Rotek high-quality slewing rings in diameters from 9" to 60".
Competitively priced and readily available.*

Rotek Incorporated now offers ready availability of high-quality Series 3000 slewing rings in diameters from 9 inches to 60 inches.

Rotek’s Series 3000 slewing rings are single row, four-point contact ball bearings with induction-hardened offset raceways. Balls are chrome-alloy steel and separated by spacers to prevent ball-to-ball sliding friction. For moment loads up to 21,000,000 foot-pounds; thrust loads to 6,500,000 pounds; and radial loads to 1,200,000 pounds.

Series 3000 slewing rings:
■ are competitively priced
■ are certified to ISO 9001
■ are available in raceway diameters from 9 inches to 60 inches
■ are available in larger diameters – contact us
■ have deep-hardened raceways for extended life and reliable operation
■ are available with integral internal or external gearing, or gearless
■ are accompanied by complete customer service and engineering assistance
■ include worldwide support for you and your customers, wherever they may be

Get the quality and dependability of Rotek at an economical cost!

* Select sizes available from stock; other sizes available with short lead times.

Ideal for use in your heavy-duty applications, such as: stationary and mobile cranes, excavators, aerial lifts, industrial turntables, mining equipment and forestry equipment.

Rotek Inc.
Rotek’s fully-integrated facilities provide complete manufacturing, scheduling and quality control.

Modern facilities and efficient practices provide value to you.

With fully integrated manufacturing capabilities, including ring rolling mills, complete in-house heat treating, full machining facilities, and CNC/CAD/CAM technologies, Rotek is able to produce, machine and assemble our products with complete control over quality and scheduling.

And we’ve complemented our production expertise with a variety of customer-oriented business philosophies and techniques. Our Total Quality Management program and continuous improvement policy have earned certification to ISO 9001 standard.

Rotek also offers worldwide support.
And, as an affiliate of Rothe Erde, Rotek is part of a network of affiliated manufacturing companies located around the world. This network is ready to assist you – or your customer – wherever you may need us.

Captions (Clockwise from upper left)
State-of-the-art quality control procedures are utilized for all products.
In-house heat treating facilities provide complete normalizing, annealing, and tempering operations.
Rotek produces its own seamless rolled rings for slewing ring production.
Raceways are deep-hardened with in-house induction heating equipment.
Rotek’s machining complex will double in size to over 230,000 square feet by the end of 2009.
