The document is a sales flyer advertising Performance Screen Supply, a company that provides screen printing supplies and equipment. The flyer emphasizes their commitment to quality, affordability, and customer service, including free technical support and a money-back guarantee. The company also offers a monthly buyer program and a technical support hotline. The flyer lists various products available, such as adhesives, mesh panels, dip tanks, and cleaning equipment. The company operates from New Jersey and offers same-day shipping to most of America. The flyer includes contact information and a note from the owners, Bob and Kathy Drake, who started the business in 1992.

HI TEST INK™
HIGH OPACITY - LOW BLEED INKS

You don't need big arms to print these inks! They're smooth and creamy so you can print faster and get better coverage with less effort! Our special formula won't fatigue the manual printer and allows the automatic screen printer to crank up the speed.

This ink is a screen printers dream come true!

**WHITE**
- SCARLET RED
- LEMON YELLOW
- GOLDEN YELLOW

**SUPER HI TEST INK™**
Even more bleed resistant and opaque than our original HI TEST ink. SUPER HI TEST inks are slightly thicker but still easy to print by hand.

**WHITE and GOLDEN YELLOW**
Incredible new technology allows our thinnest formula ever! Superior bleed resistance and more optical whiteners than our HI TEST white.

**AVALANCHE WHITE™**
Incredible new technology allows our thinnest formula ever! Superior bleed resistance and more optical whiteners than our HI TEST white.

**AVALANCHE WHITE HEAVY DUTY™**
Same as our original Avalanche White except a heavier body to provide even better coverage and opacity on automatic printers.

**POLY KILLER WHITE™**
Bleed resistant to the MAX. Poly Killer White has the maximum killing peroxide & special expensive bleed resistant plasticizers. Only use on cotton and cotton-blend fabrics. Slip sheet all printed shirts to prevent ghosting & no overprinting with other colors without testing first. This ink is sick stuff - Use care!

Hints:
- All inks heat cure at 320 degrees. Dark colored substrates, heavier ink deposits and heavier substrates (ie. sweatshirts) require much longer cure times/temps. Heat tapes are a good way to check...when you don't have enough of an ink color to finish a job) add extender base which is ink without any color pigment.

Discounts: $1.00/gal buy 4 gallons $2.00/gal buy 8 gallons

Prices subject to change without notice.

---

DAMN GOOD PLASTISOL INK™
Premium Soft Hand Plastisols

- EASY PRINTING BY HAND OR AUTOMATIC
- SMOOTH AND CREAMY CONSISTENCY
- PREMIUM QUALITY
- REASONABLE PRICES

**WHITE**
- SCARLET RED
- BRITE BLUE
- BRITE GREEN
- FOREST GREEN
- GOLDEN YELLOW
- BRITE RED
- COLUMBIA BLUE
- METALLIC SILVER
- METALLIC GOLD

Hints:
- Use the lowest mesh count that will hold the details of your design. On dark shirts, most printers use the "PRINT-FLASH-PRINT" technique. Maximizing ink film thickness is an essential part of bleed resistant prints. Since high opacity inks lay down thicker, they need more time in the dryer to cure.

# Adhesives

## BULK ADHESIVE APPLICATOR

**SYSTEM TB 1000**

- **No VOC**
- **Water Based**
- **Economical**
- **Multi Station Kit Available**
- **Made in USA**
- **Quiet**
- **Limited Lifetime Warranty**

### TB10 Water Based Adhesive

- Adhesive dries quickly, contains no solvents, propellants or aerosols.
- One gallon of TB10 is equal to 6 cases (about 70 cans) of aerosol spray adhesive. This is a savings of about 75%

## OUR MOST POPULAR ITEMS:

1. **#1 380 Mist Adhesive**
2. **#2 375 Flash Cure Mist Adhesive**
3. **#3 480 Screen Opener**

**Simply The Best Adhesives For Printers!**

<table>

**Discounts:** 5% buy 10 Cases, 10% buy 20 Cases (OK to mix solid Camie cases for discounts)

### Beauty Tip:

Use BABY OIL to easily remove spray adhesive from your skin. This is much less painful than pulling the adhesive off hairy legs. Apply oil with a rag, or use a Q-Tip for nostrils and the sort. This also works well on eyeglasses (just be careful not to scratch them.)

---

**BULK ADHESIVE APPLICATOR SYSTEM TB 1000**

- **No VOC**
- **Water Based**
- **Economical**
- **Multi Station Kit Available**
- **Made in USA**
- **Quiet**
- **Limited Lifetime Warranty**

**HVLP Technology**

- **High Volume Low Pressure Technology**

### System TB 500

- **No clog nozzle**

**Operates on compressed air. No electric required!**

- **HVLP Technology**

**The TARGET SYSTEM TB1000 is the affordable answer to aerosol can replacement. Designed to be used with TEKBOND TB10 water based adhesive, this revolutionary system will quickly provide savings of up to 500% over aerosols alone. Utilizing HVLP technology, the system provides an on demand supply of adhesive with virtually no over spray.**

**Discounts:** 15 gallon and 55 gallon drums are available.

**Operates on compressed air. No electric required!**

**Add Manufacturers $10 packaging charge to TB500 and TB1000.**

### Hint:

Get the best performance out of all spray cans by shaking before using. At the end of the day turn adhesive cans upside down and spray for a few seconds to clear adhesive from the nozzle tip. Spray in a quick, even pattern and allow a few seconds for the adhesive to ‘tack up’ or dry before putting on your first shirt. Several thin layers of adhesive applied in the morning will give you a good adhesive base. Adhesives will not transfer to the inside of your shirts (unless you spray too much adhesive (making puddles of adhesive on your pallets never helps either). To remove adhesive from shirts turn the shirt inside out, run back through dryer and immediately use a piece of sticky packing tape to rip the excess adhesive from the shirt.

**Prices subject to change without notice.**

Phone to order (800)659-8337
Screen Tapes

**NEWMAN ROLLER TAPE**

- Thin strip of adhesive goes on frame roller
- Adhesive on this half of tape goes on the screen mesh
- The best tape for roller frames. Doesn't leave a mess when removed. Costs less than split liner tape. The purple tape is perfect for textile printing.

**LIQUID BLOCKOUT**

- "DAMN GOOD BLOCK OUT"
- Fast Drying
- Water Soluble
- Easy Spreading
- Great on Coarse Mesh
- Packaged in Gallon or Quart Buckets

**SOLVENT PROOF TAPE**

- This white cloth backed tape is the most solvent resistant, permanent tape we could find. It ain't never coming off! Also use on square bar of roller frames to protect mesh from screen clamp damage on press.

**HAND CLEANER**

- Gentle scrubbers made of recycled plastic are soft on your skin and remove plastisol ink fast. Bob says this stuff is the best. Guaranteed!

*Discounts: 5% buy 1 Case, 10% buy 6 cases. No mix and match allowed. Liquid Blockout buy 4 gallons less $1.00/gal. Buy 55 gal drum less $4/gal.

**BLUE BLOCKOUT TAPE**

STOP STRUGGLING WITH MASKING TAPE!

- Stop waiting for liquid blockout to dry! Stop picking those little pieces of masking tape off your screens! Stop ruining shirts because the ink oozed where it wasn't supposed to go. Our BLOCKOUT TAPE is easy to apply and can be left on the screen permanently or easily removed before reclaiming. Solvent resistance is very good and it leaves no adhesive residue or mess on your screen. The time you save using BLUE BLOCKOUT TAPE is incredible!

RUBBER GLOVES

CLEAN HANDS = CLEAN SHIRTS

If your employees are like most, they wash their hands at least 10 times a day. It is hard to avoid getting your hands dirty working with inks, emulsions, and screen making chemicals. Our inexpensive disposable gloves can reduce the time wasted washing hands and offer protection from solvents and chemicals. Keep your hands from getting rough and red by using our gloves. Consider this:

A: It costs you $.40 for an $8/hr employee to wash his hands if it takes him 3 minutes. (+ soap and paper towels!)
B: One pair of gloves costs: $10
C: You save $.30 each time an employee uses gloves!

SAVE $775/EMPLOYEE/YEAR!!!

DISPOSABLE NITRIle GLOVES

These are the toughest disposable rubber gloves we have ever used! They are packaged similar to our latex gloves (sold above), but are made of incredible "BLUE" Nitrile Rubber. No more fingers falling off when cleaning ink from screens. These gloves cost a few cents more, but their durability will save you money in the long run. Packaged 100 gloves/box.

Size XL only (because they are sized a little tight)

A dual cure emulsion designed for fluorescents and other light sources in the 420 spectral range. Plastisol, water-based UV and solvent inks. Sensitized life is 4 weeks after you mix in diazo.

Pure Photopolymer emulsion designed for fluorescents in the 420 spectral range. High solids for easier coating on low meshes. Presensitized and has a 1 year shelf life. Plastisol only.

An economically priced diazo-based emulsion for textile and graphics shops. An excellent choice for plastisol, solvent or UV inks. Sensitized life is 4 weeks after you mix in diazo.

A premium photopolymer emulsion for shops using plastisol inks. Very fast exposing, no mixing. Excellent reclaimability.

---

**Sex Emulsion**

**Trial Offer: 50% Off Your First Quart**

Our pure photopolymer emulsion is expensive by the gallon, but cheaper by the screen than diazo emulsions (it works better too!). We get 125 screens (20x24) from just one gallon. Higher solids content means many more screens per gallon.

ERGO GRIPS
RUBBER GRIPS FOR WOOD OR METAL SQUEEGEE HANDLES

These wide rubber squeegee pads retrofit most squeegee handles. Studies show that Squeegee Plus pads actually reduce the pressure of your grip, increasing comfort, printing strength, and productivity. Prevent carpal tunnel syndrome by protecting the delicate tendons, nerves and blood vessels in your hands and wrists.

SQUEEGEE SHARPENER

The Diamond Short-Cut is the first precision, manual squeegee sharpener for manual and automatic squeegees 20” and under. The tabletop sharpener includes one indestructible diamond sharpening wheel that will sharpen any durometer squeegee, and optional wheels for rounded and beveled squeegees are available. The unit also features a dial indicator to gauge the amount of squeegee material removed during each sharpening pass. There is no sharpener that offers such precision at such an economical price.

**Spot Cleaning Tips**

- The high pressure of the electric gun is the key to the cleaning process. The cleaning fluid should be used sparingly like detergent in a washing machine. A thorough approach to cleaning will allow the fluid to evapate, preventing ringing. Use the sprayer's sprays first and then finish up with the brushing sprays for perfect results.
- Be safe and never put your hand behind the garment being cleaned. You may shoot yourself! Always wear eye protection and use an exhaust to vent fumes.

**Limited Lifetime Warranty**

All **TARGET** guns are covered by a limited lifetime warranty. All parts are covered against defects for 12 months and all labor charges are covered for the working life of the product.

**EXHAUSTEX 1500**

Rugged, all metal exhauster is the affordable answer to exposure and compliance problems. The powerful motor quickly dries the heaviest of fabrics while exhausting fumes away from your workers. Reduce the risk of workers shooting their fingers with spotting guns. The stainless mesh screen supports the garment and keeps hands safely out of the way.

**Prices subject to change without notice.**

TEKMAR
EXHAUSTEX 2000
The Ultimate Exhauster!
Activated Carbon Filter
Dual Speed Motor
The EXHAUSTEX 2000 is the latest in spot cleaning technology. The powerful 2-speed motor instantly removes airborne contaminants, that are generated during the spot cleaning process. The secondary Stainless Steel Chemical Shield protects as it vacuums away overspray.

The adjustable stainless steel arm rotates for optimal cleaning efficiency and safety. An internal Activated Carbon (Charcoal) Filtration Unit is easy to exchange and allows spot cleaning to be done safely inside the production facility. The Exhauster can also be conventionally vented to the outside.

Other advanced features include a built-in Gun Stand that is plumbed for an air dryer (optional) and has an integrated inspection light. A convenience outlet is provided for a cleaning gun and the unit includes standard safety fused protection.

NEW

Monitoring your dryer temperature is easier said than done. The temperature inside any dryer varies from day to day due to brownouts, outside temperature changes and type of garments being printed. Heat tapes help you to ensure ink curing and prevent shirt burning. We recommend using a heat tape at the beginning of each shift and whenever you change the type of garment being printed.

HINT: SAVE SOME MONEY BY CUTTING EACH HEAT TAPE IN HALF BEFORE USING

Point and Shoot Technology

Point this TEMPERATURE GUN at the ink as the shirt comes out of the dryer and the digital readout instantly shows the temperature. No more waiting for the heat tape or donut probe to travel through the dryer. Also use this gun to scan the surface of your heater panels for cold spots. This TEMPERATURE GUN makes it easy for printers to verify that ink reaches curing temperature. How much does one job returned with under cured ink cost you?

**Embroidery**

**Misc Printing Tools**

- **Flash Cure Cool Down System**
  - Exclusively Air Curtain Spray Head
  - Exclusive Air Curtain
  - Speeds production by spraying a silicone solution along with compressed air.
  - Reduces the need for cooldown stations and speeds up production dramatically.
  - Automatic Portable Economical Easy to use

**Kwik Kool**

- Silicone Concentrate 4 Quarts For $80
- 1 Quart Mixed With Water Makes 5 Gallons.

**PreScreen**

- Prepress film registration system
  - The Precreen system was designed as an economical alternative to carrier sheet or pin type registration systems. The system allows you to line up all positives for a job in the correct screen location, minimizing the amount of on press adjustment and registration required. From simple one color jobs to complex multi-color art, you'll get the job done quickly and easily. Does not require registration marks or crop marks.

**Clear Plastic Layout Sheets**

- 14" x 17" 100 Sheets
- Use them to pre-register multi-color jobs.

- **Lithopaquer Pens**
  - Lithopaquer II
  - Ideal for touching up film positives. The medium point is good for broad strokes and easily fills pinholes. The fine point is ideal for detail work. Quick drying aqueous ink.

- **Blockout Pen**
  - by FIRST PRINT

- **Toner Aide**
  - Just a light spray on Vellum Paper or Laser Film Positive and the toner is noticeably darkened.
  - Screens will burn much better and image quality greatly enhanced.

**Flash Cure**

- Exclusive Air Curtain Spray Head
- Automatic Portable Economical Easy to use

**Packing Tape & Guns**

- We're talking about the clear tape you use to seal cardboard boxes when you ship them. Packing tape isn't a screen printing supply, but it's something we're sure you use every day. We have the lowest price around, so why don't you add a case to your order today! Use it to tape over shipping labels too!

**PMS BOOK**

- PANTONE is the standard in color communication among artists, graphic designers and unfortunately screen printers. No, the colors in this book can't be matched exactly on T-Shirts and no the color formulas don't work well with plastisol. But, this is the only widely used method of communicating colors, so we're stuck with it. Buy this guide and give it to artists and ink mixers to use as a tool.

SOLVY—Water Soluble Topping

Solvy film is a great topping for towels, golf shirts and sweaters. Just put a layer of Solvy on top of item when you hoop it.

When embroidery is done, tear away as much Solvy as you can. Any small pieces which are left will dissolve during the first wash (or steam them away).

Solvy works wonders sewing difficult items. It stabilizes the fabric & dramatically improves the detail of the embroidery.

PEGGY’S STITCH ERASER

Remove stitches in fabric without any damage to the material!

#PSE3 $80.95

Replacement blade available #PSE3RB $21.25

NO-SHOW Backing

Nylon Mesh Backing is very soft, sheer and translucent. Minimizes “Show-through” on golf shirts and lightweight fabrics.

16"x20"

$985

The most reliable Auto-Opening machine on the market. Requiring no air feed, this semi-automatic press utilizes an electronic release. Hands free opening saves time and allows the user to apply more transfers with less effort. Auto reset digital timer, full range pressure control, thermometer (up to 450 deg) & heat indicator light. Weight 84lbs 120 Volts 12.5 Amps

Commercial Air-Automatic
16"x20"

$1,490

Air assist helps reduce operator fatigue. Features include auto-reset timer, psi pressure setting, thermometer, thermostat, heat indicator light, and pre-press release button. Optional Shuttle Attachment (see below) significantly increases output. Customer must supply air compressor. Weight 137 lbs 120 Volts 14.5 Amps NEMA 5-20 20A Plug

S450P

**Digital Heat Transfer Papers**

**Inkjet Cold/Hot Peel**

Use with most ink jet printers (No special cartridges required). Transfer images to t-shirts, sweatshirts, aprons or just about any light colored cotton, 50/50 or polyester fabric. For best results, use light colored material with a smooth surface.

**Inkjet Dark**

Single-Step inkjet Transfer Paper - for transfer to dark fabrics. Can be hand ironed or heat pressed. EASY to use, excellent brightness and color retention after washing. This paper leaves a white square on the shirt (it can be trimmed).

**Laser Transfer Paper**

Premium Color Laser Copier Heat Transfer Paper. This product works for a variety of color laser copiers and color laser printers that use fuser oil. Peels HOT or COLD. For flat transfers onto white and light colored garments.

**TransferWear Econo CLC**

High quality digital transfer paper at an economical price. Recommended for cassette feeding in most high speed color copiers and laser printers that use fuser oil. For flat transfers onto white and light colored garments.

**TransferWear CLP**

High quality digital transfer paper. Designed for use in laser printers that DO NOT USE FUSER OIL, such as the HP4500 and 4600 series, Canon Image Class 2100. For transfers onto white and light colored garments.

**TransferWear Dark**

A single step color laser copier transfer paper for transfer onto dark fabrics. Can be hand ironed or heat pressed. EASY to use, excellent brightness and color retention after washing. This paper leaves a white square on the shirt (it can be trimmed). Fuser oil printer required.

**Prices subject to change without notice.**

Phone to order (800)659-8337
VELLUM PAPER can take the place of a film positive. Print your artwork on a sheet of VELLUM PAPER using your laser printer or photocopier. Expose your screen using VELLUM PAPER like you would use a film positive. VELLUM PAPER is sturdy enough to make it through the production cycle and suitable for art file storage of up to one year.

**WaterProof vs. Non-WaterProof Film**

So, which film do you need? It really depends upon your needs. If you want to use off-the-shelf pigment inks that come with Epson 2200, R1800 and 4000/4800, then WP is a must. If you have high humidity or just don’t want to worry about images getting smeared, then again WP is for you. If you are looking for an affordable solution and are using Epson 3000 or 1520 DYE ink or FastINK Dye ink, then our Non-WaterProof film is fine. If you have problems with in drying because of humidity or just the pressure of getting a job on press right now, then WP is the best choice. The special microporous coating on WP causes the ink to dry IMMEDIATELY!

**Best Seller**

FastINK is the best ink on the market for film output on Epson inkjet printers. Our FastINK Dye Ink is specially formulated for printing on clear film and is designed to be quick drying, scratch resistant and have excellent UV blocking characteristics.

**LASER FILM POSITIVE**

- **Density**: Excellent, Dark Toner Adhesion!
- **Durability**: Will Not Rip!
- **Registration**: Will Not Rip! Will Not Shrink!

**Hint**: Laser Film Positive is designed to go through your laser printer. A higher fusing temperature is required to bond the toner to the positive so it won't scratch off. Some copiers get hot enough to do the job, but many do not. Get a test pack + check it out.

**NEW CRYSTAL CLEAR LASER FILM**

Now a Crystal Clear Film for Laser Printers. It is the first truly clear film that provides proper toner adhesion and density on a laser printer. Recommended for use with the XANTE ScreenWriter 4.

**NEW**

**Screenwriter 4** from XANTE is the perfect way to produce quality film positives for your T-shirts and much more. Now able to print on clear film along with vellum paper and laser film. The huge print area is up to 13”x35.5” to reduce tiling of films. Print at 600x600 dpi, 1200x1200 dpi or 2400x2400 dpi for quality text, line art and halftones. The Screenwriter 4 prints much darker than any other brand of laser printer, because the print engine is purposely slowed down to allow more toner to lay down on the positive. No laser printer prints as dark or dense as a XANTE.

True Adobe PostScript 3 ensures perfect halftones and compatibility with virtually any graphics software and hardware environment. Connect to your computer with the included USB, 10/100 BaseT Ethernet or Parallel port. Call for a complete brochure and sample positive for you to burn.

**Beginning Garment Screen Printing**

(Run Time 120 minutes)

Richard Greaves, Printwear Magazine's technical editor, goes into the shop to show you how it's done in this step by step guided tour through each department of a successful garment printing shop (Art, Screen Making, Ink and Printing). Greaves, with his trademark wit and wisdom, shows it all up by building up shirts for the customer with incredible information along the way. Experienced screen printers will take advantage of Greaves' 20 years of experience in the industry with tips and techniques that will transform the average screen printing shop into the high profit screen printing business it should be.

**Training DVD's**

We are very excited about DVD's and pleased to offer a line of excellent training DVD's from Scott Fresner's U.S. Screen Printing Institute. Most new computers have a DVD player built in and DVD players for your TV are less than $100. With DVD, the quality you see is excellent because it is digital and you see exactly what is shot. There is no image loss compared to video.

**PLUS** if you watch the DVD on your computer, you can have the DVD training session running at the same time you are working on your program. The best feature is there is no more rewinding or fast forwarding tape. Simply click on the "chapter" or "topic" you want and you are there in fractions of a second!

**Plastisol Inks-How To Use**

Learn the important aspects of using Plastisol inks in the garment screen printing shop. Types of plastisols, using reducers properly, working with tenders and bases, ink mixing, proper curing techniques, using high opacity inks, proper in viscosity and much much more.

#DVDPFPLASTIS $39.95 each

**Screen Printing Heat Transfers**

Learn everything there is to know about making and applying heat transfers to garments. Hot and cold peel transfers, sublimation transfers, types of transfer papers, proper printing, mesh selection and stencil systems, equipment needed, making multi-color transfers...

Laser Alignment Systems

Screen Printing Presses
Heat Transfer Presses
Direct-to-Garment Printers
Embroidery Hooping / Tracing

Improve Production Speed, Minimize Mistakes

Laser guidelines will dramatically reduce your set up time, speed up your production and improve your accuracy. Laser Targeting Systems offers the only complete laser alignment systems that work in conjunction with your equipment to improve your production and provide the highest quality of product. Whether you do screen printing, embroidery, heat transfer or provide other services, you will see immediately the impact of using a laser system in your shop.

Customize a Laser Alignment System For Your Shop

Step #1: Choose a Control Panel

- Single Control (Only 1 Laser) - $25.00
- Manual Control (Up to 4 Lasers) - $110.00
- Automatic Control (Up to 4 Lasers) - $210.00

Step #2: Select the Number and Type of Lasers

- Spot Laser - $70.00
- Line Laser - $150.00
- Crosshair Laser - $180.00

Step #3: Choose Optional Mounting Equipment

- Floor Stand - $100.00
- Table Clamp - $80.00
- Bracket / Arm - $80.00
- Battery Box - $40.00
- Adapter - $35.00

Call Bob at 1-800-659-8337 for Help Setting Up a Laser Targeting System for Your Shop.

Prices subject to change without notice.

Phone to order (800)659-8337
Loaded With Quality and Features

Highest Watts/ Square Foot in It's Class
Modular Design is Expandable (not 2608)
Optional Side Cap Element (2608 only)
Solid State Digital Temperature Control
Heated Air Recovery, Power Exhaust
Removable Oven Hood, Flash Phase
4-Point Belt Tracking w/Adjustable Speed
3 Foot Add-On In-Feed / Out-Feed-Optional

All Heads Down allows several people to print on the same machine at one time. This can speed up the production on big jobs or allow multiple jobs to be printed simultaneously. If these features are not important to you, then select our classic One Head Down design for maximum value.

Optional Side Clamps provide support for automatic size screens. What an awesome sampling machine for the automatic shop. Manual printers who gang up multiple jobs on each screen will also love the versatility of side clamps.

Prices subject to change without notice.
The perfect "first" automatic for a growing manual shop. The Javelin is manufactured by Tuf Products in Houston, Texas. While the other automatic manufacturers only pay attention to the multi-million dollar shops, Tuf Products treats even the smallest printer with respect. The Javelin holds perfect registration and can print up to 1000 shirts per hour. Please call for more information.

Automatic Printers

The Revolutionary FLASHBACK

Now for the first time, printing, flashing and cooling are all performed on the same printhead. After the print stroke, the Flashback automatically slides its thin quartz element in between the garment and the screen, instantly flash drying and then cooling the garment.

Choose between three flash modes: Print one stroke then flash once; print two strokes then flash once; or for a super-bright white under-base, print then flash and print then flash again. After each flash the garment is automatically cooled with the built-in turbo fans.

We thought a lot about how to explain this new FREEDOM 6-Color/8-Station automatic printer from Tuf Products. Everyone wants to know how we can sell a machine that looks almost exactly like the Javelin (see page 52) for $4,500 less. Well, there’s a “PRICE WAR” going on and you are the big winner.

Tuf Products is battling it out to earn your first automatic printer purchase. We hope you’ll buy a bigger more expensive printer from us later on down the road. We’ll never get the second sale if we don’t get the first one.

Now that brings us to the Freedom. It has nearly all the features of the Javelin. The main differences are: No foot pedal for manual indexing (but it’s an option), Slightly lighter weight steel tubing (it’s still built like a tank) and a slower indexer (Most shops only average 400 pcs/hr on an auto anyway). Other than that, it’s pretty much the same machine for $4,500 less. And best of all the FREEDOM uses the FLASHBACK (see page 52) and you get a 2 year warranty to boot.

$21,800

Fits Thru a 34 Inch Door

So what's keeping you from buying your first automatic printer? Is it money? We have easy leasing programs. Not sure if you have enough work to keep it running? Now you can quote competitively on jobs you could only dream of ... FREEDOM never calls out sick, doesn’t ask for a raise, never talks back, is tax deductible to buy and saves on payroll!!

Prices subject to change without notice.
The Odyssey printers combine superior construction with features usually only found on higher priced models. Micro-Registration, adjustable off-contact and top grade aluminum castings are all standard with Odyssey.

WASHOUT SINKS

CLEAN SCREENS FASTER & BETTER

44" wide x 28" Deep X 72" Tall

Stainless Steel Sink

Model #SINKSS48BL

Professional quality stainless steel washout sink has a plexiglass back. Install 4 foot florescent lights (customer supplied) with our optional yellow safelight shields and dramatically improve screen making quality. This sink will last a lifetime!

$1,595 PLEXIGLASS +$95 crating BACK

Designed to fit a pressure washer and RFU20 filtration unit underneath the sink and you have the perfect screen reclaiming system.

REduce your Chemical Usage:

High pressure is the secret to making better screens. You'll use less reclaimers and haze removers when you let the pressure do the work. Reclaims screens in less than one minute. The labor savings will pay for this piece of equipment in under six months.

Add a Pressure Washer and RFU20 Filtration Unit under the sink and you have the perfect screen reclaiming system.

Stainless Steel Sink

Designed to fit a pressure washer and RFU20 filtration unit underneath

Stainless Steel Sink

Designed to fit a pressure washer and RFU20 filtration unit underneath

RFU20

Dimensions: 32"Dx16"Wx18"H

The dirty water falls from the sink drain into the RFU20 and goes through a stainless steel mesh strainer and a 20 micron filter media. Plastisol ink and emulsion are filtered and the water is then pumped to drain. The RFU20 prevents drain clogs and keeps ink from going down the drain. (Solvents are not acceptable for drain discharge and are not removed by the RFU20).

*Slides under your existing sink.
*Up To 25-30 Screens Between Filter Replacement
*20 Micron Filter Bags Cost $3.97 ($3.74 in 144pc qty)

---

**U-Boat Alert!**

Warning: This U-Boat will make your life much easier (and save your aching back tool).

Load with boxes of T-Shirts, 4 high x 3 wide. That’s nearly 1000 T-Shirts on one U-Boat. Now you can easily wheel those shirts from the UPS truck, right on over to the printing press. After printing, load the boxes back onto the U-Boat and they’re ready to wheel out to your customer’s vehicle when the order is picked up.

If your shop is tight on space, you really need to get some U-Boats. They are easily maneuvered in tight spaces and can be parked in the aisles.

U-Boats are in stock for immediate shipment via truck. F.O.B. New Jersey.
