Embarking on a new career or job search is both exciting and challenging. To help you explore various options, the Education & Employment Information Center has compiled this list of popular websites and telephone hotlines. Two websites can help you kick-off your search – the Department of Labor’s Let Us Help you get back to Work!, (www.ctdol.state.ct.us/) , and the Connecticut Library Consortium’s JobNow, (www.ctlibrarians.org/). In addition, many colleges and community agencies offer career planning workshops and courses, some of which are free. The Education & Employment Information Center is a statewide referral service operated by the Office of Higher Education.
