BASF - The Chemical Company

BASF is the world’s leading chemical company: The Chemical Company. Its portfolio ranges from chemicals, plastics, performance products, agricultural products and fine chemicals to crude oil and natural gas. As a reliable partner to virtually all industries, BASF’s intelligent system solutions and high-value products help its customers to be more successful. BASF develops new technologies and uses them to open up additional market opportunities. It combines economic success with environmental protection and social responsibility, thus contributing to a better future. BASF has approximately 94,000 employees and posted sales of more than €62 billion (approximately 4,00,000 crore) in 2008. Further information on BASF is available on the Internet at www.basf.com

The World’s Number 1

The Construction Chemicals Division of the BASF Group is the world’s largest provider of construction chemicals products, systems and services for new construction, repair and renovation. The business focuses on two product-oriented segments: Admixture Systems and Construction Systems.

The admixture systems consist of products and technologies for improving ready-mix & site-batched concrete, pre-cast, manufactured concrete products and underground ground construction systems including shotcrete, anchoring, and ground stabilization. The company also provides state of the art equipments for sprayed concrete & light weight concrete.

The construction systems consist of products for sports industrial & decorative flooring, coatings strengthening, precision grouts, sealants & adhesives and expansion joints.

BASF Construction Chemicals is committed to engineering quality solutions to drive the concrete industry forward. Through constant research and development in to new products, systems, application methods and equipment, we add value to concrete.

Construction Chemicals India

BASF Construction Chemicals India, wholly owned by the BASF group operates across India, Nepal and Bhutan. Our market segmented structure means that you can rely on the proximity of a local company with the backing of a global group.

“Local experience, Global expertise” is the motto followed by the company to provide latest trends and products systems to the Indian construction Industry. The sales and support is provided by well qualified engineers, trained in India and abroad and also include expatriate technical experts employed in India. We have been pioneer in introduction of latest generation concrete admixtures for self-compacting concrete, alkali free accelerators for sprayed concrete and polyurethane concrete floors for highest level of ruggedness & hygiene maintenance.

The quality systems in production, distribution and sales & marketing forms an integral part of company’s culture. In addition to our own global standards, the quality management system complies with ISO 9001: 2000 and environment management system complies with ISO 14001: 2004. The company comprises manufacturing plants for liquid admixtures, powder and resin products; located at Navi Mumbai, Bangalore Kolkata and Baddi. A development centre, training facility and several branches provide products, technical and marketing services to contractors, specifiers and owners. We also exports products to affiliate companies’ world wide.

Improve, Protect & Repair

The challenges of today’s construction industry increasingly demand materials that ensure long – term equilibrium between the performance requirements of a structure on one hand and economics, quality, safety, aesthetics and the environment on the other.

At the core of BASF’s business philosophy is development of solutions to improve, protect and repair concrete whilst maintaining this balance.
Integrated solutions

The result of specifying BASF as a single source of supply is a guarantee of value, performance and durability of inclusive systems, supplied against the highest international quality standards.

A single source of supply provides the benefits of one point of contact for the specifiers, contractor and a single point of material responsibility for the client.

No other single manufacturer can offer such complete, complimentary systems or tailor integrated solutions to often complex site dynamics.

BASF’s product includes Integrated System Packages for:

- Airports & Cargo Handling
- Automobile assembling
- Bridges & flyovers
- Car parks & podiums
- Chemicals & mineral processing
- Electronics manufacturing
- Food and beverage production
- Foundation protection
- Hospitals & Health care
- Industrial construction
- IT & ITeS office spaces
- Jetties & marines construction
- Kitchens & Catering facilities
- Luxurious & Mass Housing
- Oil, Gas and petrochemicals
- Pharmaceutical & Biotech
- Power project construction
- Precast concrete production
- Rails and Highways
- Ready mix concrete
- Schools & Education institutes
- Shopping malls and showrooms
- Swimming pools & water bodies
- Tunneling & mining
- Ware housing
- Water treatment & storage
- Watertight joints

Above all, BASF is a reliable partner whose products and equipments are supported by professionals committed to providing a superior quality service as their highest priority.
