand corner of the site.

---

**SET ME UP!**

As a trade only supplier, we do not allow or want our prices in the public domain. Prices will not appear unless you are logged in, a function only available to account holders and therefore cleared as trade. Without login, our website is a good online catalogue that will enable you to check specifications, images and basic stock availability of our regular main stock profile.

If you already have a TED account and want to use the online account features, contact your local branch or email our web department on enquiries@get-ted.co.uk. You will then be given your username and password and your level of security will be discussed and implemented.
