The Diagnostic Center, Southern California offers formal professional development activities to local educational agency (LEA) staff and parents on a range of topics. Our topics are based upon both statewide and local needs assessment surveys as well as other areas of interest. Our primary charge, the provision of assessment services, limits our ability to accommodate multiple requests for training. In an effort to maximize our training resources, we offer training and technical assistance in several formats.

How is our training disseminated?

**Workshops:**
In order to provide our services in an equitable manner to LEAs and SELPAs, most of our workshops are offered regionally on pre-set dates to the four Regional Coordinating Councils (RCCs) in our catchment area. Any remaining dates after June 1, 2016 are available for individual districts or SELPAs. While scheduled on a “first come, first served” basis, attempts are made to distribute workshops equitably.

**Consultation Services:**
The Diagnostic Center has the capacity to provide consultation services in one to two hour sessions either at our Center or through the web or videoconferencing. See page 25 for more information.

**Comprehensive Professional Development Projects:**
Comprehensive Professional Development Projects are individually designed to meet specific district or school site needs. Projects incorporate in-depth content training and multiple levels of follow-up support including demonstration teaching and on-site collaboration. These systemic projects include multiple service days that may be interspersed over a period of weeks, months or a year. Project topic examples include Autism, Moderate to Severe Disabilities, Transition, and Mental Health. Projects are described on page 26.
How to Book a Workshop

Check for Dates:
Please contact Laura Anderson, Assistant Director, for available dates at train@dcs-cde.ca.gov or (323) 222-8090

What does the sponsoring agency (RCC, SELPA, LEA) need to do?
After a topic and date is confirmed, the sponsoring agency is responsible for:
- Assigning a contact person responsible for coordinating with the Diagnostic Center presenter
- Assigning administrator or designee to attend the workshop
- Securing a training site to accommodate audience size
- Creating and distributing a flyer at least six weeks before the training (see sample on page 6)
- Providing for audio-visual needs
- Duplicating handout packets for all participants (request master copy of handout package from DCS presenter, allow a minimum of two weeks prior to training date)
- For electronic distribution of the handout packets, ensure all participants are provided with the links to download the materials as well as any necessary hard copies
- Greeting and registering participants
- Introducing presenter
- Distributing and collecting evaluation forms
- Distributing Certification of Completion at the end of workshop
- Providing DCS presenter copies of sign-in sheets and evaluation forms

Note: While it is not required, providing lunch on-site for full day workshops is greatly appreciated. It ensures a timely resumption of the training after the lunch break.

A “Certification of Completion” is available upon request of the sponsoring agency for dissemination to participants at the conclusion of the workshop. The Diagnostic Center is also a Speech-Language Pathology and Audiology Board approved continuing professional development provider.

We strongly recommend that the sponsoring agency ensures that parents, general education and other agency staff (for example, Regional Center, Mental Health) as appropriate, are invited.

What is the cost?
There is no cost for our services. Sponsoring agencies have the responsibility for costs involved with any duplication of handout materials, securing the site, advertising the workshop, providing refreshments and other like costs.
Cognitive-Behavioral Techniques for Educators

Sponsored by
Regional Coordinating Council # and the XYZ SELPA

Presenter: Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist
Diagnostic Center South, California Department of Education

Date: Thursday, March 16, 2017

Time: 8:00 a.m. - 8:30 a.m.— Registration/Coffee
8:30 a.m. - 12:45 p.m.— Workshop

Place: Union School District Education Center
2786 Fifth Avenue, Los Angeles, CA 90032

Cost: $15.00 (includes Lunch)

Content: Behavior plans don’t work. What? Well, they’re not what we use for children with Emotional-Behavioral disorders. There is a new treatment model that incorporates evidence-based Cognitive-Behavioral Interventions (CBIs, also known as CBTs) for targeting a wide variety of emotional and behavioral difficulties. This unique hands-on, interactive training provides you with the key CBIs to help develop an effective milieu program that—in tandem with your students’ mental health professionals—can provide brief, issue-focused support for restructuring of student thinking, promoting problem-solving, and improving behavioral outcomes. This training is considered to be part three of three important trainings you’ll need to become better equipped to work with the new treatment model.

Intended Audience: Special education teachers, school psychologists, counselors, administrators, clinical psychologists, LMFTs, LCSWs, LPCCs, parents, and others who actively work with youth who have mental health concerns

Outcomes: Participants will:
1. Learn how to help students identify and battle cognitive distortions.
2. Learn how to assist in changing emotional patterns that lead to unwanted outcomes.
3. Learn ways to help students regulate and manage moods.
4. Learn and practice “mindfulness” techniques that help de-stress and rapidly restore emotional equilibrium.
5. Discover how to cultivate your student’s own creative solutions and new coping strategies for ongoing emotional difficulties.

Registration Deadline: March 2, 2017
There are only 80 spaces available – FIRST COME, FIRST SERVED!

Name: ____________________________ Telephone/FAX: ____________________________
School District: ________________________ Email: ______________________________

Please mail or fax registration to: Contact Person, XYZ SELPA
5323 Village Road, Los Angeles, CA 90032
Tel: (323) 888-8888 Fax: (323) 888-9999

Your place will be reserved unless notified. DIRECTIONS & MAP ON BACK
A-1  Evidence-Based Practices for Students with Mild-Moderate Autism Spectrum Disorder

**Presenter:** Gina O’Brien, M.A., School Psychologist  
**Time:** 5 hours (8:30-2:30)

Many interventions exist for autism spectrum disorder (ASD). However, scientific research has found only some of these interventions to be effective. The interventions that researchers have shown to be effective are called evidence-based practices (EBPs). Primary reasons for using EBPs are that the students demonstrate improved outcomes, the interventions are legally defensible, and the use of EBPs aligns with best practice in education. This training will provide the history on the identification of the EBPs for ASD and support the understanding and use of EBPs for individuals affected by mild-moderate ASD.

**Intended Audience:** School personnel working with students with mild-moderate ASD

**Outcomes:** Participants will:

1. Learn about the identification of the EBPs through research conducted by the National Autism Center and the National Professional Development Center on Autism Spectrum Disorders.
2. Learn how to use EBPs to assist students at the mild-moderate level in accessing the California Common Core State Standards.
3. Obtain resources that include detailed information on how to plan, implement, and monitor specific EBPs for students with ASD at the mild-moderate level.
4. Practice implementing various EBPs through case studies, instructional videos, resource development, and role-play.

A-2  Evidence-Based Practices for Students with Moderate-Severe Autism Spectrum Disorder

**Presenter:** Nitza Fregosi, M.A., CCC-SLP, Speech-Language Pathologist  
**Time:** 5 hours (8:30-2:30)

Many interventions exist for autism spectrum disorder (ASD). However, scientific research has found only some of these interventions to be effective. The interventions that researchers have shown to be effective are called evidence-based practices (EBPs). Primary reasons for using EBPs are that the students demonstrate improved outcomes, the interventions are legally defensible, and the use of EBPs aligns with best practice in education. This training will provide the history on the identification of the EBPs for ASD and support the understanding and use of EBPs for individuals affected by moderate-severe ASD.

**Intended Audience:** School personnel working with students with moderate-severe ASD

**Outcomes:** Participants will:

1. Learn about the identification of the EBPs through research conducted by the National Autism Center and the National Professional Development Center on Autism Spectrum Disorders.
2. Learn how to use EBPs to assist students at the moderate-severe level in accessing the California Common Core State Standards.
3. Obtain resources that include detailed information on how to plan, implement, and monitor specific EBPs for students with ASD at the moderate-severe level.
4. Practice implementing various EBPs through case studies, instructional videos, resource development, and role-play.
**Autism Spectrum Disorders (ASD) and Applied Behavior Analysis (ABA)**

**Presenter:** Margot Glasgow, M.A., BCBA, Education Specialist  
**Time:** 5 hours (8:30-2:30)

**This is a beginning level workshop and introduces the basic aspects of behavioral assessment and interventions.**

This training will provide participants with an understanding of the basic principles of applied behavior analysis, and how they can be used to address difficulties associated with an ASD. Participants will learn the behavioral characteristics of autism, etiology, treatment myths, and research-based information. Additional content includes the assessment of behavior, appropriate data collection methods, and effective ABA teaching strategies to address the unique learning needs and challenging behaviors associated with ASD.

**Intended Audience:** School personnel working with or developing programs for students with ASD

**Outcomes:** Participants will:

1. Gain a better understanding of the behaviors associated with ASD.
2. Understand how to assess behaviors associated with ASD.
3. Develop effective behavior plans to address behaviors associated with ASD.
4. Understand the variety of ABA teaching methodologies.
5. Explore the effective ABA teaching strategies used with students with ASD.

---

**Autism Spectrum Disorder (ASD): What Every Paraeducator Should Know**

**Presenter:** Scott Gutentag, Ph.D., LEP, NCSP, School Psychologist  
**Time:** 3 hours (8:30-11:30)

An overview of autism spectrum disorder (ASD) and practical information paraeducators can use for effective teaching. Strategies and behavior supports will include visual pacing and closure systems, schedules, prompting hierarchies, and reinforcement principles.

**Intended Audience:** Paraeducators working with students with ASD

**Outcomes:** Participants will:

1. Become familiar with the major characteristic of autism spectrum disorders.
2. Become familiar with a variety of teaching strategies and behavior supports.
Presenter: Nitza Fregosi, M.A., CCC-SLP, Speech-Language Pathologist
Time: 3 hours (8:30-11:30)

Social narratives and story-based interventions are visually represented stories or scripts that describe social situations and socially appropriate responses or behaviors. These strategies are designed to help individuals with autism spectrum disorder (ASD) acquire and use appropriate social skills. Social skills include communication, problem-solving, decision-making, self-management, and peer relationship abilities that allow one to initiate and maintain positive social relationships. This training will present an overview of multiple story-based intervention strategies that have been developed to address social skill deficits of individuals with ASD; such as, social narratives, cartooning or comic strip conversations, power cards, social autopsies, and interactive social white boarding.

Intended Audience: School personnel supporting children with ASD

Outcomes: Participants will:
1. Understand the research and theory behind social narratives and how they can be an effective intervention for a variety of student needs.
2. Understand how visual mediums used positively support student understanding of expectations and others’ perspectives.
3. Develop story-based interventions based on individual student needs using specific strategies that are research-based.
It’s a Match! Applying In-Vivo Supports to Students with Mild-Severe Intellectual Disabilities

**Presenter:** Scott Gutentag, Ph.D., LEP, NCSP, School Psychologist  
**Time:** 3 hours (8:30-11:30)

*This workshop is the short version of the previous 5-hour training entitled, “An Introduction to Interpreting Challenging Behaviors in Students with Developmental Disabilities.”*

Ever wonder why your student does not respond to a particular support? Ever wonder why reinforcement “doesn’t work” with your student? Ever wonder why your student needs so much prompting? Have you ever considered nontraditional approaches and matching supports and strategies to the student’s developmental level of functioning? This workshop will address these questions and explain how developmentally-appropriate supports and strategies can help students become more attentive, calm, and engaged (ACE). Providing smart schedules, functional work systems, meaningful visual supports, and effective reinforcement can increase students’ independence and engagement while reducing challenging behavior. Understanding the implications of a student’s developmental level is critical to this process, which will be discussed in this workshop. Some of the themes to be addressed include, “Making Time and Activities Concrete and Experiential,” “Making Work Systems Come Alive and Increasing Engagement,” and of course, “Matching Behavior Strategies to Behavior Function and Developmental Level.”

**Intended Audience:** Individuals who would benefit from a refresher course or introduction to working with students with developmental disabilities who exhibit challenging behavior

**Outcomes:** Participants will:

1. Explain the role of development when designing supports for students.
2. Describe and select strategies that match the student’s developmental level, which may be used to prevent and intervene with challenging behavior.

Pathway Charting: A Tool for Enhancing the Treatment Fidelity of Behavior Intervention Plans (BIps)

**Presenter:** Margot Glasgow, M.A., BCBA, Education Specialist  
**Time:** 3 Hours (8:30-11:30, 9:00-12:00, or 12:30-3:30)

Pathway charting is a strategy for facilitating a team approach in the development and implementation of a behavior intervention plan (BIP). Generating a consensus between IEP Team Members on the core elements of a BIP promotes an understanding of the variables that contribute to and maintain problem behaviors and what must be done to change them. This knowledge promotes buy-in and shared responsibility which in turn, enhances the fidelity with which a behavior plan is implemented. In this training, participants will learn how to facilitate pathway charting through the use of lecture, visual supports, and guided practice with a variety of case studies.

(B-2 continued →)
Intended Audience: Educators who are involved in developing, writing, implementing, or supporting the implementation of behavior intervention plans (BIPs). This may include behavior analysts and specialists, school psychologists, speech-language pathologists, teachers, and administrators.

Room Set-Up: Arrange seating at tables to facilitate group activities with five per group. Easel and chart paper are required for each group.

Outcomes: Participants will:
1. Understand the purpose and process of pathway charting.
2. Gain experience in using pathway charting for a variety of problem behaviors.
3. Understand how to use pathway charting to enhance BIP development and implementation.
4. Learn strategies that can be used to lead a behavior planning team through the pathway charting process.

B-3 Behavior is Communication

Presenters: Elizabeth Gallardo, M.A., CCC-SLP, Bilingual Speech-Language Pathologist
Margot Glasgow, M.A., BCBA, Education Specialist

Time: 5 hours (8:30-2:30)

Behavior is the earliest form of communication. While some students will develop verbal language, others will continue to communicate non-verbally using their behavior. This training will focus on students who use behavior as communication and teach those who work with these students how to recognize, respond to, and shape more appropriate and comprehensible forms of communication. Attendees will learn how to utilize the Form and Function matrix to identify appropriate replacement behaviors for maladaptive behaviors, which are already within their repertoire. This will serve as a guideline for development of appropriate behavior intervention plans. Additional topics will include identifying the student’s level of symbolism and implementing developmentally appropriate supports.

Intended Audience: Individuals working with students who primarily use non-verbal language and/or present with challenging behavior. This includes speech-language pathologists, special education teachers, school psychologists, paraeducators, parents.

Outcomes: Participants will:
1. Increase awareness of the many forms of communication.
2. Understand how to use the Form and Function matrix to classify a student as a pre-symbolic vs. symbolic communicator.
3. Understand how to identify functionally equivalent replacement behaviors (FERBs) based on current communication repertoire.
4. Identify next steps for expanding a student’s forms of communication.
M-1 Case By Case: Mental Health Disorders in Schools

Presenter: Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist
Time: 4 hours (8:30-12:45)

Come join Tim for this enlightening workshop style primer to the world of mental health diagnoses. This hands-on case-study training helps educators broaden their understanding of mental health conditions and the supports students need to succeed. Learn about the major disorders our students and teachers face as well as their functional consequences and the implications for learning. Have you been hearing about the new three-step treatment model for working with children diagnosed with an emotional disturbance? Find out all about it and learn how you can help identify and improve student outcomes today! The day includes tips for screening, assessment, classroom support, educational priorities, and setting up for less educational stress. This training is considered to be part one of three important trainings you will need to become better equipped to work with the new treatment model.

Intended Audience: School psychologists, counselors, special education teachers, administrators, LMFTs, LCSWs, LPCCs, clinical psychologists, and ERMHS

Outcomes: Participants will:
1. Learn how the DSM-5 criteria for various disorders have implications for the Education Code.
2. Gain a basic understanding of how the disorders are different from one another.
3. Learn the implications of each disorder, which will affect your supports, strategies, and teaching approaches.
4. Learn about the new treatment planning model and how it will change the way you teach children with emotional-behavioral disorders.

M-2 Do This, Not That!: The Educator’s Guide to Working with Mental Health Conditions

Presenter: Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist
Time: 4 hours (8:30-12:45)

Oops! You did it again. You stepped on a student’s emotional land mine. Are you spending too much time dealing with the behavioral fallout from emotions you accidentally triggered? Are there things you should have avoided saying or doing? Are there some approaches better than others? The short answer: Yes! You can change your approach and change your educational world. With this half-day presentation, you will learn triggers and side-stepping them without walking on eggshells as well as proactive supports and strategies. This training is considered to be part two of three important trainings you will need to become better equipped to work with the new treatment model.

(M-2 continued →)
Intended Audience: Special education teachers, school psychologists, counselors, administrators, LCSWs, LMFTs, LPCCs, clinical psychologists, parents, and others who actively work with youth who have mental health concerns

Outcomes: Participants will:
1. Learn how to avoid triggering students with emotional-behavioral disorders.
2. Learn the basic profiles and emotional underpinnings involved in major DSM disorders.
3. Learn how to support and teach students with emotional-behavioral disorders.
4. Learn how to incorporate understanding of psychological profiles into treatment planning.
5. Learn strategies that can help parents to avoid the home becoming a setting event for behavioral difficulties at school.

M-3 Cognitive-Behavioral Techniques for Educators

Presenter: Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist

Time: 4 hours (8:30-12:45)

Is your behavior plan not working? Well, they are not what we would typically use for children with emotional-behavioral disorders. There is a new treatment model that incorporates evidence-based cognitive-behavioral interventions (CBIs, also known as CBTs) for targeting a wide variety of emotional and behavioral difficulties. This unique hands-on, interactive training provides you with the key CBIs to help develop an effective milieu program that—in tandem with your students’ mental health professionals—can provide brief, issue-focused support for restructuring of student thinking, promoting problem-solving, and improving behavioral outcomes. This training is considered to be part three of three important trainings you will need to become better equipped to work with the new treatment model.

Intended Audience: Special education teachers, school psychologists, counselors, administrators, clinical psychologists, LMFTs, LCSWs, LPCCs, parents, and others who actively work with youth who have mental health concerns

Outcomes: Participants will:
1. Learn how to help students identify and battle cognitive distortions.
2. Learn how to assist in changing emotional patterns that lead to unwanted outcomes.
3. Learn ways to help students regulate and manage moods.
4. Learn and practice “mindfulness” techniques that help de-stress and rapidly restore emotional equilibrium.
5. Discover how to cultivate your student’s own creative solutions and new coping strategies for ongoing emotional difficulties.
M-4 Keeping the Day Sane: Mental Health 101 for Paraeducators

Presenter: Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist

Time: 4 hours (8:30-12:45)

Are your paraeducators prepared with little more than good intentions to handle the challenges of children identified with emotional difficulties? Are they getting injured? Stressed? Burnt out? Are they inadvertently handling behavioral scenarios with tactics that set kids off and escalate their emotional responding? Stop pulling out your hair and start taking proactive steps. Save the paraeducators! This training will equip your staff with basic knowledge and easy-to-learn strategies that can help them be more successful, keep your students safe, and your teachers sane. Let’s get everyone on the same page.

Intended Audience: Paraeducators, special education teachers, administrators, school psychologists, counselors, and other IEP team members who support these students are strongly advised to attend.

Outcomes: Participants will:

1. Learn the basics of most frequently encountered mental health profiles.
2. Learn how to side-step emotional triggers.
3. Learn basic learning supports and strategies to help keep students with emotional difficulties on track.
4. Learn how to collect proper data to support teachers, behaviorists, counselors, and school psychologists.
5. Learn proactive strategies for handling emotion-driven behaviors.

M-5 Differential Diagnosis: Finding Your Way Through the Mental Health Diagnostic Maze

Presenter: Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist

Time: 4 hours (8:30-12:45)

Emotionally Disturbed? Autistic? Intellectually Disabled?! Head spinning yet? Many of these disorders have overlapping symptoms and eligibility criteria. It can be tricky to discern between disorders, but doing so is the key to proper treatment and support. It also reduces confusion about IEP goals and services. In this 4-hour introductory presentation, you will learn best practices for differentiating between several of the most confused special education criteria, including the criteria for emotional disturbance, autism, intellectual disability, ADHD (OHI), and language disorders. Stop scratching your head and start differentiating with confidence!

(M-5 continued →)
**Intended Audience:** School psychologists, special education teachers, program specialists, speech-language pathologists, behaviorists, and others involved in the assessment process

**Outcomes:** Participants will:

1. Understand the differences between several of the most confused special education criteria.
2. Learn about best practices in differential assessment—the dos and don’ts.
3. Learn about some best practices and evidence-based classroom supports and strategies you can use not only to support students but also to support your diagnosis.
4. Understand DSM criteria that can help you differentially diagnose.

**Presenter:** Tim Halphide, M.A., L.M.F.T., School Psychologist and Licensed Marriage and Family Therapist

**Time:** 3 hours (8:30-11:30)

The age of behavior plans for children with emotional-behavioral disorders is changing. California’s educators are now embracing a treatment plan model with an evidence-based protocol of interventions, as well as best practice supports and strategies for effective, time-limited plans for students. It is a new educational landscape out there and teachers are bravely venturing out. But they need your support! Come to this 3-hour overview and learn about the new treatment model and what you need to do to help your staff and students be successful!

**Intended Audience:** School Administrators, including superintendents, principals, program specialists. Others who may benefit include special education teachers, counselors, school psychologists, and clinical staff (such as LMFTs, LCSWs, LPCCs, and ERMHS)

**Outcomes:** Participants will:

1. Understand the differences between behavioral planning and treatment planning.
2. Understand the new model and the rationale for treatment.
3. Learn about the research supported treatments such as CBT and the guidelines for treatment length.
4. Understand the data needed to support your IEPs and some legal considerations.
5. Learn how you can handle, de-escalate, and support students when they get referred to YOUR office!
R-1  Still Not Producing: Assessment and Intervention for Executive Function Difficulties

Presenter: Scott Gutentag, Ph.D., LEP, NCSP, School Psychologist
Time: 3 hours (8:30-11:30)
The purpose of this training is to present an overview of the professional field’s current thinking about the role and complexity of executive functioning, the process of measuring executive functioning through multiple means, and ways to apply assessment results to real-world supports and interventions. Both quantitative and qualitative assessment data from case studies will be presented for the audience members to analyze. Possible interventions based on these assessment results will be discussed.

Intended Audience: School psychologists and anyone with knowledge of psychological tests and psychometrics. Should have basic understanding of executive functioning.

Outcomes: Participants will:
1. Develop a deeper understanding of executive functioning.
2. Learn to use multiple sources of information in assessing executive functioning/self-regulation.
3. Understand the implications of cognitive and emotional regulation.
4. Translate assessment results into practice.

R-2  Larry P’s and Q’s: Clearing Up the Confusion with Science

Presenter: Scott Gutentag, Ph.D., LEP, NCSP, School Psychologist
Time: 3 hours (8:30-11:30)
The Larry P case has significantly influenced the assessment process of professionals working in the California public schools for over the past 30 years. Confusion exists regarding how to conduct effective assessments of African American students. Many terms and approaches related to assessment of this population have been misunderstood, misinterpreted, and misused. This has the potential to lead to assessment practices with reduced reliability and validity. This presentation will emphasize the need for assessment processes based on best practices that are theoretically sound, scientifically validated, and thus legally defensible.

Intended Audience: School psychologists, speech-language pathologists, or others with a working knowledge of psychometrics.

Outcomes: Participants will:
1. Review what the actual Larry P ruling says regarding the assessment of African American students in California Public schools.
2. Learn how the extrapolations of the Larry P ruling are many times fraught with misunderstanding, misinterpretation, and misuse.
3. Apply the tenets of scientifically sound and best practice in assessing individuals rather than groups.
4. Learn the components of nondiscriminatory assessment.
Assessment and Intervention for Childhood Apraxia of Speech (CAS)

Presenter: Nitza Fregosi, M.A., CCC-SLP, Speech-Language Pathologist
Time: 3 hours (8:30-11:30)

Speech-language pathologists (SLP) play a central role in the screening, assessment, diagnosis, and treatment of Childhood Apraxia of Speech (CAS). As indicated in the Code of Ethics (ASHA, 2010r), SLPs who serve this population should be specifically educated and appropriately trained to do so. SLPs who diagnose and treat CAS must possess skills in differential diagnosis of motor speech disorders and co-morbid language disorders, have specialized knowledge in phonological encoding disorders and motor learning theory, and have experience with appropriate intervention techniques.

Intended Audience: Speech-language pathologists and speech-language pathology assistants

Outcomes: Participants will:
1. Review the components of a comprehensive assessment for students suspected of having Childhood Apraxia of Speech.
2. Compare behavioral features that are commonly seen in other speech sound disorders in order to conduct a differential diagnosis.
3. Identify the elements of intervention for Childhood Apraxia of Speech that are validated by research.

Inclusive Education That Works

Presenters: Nicole Ward, M.A., Education Specialist and/or Amy L. Taylor, Ed.S., NCSP, School Psychologist
Time: 5 hours (8:30-2:30)

This training will focus on inclusive education and the best practices for educating students of varying abilities in inclusive settings. Topics to be covered include: inclusive education program models, research-based practices, and how to develop and implement appropriate academic and social curriculum.

Intended Audience: Ideal audience will include multidisciplinary teams working with students with special needs in inclusive settings, however, individual professionals will also benefit. This includes administrators, special education teachers, general education teachers, school psychologists, speech-language pathologists, occupational therapists, and paraeducators.

Outcomes: Participants will:
1. Increase awareness of the various working models for implementing inclusive education.
2. Learn how to identify and then reduce or remove barriers that may hinder learning.
3. Understand how to use research-based practices to support positive outcomes for students and staff.
The ABCs of Preschool Assessment and Intervention

Presenters: Amy L. Taylor, Ed.S., NCSP, School Psychologist
           Elizabeth Gallardo, M.A., CCC-SLP, Bilingual Speech-Language Pathologist

Time: 5 hours (8:30-2:30)

This training will explore the laws and regulations around special education transition from Part C (Early Intervention) to Part B (Preschool Special Education: the foundation upon which special education and related services rest). The focus of the first part of this training will explore the selection and use of appropriate assessment measures designed to assess a preschool child’s development including cognition, language, motor, and play for both the initial assessment and the transition to kindergarten. Participants will critically examine the continuum of services and optimum preschool environments. Preschool special education teams will have the opportunity to discuss challenging cases to improve the transdisciplinary assessment process. Topics of cases will explore cultural considerations when assessing young children, how to determine delay versus disorder, and medical issues that may impact a child’s development. Preschool teams will be introduced to evidence-based instructional practices and on-going data collection to support the growth and development of young children while in preschool classrooms.

Intended Audience: School psychologists, speech-language pathologists, occupational therapists, early childhood special education teachers, and instructional assistants. Ideally, entire preschool assessment teams would attend together.

Outcomes: Participants will:
1. Become familiar with assessment methods for preschool students
2. Understand the laws pertaining to the assessment of preschool students
3. Be exposed to instructional and behavioral strategies for early educators
4. Understand language and play-based supports to engagement and social skills

Dyslexia and Reading: Responding to the Non-Responder

Presenter: Jenny Quan, Ph.D., Education Specialist

Time: 5 hours (8:30-2:30)

In anticipation of the program guidelines for dyslexia as a result of AB 1369, it will be essential for educational teams to improve services to students who struggle with reading achievement. Per the law, educational services will need to be "evidence-based, multisensory, direct, explicit, structured, and sequential" for these students. As a result, it is essential that reading interventionists have a solid foundation for providing this level of service to students. While this workshop will target skills typically mastered in elementary school, teachers of older students who have not responded to intervention efforts may also benefit from the information.

Intended Audience: Teachers and instructional aides/paraprofessionals

Outcomes: Participants will:
1. Learn how to identify areas of weakness in phonological awareness and decoding using criterion-referenced assessment.
2. Learn how to use progress monitoring to provide data-driven instruction.
3. Develop a foundation for implementing early reading skills intervention that is evidence-based, multisensory, direct, explicit, structured, and sequential.
**Augmentative-Alternative Communication (AAC) Assessment Certificate**

**Presenter:** Heather DeFelice, M.S., CCC-SLP, Speech-Language Pathologist, AAC Specialist

**Commitment:** Four 1-day sessions plus completion of AAC assessment and report and self-study assignments. Attendance on all four dates plus successful completion of self-study assignments and an AAC assessment and report yields the certificate.

**Time:** 5.5 hours (8:30-3:00) each day, plus time to complete an AAC assessment and report. Self-study work will also be assigned and must be completed by Day 1 of the training.

This Certificate Program is intended to provide in-depth training in the area of augmentative-alternative communication assessment for AAC specialists and/or staff who serve children with complex communication needs in their school districts. Participants should have some experience with using several low- and high-tech devices with students in the classroom and/or therapy settings. The course will emphasize integrating theory with practice, conceptualizing the impact of cognitive, perceptual, and motor deficits on communicating and AAC recommendations, as well as provide direct experience with a sample of augmentative devices. **This is not a beginner course.**

**Intended Audience:** Speech-language pathologists and other school professionals (e.g., school psychologists, occupational therapists, etc.) who are qualified to conduct school-based assessments and who will be completing AAC assessments for their school district. This does not include paraprofessionals. **If an attendee is not a speech-language pathologist, he/she needs to attend with an SLP from his/her district to facilitate appropriate teaming. It is highly suggested that a speech-language pathologist, school psychologist, and occupational therapist from the same district attend together as AAC assessments are a team approach.**

**Audience Size:** Maximum of 30 participants

**Outcomes:** Certificate recipients will be able to:

1. Understand the impact development has on AAC recommendations.
2. Understand the purposes and role of AAC for different levels of communicators.
3. Consider vocabulary, symbol sets, access methods within a variety of AAC systems.
4. Identify, describe, and interpret assessment procedures for children who may benefit from AAC.
5. Demonstrate the ability to conduct an AAC assessment and complete an AAC assessment report.

For information regarding the training, please contact Heather DeFelice at hdefelice@dcs-cde.ca.gov.
Administration and Interpretation of the Southern California Ordinal Scales of Development - Cognition

Presenter: Gina O'Brien, M.A., School Psychologist

Time: 2 sessions  6.5 hours each (8:30-4:00)

The Southern California Ordinal Scales - Cognition, developed at the Diagnostic Center, provides educators a descriptive framework for understanding students' cognitive abilities. Based on Piaget's developmental levels, the “Scales” are among the most culture-free and nonsexist instruments available. It utilizes a flexible format for assessing the cognition of both low- and high-functioning students. However, practitioners will find them especially useful for evaluating low-functioning and difficult-to-assess students of all ages. The information they derive is useful for developing instructional, communication, and behavioral support programming. This series of seminars will introduce and demonstrate Scales administration and interpretation.

Intended Audience: School psychologists, speech-language specialists, teachers, and administrators

Outcomes: Participants will:
1. Review the developmental theory of Piaget, with particular emphasis on its applicability to educational settings, curriculum, and behavior.
2. Achieve basic competency in administering a variety of Scales items.
3. Understand the Scales’ qualitative scoring system.
4. Interpret and translate the results into specific recommendations for educational staff.

Please note: Participants must bring their own copy of the Cognition Scales manual to each session. Attendees may also want to bring the Social-Affective and Communication manuals. These manuals are available from Zilprint, www.zilprint.com. None will be available at the Center. Participants will be asked to practice Scales items in the periods between training sessions and must attend both sessions to receive a certificate at the end of the training.

To sign up for the trainings, please visit our website at www.dcs-cde.ca.gov/prf/calendar.html.
An Introduction to the *What’s & Not’s of Attention Deficit Hyperactivity Disorder (ADHD): Implications for Behavior and Instruction*

**Presenters:** Scott Gutentag, Ph.D., LEP, NCSP, School Psychologist  
Kathleen Whelan Gioia, M.S., M.Ed., Education Specialist

**Time:** 5 hours (8:30-2:30)

This training is an introduction to understanding the complexity and multifaceted aspects of Attention Deficit Hyperactivity Disorder (ADHD). Cognitive, behavioral, social, and academic issues associated with the condition will be discussed. Focus is placed on the critical role of executive functioning (cognitive processes responsible for many of our problem-solving skills) and how this functioning explains many of the challenges faced by students with ADHD. Professionals require the understanding of the disorder as it is necessary for effective development and implementation of strategies and supports. Techniques and strategies will be shared that can support students who face challenges associated with ADHD.

**Intended Audience:** Professionals working with students with ADHD

**Outcomes:** Participants will:
1. Become familiar with the diagnostic criteria associated with ADHD.
2. Understand the relationship between executive functions and ADHD.
3. Identify how executive functions impact performance and daily living at home and school.
4. Become familiar with environmental, curricular, and behavioral supports that can facilitate positive life outcomes.

---

If It Isn’t Written Down, It Didn’t Happen!

**Presenter:** Kathleen Whelan Gioia, M.S., M.Ed., Diagnostic Education Specialist

**Time:** 5 hours (8:30-2:30)

This workshop focuses on data collection, documentation strategies, and proven techniques to track student progress. Attendees will become familiar with effective strategies that support Educational Benefit. Learn to work “smarter not harder” and how to set the stage for successful IEP meetings. Participants will receive materials to begin the documentation process and to support teachers’ compliance responsibilities required to implement the IEP.

**Intended Audience:** Special educators, program specialists, and administrators

**Audience Size:** Maximum of 70

**Outcomes:** Participants will:
1. Review Best Practice techniques for documentation.
2. Learn to prepare for effective IEP meetings.
3. Implement documentation strategies that support Educational Benefit.
4. Learn how to systematically monitor, review, and analyze student growth over time.
5. Learn strategies to inform parents of their child’s educational progress.
S-3 To the World & Beyond! Successful Transition Practices

Presenter: Kathleen Whelan Gioia, M.S., M.Ed., Diagnostic Education Specialist
Time: 5 hours (8:30-2:30)
Quality indicators support our transition practices which lead to positive postsecondary outcomes for all students. In this training, participants will learn how to effectively use Levels of Assessment to create an Individualized Transition Plan (ITP). Evidence-based practices and predictors, including appropriate services and activities, will be reviewed. Reference materials appropriate for mild-moderate to severe will be shared.

Intended Audience: Special educators, program specialists, administrators, and parents

Audience Size: Maximum of 70

Outcomes: Participants will:
1. Learn how to complete an Individualized Student Planner.
2. Review tools for transition planning and assessment.
3. Recognize the importance of: Levels of Assessment, Parent Involvement and realistic post-secondary goals
4. Review key transition services and activities.
5. Become familiar with the requirements to satisfy Indicator 13.

S-4 Indestructible Instruction: Using UDL to Combat Barriers to Common Core Access for Elementary Students with Mild-Moderate Disabilities

Presenter: Jenny Quan, Ph.D., Education Specialist
Time: 5 hours (8:30-2:30)

Many barriers to learning exist for students in terms of access to the California Common Core State Standards, particularly for elementary students with mild-moderate disabilities who participate in general education during their school day. This workshop will help educational teams to identify learning barriers, learning targets for Common Core access, and how to optimize teaching and learning within a universal design for learning (UDL) framework to best support students. Instructional teams (e.g., teachers, aides/paraprofessionals, school psychologists, SLPs, etc.) are encouraged to attend together, as opportunities for brainstorming for targeted students will be incorporated throughout the workshop.

Intended Audience: Teachers, aides/paraprofessionals, school psychologists, SLPs

Outcomes: Participants will:
1. Learn how to support elementary school students at the mild-moderate level of disability in accessing the California Common Core State Standards.
2. Explore resources for UDL, including how to provide multiple means of: Engagement, Representation, and Action & Expression.
3. Identify individualized, targeted supports and instructional strategies for students that can be used in the classroom.
SELPA PENT Committee:
Kathy Skeels, Patty Metheny, Steve Collins,
Anjanette Pelletier, Christopher Gutierrez-Lohman
with Vanessa Smith and Valerie Johnson

What is PENT?

PENT is a California Positive Behavior Initiative created in 1998 as a joint effort between the Diagnostic Center, Southern California and SELPA to build a statewide network of trainers in positive behavior supports.

What has PENT accomplished?

- **Annual PENT Forums** since 2003 held North and South, providing 300 Cadre members yearly with evidence-based training materials and resources to build capacity at the local level.
- **PENT Research Team** demonstrated that a well-developed BIP (using the PENT BIP and scoring rubric) increases student outcomes and staff fidelity. Research was published in four peer reviewed journals.
- **PENT Website** had over 45,000 visitors and over 225,000 pages downloaded in 2014-2015 (www.pent.ca.gov).

What’s next for PENT Forum 2017:

- **Southern California, Fontana: February 28 & March 1, 2017**
- **Northern/Central California, Stockton: March 14 & 15, 2017**
- Nomination forms for new Cadre or to replace Cadre members will be distributed to all SELPA Directors in October 2016.

Advantages of PENT Participation:

- Brings continuity throughout the state on evidence-based practices for social, emotional, and behavioral functioning.
- Creates a body of knowledgeable professionals that are a resource not just to the districts or SELPAs, but also to the state.
- Develops a collegial network of trainers that can share developed tools and resources.
- Creates a proactive movement to assist providers in the use of individualized, least restrictive interventions, within a context of tiered support.
- Provides a wealth of resources that have been reviewed, in an online system. Information from the forums is memorialized and available on the website. Presentations can be tailored to your own SELPA needs. Participants learn specific strategies, take away information, and build skills that they can use right away.
- Develop an understanding and consideration of the critical impact of cultural competency
- Keep abreast of the current trends and compliance issues of Federal and State legislation.
- Documented quality training assists in creating a legally defensible system of practice that utilizes best practices in all areas including and not limited to assessment, analysis, intervention, data driven decisions and collaborative processes.
- It is expected that those participating will be in a position to train others and to be a resource for their community of educators and parents.
- Collaboration with multi-agencies is necessary for many of our students, and how to build a climate of shared vision, service, and communication is emphasized.
Assessment Services

Unique to the state of California, the Diagnostic Centers are the California Department of Education’s primary provider of direct services and assistance to California school districts and their special education students. The Diagnostic Centers provide individualized assessment and educational planning services for California’s most difficult to serve special education students.

- Assessments are designed to meet the individual needs of each student and the diagnostic questions posed by the district. Assessments are completed at the Diagnostic Center and/or the school site.
- Assessments are provided by expert teams of diagnostic professionals, including educational specialists, speech and language specialists, psychologists, pediatricians, and other specialists.

Following the completion of an assessment a comprehensive report detailing findings and recommendations including evidence-based strategies and interventions is provided at a collaborative family/district conference.

Eligible Students:
Eligible students are California residents between the ages of 3 and 22 who:
- receive public special education services
- are not progressing despite local school efforts
- demonstrate a complex learning and/or behavioral profile
- require assessment beyond district capabilities to define educational needs
- would not be more appropriately assessed by other agencies.

Referral Process:
Referrals for assessment services must be made by the student’s school district, County Office of Education, or SELPA. Contact the Diagnostic Center for an electronic copy of the application or to discuss the possibilities of a specific referral at (323) 222-8090.

Fees:
There are no charges to the LEA or family for any Diagnostic Center service.
Consultation Services

The Diagnostic Center is committed to utilizing our staff resources and expertise to meet your local needs by providing consultation services in the following areas:

Case Conferencing:
Diagnostic Center assessment team members can consult with district IEP team members to assist in assessment planning for an individual student. This can be particularly helpful when a differential diagnosis is in question, or when the IEP team would like consultation regarding “next steps” for an individual student.

Medical/ Mental Health:
Assistance in understanding the educational implications of certain medical and/or mental health conditions. Examples of specific consultation topics include brain injury, genetic syndromes (such as Angelman, Williams, Prader Willi), Tourette Syndrome, Anxiety Disorders, Depression, Bipolar Disorder, etc.

Assessment Strategies:
Tools:
- Roundtable discussions on best practices in assessment instruments and methodologies. These discussions can be individually designed for specific disciplines, disabilities or ages.

Techniques:
- Strategies to assist students with behavior problems to successfully participate in the assessment process.
- Strategies to assist district staff in giving the hard news well: effective ways of helping families understand new diagnoses such as intellectual disability and autism.

How are these services delivered:
These services are available either on-site at the Diagnostic Center or via the use of web or videoconferencing. Due to staff time constraints we are unable to travel to your site to provide these services.

The typical length of consultation services is from one to two hours. LEA is responsible for identifying a local technology site and person to coordinate with the Diagnostic Center for web or videoconference and for the phone charges.

Referral Consultation and Training:
In an effort to ensure that we are continuing to meet local district needs, we are offering to meet with SELPAs throughout Southern California to overview our services. Our administrative team has a 1½ to 2 hour presentation on accessing Diagnostic Center services, including a walkthrough of the assessment referral packet and time for questions.

How do I access these services:
Please contact Laura Anderson at (323) 222-8090 or landerson@dcs-cde.ca.gov if you wish to access these services. If you have a particular need that is not listed above, please feel free to call and inquire.
The Diagnostic Center offers Comprehensive Professional Development Projects that are individually designed to meet specific district or school site needs. Projects typically include multiple service days that may be interspersed over a period of weeks or months. Project components are identified by DCS and the receiving district and may include:

- in-depth content training
- full or half day institutes
- 1 to 1½ hour staff training sessions
- on-site consultation
- planning sessions with teachers and administrative support team
- demonstration teaching—including video taping for future staff development
- lesson observations with feedback sessions
- problem solving/coaching sessions
- data analysis, summative and formative evaluation

Due to our staff time commitment for these projects, they will be available on a limited basis. In many cases we begin the planning process with the local district or school site in the spring prior to the implementation year.

**Autism Spectrum Disorders:**
These projects are designed to provide technical assistance and training to school personnel working with students with autism spectrum disorders.

Sample Project Components/Outcomes:
- Designing Positive Behavior Supports, including the use of visual support strategies
- Implementation of Evidence-Based Interventions
- Strategies to Support Social Inclusion
- Guidelines and Training for One-to-One Assistants

**Moderate to Severe Disabilities:**
These projects are designed to provide technical assistance and training to school personnel working with students with moderate to severe cognitive disabilities.

Sample Project Components/Outcomes:
- Use of systematic instruction strategies in the classroom
- Identifying and teaching functional academic skills
- Aligning critical functional skills with the core curriculum
- Providing assistance for classroom behavior management

Transition:
Transition projects are designed to provide technical assistance and training to school districts in developing and implementing transition programs that facilitate the movement from school to post-school activities. Project components can be tailored for students at the middle or high school level.

Sample Project Components/Outcomes:
- Demonstration lessons/activities linked to standards
- Strategies to identify interests/strengths and individual transition needs
- Development of individual transition planners for each participant

**General Requirements:**
The following general requirements apply to each of the Comprehensive Professional Development topics:

- Evidence of strong administrative support for the project
- Completion of identified paper work
- Participants must be part of district team; all team members must commit to fully participate in the training

Additional requirements, specific to each topic, may also apply. For more information, please call the contact person at (323) 222-8090.

Transition........................................ Kathleen Whelan Gioia
All others............................................ Laura Anderson

We also offer several other project topics. Please see the Client List on the next page for a complete list of projects we offered in 2015-2016.

Diagnostic Center, Southern California
About Our Presenters

Heather DeFelice is a speech-language pathologist at the Diagnostic Center, Southern California. She earned her M.S. in Communicative Disorders from University of Wisconsin-Madison. Heather holds California state licensure in speech-language pathology and the Certificate of Clinical Competence from the American Speech-Language-Hearing Association (ASHA). She also earned an Assistive Technology Applications certificate through CSUN and has extensive experience working with children in public schools as well as in augmentative and alternative communication (AAC) camp settings. Areas of expertise include AAC, autism, and severe disabilities.

Elizabeth Gallardo is a speech-language pathologist at the Diagnostic Center, Southern California. She has an M.A. in Communicative Disorders from CSU Long Beach and an M.A. in Special Education with an emphasis in Early Childhood from CSU Los Angeles. Elizabeth also has certificates in Autism and Behavior Analysis from CSU Los Angeles. Elizabeth holds California state licensure in speech-language pathology and the Certificate of Clinical Competence from the American Speech-Language-Hearing Association (ASHA). She is also fluent in Spanish. Elizabeth has experience working with children with special needs from age 1 to 22 years of age and also has experience working with the geriatric population. She has worked extensively in the private and public sector. Areas of expertise include autism, severe disabilities, behavior, and issues in serving culturally and linguistically diverse students.

Nitza Fregosi is a speech-language pathologist at the Diagnostic Center, Southern California. She has an M.A. in Communicative Disorders from CSU Los Angeles. Nitza holds California state licensure in speech-language pathology and the Certificate of Clinical Competence from the American Speech-Language-Hearing Association (ASHA). She is also fluent in Spanish. Nitza has experience working with children with special needs from 2 to 22 years of age in both nonpublic and public school settings. Areas of expertise include autism, severe disabilities and issues in serving culturally and linguistically diverse students. She is also serving as a leader in the California Autism Information Professional Training and Information Network (CAPTAIN), which includes providing training on evidence-based practices for students with autism spectrum disorders.

Margot Glasgow is an education specialist at the Diagnostic Center, Southern California. She is a Board Certified Behavior Analyst (BCBA) and earned her M.A. in Special Education from Chapman University. Margot has extensive experience working with students of all ages who have moderate-to-severe disabilities in the public school setting. Areas of expertise include curriculum and instructional techniques for students with moderate-to-severe disabilities, programming for transition-age students, and positive behavioral interventions for students who exhibit significant behavioral challenges.

Scott Gutentag is a school psychologist at the Diagnostic Center, Southern California. He holds a Ph.D. in School Psychology with a specialization in Clinical Child Psychology from The Ohio State University. As a licensed educational psychologist, Scott holds the National Certification for School Psychology from the National Association of School Psychologists. Scott has provided psychological services in a variety of settings including schools, behavioral clinics, treatment programs, and hospitals. Additionally, he has taught undergraduate and graduate level university courses in psychology at several institutions. Scott has a particular interest in the assessment and provision of behavior supports for children with developmental disabilities and challenging behaviors.
About Our Presenters

**Tim Halphide** is a school psychologist at the Diagnostic Center, Southern California. Tim has an M.A. in Clinical Psychology, a Pupil Personnel Services credential in educational psychology and he is a Licensed Marriage and Family Therapist. Tim has worked in California’s schools for over 16 years and has held a license as an LMFT since 2001. He has an extensive background in evidence-based Cognitive Behavioral Interventions, Mindfulness-Based Psychotherapies, and developmental psychology. Tim trains California’s educators in the latest evidence-based, short-term, and milieu treatments that help teachers and students become more successful. His trainings bring together his years of experience from private practice, community mental health clinics, work with foster family agencies, California’s Regional Centers and his many years as a school psychologist working directly with students, teachers and parents. Tim is a member of the National Association of School Psychologists, the California Association of Marriage and Family Therapists, and The Association for Contextual Behavioral Science.

**Luis Mendez** is a school psychologist at the Diagnostic Center, Southern California. He earned his M.A. from UC Riverside and is a Board Certified Behavior Analyst (BCBA), Certified Nonviolent Crisis Intervention® Instructor, and PENT Leader (Positive Environments, Network of Trainers). Since 1997, Luis has worked for various educational and non-public agencies in supporting students with emotional and behavioral disorders and developmental disabilities across school, home, and community settings. Luis is also a highly skilled and experienced educational diagnostician. As a current member of the Diagnostic Center’s assessment team, he assesses students with variety of disabilities across age-levels. He also consults with and provides trainings to various school districts in southern California on projects related to best practices in psychoeducational assessment.

**Gina O’Brien** is an Assistant Director at the Diagnostic Center, Southern California. She holds an M.A. in Education and a Pupil Personnel Services credential. Gina has worked as a school psychologist throughout the state of California in both public and nonpublic settings. She has extensive experience with children of all ages and a variety of special needs, including culturally diverse populations. Gina has a specific interest in identifying the unique developmental profiles of children on the autism spectrum and the impact it has on their learning and behavior.

**Jenny Quan** is an education specialist at the Diagnostic Center, Southern California. She holds a Ph.D. with an emphasis in Psychological Studies in Education from UCLA and in Special Education from CSULA/UCLA. As a teacher, Jenny worked with students with mild-to-severe disabilities across a wide variety of settings. Her instructional expertise includes implementing targeted reading and early math interventions, using assistive technology to enhance instruction, and providing behavioral support for students with mental health needs, autism, and/or attentional difficulties. Jenny has served as adjunct faculty at CSULA for several years, teaching graduate courses in assessment, autism, reading and writing intervention, research methods, and methods for working with special populations in general education. She has worked in clinical settings at UCLA, both as an assessor for childhood anxiety treatment programs and as an interventionist for parent-mediated joint attention and symbolic play intervention for young children with autism.
Amy Taylor is a school psychologist at the Diagnostic Center, Southern California. Amy holds a Master’s in Education from Smith College, a Master’s in Counseling and an Ed.S. in School Psychology from San Diego State University. Amy is a Nationally Certified School Psychologist. She has been an educator for nearly 20 years working as a general education teacher, reading intervention teacher, and as a school psychologist. Additionally, she has taught graduate level courses in school psychology. Amy has assessed children of all ages with mild-to-severe disabilities. She has a particular interest in transdisciplinary assessment and intervention of preschool age children.

Nicole Ward is an education specialist at the Diagnostic Center, Southern California. She holds a M.A. in both Special Education and Educational Leadership and Policy Studies. Nicole has served students with special needs in a wide variety of settings since 2002. She comes with extensive experience in developing and implementing appropriate educational programs for students with developmental disabilities. Nicole has previously worked as a special day class teacher, inclusion specialist, assistive technology specialist and program specialist. Particular areas of expertise include program development, assistive technology, positive behavior support and inclusive education.

Kathleen Whelan Gioia is a diagnostic educational specialist serving on the transdisciplinary assessment team at the Diagnostic Center of Southern California. She holds a M.S. in Elementary Education and a M.Ed. in Special Education. Kathy has been a Special Day Class teacher, Resource Specialist, Special Education Mentor, and a Support Provider for the Beginning Teacher Support and Assessment program (BTSA). At the graduate level, she has taught classes in the field of Teacher Education. Kathy has extensive experience developing successful educational programs for students with a variety of disabilities from preschool age to young adulthood. She is especially proud of her work in documentation approaches and techniques, IEP best practices and evidence-based strategies to support ADHD. Kathy specializes in the area of Transition Planning, with a focus on creating positive secondary outcomes for all students. Ardent about post school success, she has developed a year-long Transition Project offered through the Diagnostic Center of Southern California. The Project provides supports to several school districts by aligning mandated Levels of Assessment to compliment Indicator 13 requirements via person-centered-planning activities. She has presented at numerous conferences and conventions throughout the state on the topics of Documentation, ADHD, Parent Training & Support and Transition. Kathy serves on the California Department of Education (CDE) Disability Advisory Committee (DAC). She is also a member of the California Consortium on Higher Education for People with Intellectual/Developmental Disabilities (ID/DD) at UCLA.
