Tobacco Coding Fact Sheet for Primary Care Pediatrics

**Current Procedural Terminology (CPT®) Codes**

**Physician Evaluation & Management Services**

### Outpatient

99201  Office or other outpatient visit, *new* patient; self limited or minor problem, 10 min.
99202  low to moderate severity problem, 20 min.
99203  moderate severity problem, 30 min.
99204  moderate to high severity problem, 45 min.
99205  high severity problem, 60 min.

*A new patient* is one who has not received any professional face-to-face services rendered by physicians and other qualified health care professionals who may report evaluation and management services reported by a specific CPT code(s) from the physician/qualified health care professional or another physician/qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, within the past three years.

99211  Office or other outpatient visit, *established* patient; minimal problem, 5 min.
99212  self limited or minor problem, 10 min.
99213  low to moderate severity problem, 15 min.
99214  moderate severity problem, 25 min.
99215  moderate to high severity problem, 40 min.

+99354  Prolonged physician services in office or other outpatient setting, with direct patient contact; first hour (*use in conjunction with time-based codes 99201-99215, 99241-99245, 99301-99350*)
+99355  each additional 30 min. (*use in conjunction with 99354*)

• Used when a physician provides prolonged services beyond the usual service (ie, beyond the typical time).
• Time spent does not have to be continuous.
• Prolonged service of less than 15 minutes beyond the first hour or less than 15 minutes beyond the final 30 minutes is not reported separately.

99406  Smoking and tobacco use cessation counseling visit; intermediate, greater than 3 minutes up to 10 minutes
99407  intensive, greater than 10 minutes

### Inpatient

99238  Hospital discharge day management; 30 min.
99239  more than 30 min.

Codes 99406-99407 can only be reported under the person being counseled. The codes cannot be reported under the pediatric patient if a parent or guardian is counseled on smoking cessation. Time spent counseling the parent or guardian falls under the E/M service time unless billing under the parent or guardian’s name and ID.

99420  Administration and interpretation of health risk assessment instruments

*Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided

*To find your state’s quitline fax referral form, visit [http://www2.massgeneral.org/ceasetobacco/states.htm](http://www2.massgeneral.org/ceasetobacco/states.htm)

- Indicates that an additional character is required for the ICD-10-CM code
99221  Initial hospital care, per day: admitting problem of low severity, 30 min.
99222  admitting problem of moderate severity, 50 min.
99223  admitting problem of high severity, 70 min.

99231  Subsequent hospital care, per day, also used for follow-up inpatient consultation services; patient is
99232  stable, recovering or improving, 15 min.
99233  patient is responding inadequately to therapy or has developed minor complication, 25 min.
99234  patient is unstable or has developed a significant complication or new problem, 35 min.

99218  Initial observation care, per day: admitting problem of low severity, 30 min,
99219  admitting problem of moderate severity, 50 min,
99220  admitting problem of high severity, 70 min.

99224  Subsequent observation care, per day: patient is stable, recovering or improving, 15 min.
99225  patient is responding inadequately to therapy or has developed a minor complication, 25 min.
99226  patient is unstable or has developed a significant new problem, 35 min.

99460  Normal newborn care; Initial Day
99462  Subsequent day, per day
99463  Same Day Admit and Discharge

+99356  Prolonged services in the inpatient/observation setting; first hour (use in conjunction with time-
99357  based codes 99221-99233, 99218-99220, 99224-99226)
+99357  each additional 30 min. (use in conjunction with 99356)

**Reporting E/M services using “Time”**

- Only pertains to E/M codes with a typical time. For purposes of this fact sheet, this refers only to codes
  99201-99215, 99218-99220, 99221-99226, 99231-99233).

- When counseling or coordination of care dominates (more than 50%) the physician/patient or family
  encounter (face-to-face time in the office or other outpatient setting or floor/unit time in the hospital or
  nursing facility), then time shall be considered the key or controlling factor to qualify for a particular
  level of E/M services.

- This includes time spent with parties who have assumed responsibility for the care of the patient or
  decision making whether or not they are family members (eg, foster parents, person acting in loco
  parentis, legal guardian). The extent of counseling and/or coordination of care must be documented in
  the medical record.

- For coding purposes, face-to-face time for **outpatient** services (eg, office) is defined as only that time
  that the physician spends face-to-face with the patient and/or family. This includes the time in which the
  physician performs such tasks as obtaining a history, performing an examination, and counseling the
  patient. For reporting purposes, intraservice time for **inpatient** (eg, hospital care) services is defined as
  unit/floor time, which includes the time present on the patient’s hospital unit and at the bedside
  rendering services for that patient. This includes the time to establish and/or review the patient’s chart,
  examine the patient, write notes, and communicate with other professionals and the patient’s family. In
  the hospital, pre- and post-time includes time spent off the patient’s floor performing such tasks as
  reviewing pathology and radiology findings in another part of the hospital.

---

+ Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided

---

*To find your state’s quitline fax referral form, visit [http://www2.massgeneral.org/ceasetobacco/states.htm](http://www2.massgeneral.org/ceasetobacco/states.htm)
- Indicates that an additional character is required for the ICD-10-CM code
When codes are ranked in sequential typical times (such as for the office-based E/M services or consultation codes) and the actual time is between 2 typical times, the code with the typical time closest to the actual time is used.

Prolonged services can only be added to codes with listed typical times such as the ones listed above. In order to report physician or other qualified health care professional prolonged services the reporting provider must spend a minimum of 30 minutes beyond the typical time listed in the code level being reported. When reporting outpatient prolonged services only count face-to-face time with the reporting provider. When reporting inpatient or observation prolonged services you can count face-to-face time, as well as unit/floor time spent on the patient’s care. However, if the reporting provider is reporting their service based on time (ie, counseling/coordinating care dominate) and not key components, then prolonged services cannot be reported unless the provider reaches 30 minutes beyond the listed typical time in the highest code in the set (eg, 99205, 99226, 99223). It is important that time is clearly noted in the patient’s chart. For clinical staff prolonged services refer to CPT codes 99415-99416 in the CPT manual.

**Physician Non-Face-to-Face Services**

<table>

*” Indicates that an additional character is required for the ICD-10-CM code
**Care Management and Transition Care Management Services:**

Care management and transition care management are reported under the directing physician or other qualified health care professional, however, the time requirement can be met by clinical staff working under the direction of the reporting physician or other qualified health care professional.

Care Management codes are selected based on the amount of time spent by clinical staff providing care coordination activities. CPT clearly defines what is defined as care coordination activities. In order to report chronic care or complex chronic care management codes, you must

1. provide 24/7 access to physicians or other qualified health care professionals or clinical staff;
2. use a standardized methodology to identify patients who require chronic complex care coordination services
3. have an internal care coordination process/function whereby a patient identified as meeting the requirements for these services starts receiving them in a timely manner
4. use a form and format in the medical record that is standardized within the practice
5. be able to engage and educate patients and caregivers as well as coordinate care among all service professionals, as appropriate for each patient.

<table>
<thead>

</tbody>
</table>

Complex chronic care management services are reported by the physician or qualified health care professional who provides or oversees the management and coordination of all of the medical, psychosocial, and daily living needs of a patient with a chronic medical condition. Typical pediatric patients

1. receive three or more therapeutic interventions (eg, medications, nutritional support, respiratory therapy)
2. have two or more chronic continuous or episodic health conditions expected to last at least 12 months (or until death of the patient) and places the patient at significant risk of death, acute exacerbation or decompensation, or functional decline
3. commonly require the coordination of a number of specialties and services.

99495  **Transitional care management (TCM) services** with the following required elements:
- Communication (direct contact, telephone, electronic) with the patient and/or caregiver within 2 business days of discharge
- Medical decision-making of at least moderate complexity during the service period
- Face-to-face visit, within 14 calendar days of discharge

99496  **Transitional care management services** with the following required elements:
- Communication (direct contact, telephone, electronic) with the patient and/or caregiver within 2 business days of discharge
- Medical decision-making of high complexity during the service period
- Face-to-face visit, within 7 calendar days of discharge

These services are for a patient whose medical and/or psychosocial problems require moderate or high complexity medical decision-making during transitions in care from an inpatient hospital setting (including acute hospital, rehabilitation hospital, long-term acute care hospital), partial hospital, observation status in a hospital, or skilled nursing facility/nursing facility to the patient’s community setting (home, domiciliary, rest home, or assisted living). TCM commences on the date of discharge and continues for the next 29 days and requires a face-to-face visit, initial patient contact, and medication reconciliation within specified timeframes. Any additional E/M services provided after the initial may be reported separately.

Refer to the *CPT* manual for complete details on reporting chronic care management and TCM services.

**Non-Physician Provider (NPP) Services**

99366  **Medical team conference** with interdisciplinary team of healthcare professionals, face-to-face with patient and/or family, 30 minutes or more, participation by a nonphysician qualified healthcare professional

99368  **Medical team conference** with interdisciplinary team of healthcare professionals, patient and/or family not present, 30 minutes or more, participation by a nonphysician qualified healthcare professional

96150  **Health and behavior assessment** performed by nonphysician provider (health-focused clinical interviews, behavior observations) to identify psychological, behavioral, emotional, cognitive or social factors important to management of physical health problems, 15 min., initial assessment

96151  re-assessment

96152  **Health and behavior intervention** performed by nonphysician provider to improve patient’s health and well-being using cognitive, behavioral, social, and/or psychophysiological procedures designed to ameliorate specific disease-related problems), individual, 15 min.

96153  group (2 or more patients) 96154

96155  family (with the patient present)

family (without the patient present)

+ Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided

*To find your state’s quitline fax referral form, visit [http://www2.massgeneral.org/ceasetobacco/states.htm](http://www2.massgeneral.org/ceasetobacco/states.htm)

- Indicates that an additional character is required for the ICD-10-CM code
Non-Face-to-Face Services: NPP

98966  Telephone assessment and management service provided by a qualified nonphysician healthcare professional to an established patient, parent or guardian not originating from a related assessment and management service provided within the previous seven days nor leading to an assessment and management service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion

98967  11-20 minutes of medical discussion
98968  21-20 minutes of medical discussion

98969  Online assessment and management service provided by a qualified nonphysician healthcare professional to an established patient or guardian, not originating from a related assessment and management service provided within the previous seven days nor using the internet or similar electronic communications network

Miscellaneous Services

99071  Educational supplies, such as books, tapes or pamphlets, provided by the physician for the patient’s education at cost to the physician

International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM) Codes

- Use as many diagnosis codes that apply to document the patient’s complexity and report the patient’s symptoms and/or adverse environmental circumstances.
- Once a definitive diagnosis is established, report the appropriate definitive diagnosis code(s) as the primary code, plus any other symptoms that the patient is exhibiting as secondary diagnoses that are not part of the usual disease course or are considered incidental.
- **ICD-10-CM codes are only valid on or after October 1, 2015.** Respiratory Conditions

**J06.9**  Acute upper respiratory infection, unspecified

For **J44** codes
- Code also type of asthma, if applicable (**J45**.-)

For **J44** and **J45** codes use additional code to identify: exposure to environmental tobacco smoke (**Z77.22**) history of tobacco use (**Z87.891**) occupational exposure to environmental tobacco smoke (**Z57.31**) tobacco dependence (**F17**.-) tobacco use (**Z72.0**)

**J44.0**  Chronic obstructive pulmonary disease with acute lower respiratory infection (use additional code to identify the infection)
**J44.1**  Chronic obstructive pulmonary disease with (acute) exacerbation
**J44.9**  Chronic obstructive pulmonary disease, unspecified (Chronic obstructive airway disease NOS)
**J45.20**  Mild intermittent asthma, uncomplicated (NOS)
**J45.21**  Mild intermittent asthma with (acute) exacerbation
**J45.22**  Mild intermittent asthma with status asthmaticus
**J45.30**  Mild persistent asthma, uncomplicated (NOS)
**J45.31**  Mild persistent asthma with (acute) exacerbation
**J45.32**  Mild persistent asthma with status asthmaticus
**J45.40**  Moderate persistent asthma, uncomplicated (NOS)
**J45.41**  Moderate persistent asthma with (acute) exacerbation

+ Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided

*To find your state’s quitline fax referral form, visit [http://www2.massgeneral.org/ceasetobacco/states.htm](http://www2.massgeneral.org/ceasetobacco/states.htm)
- Indicates that an additional character is required for the ICD-10-CM code
J45.42  Moderate persistent asthma with status asthmaticus
J45.50  Severe persistent asthma, uncomplicated (NOS)
J45.51  Severe persistent asthma with (acute) exacerbation
J45.52  Severe persistent asthma with status asthmaticus
J45.901 Unspecified asthma with (acute) exacerbation
J45.902 Unspecified asthma with status asthmaticus
J45.909 Unspecified asthma, uncomplicated (NOS)
J45.990 Exercise induced bronchospasm
J45.991 Cough variant asthma
J45.998 Other asthma
R06.02  Shortness of breath
R06.2   Wheezing

**Substance-Related and Addictive Disorders:**
If a provider documents multiple patterns of use, only one should be reported. Use the following hierarchy:
use—abuse—dependence (e.g., if use and dependence are documented, only code for dependence).

When a minus symbol (-) is included in codes F10–F17, a last digit is required. Be sure to include the last digit
from the following list:
0  anxiety disorder  2  sleep disorder  8  other disorder  9  unspecified disorder

[C]Alcohol
F10.10  Alcohol abuse, uncomplicated
F10.14  Alcohol abuse with alcohol-induced mood disorder
F10.159 Alcohol abuse with alcohol-induced psychotic disorder, unspecified
F10.18- Alcohol abuse with alcohol-induced
F10.19  Alcohol abuse with unspecified alcohol-induced disorder
F10.20  Alcohol dependence, uncomplicated
F10.21  Alcohol dependence, in remission
F10.24  Alcohol dependence with alcohol-induced mood disorder
F10.259 Alcohol dependence with alcohol-induced psychotic disorder, unspecified
F10.28- Alcohol dependence with alcohol-induced
F10.29  Alcohol dependence with unspecified alcohol-induced disorder
F10.94  Alcohol use, unspecified with alcohol-induced mood disorder
F10.959 Alcohol use, unspecified with alcohol-induced psychotic disorder, unspecified
F10.98- Alcohol use, unspecified with alcohol-induced
F10.99  Alcohol use, unspecified with unspecified alcohol-induced disorder

[C]Cannabis
F12.10  Cannabis abuse, uncomplicated
F12.18- Cannabis abuse with cannabis-induced
F12.19  Cannabis abuse with unspecified cannabis-induced disorder
F12.20  Cannabis dependence, uncomplicated
F12.21  Cannabis dependence, in remission
F12.28- Cannabis dependence with cannabis-induced
F12.29  Cannabis dependence with unspecified cannabis-induced disorder
F12.90  Cannabis use, unspecified, uncomplicated
F12.98- Cannabis use, unspecified with
F12.99  Cannabis use, unspecified with unspecified cannabis-induced disorder

*+ Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided

*To find your state’s quitline fax referral form, visit [http://www2.massgeneral.org/ceasetobacco/states.htm](http://www2.massgeneral.org/ceasetobacco/states.htm)

- Indicates that an additional character is required for the ICD-10-CM code
[C]Sedatives
F13.10  Sedative, hypnotic or anxiolytic abuse, uncomplicated
F13.129 Sedative, hypnotic or anxiolytic abuse with intoxication, unspecified
F13.14  Sedative, hypnotic or anxiolytic abuse w sedative, hypnotic or anxiolytic-induced mood disorder
F13.18- Sedative, hypnotic or anxiolytic abuse with sedative, hypnotic or anxiolytic-induced
F13.21  Sedative, hypnotic or anxiolytic dependence, in remission
F13.90  Sedative, hypnotic, or anxiolytic use, unspecified, uncomplicated
F13.94  Sedative, hypnotic or anxiolytic use, unspecified with sedative, hypnotic or anxiolytic-induced mood disorder
F13.98- Sedative, hypnotic or anxiolytic use, unspecified with sedative, hypnotic or anxiolytic-induced
F13.99  Sedative, hypnotic or anxiolytic use, unspecified with unspecified sedative, hypnotic or anxiolytic-induced disorder

[C]Stimulants (eg, Caffeine, Amphetamines)
F15.10  Other stimulant (amphetamine-related disorders or caffeine) abuse, uncomplicated
F15.14  Other stimulant (amphetamine-related disorders or caffeine) abuse with stimulant-induced mood disorder
F15.18- Other stimulant (amphetamine-related disorders or caffeine) abuse with stimulant-induced
F15.19  Other stimulant (amphetamine-related disorders or caffeine) abuse with unspecified stimulant-induced disorder
F15.20  Other stimulant (amphetamine-related disorders or caffeine) dependence, uncomplicated
F15.21  Other stimulant (amphetamine-related disorders or caffeine) dependence, in remission
F15.24  Other stimulant (amphetamine-related disorders or caffeine) dependence with stimulant-induced mood disorder
F15.28- Other stimulant (amphetamine-related disorders or caffeine) dependence with stimulant-induced
F15.29  Other stimulant (amphetamine-related disorders or caffeine) dependence with unspecified stimulant-induced disorder
F15.90  Other stimulant (amphetamine-related disorders or caffeine) use, unspecified, uncomplicated
F15.94  Other stimulant (amphetamine-related disorders or caffeine) use, unspecified with stimulant-induced mood disorder
F15.98- Other stimulant (amphetamine-related disorders or caffeine) use, unspecified with stimulant-induced
F15.99  Other stimulant (amphetamine-related disorders or caffeine) use, unspecified with unspecified stimulant-induced disorder

[C]Nicotine (eg, Cigarettes)
F17.200  Nicotine dependence, unspecified, uncomplicated
F17.201  Nicotine dependence, unspecified, in remission
F17.203  Nicotine dependence unspecified, with withdrawal
F17.20- Nicotine dependence, unspecified, with
F17.210  Nicotine dependence, cigarettes, uncomplicated
F17.211  Nicotine dependence, cigarettes, in remission
F17.213  Nicotine dependence, cigarettes, with withdrawal
F17.218- Nicotine dependence, cigarettes, with

Depressive Disorders
F30- Report for bipolar disorder, single manic episode
F30.10 Manic episode without psychotic symptoms, unspecified

+ Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided
- Indicates that an additional character is required for the ICD-10-CM code

Poisoning and Adverse Effects
For codes T40 – T65 use the following as the 5th or 6th digit to define the poisoning or adverse effect
Accidental (unintentional) Intentional self-harm Assault Undetermined Adverse effect

Codes T40 – T65 require a 7th digit to define the encounter.
A Initial encounter
D Subsequent encounter
S Sequela

T40.0X- Opium
T40.1X- Heroin
T40.2X- Opioids (other)
T40.3X- Methadone

T43.9- Psychotropic drugs, unspecified (need to add a 6th digit placeholder X)
T65.22- Toxic effect of tobacco cigarettes

Z Codes
Z codes represent reasons for encounters. Categories Z00–Z99 are provided for occasions when circumstances other than a disease, injury, or external cause classifiable to categories A00–Y89 are recorded as ‘diagnoses’ or ‘problems’. This can arise in 2 main ways:
(a) When a person who may or may not be sick encounters the health services for some specific purpose, such as to receive limited care or service for a current condition, to donate an organ or tissue, to receive prophylactic vaccination (immunization), or to discuss a problem is in itself not a disease or injury.
(b) When some circumstance or problem is present which influences the person’s health status but is not in itself a current illness or injury.

+ Codes are add-on codes, meaning they are reported separately in addition to the appropriate code for the service provided
*To find your state’s quitline fax referral form, visit http://www2.massgeneral.org/ceasetobacco/states.htm
- Indicates that an additional character is required for the ICD-10-CM code
Z13.89  Encounter for screening for other disorder
Z57.31  Occupational exposure to environmental tobacco smoke
Z59.5  Extreme poverty
Z59.6  Low income
Z59.7  Insufficient social insurance and welfare support
Z59.8  Other problems related to housing and economic circumstances
Z60.4  Social exclusion and rejection
Z60.8  Other problems related to social environment
Z60.9  Problem related to social environment, unspecified
Z62.0  Inadequate parental supervision and control
Z62.21  Foster care status (child welfare)
Z62.22  Institutional upbringing (child living in orphanage or group home)
Z62.29  Other upbringing away from parents
Z62.6  Inappropriate (excessive) parental pressure
Z62.810  Personal history of physical and sexual abuse in childhood
Z62.811  Personal history of psychological abuse in childhood
Z62.812  Personal history of neglect in childhood
Z62.819  Personal history of unspecified abuse in childhood
Z62.820  Parent–biological child conflict
Z62.821  Parent-adopted child conflict
Z62.822  Parent-foster child conflict
Z63.31  Absence of family member due to military deployment
Z63.32  Other absence of family member
Z63.4  Disappearance and death of family member
Z63.5  Disruption of family by separation and divorce
Z63.8  Other specified problems related to primary support group
Z65.3  Problems related to legal circumstances
Z69.010  Encounter for mental health services for victim of parental child abuse
Z69.020  Encounter for mental health services for victim of non-parental child abuse
Z71.6  Tobacco abuse counseling
Z71.89  Counseling, other specified
Z72.0  Tobacco use
Z73.4  Inadequate social skills, not elsewhere classified
Z77.22  Exposure to environmental tobacco smoke
Z81.1  Family history of alcohol abuse and dependence (conditions classifiable to F10.-)
Z81.2  Family history of tobacco abuse and dependence (conditions classifiable to F17.-)
Z81.3  Family history of other psychoactive substance abuse and dependence (conditions classifiable to F11–F16, F18–F19)
Z81.8  Family history of other mental and behavioral disorders
Z86.69  Personal history of other diseases of the nervous system and sense organs
Z87.891 Personal history of nicotine dependence (tobacco)
**Vignettes**

**Vignette #1**
A mother brings her two-year old child (established patient) in for a well-baby check. In social history, you ask the mother whether she smokes and she admits that she smokes 1 pack a day and has been doing so for the past 10 years. You explain to her that besides the fact that smoking can be detrimental to her health, her child is at increased risk for respiratory problems including asthma, colds, upper respiratory infections and ear infections. You spend 10 minutes face to face explaining to her the serious implications this can have on her child’s health. When the parent shows interest in quitting, you discuss various options for smoking cessation, refer her to the state quitline using a fax referral form*, and give her literature on smoking cessation programs in your area.

<table>
<thead>
<tr>
<th>CPT</th>
<th>ICD-10-CM</th>
</tr>
</thead>
<tbody>
<tr>
<td>99392</td>
<td>Z00.129 Encounter for routine child health examination without abnormal findings</td>
</tr>
<tr>
<td></td>
<td>Z77.22 Exposure to environmental tobacco smoke</td>
</tr>
<tr>
<td></td>
<td>Z81.2 Family history of tobacco abuse and dependence</td>
</tr>
<tr>
<td></td>
<td>Z71.89 Counseling, other specified</td>
</tr>
</tbody>
</table>

**Teaching Point:** Since you are not counseling the patient, you cannot report the smoking cessation codes 99406-99407. Preventive medicine service codes take into account all preventive medicine counseling. Since the patient is healthy and the smoking cessation counseling is being done to prevent future illness you cannot report a “sick” E/M services based on time spent, in addition to the preventive medicine service.

**Vignette #2**
A mother brings her 5-year old son in for sudden onset of wheezing. You diagnose an acute exacerbation of his moderate persistent asthma and initiate nebulizer treatment. His mother admits to being a 1.5 pack per day smoker and has tried to quit smoking in the past without success. You explain to the mother that her smoking has contributed to the exacerbation of the asthma. You give her literature on the various options for smoking cessation and explain the various modalities available to her, including local options such as the state quitline*. You then spend 10 additional minutes face to face discussing the relative risks and benefits of each. Overall face-to-face time is 20 minutes. You are at a level 4 office visit given the key components.

**How do you code this encounter?**

</tr>
<tr>
<td>94640 Nebulizer treatment</td>
<td>J45.41 Moderate persistent asthma with (acute) exacerbation</td>
</tr>
</tbody>
</table>

**Teaching Point:** Unless you are going to bill under the mother’s name to the insurance for the time spent counseling, the time spent would be subsumed under the E/M service for the patient. Since counseling does take up 50% of the total face-to-face time, you can use it to report your E/M service, however, the 20 minutes would only lead you to a 99213. Since your key components support the higher level, report the 99214.
**Vignette #3**

You are evaluating a teenager (16 year-old) that has come for a sports physical examination and yearly check-up. On review of systems, she admits to some shortness of breath on exertion. Direct questioning reveals that she smokes 5-6 cigarettes a day and has also experimented with smokeless tobacco. She began smoking when her parents got divorced as it helped her cope with the depression she was feeling at that time. Since then, she has continued to smoke as she has heard that stopping smoking could cause her to gain weight. She is concerned, however, as she knows that smoking is bad for her health and could cause respiratory problems. You confirm that smoking has been shown to be detrimental to general health, and especially to the respiratory system. You briefly discuss options to assist her in stopping smoking. You then refer her to counseling for the depression as well as smoking cessation. Total time spent on smoking cessation counseling is 5 minutes.

<tr>
<td></td>
<td>F17.210 Nicotine dependence, cigarettes, uncomplicated</td>
</tr>
<tr>
<td></td>
<td>Z71.6 Tobacco abuse counseling</td>
</tr>
</tbody>
</table>

**Teaching Point:** You will not report the sports physical separately in ICD-10-CM. The Z00.121 is all that is needed.

**Vignette #4**

You see a 15 year-old boy in the after-hours clinic for his third visit in two months for an upper respiratory tract infection. He is an otherwise healthy boy with no chronic medical problems. However, this time, he has developed a persistent cough and shortness of breath when he plays soccer. You ask his parents to leave the room and discover that he has been smoking a pack of cigarettes a day for the past two years. He started when he started a new high school, as he wanted to fit in with the popular boys. A spirometry is performed. You find that his tidal volume is decreased by 15% and he has some rhonchi. A chest X-ray is negative for pneumonia. You explain to the boy that his smoking is making him susceptible to repeated episodes of upper respiratory tract infection. In addition, he is developing reactive airway disease that could make him susceptible to asthma and other problems. You show him literature that describes the various complications of smoking. You also tell him about the various smoking cessation programs available in the county and answer his questions about options that he would be able to obtain without his parents’ knowledge. You spend 40 minutes face to face total, with 20 minutes in counseling and 10 minutes strictly discussing smoking cessation options. He is diagnosed with exercise induced bronchospasms.

<tr>
<td></td>
<td>Z71.6 Tobacco abuse counseling</td>
</tr>
<tr>
<td>94010 Spirometry</td>
<td>J45.990 Exercise induced bronchospasm</td>
</tr>
</tbody>
</table>

**Teaching Point:** While the overall time spent was 40 minutes, 10 minutes of that time will be separately reported under the smoking cessation code so it cannot be counted towards your overall E/M service.

Vignette #5
You are evaluating a male adolescent (15 year old) patient that has come for his yearly routine visit. When a sking about substance use, he offers that he experimented with e-cigarettes within the past month. He denies traditional cigarette use, offering that he would never use such a product because he cares about his health. You congratulate that patient for caring about his health and avoiding cigarette use. You then spend 10 minutes informing him of the potential health hazards related to e-cigarettes, focusing on both the highly addictive and toxic nature of nicotine. You emphasize that nicotine addiction could lead to future cigarette use and encourage him to avoid any use of nicotine containing product.

Vignette #6
While covering the newborn nursery, you discharge a first-time mother who plans to breastfeed. As you routinely do, you ask her about smoking and she admits to smoking 1 pack or more a day for the past 10 years. She decreased this to half a pack while pregnant but could not decrease it any further due to cravings. Her husband is a smoker too and smokes 2 packs a day. You explain to the mother that smoking is very harmful, especially to the lungs of a newborn. You spend 15 minutes face to face explaining the various complications of smoking including asthma, recurrent upper respiratory infections, and ear infections. You explain to her that merely smoking outside the baby’s room would not eliminate the risk as she would be exposed to nicotine through breast milk which could lead to irritability and decreased sleep. You explain the various options for smoking cessation and give her literature to share with her husband for the same. You offer to refer her to a smoking cessation program in the hospital, as well as the state quitline*. Overall the discharge service takes 35 minutes to complete.

Vignette #7
You see an infant admitted in the hospital for his second episode of wheezing in the last three months. He is the only child and does not attend day care. Both parents smoke in the house and in the car. He has had three ear infections in the last six months and is being considered for tube placements by his pediatrician. As part of the management of the infant you discuss the increased risk of ear infections and frequent respiratory symptoms, amongst others, as a consequence of their smoking. You assess their willingness to quit smoking and assist with arranging smoking cessation resources, both available in the hospital and through the state quitline*. This initial hospital encounter takes 80 minutes to complete, including unit/floor time. Of that time 45 minutes is spent in counseling and coordinating care.
