**DESIGN FEATURES**: XtremeTrim® Vertical Bead Reveal serves as an aesthetic expansion joint between panels. Works with all panel profiles/finishes. A better, more appealing and secure solution to the “open wall” vertical joint look popular in many areas.

**MATERIAL**: 6063 T-5 .050” (1.27mm) ± .005 extruded aluminum alloy with proprietary coating that protects against harsh weather conditions and allows for paint adhesion.

**FINISH**: Unless specified all XtremeTrim® items are provided in primed finish. Also available in popular siding/soffit colors in standard face only color match or full coverage CoastalColorCoating™. Clear Anodized is stocked and custom anodized is available (minimums apply).

**FASTENERS AND FASTENING**: Stainless steel fasteners are recommended. XtremeTrim® profiles may be secured in place with a few SS nails until fastened through panels and into studs during panel or plank fastening per siding manufacturer’s instructions.

**CUTTING & PAINTING**: Use a non-ferrous carbide miter saw blade when cutting XtremeTrim®. Use Direct To Metal (DTM) paint when jobsite painting. See painting guide.

**XTREMETRIM® BUTT JOINT**: Sealant is required between butt joints where two trims come together. May also be further protected by use of a piece of XtremeFlashing™ behind the butt joint or with a metal flasher behind the joint.

**NOTE**: Use of the XtremeTrim® Vertical Bead Reveal at horizontal joints is not recommended.

**RECOMMENDED APPLICATION NOTES**: Please follow siding manufacturer’s best practice guides when installing. XtremeTrim® profiles DO NOT form a moisture management system. The architect and builder are responsible for designing and installing a code compliant building envelope. Before installing XtremeTrim® use either a drainable housewrap or a standard housewrap with a rainscreen system if required by code or siding manufacturer.
