Jurisdiction “8” Notice:

Jurisdiction “8” comprises the states of Indiana and Michigan. WPS is responsible for claims payment and Local Coverage Determination (LCD) development for this jurisdiction. This LCD was created as a part of the legacy transition (7/16/2012 – 8/20/2012); and, is a consolidation of the previous legacy contractors’ policies. Coverage of each LCD begins when the state/contract number combination officially is integrated into the Jurisdiction. On the CMS MCD, this date is known as either the Original Effective Date or the Revision Effective Date. The following table details the official effective dates for each state/contract number combination.

Title XVIII of the Social Security Act
Section 1833 (e) prohibits Medicare payment for any claim which lacks the necessary information to process the claim. Section 1862 (a) (1) (A) excludes expenses incurred for items or services which are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. Section 1862 (a) (13)(C) defines the exclusion for payment of routine foot care services. 

**Code of Federal Regulations (CFR)** 
Part 411.15., subpart A addresses general exclusions and exclusion of particular services.

**CMS Publication 100-3, Medicare National Coverage Determination Manual,** Part 1: 70.2.1 Services provided for the diagnosis and treatment of diabetic sensory neuropathy with loss of protective sensation.

**Coverage Guidance**

**Coverage Indications, Limitations, and/or Medical Necessity**

Routine foot care is the paring, cutting, or trimming of corns and calluses, or debridement and trimming of toenails in the absence of localized illness, injury or symptoms involving the foot. Routine foot care is usually performed by the beneficiary himself or herself, or by a caregiver.

The following services are considered to be components of routine foot care and are generally excluded from coverage under both Part A and Part B, regardless of the provider rendering the service:

- Cutting or removal of corns and calluses;
- Clipping, trimming, or debridement of nails;
- Shaving, paring, cutting or removal of keratoma, tyloma, and heloma;
- Non-definitive simple, palliative treatments like shaving or paring of plantar warts which do not require thermal or chemical cautery and curettage;
- Other hygienic and preventive maintenance care in the realm of self care, such as cleaning and soaking the feet and the use of skin creams to maintain skin tone of both ambulatory and bedridden patients;
- Any services performed in the absence of localized illness, injury, or symptoms involving the foot.

**Indications:**
While the Medicare program generally excludes routine foot care services from coverage, there are specific indications or exceptions under which there are program benefits.

**Covered Routine Foot Care CPT codes 11055, 11056, 11057, 11719, and G0127, and 11720 - 11721.**

*Medicare payment may be made for routine foot care when the patient has a systemic disease, such as metabolic, neurologic, or peripheral vascular disease, of sufficient severity that*
performance of such services by a nonprofessional person would put the patient at risk (for example, a systemic condition that has resulted in severe circulatory embarrassment or areas of desensitization in the patient’s legs or feet).

Services normally considered routine may be covered if they are performed as a necessary and integral part of otherwise covered services, such as diagnosis and treatment of ulcers, wounds, or infections.

In evaluating whether the routine services can be reimbursed, a presumption of coverage may be made where the evidence available discloses certain physical and/or clinical findings consistent with the diagnosis and indicative of severe peripheral involvement.

The following physical and clinical findings, which are indicative of severe peripheral involvement, must be documented and maintained in the patient record, in order for routine foot care services to be reimbursable:

**Class A findings**
Non-traumatic amputation of foot or integral skeletal portion thereof

**Class B Findings**
Absent posterior tibial pulse;
Advanced trophic changes as: hair growth (decrease or absence) nail changes (thickening)
pigmentary changes (dyscoloration) skin texture (thin, shiny) skin color (rubor or redness)
(Three required); and
Absent dorsalis pedis pulse

**Class C findings**
Claudication
Temperature changes (e.g., cold feet)
Edema
Paresthesias (abnormal spontaneous sensations in the feet)
Burning

The presumption of coverage may be applied when the physician rendering the routine foot care has identified:

1. A Class A finding (Modifier Q7)
2. Two of the Class B findings (Modifier Q8); or
3. One Class B and two Class C findings (Modifier Q9).

Benefits for routine foot care are also available for patients with peripheral neuropathy involving the feet, but without the vascular impairment outlined in Class findings. The neuropathy should be of such severity that care by a non-professional person would put the patient at risk. If the patient has evidence of neuropathy but no vascular impairment, the use of class findings modifiers is not necessary. This condition would be represented by the diagnosis codes in group
Treatment of mycotic nails may be covered under the exceptions to the routine foot care exclusion. Payment may be made for the debridement of a mycotic nail (whether by manual method or electrical grinder) when definitive antifungal treatment options have been reviewed and discussed with the patient at the initial visit and the physician attending the mycotic condition documents that the following criteria are met:

The class findings, outlined above or the presence of qualifying systemic illnesses causing a peripheral neuropathy or;

In the absence of a systemic condition, treatment of mycotic nails may be covered when the following criteria are met:

In the case of ambulatory patients there exists:
Clinical evidence of mycosis of the toenail, and
Marked limitation of ambulation, or pain (Note: painful ingrown toenail), and/or secondary infection resulting from the thickening and dystrophy of the infected toenail plate.

In the case of non-ambulatory patients there exists:
Clinical evidence of mycosis of the toenail, and

The patient suffers from pain (Note: painful ingrown toenail) or secondary infection resulting from the thickening and dystrophy of the infected toenail plate.

In addition, procedures for treating toe nails are covered for the following:

Onychogryphosis defined as long standing thickening, in which typically a curved hooked nail (ram’s horn nail) occurs, and there is marked limitation of ambulation, pain (Note: painful ingrown toenail), and/or secondary infection where the nail plate is causing symptomatic indentation of or minor laceration of the affected distal toe, and/or

Onychauxis defined as thickening (hypertrophy) of the base of the nail/nail bed and there is marked limitation of ambulation, pain, and/or secondary infection that causes symptoms.

NAIL DEBRIDEMENT DEFINITION: Nail debridement involves the removal of excessive nail material (i.e., the reduction of nail thickness or bulk) from clinically thickened, diseased (e.g., mycotic or dystrophic) nail plate that may or may not also be misshapen in appearance or brittle in characteristic.

**Coding Information**

Bill Type Codes:
Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

012x Hospital Inpatient (Medicare Part B only)
013x Hospital Outpatient
022x Skilled Nursing - Inpatient (Medicare Part B only)
074x Clinic - Outpatient Rehabilitation Facility (ORF)
075x Clinic - Comprehensive Outpatient Rehabilitation Facility (CORF)
085x Critical Access Hospital

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory; unless specified in the policy services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

**Group 4 Medical Necessity ICD-10 Codes Asterisk Explanation:** **For these diagnoses, the patient must be under the active care of a doctor of medicine or osteopathy (MD or DO) for the treatment and/or evaluation of the complicating disease process during the six (6) month period prior to the rendition of the routine-type service.

**General Information**

Associated Information
**Documentation requirements**
The patient's medical record must contain documentation that fully supports the medical necessity for services included within this LCD. This documentation includes, but is not limited to, relevant medical history, physical examination, and results of pertinent diagnostic tests or procedures.

Documentation supporting the medical necessity, such as physical and/or clinical findings consistent with the diagnosis and indicative of severe peripheral involvement must be maintained in the patient record.

Physical findings and services must be precise and specific (e.g., *left great toe, or right foot, 4 th digit.*) Documentation of co-existing systemic illness should be maintained.

There must be adequate medical documentation to demonstrate the need for routine foot care services as outlined in this determination. This documentation may be office records, physician notes or diagnoses characterizing the patient's physical status as being of such severity to meet the criteria for exceptions to the Medicare routine foot care exclusion.

Documentation supporting the medical necessity should be legible, maintained in the patient's medical record, and must be made available to Medicare upon request.

**Utilization guidelines**
Routine foot care services are considered medically necessary once (1) in 60 days. More frequent services will be considered not medically necessary.

Coding Information
1. Report the appropriate procedure code and modifiers for the service(s) performed.
   a. When reporting foot/nail care report the applicable “Q” modifier.
   b. These services should be reported with quantity of one in the quantity/units field.
2. Report the ICD-10 code for which the service(s) is performed in the first position in the diagnosis field of the CMS 1500 claim form or electronic equivalent; report the systemic condition(s) in the remaining positions. Where the systemic condition is marked with an (*) (see below) and the services were rendered by a podiatrist, include the 8-digit (MM/DD/CCYY) date the patient was last seen and the NPI of his/her attending (MD/DO) physician who diagnosed the complicating condition in item 19 of the CMS 1500 claim form or electronic equivalent field.

   Diabetes mellitus*
   Chronic Thrombophlebitis*
   Peripheral neuropathies involving the feet -
   Associated with malnutrition and vitamin deficiency*
   Malnutrition (general, pellagra)
   Alcoholism
   Malabsorption (celiac disease, tropical sprue)
   Pernicious anemia
   Associated with carcinoma*
   Associated with diabetes mellitus*
   Associated with drugs and toxins*
   Associated with multiple sclerosis*
   Associated with uremia (chronic renal disease)*
   Hereditary sensory radicular neuropathy
   Angiokeratoma corporis diffusum (fabry's)
   Amyloid neuropathy
   Long term oral anticoagulant therapy (e.g. Coumadin, Dicoumaral, etc.)*

3. When billing for services, requested by the beneficiary for denial, that are statutorily excluded by Medicare (i.e. Routine foot care), report an ICD-10 code that best describes the patients condition and the GY modifier (items or services statutorily excluded or does not meet the definition of any Medicare benefit)
4. When billing for services, requested by the beneficiary for denial, that would be considered not reasonable and necessary, report an ICD-10 code that best describes the patients condition and the GA modifier if an ABN signed by the beneficiary is on file or the GZ modifier (items or services expected to be denied as not reasonable) when there is no ABN for the service on file.

5. For patients on long term oral anticoagulant therapy, report the ICD-10 related to the performed service in the first position, the code for long term anticoagulant in the second position and the condition being treated with the anticoagulant in the third position of item 21 of the CMS 1500 claim form or electronic equivalent.

6. It is inappropriate and incorrect to report an E&M code when routine foot care or a nail trimming/debridement service is the service actually performed.

7. The following class finding modifiers should usually be used with G0127, 11055, 11056, 11057, 11719, and when appropriate, CPT codes 11720, 11721.
   
   A Class A finding (Modifier Q7)
   Two of the Class B findings (Modifier Q8); or
   One Class B and two Class C findings (Modifier Q9).

8. Benefits for routine foot care are also available for patients with peripheral neuropathy involving the feet, but without the vascular impairment outlined in Class findings. The neuropathy should be of such severity that care by a non-professional person would put the patient at risk. If the patient has evidence of neuropathy but no vascular impairment, the use of class findings modifiers is not necessary. This condition would be represented by the ICD-10 CM codes in group 4 of “ICD-10 Codes that Support Medical Necessity” listed in the LCD.

9. A diagnosis of onychomycosis can allow 11720 or 11721 if it has either a Q modifier (but does not need a MD or DO last seen) or if it has one of the ICD-10 codes listed in group 3 for onychomycosis, i.e. difficulty with walking.

**Routine Foot Care**

> Except as provided above, routine foot care is excluded from coverage. Services that normally are considered routine and not covered by Medicare include the following:
> The cutting or removal of corns and calluses;
> The trimming, cutting, clipping, or debriding of nails; and
> Other hygienic and preventive maintenance care, such as cleaning and soaking the feet, the use of skin creams to maintain skin tone of either ambulatory or bedfast patients, and any other service performed in the absence of localized illness, injury, or symptoms involving the foot.

**Exceptions To Routine Foot Care Exclusion**

1. **Necessary And Integral Part Of Otherwise Covered Services**
   In certain circumstances, services ordinarily considered to be routine may be covered if they are performed as a necessary and integral part of otherwise covered services, such as diagnosis and treatment of ulcers, wounds, or infections.

2. **Presence Of Systemic Condition**
   The presence of a systemic condition such as metabolic, neurologic, or peripheral vascular disease may require scrupulous foot care by a professional that in the absence of such condition(s) would be considered routine (and, therefore, excluded from coverage). Accordingly, foot care that would otherwise be considered routine may be covered when systemic condition(s) result in severe circulatory embarrassment or areas of diminished sensation in the individual’s legs or feet.
In these instances, certain foot care procedures that otherwise are considered routine (e.g., cutting or removing corns and calluses, or trimming, cutting, clipping, or debriding nails) may pose a hazard when performed by a nonprofessional person on patients with such systemic conditions.

Coding Information

Date Last Seen by Attending Physician (for those ICD-9 CM codes which fall under the active care requirement): CPT codes 11055, 11056, 11057, 11719, and G0127 or 11720, 11721. The approximate date when the beneficiary was last seen by the M.D., D.O. who diagnosed the complicating condition (attending physician) must be reported in an 8-digit (MM/DD/YYYY) format in Item 19 of the CMS-1500 claim form or the electronic equivalent or if the patient sees their primary care physician no later than 30 days after the services were furnished.

Hospital Inpatient Claims:
The hospital should report the patient's principal diagnosis in Form Locator (FL) 67 of the UB-04. The principal diagnosis is the condition established after study to be chiefly responsible for this admission.

The hospital enters ICD-10-CM codes for up to eight additional conditions in FLs 67A-67Q if they co-existed at the time of admission or developed subsequently, and which had an effect upon the treatment or the length of stay. It may not duplicate the principal diagnosis listed in FL 67.

For inpatient hospital claims, the admitting diagnosis is required and should be recorded in FL 69. (See CMS Publication 100-04, Medicare Claims Processing Manual, Chapter 25, Section 75 for additional instructions.)

Hospital Outpatient Claims:
• The hospital should report the full ICD-10-CM code for the diagnosis shown to be chiefly responsible for the outpatient services in FL 67. If no definitive diagnosis is made during the outpatient evaluation, the patient's symptom is reported. If the patient arrives without a referring diagnosis, symptom or complaint, the provider should report an ICD-10-CM code for Persons Without Reported Diagnosis Encountered During Examination and Investigation of Individuals and Populations (V70-V82).

• The hospital enters the full ICD-10-CM codes in FLs 67A-67Q for up to eight other diagnoses that co-existed in addition to the diagnosis reported in FL 67.

RHC/FQHC encounters billed on TOBs 071x or 073x do not require HCPCS coding.
Home health claims billed on 12X or 22X TOBs do not require HCPCS coding.

Modifiers:
Level two modifiers (indicating digit or limb) are entered in Field Locator 44 UB-04 claim form or the electronic equivalent.

Modifiers identifying indication for treatment (Q7, Q8, or Q9) are entered in Field Locator 44 UB-04 claim form or the electronic equivalent when applicable to validate medical necessity.
