true to life
No paint. No stain. No hassles. Carvedwood•44® delivers strength, durability, the beauty of real wood — and endless design options. With 23 colors, five distinct profiles and two attractive finishes — smooth and woodgrain — Carvedwood•44® is the ideal choice in a virtually maintenance-free home exterior.
Is it any wonder that vinyl siding is chosen more than any other exterior cladding in the U.S. and Canada?¹

Carvedwood•44® Delivers.

**DURABILITY.** If you're looking for siding that is durable and low maintenance, and looks beautiful, Carvedwood•44® siding is the ideal choice. Carvedwood•44® will enhance your home’s appearance today — and for years to come.

**NO PAINT, NO STAIN, NO HASSLES.** Carvedwood•44®, a premium panel, never needs paint or stain. Unlike real wood siding, it won’t crack, peel, flake or rot. Revolutionary technologies like Mastic’s exclusive Hang-Tough™ Technology and Duranyl 5000® Protection System maximize the panel’s weatherability and deliver additional protection — and peace of mind — for your investment.

**COLOR AND TEXTURE.** Featuring two finishes — woodgrain and smooth — Carvedwood•44® is available in a virtually endless palette of colors — 23 base colors from rich, deep hues to light neutrals.

**PEACE OF MIND THAT LASTS A LIFETIME.** Carvedwood•44® is backed by the Mastic V.I.P. Limited Lifetime Warranty — a real warranty backed by a solid company. Mastic has been a trusted industry leader for more than 50 years. Please see our warranty for complete details.

(independent study conducted by Vernon Research Group, 2005)
Beauty that lasts. Based on an average-size home, repainting or staining can cost up to $6,000 every four years. Carvedwood•44® never needs painting, caulking or patching because, unlike wood, it won’t crack, peel, rot or split.

**Mastic Savings Add Up**

- **$6,000** in painting costs saved in 4 years
- **$12,000** in painting costs saved in 8 years
- **$18,000** in painting costs saved in 12 years
- **$24,000** in painting costs saved in 16 years

**Hang-Tough™ Technology**
Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

**Duranyl 5000® Protection System**
Proprietary technology adds extra UV protection to our deepest, most vivid colors — protects color against harsh elements and maximizes long-term weatherability.

**Breathe Easy**
Unlike some fiber cement products, vinyl siding does not produce harmful silica dust — silica dust can cause lung disease.

**V.I.P. Limited Lifetime Warranty**
Premium guarantee of lasting quality and peace of mind — backed by Mastic, a trusted industry leader for 50+ years. See warranty for complete details.
Test our vinyl. We do. Rigorously. Relentlessly.

**OIL CAN TEST** Siding panels are placed under heat strips and saturated to 120°–140°F to make sure the siding doesn’t warp or buckle.

**WEATHERING** Color retention (resistance to fading) is tested by subjecting Mastic products to real-time weather conditions and accelerated UV testing. This ensures that Mastic products will hold up in the most extreme environmental conditions.

**RIGIDITY** Panels are designed and engineered to be more rigid so the siding remains straight on the wall.

**COLOR READ TEST** Using a spherical spectrophotometer, a 10,000 watt xenon flash tube bounces light off a siding panel. This information is then analyzed to determine if the color falls within accepted ranges for color consistency and match.

**GLOSS TEST** A digital readout microgloss meter is used to scan siding to determine if its gloss falls within a target range. Gloss is important to the aesthetic appeal of the siding.

**VERTICAL HEIGHT IMPACT TEST** Measures the product’s durability and ability to resist impact forces — the result of proper thickness, formulation and impact modifiers.
The Vinyl Siding Institute sponsors a certification program that assures the quality of vinyl siding by offering manufacturers the means to independently verify the quality of their products through third-party testing and inspection.

Through this program it was certified that Mastic vinyl siding products meet or exceed the performance standards set forth by ASTM D3679 and the color retention requirements of ASTM D6864/D7251, so you can have confidence our products will perform well, season after season.

V.I.P. LIMITED LIFETIME WARRANTY
Premium guarantee of lasting quality and peace of mind — backed by Mastic, a trusted industry leader for 50+ years (see warranty for complete details).

T-2 LOK™
Locking system delivers a positive locking action with a wider locking mechanism for more contact area.*

ROLLOVER, REINFORCED NAIL HEM
Easier installation — more precise and secure fastening.*

PREMIUM .044 THICKNESS
Superior thickness and impact resistance.

WIND SPEED — RATED UP TO 200 MPH
Mastic’s proprietary design and engineering delivers a panel that achieves superior wind resistance.

5/8” PANEL PROJECTION
Enhanced shadow lines replicate the appearance of real wood siding.

DURANYL 5000® PROTECTION SYSTEM
Proprietary technology adds extra UV protection to our deepest, most vivid colors — protects color against harsh elements and maximizes long-term weatherability.

HANG-TOUGH™ TECHNOLOGY
Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

CLASS 1(A) FIRE RATING

METRO-DADE COUNTY APPROVED

CARVEDWOOD•44® HAS BEEN GREEN APPROVED
BY THE NAHB RESEARCH CENTER.
This means you can be assured that this product complies with specific green practice criteria in the National Green Building Standard. Visit www.GreenApprovedProducts.com for details.

* Single 8” panel features a unique, advanced locking system and nail hem.
Mastic Home Exteriors by Ply Gem can help you meet your sustainable building goals and earn points in leading green building certification programs. Our products offer features that positively contribute to sustainable practices, improved energy efficiency or lifecycle benefits of homes. All are important aspects of sustainable building and reflect Mastic’s contribution to the Ply Gem Enviro initiative.

For more information on how Mastic products can help you meet your sustainable building goals, refer to the Mastic Building to Make a Difference white paper available at mastic.com.

**SUSTAINABLE RESOURCES:**
- Mastic vinyl siding is manufactured from two abundant natural resources: salt (57%) and natural gas (43%).
- All post-product scrap material created during the manufacturing process is reclaimed.
- Vinyl siding generates less construction site waste than cardboard packaging, brick or lumber.
- When installed and used properly, Mastic products never require paint or stain, which reduces VOCs released into the atmosphere.
- Mastic Performance Metals have been evaluated by a third-party and are Green Circle certified to contain a minimum of 67% recycled content.
- Ply Gem facilities reuse and recycle pallets and packaging material, reducing raw material needs and landfill use.
- Ply Gem works with its suppliers to recycle as many materials as possible, including cores, cardboard padding, paint totes, batteries, light bulbs, toner and paper.

**ENERGY EFFICIENCY:**
- Vinyl siding requires less energy to manufacture per square foot than brick and mortar.
- Mastic vinyl siding is lighter weight per square than other cladding options, so it requires less fuel to transport. Less fuel used means less pollution.
- When properly installed, Structure EPS Insulated Siding can reduce thermal bridging and help meet the requirements of an Energy Star Qualified new home. Structure EPS Insulated Siding panels, with a verified R-value of up to 3.0, have been tested using the new 2011 FTC-compliant testing method (ASTM C1363).
- Mastic Performance Metals V-Groove soffit and roof and eave vents support proper attic ventilation efforts, which moderates attic temperatures and improves a home’s energy efficiency. Mastic V-Groove metal soffit provides the most net free ventilation per linear foot of any aluminum soffit system.

**LIFECYCLE BENEFITS OF HOMES:**
- Mastic vinyl siding is durable and requires no site finish. Our Performance Metals stand up to weather with virtually no maintenance. Our Designer Accents use thicker construction and a baked lacquer finish to ensure that they hold up season after season.
- When installed properly and under normal use, our products should never require painting or staining. They won’t crack, peel, blister, or rot.
- All of our Performance Metals aluminum accessories are easily recyclable. In fact, at the end of its lifecycle in building applications, 100% of the aluminum can be recycled.

**VINYL SIDING ENVIRO SNAPSHOT:**
