About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over $15 million (Cdn.) capital cost, or $20 million in the Lower Mainland–Vancouver area. As of June 2010, the information in this published version of the BC Major Projects Inventory is prepared by Rene Corcoran, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information
Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location
Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g., a municipality.

Updates
New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs
Cost estimates are general estimates from the information sources used.

Start and Finish Dates
Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status
Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design
As a new feature, the Major Projects Inventory has begun identifying sustainable building design and construction projects within the Inventory that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.
Highlights of the September 2010 Issue

This issue of the BC Major Projects Inventory lists 33 new proposed projects over $15 million for the third quarter of 2010, with available capital cost estimates totaling approximately $2.4 billion in potential new capital investment, if all the projects proceed.

Twenty-two major projects started construction in the third quarter, with an estimated value of approximately $1.5 billion. The largest project started was the $500 million River Green residential development in Richmond. Construction is also underway on the $170 million Mt. Lehman Shopping Mall in Abbotsford and the $133 million UBC Pharmaceutical Science Building in Vancouver.

Twelve projects completed construction in the third quarter, with an estimated capital cost of approximately $643 million; the largest completion noted is the $180 million Canexus Manufacturing Plant upgrade in North Vancouver, followed by the $80 million Osprey Master Planned Community in Pitt Meadows.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at $61.7 billion, down from $62.8 billion reported in the second quarter of 2010. Many major project proposals listed are in very preliminary stages and are not approved for construction, therefore capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately $111.9 billion, up slightly from $111.5 billion in the previous quarter. Approximately $24.1 billion of projects are judged to be ‘on hold’ for the time being.

**Peace River Site C Dam**

BC Hydro Ph: (250) 785-3420

Site C is a potential third dam and 900 megawatt hydroelectric generating station on the Peace River approximately 7 kilometres southwest of Fort St. John. It would be capable of producing approximately 4,600 gigawatt-hours of electricity annually - about 8 percent of BC Hydro’s current electricity needs. Site C would deliver firm electricity with a high degree of flexibility. Site C was examined as a resource option over 25 years ago, with much more recent research and consultative work done, including technical work to bring existing information up to date, the Province decided to move forward with the project in Apr 2010. A multi-stage review process has been established for looking at Site C. Stage 1, involved a high level review of existing information, and Stage 2, extensive consultations with First Nations were completed. Stage 3 of the review is underway including independent environmental assessment, regulatory review, permitting and approvals. Construction will take about seven years and provide about 35,000 direct and indirect jobs throughout the project stages. Capital cost listed is an interim project cost estimate reported by BC Hydro in Dec 2007.
