Reducing criminal behavior and improving public safety can best be achieved by referring offenders to services that are consistent with Evidence Based Practices.

It is important to understand the extent to which services are consistent with Evidence Based Practices.

The Probation department will collaborate with partners and providers to understand how well EBPs are being followed.
WHAT THE RNR TOOL WILL DO

• Examine the content, quality, dosage, and other factors of services

• Rates the program’s overall quality according to the RNR principles and core correctional practice

• Provides recommendations for how program administrators can refine the program
