Missouri Regulations

Department of Public Safety/ Missouri State Highway Patrol

11 CSR 50-2.340 Off-Highway Use Vehicles (ATV-OHV)

PURPOSE: This rule provides inspection standards for vehicles which are classified as either all-terrain vehicles or off-highway use vehicles with four or more wheels. These standards and procedures are necessary because these vehicles present special problems during inspection.

(1) Vehicles which are designed and primarily intended by the manufacturer for off-highway use are commonly referred to as all-terrain vehicles (ATV) or off-highway vehicles (OHV). These vehicles, when operated as intended and for which designed, need not be inspected. If operated on a public highway, however, these vehicles must be inspected and registered as passenger vehicles or motor tricycles.

(2) The inspection standards and procedures which are to be followed will be the same as those prescribed for identified items for all other motor vehicles, except a brake performance test will be required to check the service brakes of these vehicles instead of pulling a wheel to inspect the condition of a brake and 1967 and earlier models with less than fifty (50) cubic inch internal combustion engines do not require emissions components.

(3) The following items of vehicular equipment are optional, but if equipped with these items, the following will apply:

(A) Signalling Devices. If equipped with turn signals and a stop light, both must function properly and have properly installed lenses;

(B) Springs and Shock Absorbers. If equipped by the manufacturer with springs
and shock absorbers, both shall be properly installed;
(C) Glazing. If glass is installed at any location, the established glazing standard shall apply; and
(D) Windshield Wipers. If equipped with a windshield, a properly operating windshield wiper must be installed on the driver.s side and it must comply with the standards prescribed for all vehicles.
