GAS-ENGINE EQUIPMENT MAINTENANCE

Course Code: JGS130

Course Description
This one-day course provides you with the basic information and skills to maintain and troubleshoot gas-engine equipment. This course includes lecture, demonstrations, and hands-on practice. Follow-up field programs covering more complicated equipment (sweepers, snowblowers, and roto-tillers) will be offered to participants completing this program.

Key Topics Covered
• Engine Theory and Operation
• Prolonged Storage Procedures
• Spark Plug Maintenance
• Air Filter Maintenance
• Oil Changing
• Recoil Starter Maintenance
