Now there is a real alternative to traditional university study. With the growth of higher and degree apprenticeships, you have the opportunity to move your career forward and gain professional skills – and all while working and earning a salary.

With a degree apprenticeship you can achieve a full Bachelor’s or Master’s degree. And just like traditional degrees, an apprenticeship is a great route to a great career.

The facts

If you are over 16, live in England and are not in full-time education you can apply for an apprenticeship. Apprenticeships are available at intermediate, advanced, higher and degree levels.

All apprenticeships are real jobs so all apprentices earn a salary. You must be paid at least the national minimum apprenticeship wage and many employers pay significantly more. Apprentices should work for at least 30 hours per week. Entry requirements depend on the sector and prior skills. If you have achieved A-levels you may still be expected to start at intermediate or advanced level as some sectors, such as engineering, require you to build up your occupational skills.

Apprenticeships are available in 1,500 job roles covering more than 170 industries. There are currently 75 higher and degree apprenticeships available (with more in development) including foundation degrees, HNDs and full honours degrees. These include job roles ranging from legal services to banking and engineering, giving you the chance to continue your professional development and realise your full potential.

Higher and degree apprenticeships are available at levels 4-7. They combine work with study and may include a work-based, academic or combined qualification or a professional qualification relevant to the industry. Levels 4 and 5 are equivalent to a Higher Education Certificate/Diploma or a foundation degree, level 6 is equivalent to a Bachelor’s degree and level 7 is equivalent to a Master’s degree. Typically, higher apprentices study part time at college, university or with a training provider. Apprenticeships take between one and five years to complete.

There are two kinds of higher apprenticeships currently available – apprenticeship frameworks and apprenticeships standards. In the future all apprenticeship frameworks will be replaced by new apprenticeship standards.

How do I find a higher or degree apprenticeship?

You can ‘get in and go far’ with a higher or degree apprenticeship at some of Britain’s biggest and brightest companies. Over 240,000 workplaces employed an apprentice in 2013/14, including ‘blue chip’ British and international companies such as Cap Gemini, Ford, ITV, Airbus, Rolls-Royce, Barclays and the BBC. With so many opportunities on offer you can find the apprenticeship that’s right for you.

Applying is easy. Visit GOV.UK and search ‘Find an apprenticeship’. There are up to 27,000 apprenticeship vacancies on the site at any one time.
